Newby:

This newsgroup is populated by a number of old fools, many of them hiding behind various aliases, none of whom has a life beyond drooling into a microphone and exchanging insults with each other. From time to time, they form "gangs" and gang up on one or more of the others. This activity occurs both on the NG and on the air. The individual who is posting the gay stuff is one of these. You can recognize them because their technical knowledge never advanced beyond the on-off switch and their social and emotional maturity never got past sixth-grade potty jokes.

Real men on this NG mostly lurk and respond to the occasional useful post.

Bremer Says More Attacks Won't Deter the Allies
By AMY WALDMAN

BAGHDAD, Iraq, June 29 - The American civilian administrator of Iraq, L. Paul Bremer III, warned tonight that attacks against allied targets in Iraq could escalate, but vowed that the resistance would not deter the country's reconstruction.

"We're certainly not panicked," he said in an interview with several newspapers tonight, one of several meetings he had with news outlets over the weekend. "We're not going to get deflected from our direction by an attack now and then, tragic as it may be."

The attacks "are a sign of weakness," he said of those responsible for them,
adding, "And I think we have to anticipate that as we succeed, we will continue to see attacks, and indeed you may find an escalation to terrorism as we go forward."

Referring to those carrying out assaults on coalition forces, sabotage of infrastructure and attacks on Iraqi and American civilians, he said, "These are people who do not want the coalition to succeed."

He put the blame for the attacks, as he has before, on remnants of the Baath
Party of Saddam Hussein, members of the Saddam Fedayeen paramilitary force and "perhaps some terrorists." While he maintained, as have allied commanders, that the attacks were not centrally coordinated, he said "some of them are quite professional," and had probably been committed by former Fedayeen members.

At least five or six of the attacks, including the shooting of a soldier in the head in a Baghdad market on Friday, were carried out in a similar manner, Mr. Bremer said, suggesting "a clear understanding of how body armor
works."

Of attacks in recent days on civilians cooperating with the allies, he said,
"They may be targeting civilians as a way to intimidate people from working on reconstruction." But he added, "I'm not prepared to say we're entering a new phase yet."

He reiterated the importance of killing or capturing Mr. Hussein as a way to
sap the vigor of the resistance, and curb the fear of the Iraqi people. He said all available assessments suggested that Mr. Hussein was still in Iraq.

Mr. Bremer said that the attacks would not deter an expansion of the American-led civilian administration here, and that he had requested several
hundred more people to be sent to bolster the administration and deploy around the country.

In the meantime, he said, the military was continuing to carry out hundreds or thousands of small-scale reconstruction projects across Iraq.

Mr. Bremer sketched out a series of measures that the coalition is using to funnel money and resources to the Iraqi people.

Salaries are being paid to 1.3 million civil servants, although many have little work to do. Stipends are being given to about 200,000 officers, and one-time payments to 300,000 military conscripts.

Some $150 million was spent to buy wheat and barley from Iraqi farmers, and the coalition is continuing to provide food rations. About $200 million also
being spent on emergency programs directed at creating jobs.

Mr. Bremer said that the Iraqi economy had been destroyed from within, referring to Mr. Hussein's spending on weapons and palaces, and that it could not be rebuilt quickly. Reconstruction, he said, "will not be self-financing," but will require international donor support.

Iraq will be a rich country eventually, he said, "but it will need bridging money from international capital over the next few years."

Mr. Bremer said he disagreed with criticism of the planning for postwar Iraq, saying it was hard to move forward when there were people bent on disrupting progress, and "at least one country" - referring to Iran - interfering in Iraq's affairs.

"I think basically there was a plan," he said of the postwar preparations. "It's just damn difficult to execute."

Bush, Looking to His Right, Shores Up Support for 2004
By ADAM NAGOURNEY

WASHINGTON, June 28 - A systematic effort by President Bush to enlist members of his party's conservative wing in the White House, and to champion
touchstone conservative issues, has produced a unified base of support for him from this sometimes wayward faction of the Republican Party, conservative leaders say.

Mr. Bush's standing among conservatives going into next year's election appears more than strong enough to withstand the strains that have emerged in recent weeks over some of his policies, including his support for providing prescription drug coverage under Medicare and for expanding the child tax credit.

By any measure, Mr. Bush appears to have built up enough good will with his party's right wing to provide him significant latitude as he seeks to appeal
to moderate voters by taking positions that might roil conservatives. Indeed, on one potentially pivotal matter - filling a Supreme Court vacancy,
should one occur - conservative leaders say the president enjoys a level of trust that would allow him to nominate a candidate without unambiguously conservative credentials, avoiding an ideological battle that could harm his
re-election efforts.

Mr. Bush's position among conservatives stands in marked contrast to the troubled relations his father endured with many of them when he lost his re-election bid in 1992.

Again and again in interviews, leading conservatives drew favorable contrasts with the first President George Bush, who endured a debilitating primary challenge from Patrick J. Buchanan, contributing to his defeat by Bill Clinton.

"It's night and day," said Grover G. Norquist, president of Americans for Tax Reform, a conservative group. "Every group that this president has kept faith with, the previous president double-crossed."

David A. Keene, chairman of the American Conservative Union, said: "In the first Bush administration, the conservatives were asked to be spectators - and it was hoped that they would applaud the action in the field. In this one, they have a president who wants them to be part of the team."

Mr. Bush's effort to tend to the conservative wing of his party has emerged as a crucial part of his early campaign preparations.

The Bush campaign has begun sending a representative to a meeting of conservative leaders that takes place in Washington every Wednesday, joining
a delegation of as many as eight administration officials.

Party officials say Mr. Bush's advisers - starting with Karl Rove, his senior political adviser, and Ken Mehlman, his campaign manager - are now in
regular contact with about 60 conservative leaders across the nation, discussing issues of concern to the White House and the re-election campaign.

Mr. Bush has named Ralph Reed, who first rose to prominence as executive director the Christian Coalition, as a senior member of his campaign team. Beyond that, Mr. Rove and Mr. Mehlman are viewed by conservatives as advocates for their point of view in the White House.

Asked about efforts to mobilize conservative support, Mr. Mehlman responded:
"Ultimately good policy is good politics. This is a president who has strongly pushed numerous policies that appealed to a lot of different groups - including conservatives."

Many conservatives say Mr. Bush's alliance with their wing of the Republican
Party is as solid as that enjoyed by Ronald Reagan. Some suggest it is even stronger.

To some extent, several argued, that is a benefit Mr. Bush is enjoying from following Mr. Clinton in the Oval Office.

"I think the strongest motivating factor out there that I see with gun owners and people who believe in the Second Amendment is that they can still
taste eight years of Bill Clinton," said Wayne LaPierre, chief executive of the National Rifle Association. "They don't ever want to go back to that."

Mr. Bush's White House has also embraced issues that many conservatives described as crucial to their support, starting with tax cuts (the issue that undid Mr. Bush's father with this group) and abortion, and also including national security and foreign policy.

"Just about every conservative is thrilled with a president who tells the U.N. to take a hike," said Nelson Warfield, a conservative strategist.

All this has given Mr. Bush some license to stray on other issues, particularly this long before Election Day. He has taken some positions

that
have stirred concern among his supporters, like his approval of the expansion of Medicare to cover prescription drugs, an increase in farm subsidies and the child tax credit measure.

"His fiscal record is appalling - spending is out of control," said Edward H. Crane, president of the Cato Institute, a libertarian research organization. "The fiscal record of the Bush administration makes Clinton look downright responsible."

Stephen Moore, president of the Club for Growth, a conservative group, said Mr. Bush had been "one of the biggest-spending presidents we've had in 20 years." But, he added, "he has cut taxes, so politically that has protected him."

"A month ago, he passed this huge tax cut that I think is terrific - I mean,
I'm thrilled by that - and now this month he's passing this preposterous prescription drug benefit, and I'm furious at him," Mr. Moore said. "But I can't get too angry with him because he passed this tax cut. That's the way this administration works."

Some conservatives said the real test of their relationship with Mr. Bush would come if there was a vacancy on the Supreme Court and Mr. Bush chose a candidate whose ideological credentials might be in doubt, like Alberto R. Gonzales, the White House counsel.

Ken Connor, president of the Family Research Council, said, "There are two issues that are nonnegotiable for the base: the sanctity of life and the sanctity of marriage."

Mr. Connor praised Mr. Bush's record on abortion in particular, but said: "Everything he has done to date on the issue will pale in significance compared to the consequential nature of the Supreme Court nomination. If
the
president appoints another nominee like David Souter, all of that will be naught."

But other opponents of abortion said they had confidence in any judicial appointment Mr. Bush might make. "The president has made great selections
on
the Circuit Court, and I trust his judgment on the Supreme Court," said Roberta Combs, president of the Christian Coalition.

Anti-abortion groups say they are already moving to make sure rank-and-file abortion opponents turn out solidly for Mr. Bush next year.

"What you'll probably see is pro-lifers trying to make sure that their fellow citizens, family friends, realize how bad at this point all of the Democratic president candidates are - they all support abortion on demand, with no limits," said Carol Tobias, the political director of National
Right
to Life.

In 1994, when conservatives led by Newt Gingrich took control of the House, there was concern that their time in power would be limited. Today, many conservatives say, American public opinion is shifting their way, so there is no reason to be impatient - or to pressure Mr. Bush into doing things before the election that might hurt him next year.

"The Republicans are looking at decades of dominance in the House and the Senate, and having the presidency with some regularity," Mr. Norquist said. "So if this year the tax cut isn't the one we wanted - no biggie. There's a sense that we can afford to wait."

White House steps in on church-school case

By Patrick Badgley
THE WASHINGTON TIMES

The Bush administration is opposing Montgomery County public school officials' decision to bar a group from sending students home with fliers promoting an evangelist club.
The Justice Department filed an amicus, or "friend of the court," brief June 11 supporting the Child Evangelism Fellowship Inc.'s lawsuit against county school administrators who rejected handbills for the Good News Club, which offers students a once-a-week Bible study and religious-oriented recreational activities.
Child Evangelism Fellowship Inc. - which is based in Warrenton, Mo., and
oversees the after-school club - tried to send fliers home with elementary school students at Mill Creek Towne in Rockville and Clearspring in Damascus.
School officials would not allow the fliers, saying the evangelical group was trying to force teachers and students to accept "proselytizing materials." School attorneys have said that distributing the fliers would violate the Constitution's separation of church and state because the group aims to have children identify Jesus as their Savior.
Supporters of the group's mission say the school system's keeping the fliers out of children's backpacks is tantamount to discrimination, because nonreligious groups with similar activities have been approved to distribute
promotional fliers.
"This is a service that is widely available to other organizations," said Nathan Adams, an attorney for the fellowship. "This is not an instance where a religious group is seeking special treatment."
The 4th U.S. Circuit Court of Appeals in Richmond is hearing the group's
appeal. A lower court, the U.S. District Court for Maryland, ruled against Child Evangelism Fellowship by not granting a preliminary injunction against
the Montgomery County school system. The injunction would have required the schools to distribute the fliers.
"It's clear that the evangelical group is intending to use the fliers as
a recruiting tool for students to join the group," said school system spokesman Brian Porter.

The school system is reconsidering its policy for distributing materials. It is now limited to materials directly related to education and notices about health, nonprofit groups, community sports and recreation activities, day care and school-system partnerships.
Justice Department spokesman Jorge Martinez told the Associated Press the fliers are informational and not recruiting tools.
"The Good News Clubs literature does not proselytize," he said. "It basically describes what takes place at the meetings, when they are held and
where."
Child Evangelism Fellowship of Maryland v. Montgomery County School District is one of several similar cases involving the after-school club filed across the country. In 2001, the U.S. Supreme Court held that the Constitution does not prohibit Good News Clubs from meeting in elementary schools.

13. Bush's Failed War on Terrorism: Kabul Back as Terror Hotspot

http://www.paktribune.com/news/index.php?id=30407

Kabul back as terror hot spot

KABUL, June 30 (Online): Less than two years after the US-led Operation Enduring Freedom, Afghanistan is re-emerging as a terrorism hotspot on radar
screens.

A spate of attacks and an increase in intercepted electronic 'chatter' indicate that the Al-Qaeda network could be re-establishing its foothold there.

Intelligence officials said this communication buzz and tapes reportedly released by Mullah Mohammed Omar, former leader of the Taleban, suggest that
Osama bin Laden has renewed his partnership with it. The Taleban have been regrouping in the far-flung areas of the country.

The Al-Qaeda has also formed new tie-ups with outfits such as the Hizbi Islami of renegade Afghan warlords like Gulbuddin Hekmatyar. Some of its members, who had fled to Pakistan in the wake of the 9/11 attacks, are beginning to return.

The most recent suicide attack in Afghanistan is believed to be jointly organised by the Al-Qaeda, the Taleban and those affiliated with Hekmatyar.

Earlier this month, a bus packed with international peacekeepers was blown up in Kabul, leaving four German peacekeepers and one civilian dead, and 29 others injured.

Security officials and Afghan watchers said other attacks being blamed on the network suggest the initiation of a violent campaign aimed at destabilising the United States-backed Hamid Karzai regime.

In April alone, rockets were fired at an American base on the Pakistan border. Four men died when their explosives-laden car blew up and gunmen ambushed the brother of Kandahar's powerful governor, killing two of his relatives.

The Times of London reported in April that handwritten notes threatening to punish or kill anyone co-operating with American forces, or with the Afghan government, had been found in the bazaars of Afghan border towns.

In October 2001, the US launched a military operation against Afghanistan to
destroy Osama and his Al-Qaeda net work as well as the Taleban regime.

'Operation Enduring Freedom was a full frontal assault on the Taleban in Afghanistan...(but) no one was guarding the back door,' said terrorism commentator M.J. Gohel, a director with the Asia-Pacific Foundation on CNN's
Your World Today, last week.

According to him, more than 18,000 Taleban and Al-Qaeda members who had fled
to Pakistan are regrouping and launching attacks on the Karzai government.

In another indication, Mullah Omar, in a recently released tape, announced the formation of a 10-man council comprising many of the feared former military commanders.

He also urged Afghan troops to intensify their resistance to US troops.

'The situation is similar to that of the post-Soviet era in the early 1980s,' said New Delhi-based terrorism expert Ajai Sahni.

'The government was weak and Taleban stepped up its activities.

'We are seeing a revival of that again today, for given the limited presence
of peacekeepers and funding constraints, Mr Karzai has not been able to consolidate his government,' he told The Sunday Times.

Officials said, however, that at this stage it was not clear what exactly Al-Qaeda's intentions were.

Only developments in the next few months will tell, they said.

14. Iraqi Attacks Could Signal Wide Revolt

Iraqi attacks could signal wide revolt

By The Associated Press and Los Angeles Times

VICTOR CAIVANO / AP
A young Iraqi man tries to salvage some wiring Friday from a destroyed U.S. military vehicle ambushed along a highway in Abu Ghraib, northwest of Baghdad.

BAGHDAD, Iraq - U.S. troops in Iraq are getting ambushed everywhere and every day - while guarding gas stations, investigating car thefts or on their way to make phone calls home.
Each new attack is raising questions about whether the violence is a last gasp from Saddam Hussein loyalists or signs of a spreading revolt. The Pentagon is puzzling over how many resisters there are, how well they are organized and how they can be stopped.

Private risk analysts are warning of an even chance of Iraq descending into open revolt.

And although the term is rarely used at the Pentagon, from every description
by military officials, what U.S. troops face on the ground in Iraq has all the markings of a guerrilla war - albeit one in which there are multiple opposition groups rather than a single movement.

Certainly, the statistics paint a worrisome picture. Since President Bush declared an end to the major combat phase of the war on May 1, 62 U.S. troops have been killed, according to a count based on Defense Department press releases. Of those, 22 died as a result of enemy attacks, 36 in accidents and four in incidents whose cause is under investigation.

More revealing, however, is that the number of deaths from hostile fire is on the rise. Six Americans were killed in May in enemy attacks, while 16 had
died in June as of midnight Saturday.

Until the past few days, U.S. military officials had insisted that the attacks were merely a product of the final rooting out of the remnants of Saddam's regime. Now they are beginning to float the idea that U.S. forces face several different opposition forces - and military experts outside the government concur with that assessment.

Spectrum of resistance

"There are disgruntled Iraqis, upset about house searches or whatever, who might throw rocks or the occasional grenade," said retired Maj. Gen. William
Nash, now a senior fellow at the Council on Foreign Relations. "And at the other end of the spectrum, there are members of the old regime, reinforced by foreign fighters, that are looking more organized every day."

On Saturday, U.S. forces found the bodies of two U.S. soldiers who disappeared with their Humvee while on guard duty at a captured munitions storage depot. Those killings appear to have been carried out with "the upper levels of sophistication," Nash said. It is a difficult operation to snatch an enemy combatant and his equipment, he noted.

Nonlethal grenade and small-arms attacks also appear to be continuing unabated.

"We have a soldier wounded or killed every other day" in the Baghdad area, said Maj. Scott Slaten, a public-affairs officer for the 1st Armored Division, which has responsibility for Iraq's capital.

"Is it slowing us down? Yes, because some soldiers who would otherwise be doing reconstruction, we have to use for security. Every attack means we're going to have to be here a little longer."

For troops on the ground, there is a constant, uneasy sense that nothing and
no one are what they seem. Civilians have approached checkpoints and lobbed grenades, and canvas-sided Humvees have become a hazard.

"You're not sure who your enemy is," said Army Sgt. Gary Qualls, who is stationed at the U.S. military's base in Ramadi, a town in the heart of the Sunni area north and west of Baghdad long loyal to Hussein. "You don't know who to trust."

Still, military officials say they believe the security situation overall has improved in the country. And Defense Secretary Donald Rumsfeld, when asked Friday if the fighting was turning into a guerrilla war, replied: "I don't know that I would use the word."

Asserting who's in charge

However, military experts both inside and outside the Pentagon said they fear the U.S. has failed to assert itself strongly enough on the ground in Iraq because of political pressure to send a message that American forces would leave the country as soon as possible. That may have led the opposition to try to speed the U.S. military's departure, and each successful killing or act of sabotage becomes an advertisement to recruit more foot soldiers for the resistance.

"Clearly, they are emboldened by success," said a senior military official in Washington. "You have to go in and tell them: 'We're gonna do what we did
in Germany and Japan. We're gonna write your constitution. We're gonna install your government. We're gonna write your laws. We're gonna watch

your
every move for a decade, and then maybe you'll get a chance to do it
yourself.' "

The limited resistance put up by Iraqi military forces during major combat operations may also be having an impact.

"It may sound a little strange to say it, but because we didn't fight in Fallouja and Tikrit, probably the 'bad guys' have made it back into the community and we're going to have to move them out," a senior Bush administration official said recently.

Nash, of the Council on Foreign Relations, said the United States missed the
window to establish itself as the unequivocal authority when the war ended.

"When Baghdad fell is when you establish yourself; it's when you set the rules. If you miss the opportunity to do it then, it's not impossible, but it's harder," he said. "Resistance feeds resistance - the bad guys have had a chance to get organized."

In Iraq, years of vilification of the United States have compounded Iraqi uncertainty about U.S. intentions, a problem complicated further by the United States' backtracking on promises to let Iraqis choose their own new government.

The situation is worsened by the continuing communications difficulties of the U.S.-led occupation authority, which still has trouble reaching Iraqis with basic information because of weak television signals and the limited access of many Iraqis to mass media.

Furthermore, many members of the sizable Sunni minority, who prospered under
Saddam Hussein, perceive themselves as losing rather than gaining ground as a result of the U.S. presence and are willing to offer tacit, if not outright, support for those who want to actively fight the U.S.-led troops.

"The Sunni population has every reason to destabilize the situation, since they know that when there are elections, they are going to get the short end
of the stick," said Charles Pena, director of defense policy studies at the Washington-based Cato Institute, a libertarian think tank.

Three opposition factions

At the Pentagon and the White House and among military experts, there is a growing consensus that there are at least three forces involved in efforts to destabilize the country: Saddam loyalists, foreign fighters and those angry at living conditions since U.S.-led forces routed the Saddam regime.

Discontented members of Saddam's ruling Baath party, especially in the area of central Iraq known as the Sunni triangle, have the money to finance a resistance. Also present are a number of Fedayeen, paramilitary fighters loyal to Hussein who underwent brutalizing military training designed to

inure them to the horrors of assassination. The combination of money to pay for the attacks and fighters to carry them out is a dangerous mix.

There have been at least two execution-style attacks in the past two weeks in which U.S. soldiers who were talking with or helping civilian Iraqis were
shot at close range near the base of the neck. In one case, in which a soldier was helping Iraqis line up to buy cooking fuel, the shooting was lethal; in the second attack, which occurred Friday as the soldier considered buying some DVD movies in a crowded shopping area, the soldier was critically wounded.

"We ended major combat operations because the Iraqi army had disappeared, but what we don't have is the Saddam Fedayeen and Baath leadership, who are trying to disrupt the coalition efforts," said a senior military official in
Iraq.

Nash believes "that there is enough residual regime in place that they are starting to build a constituency."

The second group, foreign fighters, encompass both anti-American al-Qaida-type characters from Syria and Jordan, among other nations, as well
as possible agents provocateurs from Iran, who may be fomenting trouble in Shiite Muslim-dominated southern Iraq. Just last week, Iraqi police in Baghdad picked up a group of Palestinians and Jordanians, now being held for
questioning by the Americans.

Military officials acknowledge that they have little control of the Iraqi borders.

The third group is a hodgepodge of common criminals and people frustrated with the lack of services. Saddam released large numbers of prisoners last fall during a general amnesty.

Iraqis say the Americans should not be surprised by the violence directed toward them.

"It was predictable," said Iraqi political scientist Saad al-Jawwad. "To any
man or any woman or anybody who's living in despair, what could he do? He has nothing left but to carry arms and defy the people who are here occupying his country and doing nothing for him or his family. Where is democracy? Nonexistent. Where is stability? Nonexistent. Where's electricity? Where's water?

"What do you expect these people to do? To keep on sitting like sheep?" said
al-Jawwad. "Of course they would organize themselves, and they will get more
organized and more organized."

"And that will develop into a revolt," he predicted.

Last week, Kroll, a U.S.-based risk consulting company, told its corporate clients that an Iraqi revolt against occupying forces was one of two most likely scenarios in 2003. The other was a so-called wobbly landing, with some instability but not outright revolt.

15. Bush's Failed War on Terror: Regime Unprepared for another Catastrophe

Study: Emergency Responders Unprepared
Sun Jun 29, 2:10 PM ET Add White House - AP Cabinet & State to My Yahoo!

By JENNIFER C. KERR, Associated Press Writer

WASHINGTON - Nearly two years after the Sept. 11 attacks, the United States remains "dangerously unprepared" to handle another catastrophic attack, according to a study by the Council on Foreign Relations.

The government says it already has done some of what the council suggested and is working on other recommendations.

The report said the main problem is that emergency responders on the front lines - police, fire, public health and other officials - are drastically underfinanced and lack the equipment or training they need.

The council, a New York-based private world affairs advocacy organization, recommended spending $98 billion beyond the $27 billion it said the federal government planned to spend on first responders over the next five years.

Gordon Johndroe, a spokesman for the Department of Homeland Security, said Sunday that the conclusion that an additional $98 billion is needed for first responders is "grossly inflated." He said officials already have implemented or are in the process of putting in effect others of the report's suggestions.

The council's task force was led by former Sen. Warren Rudman, R-N.H., with Jamie Metzl, a former National Security Council and Senate Foreign Relations
Committee official, directing the project.

Rudman said the government must take immediate steps to ensure that the nation's emergency officials are prepared to respond to a chemical, biological or radiological attack.

"We are dealing with the possibility of tens of thousands of casualties. And
we must deal with it. This is not a question of, `Can we?' It's a question of we must," Rudman said Sunday on NBC's "Meet the Press."

Metzl, also appearing on NBC, said police chiefs have complained about the lack of protective suits, and health officials do not have the resources they need to analyze basic biological or chemical agents.

"There is a real danger," said Metzl.

The report found that, on average, fire departments across the country have only enough radios to equip half the firefighters on a shift and breathing apparatuses for only a third.

The commission included former White House adviser Richard Clarke, former FBI (news - web sites) and CIA (news - web sites) director William Webster and former military officials, business leaders and Nobel laureates.

The study followed on a similar task force report the council issued last October.

16. Blair Under Fire in Dossier Report

Blair under fire in dossier report

Committee likely to clear Campbell of altering draft : Blair to come under fire in dossier report

Nicholas Watt and Matt Wells
Monday June 30, 2003
The Guardian

Tony Blair will be given a severe dressing down by a committee of MPs who will accuse Downing Street of deliberately hampering their investigation into the alleged misuse of intelligence in the run-up to the Iraq war.

In a hard-hitting report, which will be published a week today, the foreign affairs select committee will condemn Downing Street for denying its members
access to intelligence officials and papers.

Downing Street will brush off the criticisms because the committee is also likely to clear Alastair Campbell, the prime minister's communications director, of the damaging charge that he ordered intelligence officials to "sex up" last September's dossier on Iraq's banned weapons.

A combative appearance in front of the committee by Mr Campbell, and a private appearance by the foreign secretary, Jack Straw, have persuaded Labour critics on the committee that Downing Street did not insert a contentious claim that Iraq could launch a banned weapons attack within 45 minutes of an order.

The change of heart was signalled yesterday by the Labour MP Eric Illsley, who told LBC Radio: "Alastair Campbell did not exaggerate the first dossier."

The change of mood on the committee persuaded Mr Campbell last night to call
a ceasefire in his war with the BBC. In a letter to the corporation's director of news, Richard Sambrook, Mr Campbell said he was "saddened" that the BBC had failed to answer his questions about a Today programme report which sparked the row.

But he added: "Given how far apart we remain, I see little purpose in continuing our exchanges in advance of the foreign affairs report being published ... I reserve the right to pursue my case further."

Mr Campbell's letter shows he believes he has secured victory in his primary
battle, which was to undermine the BBC and its correspondent Andrew Gilligan
in the minds of the committee members.

But questions were being asked last night about whether Mr Campbell's aggressive public performances have undermined his position as Downing Street's communications chief. One loyalist said: "This really raises questions about whether the Blair circle are all absolutely knackered after the war."

There was also soul searching at the BBC after the committee's change of heart. If the committee rubbishes its original story, the BBC would apologise and retract it. But if, as seems likely, the select committee's analysis is more complex, the corporation would continue to stand by its story.

For the moment the BBC is determined to fight on. With the backing of the corporation, Gilligan will launch legal proceedings today or tomorrow against Phil Woolas, the deputy leader of the Commons, who claimed the reporter had misled MPs when he appeared before the select committee last week.

BBC lawyers will offer arbitration through a QC, and will accept an apology and a retraction of the remarks. If Mr Woolas refuses to back down, they will issue a writ for libel. Gilligan is not thought to be seeking damages.

On the question of Gilligan's source, Geoff Hoon, the defence secretary, said on BBC Radio 4 last night: "If anyone from the MoD has revealed to the BBC's defence correspondent sensitive information he is in breach of his contract, he is in breach of the Official Secrets Act."

Mr Hoon also said it was wrong to compare the government's single anonymous source for the 45 minutes claim with Gilligan's unnamed intelligence source.

"It is disappointing that the BBC is comparing the judgment of our leading intelligence figures from our intelligence community ... with a single anonymous source that your defence correspondent met in a hotel," he said.

Last night the BBC was working on a further submission to the select committee, which will contain an analysis of Mr Campbell's evidence last week.

It will seek to counter what the BBC believes is Mr Campbell's "spin and bluster". One BBC source said: "We believe we were justified in what we said
and when we said it. At the time, everyone was tripping over spooks trying to tell us how unhappy they were."

The strength of the BBC's resolve has surprised many at the corporation. Greg Dyke, the director general, feels the issue is a definitive test of the

BBC's independence.

As both sides await the foreign affairs committee report, its members made clear that they are planning to show they have teeth by savaging Downing Street for preventing Sir John Scarlett, the chairman of the joint intelligence committee, from giving evidence and denying the select committee access to key papers.

17. Bush and Blair Promised Justice in Iraq: Another Lie

Bush and Blair promised justice in Iraq. Another lie

Tariq Aziz and other Iraqi leaders must be put on trial or released

Mark Seddon in Jordan
Monday June 30, 2003
The Guardian

Ziad Tariq Aziz showed me the only evidence that his father, the veteran Iraqi deputy prime minister, Tariq Aziz, was still alive: a hastily written note from him, sent courtesy of the Red Cross in Baghdad. Bearing the Red Cross imprimatur and Aziz's Red Cross number - IQZ00001101- the note itself is only two sentences long, ending "I am well and thinking of you, Tariq". Across the envelope, the Red Cross has stamped the words "safe and well". Tariq Aziz turned himself over to the American military shortly after the fall of the capital. He hadn't rated that highly on Donald Rumsfeld's pack of cards. The only high-level Christian in Saddam's regime, Aziz may have been one of its public faces, yet it was clear that he was an increasingly isolated figure in the Ba'athist hierarchy. But, unlike the renowned Iraqi information minister, Mohammed Saeed al Sahhaf - who was interrogated and then quickly released - Aziz is now apparently being held without trial in a broiling, dusty compound at what was once Saddam international airport. Along with many fellow Iraqi political leaders and others swept up in the American dragnet, there seem to be no plans either to put him on trial or to release him.

His wife Zureida and his two sons are staying in a hotel in Amman, Jordan. A few blocks away there is a lively trade in documents purporting to come from various former ministries in Baghdad. "My cousin went into one ministry and found some government stamps just lying there," a Jordanian tells me in the hotel lobby; forging documents which implicate people in the crimes of Saddam's regime "is an easy way to make some money", he says.

In this postwar reality of claim, counter-claim and corruption, "justice" is arbitrary - and made more so by the chaos in Iraq itself. The country smoulders into guerrilla warfare, and Baghdad remains a looted, threatening place where the new "provisional coalition authority" can't even get the lights to work. And yet "coalition" leaders show little sign of

acknowledging the occupation's spectacular failures or the scale of opposition to it in Iraq and around the world. In a interview yesterday the head of the US administration in Iraq, Paul Bremer, asserted that: "We dominate the scene and we will ... impose our will on this country."

In such a climate, the Aziz family's campaign on behalf of their father is by necessity low-key. His sons are anxious not to upset the Jordanian authorities and extremely loath to court publicity. Their question is a simple one - "Why is Tariq Aziz being held without trial?"

Their defence of their father - that he had only been "following orders" as a senior official in the former Iraqi regime - would scarcely meet the standard set by the Nuremberg trials, nor that of the new international criminal court. But under American policy it seems unlikely that it will even get a hearing. The US has refused to sign up to the international court. In stead, it would seem, it intends to hold people in detention indefinitely, just as it is doing in Guantanamo Bay, Cuba, at Bagram in Afghanistan and, it is persistently claimed, on the British-owned island of Diego Garcia in the Indian Ocean. Such an affront to "justice" lacks even the most basic transparency - no one even knows how many Iraqi PoWs and other detainees are being held, just as no one knows whether any Iraqis have
been sent to Guantanamo Bay. Despite repeated representations to US diplomats, Ziad Aziz told me that all enquiries had led only to that hastily
scrawled note.

Last week, Jack Straw wrote in the Financial Times deploring the house arrest of the Burmese opposition leader, Aung San Suu Kyi. He was right to do so. Nor can any direct comparison be made between a democratic opposition
leader and a former minister of a dictatorship, who will have known of the large-scale human rights abuses committed under Saddam's rule. But the fact remains that Mr Aziz and many others face indefinite imprisonment without trial, in the wake of a war that, according to the UN secretary general, Kofi Annan, broke the UN charter and was, in the opinion of most international lawyers, illegal. That, too, cannot be tolerated in democratic
states which claim to uphold the rule of law.

The London-based barrister Abdul Haq al-Ani certainly believes so. I met him
as he prepared to journey into the lawless badlands of the western Iraqi desert. Mr Ani has a touching faith in British justice. Not only was he planning to contact the Red Cross and the occupation authorities in order to
give Tariq Aziz legal advice in accordance with the Geneva convention and the Human Rights Act, but he was also determined to gather evidence for criminal proceedings against US and British officials for their actions in Iraq. Mr Ani told me that if he were refused access to Aziz he would return to Britain and issue a writ for habeas corpus on the defence minister,

Geoff
Hoon.

This would be an interesting irony. Britain is the joint occupying power in Iraq; it is also a signatory to the international court and has instituted a
human rights act. The British government has been proactive in hunting down those accused of war crimes in the former Yugoslavia, and even - albeit briefly - the former Chilean dictator, General Pinochet. So how will Hoon justify British behaviour in Iraq?

Last year I went to Baghdad and interviewed Tariq Aziz in the now bombed-out
foreign ministry. I told him that Tony Blair was not sabre-rattling; that he
would use force if Iraq failed to allow UN weapons inspectors back in. "We have no weapons of mass destruction", Aziz insisted. "Tell Mr Blair that he can send anyone to Iraq to see for themselves." In common with many others, I was, then, more inclined to believe Blair rather than Aziz.

And so the one-time face of the Saddam regime now languishes in a Baghdad airport compound, a victim of victors' revenge. Few Iraqis could expect much
in the way of justice under the old regime, but since one of the pretexts for the war was a promise to bring justice to the benighted people of that country, Bush and Blair may soon be fingered for telling yet another lie.

Perhaps the Aziz family should not worry too much. Their father has been around long enough to have dealt with many of those, such as Donald Rumsfeld, who were only too happy to sell Iraq weapons of mass destruction when it suited them. And their father knows where the proverbial bodies are buried. It should be up to independent courts to decide whether he and other
Iraqi officials know about real bodies - not US military tribunals or occupation courts, but either the international court itself or courts constituted by a democratic Iraq, free of foreign occupation. And meanwhile it is also for the courts to decide whether he is being held illegally - and
whether Blair ordered an illegal war, a war that is far from over.

18. Bush and Blair Ignored Intelligence on WMD

London and Washington ignored Iraq weapons counter-evidence: press
Sun Jun 29, 4:53 PM ET Add Politics - AFP to My Yahoo!

LONDON (AFP) - London and Washington deliberately overlooked a pre-war report discrediting claims that Iraq (news - web sites) had sought to purchase uranium from Niger, the Independent on Sunday newspaper quoted a former US ambassador and CIA (news - web sites) investigator as saying.

In a dossier submitted to parliament in September 2002 on Iraq's alleged weapons of mass destruction, the British government had claimed that Iraq had sought to acquire large quantities of uranium from Africa, despite having no civilian nuclear program to justify the purchase.

But the British newspaper's source, who asked that his name be withheld at this stage, claims to have established six months beforehand that two documents attributed to the government of Niger were forgeries.

"My report was very unequivocal," said the paper's source, a former member of the US National Security Council under then president Bill Clinton (news - web sites).

He said he had urged the US Central Intelligence Agency (news - web sites) to verify whether the British dossier rested upon the Niger allegations and if so to make the facts known to the British public, but that nothing had been done.

"It is hard for me to fathom, that as close as we (Britain and the United States) are and (while) preparing for a war based on weapons of mass destruction, that we did not share intelligence of this nature," he said.

Asked whether he believed that his findings had been ignored for political reasons, he replied: "It's an easy conclusion to draw."

The documents in question carried a forged signature of Niger's president and that of a figure who last served in government in the 1980s, he said.

The International Atomic Energy Agency later confirmed that the documents were fakes.

British Foreign Secretary Jack Straw strongly denied last week that the British government deliberately exaggerated the threat posed by Iraq under Saddam Hussein (news - web sites) in order to beef up the case for war.

"It's completely untrue, totally untrue" that the September 2002 dossier on Iraq and weapons of mass destruction had been doctored, Straw told a parliamentary committee probing the affair.

The foreign affairs committee began hearings earlier this month after BBC radio broadcast an allegation by an unnamed source that a second dossier presented in February was "sexed up" by Downing Street despite the reservations of intelligence officials.

http://www.nytimes.com/2003/06/30/opinion/30HERB.html

June 30, 2003
Oblivious in D.C.
By BOB HERBERT

Of all the challenges we face, none is more troubling than the fact that thousands of Oregonians - many of them children - don't have enough to eat. Oregon has the highest hunger rate in the nation."

- Gov. Ted Kulongoski, in his
State of the State address.

Those who still believe that the policies of the Bush administration will set in motion some kind of renaissance in Iraq should take a look at what's happening to the quality of life for ordinary Americans here at home.

The president, buoyed by the bountiful patronage of the upper classes, seems
indifferent to the increasingly harsh struggles of the working classes and the poor.

As Mr. Bush moves from fund-raiser to fund-raiser, building the mother of all campaign stockpiles, states from coast to coast are reaching depths of budget desperation unseen since the Great Depression. The disconnect here is
becoming surreal. On Thursday the National Governors Association let it be known that the fiscal crisis that has crippled one state after another is worsening, not getting better.

Taxes have been raised. Services have been cut. And the rainy day funds accumulated in the 1990's have been consumed. If help does not materialize soon - in the form of assistance from the federal government or a sharp turnaround in the economy - some states will fall into a fiscal abyss.

That already seems to be happening in places like California, which has been
driven to its knees by a two-year $38.8 billion budget gap, and Oregon, which has seen drastic cuts in public school services and the withholding of
potentially life-saving medicine from seriously ill patients.

Most states have been unable to protect even the most fundamental services from damaging budget cuts.

"Few states have succeeded in exempting high-priority programs such as K-12 education, Medicaid, higher education, public safety or aid to cities and towns," according to the compilers of the Fiscal Survey of States, a report produced jointly by the governors' association and the National Association of State Budget Officers.

Scott Pattison, director of the budget officers' group, said, "If economic conditions remain stagnant or worsen, and if budget shortfalls continue next
year, the states will have exhausted many of their options for countering a weak economy."

The budget crisis in California, where an unpopular Democratic governor is politically paralyzed and the Republicans in the State Legislature refuse to
consider raising taxes, is potentially catastrophic.

Jack Kyser, a public policy economist in Los Angeles told The Associated Press: "People are nervous. There's a real chance for a meltdown that could have rippling effects throughout the nation. This is something of a different magnitude than we've seen before."

The governors' association called the fiscal survey the most accurate gauge of the health of state budgets. Its discouraging findings were released as the president was preparing a fund-raising swing that added millions more to
his campaign stockpile, and as the Internal Revenue Service was reporting that the nation's richest taxpayers were accumulating an even greater share of the nation's wealth.

Some Americans are missing meals and going without their medicine, while others are enjoying a surge in already breathtaking levels of wealth. So what are we doing? We're cutting aid to the former while showering government largess on the latter.

There's a reason those campaign millions keep coming and coming and coming.

A Times article last week noted that the wealthiest 400 taxpayers accounted for more than 1 percent of all the income in the United States in 2000, "more than double their share just eight years earlier."

The influence of the wealthy has always been great, but it hasn't always been so cruel. Especially in the past six or seven decades there were many powerful political and civic leaders who looked out for the interests of the
less fortunate and pressed their claims for treatment that was reasonably fair.

That's changed. The Bush juggernaut, at least for the time being, is rolling
over everything that dares to get in its way. And fairness is not something it is concerned about.

A BushCo Pimp-Slap Threesome
Is the latest trio of Bush policy atrocities enough to make you scream, or just cry?
By Mark Morford, SF Gate Columnist
Friday, June 27, 2003
©2003 SF Gate

URL:
http://sfgate.com/cgi-bin/article.cgi?f=/g/a/2003/06/27/notes062703.DTL&nl=fix

Onward they come like some sort of vicious and sad joke, some sort of maniacal stabbings at the very core of joy and intelligence and progress and
hot sex and easy laughter, the regular grisly onslaught of BushCo policy insults, with you just sort of sitting there saying, no, no way, this can't really be happening, can it?

Oh my yes. Let us now scan the latest salvos, the most current round of BushCo karmic bitch slaps, three little tales of environmental and economic and sex-ed woe to make the toes of your id curl and your soul recoil.

And let's kick it all off with the big bad and blatantly abridged Environmental Protection Agency report on the environment, shall we?

Did you notice that story? About that major new report on the state of the world environment, air quality and water quality and greenhouse gases and all the rest, as scribed by Christine Todd Whitman's increasingly impotent EPA, right before she found out her decidedly pro-corporate GOP-licking kowtowing skills were somewhat at odds with the utter knavelike skills BushCo required, and she quit?

A very serious and comprehensive report it is, too. And, until recently, it included a major section on climate change, on greenhouse gases and ozone depletion and the now widely accepted perils of global warming, the dire effects now taking place, and worsening, and what we can expect if we continue on our current, dangerous trajectory.

And wouldn't you know it, BushCo stepped right in there and hacked that section down to virtually nothing just prior to publication. Just snipped the dire climate-change info right out lest anyone be reminded of the utterly contemptible anti-environmental, pro-industry slant of the Bush regime.

Can't make it too obvious how much Dubya supports major polluters and industry self-regulation, or how he gutted the Clean Air Act, now, can you?

It's so cute it almost makes you retch.

Hey, that coupled with the recent BushCo decision to allow more logging in the nation's largest protected national forests and, lo, you've got yourself
a nice new reason to drink more heavily and escape to Canada to numb the savage karmic pain.

Ah but let's not stop there. Not where there's a truly astounding deficit looming like a thundercloud. Not when BushCo just passed yet another absurdly pointless tax cut that makes the extremely wealthy squeal like hogs, while almost simultaneously comes the Congressional Budget Office announcement that the national deficit will actually double by the end of this coming September, soaring right past a whopping $400 billion, a new record, ha-ha suckers. Good thing most Americans don't care, polls say.

Yes, you read correctly, double. Remember when we actually had an enormous budget surplus, just a few years ago? Before BushCo snuck into power and cranked military spending and passed that first ridiculous tax cut and spent
tens of billions to attack a defenseless nation and blatantly lied and smirked about the reasons why?

And just before he reconfigured the national policy to favor major corporations and CEO cronies and leave states cut off and hanging, begging for fiscal scraps, Medicare gutted and schools stunned into sudden poverty and cities cutting back on vital services for the poor and elderly and children and, well, you? Ah yes, the salad days.

Speaking of gutted school budgets, let's talk sex. Or, rather, let's talk no
sex, given how the snide sexless GOP very much wants kids to know sex is icky shameful wrong anti-Christian sin (well, hello, Mr. Ashcroft!) and hence we have BushCo's malicious and asinine little $135 million "abstinence-only-until-marriage" program for schools.

Yes, it's $135 mil of your tax dollars set aside for these already Bush-reamed schools, but they get a cut only if they agree to teach the wee ones that the only -- repeat, the only -- proper approach to sexual awareness at their age is, of course, not to have it.

That's right, just shut that intense natural libido right down, kiddo. Repress it and hold it back and cram it down and defenestrate your divine sexual self because we can't have you feeling all free and open and happy, now can we? Take that, you hormonally ravaged little punks.

This bears repeating. This bears a second look, if only for the sick invidiousness. Schools get a chunk of that $135 mil only if they promise to teach the "joys" of completely abstaining from all sexual activity, and nothing else.

Are we clear? No words about condoms, no safe sex, no HIV awareness, no celebration of the body, no notions of any sort of reverence for sexuality

and sensuality and respect for your partner and pleasure and love and lust and tongues and joy and discovery and human goddamn nature. God forbid.

And still we wonder why teens lash out and rebel and listen to bad rap metal
and have massive amounts of sex anyway and flip off the establishment and then, through some sad, mutated cheese grater of culture, turn out to be violent flag-waving psychopatriots who drink cheap beer and smack their wives and watch way too much Fox News. Your tax dollars at work, honey.

You have to ask. Are they idiots? This is the ultimate question. These lawmakers, the GOP in particular -- are they really such vile and mean-spirited imbeciles? Or are they just wealthy and relatively heartless corporatized jerks protected by cocoons of fear-based support and warmongering and power, insulated from authentic reality and entirely devoid
of soul and perspective?

No, it simply can't be. They can't be that sneering and small-minded. This is what you say to yourself. Maybe they're just misguided, money-drunk, power-sucked. Maybe it will all change for the better relatively soon. Maybe
it really is just a bad and vicious joke, one that we as a nation will, with
any luck, laugh off in about, oh, say a year.

Because if we don't, well, the joke is most definitely on us.

21. Ontario Gay & Lesbian Weddings

No captions, and no cropping (which is all the editing I ever do), but
the pics are here :

http://www.fototime.com/inv/996283C6CFDD61C

They're the march, the Catacombs, general shots of Paris, and
exhibitions in the Pompidou centre.

I'll post to this thread again when I've done the titling/cropping.

I have the high res originals if anyone needs them.

23. Gays celebrate recent court rulings in Canada, US on Gay Pride Day

NEW YORK, June 30 (AFP) - Tens of thousands of people took to the streets of New York, Toronto and Rio de Janeiro as gays across the Americas celebrated
Gay Pride Day and recent victories in the courts.
The march in New York, one of the biggest in the world, was sweetened by last week's US Supreme Court decision knocking down laws banning gay sex.
"I'm so emotional about all this stuff going on. We've been working so hard
for so many years," parade co-director Tom Hom said. "I'm so excited and joyous, but I know there's more work left to be done."
The court ruled Thursday that Texas could not punish two men arrested for
having sex in a private apartment. The Supreme Court decision was acclaimed by
gay rights groups but bitterly condemned by conservatives.
Tens of thousands marched Sunday at noon along Fifth Avenue and headed south toward Greenwich Village, site of the 1969 "Stonewall rebellion" against
the repression of homosexuals, an event that became a catalyst in the gay rights movement.
"When we come to events like this we get to be reminded of how diverse the
population is," said one marcher.
"Some day the rest of the country is going to recognize the relationship,
and I think that is really one step in that direction."
But a top US legislator Sunday gave voice to more conservative views that
still prevail in much of the United States.
Senate Majority Leader Bill Frist told a US television news program he would support an amendment to the US Constitution to ban same-sex marriages.
US law already defines marriage as between one woman and one man for federal purposes, and allows states to decide whether to recognize same-sex marriages performed in other states.
No US state currently allows gay marriage, but the northeastern state of Vermont allows civil unions for same-sex couples.
"I very much feel that marriage is a sacrament, and that sacrament should
extend and can extend to that legal entity of a union between, what is traditionally in our Western values has been defined, as between a man and a
woman," Frist told ABC's "This Week."

In Canada, however, Gay Pride day celebrated a recent court decision stating exactly the opposite.
Thousands of visitors descended on Toronto for the city's annual Gay Pride
parade. Last year, organizers said one million people attended the Toronto parade, But police and organizers declined to say how many people were present
Sunday.
The march was the climax of a week of celebrations, with gays and lesbians
exuberant after Canada's Court of Appeal struck down the federal definition of
marriage as being solely between a man and a woman.
The move gave the go-ahead for Ontario city clerks to begin registering same-sex marriages.
Toronto's city clerk's office was to stay open during the weekend for couples -- including same-sex couples -- to fill out a marriage license application, also keeping its wedding chamber open for ceremonies.
About 100,000 people took part in Rio's Gay Pride parade Sunday along the
edges of the famous Copacabana beach. The parade kicked off with a rendition
of the national anthem, then broke into dancing to carnival-style music.
Organizers said they wanted to expand the event to become an expression against discrimination. "We want it to be a big party for citizens opposing discrimination of whatever type," said Rainbow group president Claudio Nascimento.
Brazilian government official Luiz Eduardo Soares told the rally, "Intolerance is one of the sources of violence; this pacifist, libertarian, civic demonstration proves that all manner of love is alright."

24. No sex please, we're Hamptonites Hot Spot.. Be there or be Square

NEW YORK, June 30 (UPI) -- East Hampton residents want an end to gay sex, nudity and everything else indecent, the New York Post reported Monday.
Angry over what they call rampant, decades-long indiscretions, including sex acts, urination and nudity on the shores of the priciest seaside community in the country, some locals are demanding a crackdown.
A resident who requested anonymity said the situation is so bad, "there are used condoms strewn everywhere in the morning when you walk down the beach with your kids.
"People cruise here all night for sex. And we're not just talking about a few people," the resident said.
Acting on complaints from residents of the Further Lane Association, plainclothes East Hampton cops recently arrested two men on charges of public lewdness and four others for disorderly conduct on Two Mile Hollow beach, one of two Hamptons' gay beaches.

25. Visitors in Toronto for Gay Pride, after gay marriage ruling, SARS tro

TORONTO, June 29 (AFP) - Thousands of visitors descended on Toronto
Sunday
for the city's annual Gay Pride parade, traditionally one of the world's
largest host cities of the gathering but recently affected by a SARS
epidemic.
The parade was the climax of a week of celebrations, with gays and
lesbians
exuberant after Canada's Court of Appeal struck down the federal definition
of
marriage as being solely between a man and a woman.
The parade also allowed Toronto to recover some of its cheer, following
a
decline in tourism due to the epidemic of severe acute respiratory syndrome
(SARS) which has left 38 dead.
But police and organizers declined to say how many people were present.
Last year, organizers said one million people attended the Toronto Gay
Pride parade.
This year's event followed on from last week's historic ruling deciding
that the federal definition of marriage went against Canada's Charter of
Rights and Freedoms.
The move gave the go-ahead for Ontario city clerks to begin registering
same-sex marriages.
Toronto's city clerk's office was to stay open during the weekend for
couples -- including same-sex couples -- to fill out a marriage license
application, also keeping its wedding chamber open for ceremonies.
Around 250 same-sex couples have married in Toronto since it became
legal
to do so June 10.
Elsewhere, only the Netherlands and Belgium have legally recognized
same-sex marriages.

RIO DE JANEIRO, June 29 (AFP) - About 100,000 people took part in Rio's Gay
Pride parade Sunday along the edges of the famous Copacabana beach, according
to police figures.
The parade kicked off with a rendition of the national anthem, then broke
into dancing to carnival-style music.
Organizers said they wanted to expand the event to become an expression
against discrimination. "We want it to be a big party for citizens opposing
discrimination of whatever type," said Rainbow group president Claudio
Nascimento.
Brazilian government official Luiz Eduardo Soares told the rally,
"Intolerance is one of the sources of violence; this pacifist, libertarian,
civic demonstration proves that all manner of love is alright."
Rio deputy Fernando Gabeira of the ruling Workers Party (PT) noted that a
bill launched by Sao Paulo mayor Marta Suplicy had been debated in the
national assembly relating to the registering of civil same-sex marriages.

27. Bishop claims Jesus wouldn't care about gay clergy

The Sunday Times - June 29, 2003

Bishop claims Jesus wouldn't care about gay clergy

"The senior clergyman who nominated a gay priest as Bishop of Reading has claimed there is biblical authority for his decision.

Richard Harries, the Bishop of Oxford, has declared there is no bar in the New Testament to the appointment of a gay bishop. "Jesus said nothing about homosexuality," he says in an interview in today's Sunday Times.

Harries contrasts the absence of a biblical prohibition on homosexuality with Jesus's clear line against divorce. Despite this, he says, the Church of England has recently made provision for divorced people to be married in church, "even if their former spouse is still living".

Harries said: "Gay and lesbian people find themselves the way they are, with God-given affections for people of the same sex. They do not conform to certain biblical texts, but God takes them and their love as it is and blesses it."

Harries argues that a majority of Church of England bishops support Canon Jeffrey John, the bishop in waiting at the centre of the row. He goes further and says most bishops also have sympathy with John's view - expressed from the pulpit - that the church should support all faithful same-sex relationships.

Harries's tone of defiance will dismay evangelicals in his diocese. Philip Giddings, a friend of Harries but a leader of discontented evangelicals, wants John to stand down. He said the fact that Jesus did not mention homosexuality did not mean he approved of it. "Jesus didn't say anything about fraud, for example. All references in scripture to homosexuality are negative."

Giddings, who leads a group of about 80 clergy and 30 church lay representatives, is now waiting to hear whether they have secured a meeting with the Archbishop of Canterbury, Rowan Williams, to express their dismay directly.

"We are all down on our knees praying that the Lord will make clear to us what we should do next," he added.

The Sunday Times - June 29, 2003

Gay love's fine, it's all in the Bible
Richard Harries, Bishop of Oxford, on why he appointed the 'gay bishop'

"For some, Jeffrey John, who has been appointed the next Bishop of Reading, is a symbol of the direction they don't want the Church of England to go. For others he is a symbol of the inclusive church they would like to see. When a person becomes a symbol, rational discussion is difficult. But it is important to look at the arguments against his appointment.

John is an openly gay man, committed to a sexually abstinent lifestyle. I do not see how a Christian could object to the appointment of such a man. He is also in a lifetime relationship of love and companionship. I see nothing in the Bible against this. We read that "Jonathan made a covenant with David, because he loved him as his own soul" (1 Samuel 18:3). The nine bishops who wrote an open letter criticising the appointment said: "If this relationship is one of companionship and sexual abstinence, then we rejoice." It is. I look forward to those bishops commending John's relationship.

John has argued for the church accepting faithful, lifelong, same-sex relationships. Those opposed to the appointment suggest the Bible is against this, but there is no wide consensus on interpretation of the Bible on this issue. John also believes the church must offer the gay community - prone to promiscuity - an alternative to a lifetime of celibacy.

Celibacy is a wonderful vocation, but it has to be chosen freely. A number of bishops, perhaps the majority, have sympathy with John's arguments, but we have presented a united front to the world in opposing them, at least as far as clergy are concerned. John's relationship had a sexual dimension at one time. Opponents call on him publicly to repent. He has brought his relationship to his confessor and canonical superiors. If there has been anything wrong, the least a charitable mind can do is assume it is confessed and forgiven. Which Christian is going to say that John is a greater sinner than they are?

The crucial decision made by the first Christians was that Gentiles could become Christians without being circumcised or obeying other aspects of Jewish law. Some, like Peter, found this very difficult. Then he had a dream in which he saw that Gentiles could be accepted fully. Perhaps, like Peter, those opposed to this appointment will dream about people of the same sex loving one another through life, and

Jesus saying: "This rejoices my heart; may it rejoice yours too."
Jesus said nothing against homosexuality. He did say something very fierce against divorce. The church, however, has made provision for divorced people to be married in church.

Gay and lesbian people find themselves with God-given affections for people of the same sex. If celibacy is not the chosen path, then, John has urged, the right course is a relationship of lifetime love. Divorced people who remarry and gay and lesbian people who enter into such relationships are in a similar position. God takes them and their love, as it is, and blesses it.

The appointment of John as Bishop of Reading has been divisive and I regret that. But looked at rationally, the arguments against it do not stand up.

29. Britain unveils plans for "gay marriages"

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-01 16:58:11 UTC
From: biteme@here.con

LONDON, June 30 (AFP) - Britain unveiled controversial plans Monday to allow "gay marriages", a radical reform which would for the first time give homosexual couples the same legal rights as married people.
Under the proposals, gays and lesbians will be able to sign an official document of civil partnership at a register office, giving them pension and property entitlements.
The contracts will only be open to homosexuals and not as an alternative to
heterosexual marriage -- a position which was immediately attacked by a prominent gay rights campaigner as "heterophobic".
The government's plans were set out in a consultation paper, with newspapers reporting that a bill containing the reforms could be introduced into parliament this year.
"This is not about being PC (politically correct) but about bringing law and practice into line with the reality of people's lives," said Jacqui Smith,
the government's deputy minister for women and equality, as she unveiled the
proposals.
Smith added: "Same-sex couples often face a range of humiliating, distressing and unnecessary problems because of a lack of legal recognition.
"Civil partnership registration would underline the inherent value of committed same-sex relationships. It would open the way to respect, recognition and justice for those who have been denied it too long."
If the proposals are passed by parliament, registered gay couples will be
given next-of-kin rights in hospitals, the right to benefit from a deceased partner's pension, and exemption from inheritance tax on a partner's home.
The scheme does not mention the term "gay marriage", but the civil partnerships have been designed to be as close to a marriage contract as possible.
The chief executive of gay rights group Stonewall, Ben Summerskill, said he
was delighted that the government had taken a "long overdue step".
"Hundreds of thousands of gay people are in stable, long-term relationships, but still don't have the same rights as many others," he said.
"It's not just social status that matters, like the right to visit each other in hospital, but the right to share a partner's pension, for example --
which is something available to every heterosexual."
But Peter Tatchell, a prominent gay campaigner and human rights

activist,
said it was "divisive, heterophobic and discriminatory" to exclude
unmarried
heterosexual couples.
"The government should amend its proposals to ensure legal rights for
all
unwed couples, gay and straight," he added.
"Cohabiting heterosexuals also lack legal recognition and protection.
This
is a grave injustice."
The document published by the government predicted that up to a third of
Britain's lesbians and gays would take part in civil registration by 2050.
The scheme does not cover Scotland, which sets its own laws for civil
relationships.

Any recommendations on the best products to achieve as complete a range of reception and transmission as possible? All band, all mode, CW, VLF, Low Band, VHF, UHF, AM aircraft, etc.? Kenwood TS-2000? Harris? Is there an all-in-one radio? I've got six old radios (tube sets mostly) to accomplish this, and would like to get more space and tech efficient. I just don't know the new products. Suggestions?

"We don't want your services. Just get out of Falluja," an Iraqi man shouted at McGinn.

Anti-U.S. sentiment is also being expressed in more violent ways.

From Reuters, 7/2/03:
http://www.alertnet.org/thenews/newsdesk/4683409.htm

U.S. blames Iraqi bomb class for mosque blast

By Michael Georgy

FALLUJA, Iraq, July 2 (Reuters) -

The U.S. military blamed on Wednesday a deadly mosque explosion west of Baghdad on an Iraqi bomb-making class, but enraged residents swore vengeance for what they said was a U.S. air strike.

"We will fight a holy war until the last drop of blood. Even boys who are 10 years old will fight until their last drop of blood," said an Iraqi man standing at the al-Hassan mosque, which was rocked by the explosion on Monday night.

Residents of Falluja, 50 km (30 miles) west of Baghdad, blame a coalition air strike for the blast, which killed nine people including the mosque's imam, or prayer leader.

But U.S. Central Command said on Wednesday a joint investigation conducted with Falluja police had determined that coalition forces were in no way responsible for the blast -- and laid the blame at the door of Iraqi bomb-makers.

"The explosion was apparently related to a bomb manufacturing class that was being taught inside the mosque," Central Command said.

American troops launched a public relations campaign to distance themselves from the explosion.

Sergeant Jason McGinn, from Seattle, Washington, tried -- with no apparent success -- to persuade a group of Iraqi truck drivers that the mosque could not have been hit by a missile because the whole building would have been destroyed.

"We would never hit a mosque. People have fired at us from mosques and we do reserve the right to defend ourselves. But we did not hit the mosque," he said through a translator.

CALLS FOR JIHAD

Falluja, a hotbed of Sunni Muslim anti-U.S. sentiment, is in no mood to listen.

Iraqis believe the U.S. bombed the mosque site after the imam, Sheikh Leith Khalil, called for jihad (holy war) against U.S. troops during Friday prayers. Worshippers said Khalil died from wounds caused in the blast on Tuesday.

Growing frustration with the U.S. failure to restore water and electricity is also causing resentment.

McGinn promised Iraqis that U.S. forces were doing their best to revive those services in Falluja, a town of 250,000 people.

"We don't want your services. Just get out of Falluja," an Iraqi man shouted at McGinn. Anti-U.S. sentiment is also being expressed in more violent ways.

Two rocket-propelled grenades were fired at U.S. military vehicles in the town on Tuesday night.

Nobody was hurt in this attack, but at least 23 U.S. troops have been killed in Iraq since major combat was declared over in May after U.S.-led forces overthrew Saddam Hussein.

Growing anger at the U.S. presence in Falluja has created an ideal climate for wild rumours.

A group of men gathered to mourn the death of Abdel Raouf Ibrahim, who was killed in the mosque explosion, spent more time venting their anger than mourning.

"Did you hear an American tank ran over and killed four Iraqis on their way to the hospital the other day," said one.

The men, twirling beads through their fingers, smiled proudly when 11-year-old Ali Younis expressed his opinion on the U.S. troops patrolling his town.

"We will kill them," he said.

'Bring Them On,' Bush Says to Iraq Attacks

WASHINGTON (Reuters) -

President Bush on Wednesday challenged militants who have been killing and injuring U.S. forces in Iraq, saying "bring them on" because American forces were tough enough to deal with their attacks.

"There are some who feel like that conditions are such that they can attack us there," Bush told reporters at the White House.

"My answer is bring them on. We have the force necessary to deal with the situation."

What an ass! He's still in John Wayne cowboy mode and apparently doesn't give a shit about our troops.

Berlusconi, a staunch supporter of President Bush, said boosting the EU's role on the world stage would only work if the bloc renewed ties with Washington.

However, attention quickly focused on Berlusconi's wheeler-dealer image and allegations by critics he is unfit to represent Europe.

Even before the concentration camp remark, the debate focused as much on Berlusconi's personal suitability for the EU's top job as on his presidential agenda.

Green leader Monica Frassoni likened Berlusconi to Attila the Hun, whose barbarian hordes ravished Europe in the 5th century without regard for the law.

From The Associated Press, 7/2/03:
http://abcnews.go.com/wire/World/ap20030702_755.html

Berlusconi Nazi Comment Triggers Outrage

Berlusconi Tells German Critic That He Should Play Nazi Concentration Camp Guard in a Movie

BRUSSELS, Belgium --

Italian Premier Silvio Berlusconi provoked an uproar during a Wednesday speech to the European Parliament by telling a German critic he should star as a Nazi concentration camp guard in a movie.

The remark prompted a rebuke from the parliament president, Pat Cox, who suspended the session after the flamboyant Berlusconi refused to withdraw his comment, saying it was meant as an "ironic joke."

Berlusconi, in his first appearance before the assembly since Italy assumed the European Union presidency on Tuesday, made his remark during a question-and-answer session following his speech.

During that session, German socialist Martin Schulz referred to Berlusconi's use of an Italian immunity law to sidestep bribery charges in a Milan court.

"In Italy, they are making a movie on Nazi concentration camps," Berlusconi snapped back.

"I will propose you for the role of capo," or chief.

The comment triggered outrage among the 626-members of the EU assembly.

Schulz said the remark showed Berlusconi was unfit to represent Europe.

Berlusconi's words "debase the presidency of the (EU) council and offend Europe," said Graham Watson, leader of the Liberal Democrat group in the European Parliament.

Schulz and Cox demanded an apology, but Berlusconi would only say it was meant as an "ironic joke."

Cox then closed the parliamentary debate, saying, "I regret the offense caused to a respected member, my colleague Mr. Schulz. It would be appropriate to correct the record in this regard. The debate is now closed."

During a news conference, Berlusconi again refused to apologize, insisting his Nazi comment was meant as a joke inspired by the German legislator's "tone and gestures."

"My joke wasn't meant to be offensive," Berlusconi said.

"It was an ironic joke, perhaps the translation wasn't done in an ironic sense."

Berlusconi appeared before the parliament in Strasbourg, France, to outline his government's plans for the EU's six-month rotating presidency.

He promised to work to improve ties with the United States following the Iraq war and to involve Europe in the quest for Middle East peace.

Berlusconi, a staunch supporter of President Bush, said boosting the EU's role on the world stage would only work if the bloc renewed ties with Washington.

However, attention quickly focused on Berlusconi's wheeler-dealer image and allegations by critics he is unfit to represent Europe.

On Monday, a Milan court suspended Berlusconi's trial for allegedly bribing Italian judges in the 1980s, years before he went into politics, to sway a ruling in the sale of state-held food conglomerate SME.

The billionaire media mogul has denied the charges.

The trial was halted after the Italian Parliament last month adopted legislation granting legal immunity to top officials.

43. Majority in US believes Bush lied

Majority in US believes Bush 'stretched truth' about Iraq: poll

Wed Jul 2

WASHINGTON (AFP) -

For the first time since the beginning of the war in Iraq, a solid majority of Americans believe the Bush administration either "stretched the truth" about Iraqi weapons of mass destruction or told outright lies, according to a new opinion survey.

The poll by the University of Maryland found that 52 percent of respondents said they believed President George W. Bush and his aides were "stretching the truth, but not making false statements" about Iraqi president Saddam Hussein's chemical, biological and nuclear programs.

Another 10 percent said US officials were presenting Congress, the American public and the international community "evidence they knew was false," indicated the survey which was made public Tuesday.

Only 32 percent said they thought the government was being "fully truthful" about the Iraqi arsenal.

The weapons of mass destruction -- as well as the Iraqi government's alleged ties to the al-Qaeda terrorist group -- which the administration claimed represented an immediate threat to the Unites States, served as the chief rationale for launching the March 20 invasion of the country.

But more than three months since the start of the war, US troops have yet to find any of the suspected weapons.

Similarly, 56 percent of those polled believed the US government stretched the truth or made outright false statements about Hussein's ties to al-Qaeda.

The nationwide survey of 1,051 people was conducted from June 18 to 25 and had a margin of error of 3.5 percent.

American nap time is slowly coming to an end. Time to wake up, folks.

Jobs Market Stuck in the Doldrums

By Andrea Hopkins

WASHINGTON (Reuters) -

The U.S. job market likely will be mired in the doldrums for a few
more months, pushing the unemployment rate to fresh 9-year highs,
despite some signs of hope for the economy.

While job cuts seem to be leveling off in many sectors, analysts said
companies are still a long way from hiring new workers -- setting the
stage for another stagnant monthly government report on the jobs
market on Thursday.

"It's true that we've seen a little bit of improvement in recent weeks
on the ... employment numbers, but if you look from survey week to
survey week the numbers still look pretty ominous," said Anthony Chan,
chief economist at Banc One Investment Advisors.

The June employment report by the Labor Department is due out at 8:30
a.m. (1230 GMT) on Thursday, a day earlier than usual because of
Friday's Independence Day holiday.

Economists polled by Reuters forecast on average the report to show
the number of jobs was unchanged, after a small drop of 17,000 in May.
They expect the unemployment rate to rise to a new 9-year high of 6.2
percent from 6.1 percent in May.

Bush: Rebuilding Iraq will be long-term effort
Attacks on U.S troops to be met with 'decisive force'

By Sean Loughlin
CNN Washington Bureau

WASHINGTON (CNN) --

President Bush declared Tuesday that rebuilding Iraq, following a U.S.-led invasion there, will be a "massive and long-term undertaking," one that he suggested would require further sacrifice.

Appearing to address concerns about the rising number of U.S. military deaths in Iraq, Bush declared that anyone who attacks U.S. troops "will be met with direct and decisive force."

http://www.motherjones.com/news/dailymojo/2003/27/we_473_01.html#one

A Failing Strategy

Last evening, admittedly a quiet Saturday when few viewers other than me were watching the prime-time news and every familiar anchor-figure had been replaced by someone from the second team -- the lead story on all three networks was nonetheless American casualties in Iraq with much muttering about unfinished wars and guerrilla fighting. Americans are often riveted by
the ritual of watching numbers rise, perhaps a spill-over from sports mania and the crush of statistics -- you know, how many days X has been held hostage and the like.

Now, there's now a new set of ever grimmer figures to follow. Yesterday, American dead since the war began just crested over 200. (Those hundreds could become important as 300, 400, 500 are hit.) Then there are figures on how many Americans have died since the war was declared "over" by this administration and all critics (including those in the military) were mocked
for not predicting the shortness of the campaign (though many, in fact, had done just that). Those "post-war" dead are now subdivided into those who died in clashes or incidents with Iraqis and those who died by "accident." In addition, the rate of American deaths has grown. "The number of deaths from hostile fire has more than doubled between May and June" reports the Los Angeles Times. (Note, as a reader of these dispatches pointed out to me,
there seems to be no running tally of wounded, though it would undoubtedly be a larger and so more horrifying figure.)

Yesterday, the bodies of two Americans abducted from their Humvee were found. Last Wednesday, the first American was shot to death in the "safe" Shia south of Iraq in the holy city of Najaf. Incidents of sabotage of oil pipelines, power stations and the like are on the rise. Iraqi technicians working with Americans to restore services have been targeted for assassination recently. Last week as well, at least one American member of the Special Forces died and more were wounded in Afghanistan, the forgotten war, where Americans are far better protected than in Iraq, but where attacks are on the rise. What follows then is a round-up of building crises in the increasing number of hot-spots for which our leaders and leading dreamers have blithely taken responsibility.

In a recent long analysis of the global situation at the openDemocracy website, the reliable Paul Rogers has described what is now happening in a nutshell:

"The problem for the neo-conservative strategists, then, is that their belief that vigorous force will be followed by an immediate peace is wrong; tough military action in pursuit of its own security interests is much more likely to end up with the United States being directly involved on the ground, with its involvement extending to long-term counter-insurgency campaigns....
"A key implication of all this is that the real significance of what is happening in Iraq, and indeed Afghanistan, may relate to the very viability of the pre-emptive strategy of US neo-conservatives. The United States has formulated a military strategy designed to 'keep the violent peace' by the use of short sharp bursts of vigorous military force; but its likely result is to embroil US forces in dangerous, complicated and costly regional occupations -- the very opposite of what was intended."

Neo-con dreams of bringing democracy to the Middle East devolve into....:

You just didn't know that what democracy really meant was those men on white
horses (or were they camels?) According to William Booth and Rajiv Chandrasekaran of the Washington Post:

"U.S. military commanders have ordered a halt to local elections and self-rule in provincial cities and towns across Iraq, choosing instead to install their own handpicked mayors and administrators, many of whom are former Iraqi military leaders....
'They give us a general,' said Bahith Sattar, a biology teacher and tribal leader in Samarra who was a candidate for mayor until that election was canceled last week. 'What does that tell you, eh? First of all, an Iraqi general? They lost the last three wars! They're not even good generals. And they know nothing about running a city.'...

L. Paul Bremer, the civil administrator of Iraq, said in an interview that there is 'no blanket prohibition' against self-rule. 'I'm not opposed to it,
but I want to do it a way that takes care of our concerns....'

But for now, [said Sgt. Jeff Butler of the U.S. Army's 418th Civil Affairs Battalion from Kansas City, Mo., charged with running the city of Samarra, with a team of six civil affairs soldiers none of whom speak Arabic] the Iraqis need to be satisfied with 'baby steps.'"

Vietnam on the brain:

In "Iraq: Descending into the quagmire," retired Colonel Dan Smith (at the Foreign Policy in Focus website) considers what counterinsurgency warfare in
Iraq may involve long-term. I've included his full piece at the end of this dispatch, but he comments in part:

"Having splashed the President's declaration over their electronic and newspaper front pages and magazine covers, the media are edging ever so gingerly toward serious questioning of what kind of 'war' U.S. and UK troops
(the 'Authority') are fighting in Iraq. 'Counterinsurgency,' a 1960s

buzzword, has already re-appeared in some reports. The dreaded 'quagmire' has also been voiced. The Pentagon denies it is doing 'body counts'--although the media always seems to know the number of guerrilla dead. Can 'free fire zones,' 'five o'clock follies' (the daily official U.S.
military briefings in Saigon), and 'light at the end of the tunnel' be far off?"
In fact, if Vietnam is engraved in any set of brains, first and foremost it's in military brains -- and comments coming out of Iraq already have a distinctly familiar ring to them. As Alissa J. Rubin of the Los Angeles Times writes:

"Although the term is rarely used at the Pentagon, from every description by
military officials, what U.S. troops face on the ground in Iraq has all the markings of a guerrilla war -- albeit one in which there are multiple opposition groups rather than a single movement.... For troops on the ground, there is a constant, uneasy sense that nothing and no one are what they seem. Civilians have approached checkpoints and lobbed grenades, and canvas-sided Humvees have become a liability.
'You're not sure who your enemy is,' said Sgt. Gary Qualls, who is stationed
at the U.S. military's base in Ramadi, a town in the heart of the Sunni Muslim area north and west of Baghdad that is long loyal to Hussein. 'You don't know who to trust.'"

A headline from the lead Los Angeles Times editorial today tells it all: U.S. Credibility Under Fire. Nothing more obsessed American policy-makers in
the Vietnam era than the thought that a defeat in Vietnam would lose that elusive currency, "U.S. credibility." Incredible but true -- credibility has
returned and once again seems to be on the line. The editorial goes on to say in part:

"Commanders in chief can't always offer unequivocal candor about military affairs. In 1940, Franklin Roosevelt quietly shipped destroyers to England; that act, history has decided, proved to be a blessing. But disaster followed when Lyndon Johnson exploited the Gulf of Tonkin incident to escalate the U.S. role in Vietnam.
Now President Bush and his administration march perilously close to crossing
the line in giving Americans -- and the world -- questionable information on
the U.S. involvement in Iraq.

.

The U.S. assault on a six-vehicle convoy earlier this month... illustrates the problem. U.S. officials relied on what they first said was sound intelligence indicating that Saddam Hussein and his sons were part of the convoy. Now they concede there's no evidence they were. Instead, the world

learned that U.S. troops wiped out a tiny village of Bedouins. U.S. military
vehicles then sealed the area to prevent journalists from entering."

Matt Bivens, who writes the Daily Outrage weblog for the Nation, suggests that for Iraqis an entirely different analogy might come to mind: resistance
to the Russians in Chechnya. Considering a description of how American soldiers in Vietnam psyched themselves up for a "search" (if not yet "destroy") mission using Wagner music from Apocalypse Now, he writes:

"That story goes like this: A superpower of Christian invaders arrives to bomb and kill and occupy, but a plucky underdog band of Muslims stands up for its land, honor and women, and against all odds throws back the invaders. The Muslim world is well acquainted with this particular take on Chechnya thanks to, yes, movies--videos, perhaps some even set to Wagner--of
footage from the war zone against the Russians. The videos are circulated 'from London to the Gulf,' for recruitment purposes. ..."
Afghanistan, redux:

Pepe Escobar of the Asia Times in a pungently entitled piece, Hell Starts Now, suggests similar patterns developing in our two most recent triumphant "wars":

"Iraq is a perfect replay of Afghanistan. In both cases there was no mass capitulation, but a sort of strategic retreat. The Taliban did not surrender: they retreated from Kandahar with most of their weapons intact. Saddam's Ba'athist regime also did not surrender: it retreated from Baghdad with many of its best weapons intact.
.it is instructive to listen to Mohammed Hasan, an Afro-Arab specialist on
the Middle East... 'there are two governments in Iraq. One of them controls the country by day, by the occupation and the military and psychological terror it seeks to impose. But it does not know what is really happening.

.

[Hassan also comments on a 'crucial class division' ... for officers in the air-conditioned comfort of the Palestine Hotel in Baghdad, everything may be
under control. But for the young and poor sons of the working class hailing from Kansas, Texas or North Carolina, frying their brains under 45 degrees in the shade... this is hell: 'In South Vietnam, the Americans had a supporter army of 1 million Vietnamese, a network of Vietnamese agents and policemen and a certain social base, limited but existant. In Iraq, there is
no such base.'"

And here, also in the Asia Times, is Syed Saleem Shahzad's assessment of the
American military in Afghanistan:

"Despite the best efforts of its military and intelligence apparatus and political manipulation in Pakistan, in the year and a half since the demise of the Taliban regime in Afghanistan, the United States and its allies have failed to break the Taliban and al-Qaeda in that country. Indeed, the resistance movement in Afghanistan has fully re-organized itself, even setting up offices, and official claims to the contrary, US forces are fighting in the dark.... The hard truth is that US intelligence simply does not really know what is going on in the Taliban and al-Qaeda camps. This is evidenced by the countless raids that have been launched in recent times, none of which have resulted in the capture of anyone in Afghanistan."

48. War Criminal Bush suspends Military Aid to Countries that Support World Court

U.S. Bans Military Aid to Almost 50 Countries
By REUTERS

Filed at 1:27 p.m. ET

WASHINGTON (Reuters) - The United States on Tuesday declared almost 50 countries ineligible for military aid, including Colombia and six nations seeking NATO membership, because they back the International Criminal Court and have not exempted Americans from possible prosecution.

State Department spokesman Richard Boucher said 35 of those countries had been receiving U.S. military aid this year and, in some cases, all the money
was already spent. But the ban could still be in effect when a new fiscal year starts in October.

As the deadline passed for governments to sign exemption agreements or face the suspension of military aid, President Bush issued waivers for 22 countries.

But those 22 did not include Colombia and the eastern European countries of Bulgaria, Estonia, Latvia, Lithuania, Slovakia and Slovenia.

Colombia, where the government is fighting leftist guerrillas and drug traffickers, has been one of the largest recipients of U.S. military aid, with $98 million this year.

Boucher said all but $5 million of the Colombia military aid has already been spent. The $5 million is now frozen.

Richard Dicker, director of the international justice program at Human Rights Watch, said the suspension of aid worked against some of the Bush administration's other policy goals, such as intercepting drugs in the Caribbean and expanding NATO into eastern Europe.

Of the seven eastern European countries expected to join NATO in May, only Romania has signed a deal with Washington on the ICC.

``This campaign has brought resentment and bitterness from some of the U.S. government's closest allies and comes at an extraordinary high price,'' Dicker told Reuters.

Other major countries liable to the suspension of military aid are Brazil, Cambodia, Serbia and South Africa.

TRAINING AND WEAPONS

A U.S. official said that if countries had ratified the treaty setting up the international court and had not received a waiver, the ban on military aid would come into effect.

But the threat, enshrined in the American Service Members Protection Act of 2002, does not apply to the 19 NATO members and to nine ``major non-NATO allies.''

The suspension covers international military education and training funds, or IMET, which mainly pay the cost of educating foreign officers at U.S. institutions, and foreign military funding, which pays for U.S. weapons and other aid.

IMET funds usually amount to less than $1 million per country a year, but foreign military funding can run into the hundreds of millions.

Congress passed the law out of disapproval of the International Criminal Court, set up to try war crimes and acts of genocide. The United States says
it feared politically motivated prosecutions of civilian or military leaders.

The United States had hoped that the threat to withdraw aid would lead to a last-minute rush to sign Article 98 agreements exempting U.S. personnel from
transfer to the court.

Altogether 44 governments have publicly acknowledged signing the agreement and at least seven others have signed secret agreements, U.S. officials say.

The pace of signatures does appear to have picked up a little. About 25 governments have signed in the last four months, about half of those in the last three weeks.

Bush delivers unprecedented snub to Mandela in Africa visit
By Basildon Peta, Southern Africa Correspondent
01 July 2003

President George Bush will make history next week when he becomes the first head of state not to ask for a meeting with Nelson Mandela while on a visit to South Africa.

Officials say there is no precedent, except during large summits such as the
UN earth summit in Johannesburg last year when heads of state visited in huge numbers. But even then, world leaders lined up to visit Mr Mandela at his upmarket residence in Johannesburg, and others met him at official events.

But when Mr Bush lands in South Africa next week on his first visit to Africa, the world's most powerful leader will not meet the world's most famous statesman. Mr Bush had not asked for a meeting with Mr Mandela, the former president's spokeswoman said.

The two met at the White House soon after the 11 September suicide attacks, and Mr Mandela expressed support for Mr Bush in hunting down those responsible in Afghanistan. But they fell out when Mr Bush turned on Iraq, and Mr Mandela dismissed the US leader as a President who "cannot think properly" for bypassing the United Nations.

Mr Mandela also made a scathing attack on Tony Blair, labelling him the "Foreign Affairs Minister of the United States". He has reportedly made peace with Mr Blair after apologising in a phone discussion in which he admitted that his vitriol might have been a bit over the top. But Mr Mandela
did not retract his firm opposition to the Iraq war.

He repeated his attack on Mr Bush when he met the French Foreign Minister, Dominique de Villepin, in Johannesburg on Friday, and heaped praise on the French President, Jacques Chirac, who opposed the war.

Asked whether he would voice his concerns to Mr Bush during his visit, Mr Mandela replied: "Do not assume that he will meet with me," in what was taken as a snub addressed to the US President. Apparently, Mr Bush will not easily forgive a man widely regarded as the moral conscience of the world.

A US embassy spokesman said that Mr Bush's schedule had not been finalised, but he held out little prospects of a Bush-Mandela meeting. The US

President, who will meet President Thabo Mbeki, visits Africa from 7 to 12 July for talks, including how to help the continent out of poverty so it does not become a breeding ground for terrorists. Other items on the agenda will cover Zimbabwe, US help for fighting Aids, removal of US farm subsidies
that helped to destroy African agriculture, and support for the economic renewal programme, the New Partnership for African Development.

Washington Post Staff Writer
Wednesday, July 2, 2003; Page A01

President Bush acknowledged yesterday that the United States faces a "massive and long-term undertaking" in Iraq, but said U.S. troops would prevail over what his administration described as well-trained militants that have been killing and injuring U.S. forces.

Bush delivered his statement of resolve -- some of his most extensive remarks about Iraq in the two months since he declared that heavy fighting was over -- at a time when Americans are expressing concern about the unrest in U.S.-occupied Iraq and some lawmakers are accusing the administration of understating the task ahead.

At least 31 U.S. and British military personnel have been killed and 178 wounded in combat in Iraq in the nine weeks since Bush announced that major combat operations had ended. The U.S. administrator in Iraq said yesterday that "professional operations" with ties to the government of former president Saddam Hussein are responsible for the regular attacks on U.S. forces. At least six U.S. soldiers were injured yesterday in two separate attacks.

Bush, in a Rose Garden speech marking the 30th anniversary of the end of the military draft, spoke of "terrorists, extremists and Saddam loyalists" who have attacked U.S. forces, intimidated Iraqis and destroyed infrastructure. He warned of foreign fighters entering Iraq, al Qaeda-related groups waiting to strike and former Iraqi officials "who will stop at nothing" to recover power.

"These groups believe they have found an opportunity to harm America, to shake our resolve in the war on terror and to cause us to leave Iraq before freedom is fully established," Bush said. "They are wrong and they will not succeed."

Amid reports of lawlessness and anti-U.S. violence in Iraq, Americans have begun to show ambivalence about the mission. In a Gallup poll for USA Today and CNN, only slim majorities of 56 percent thought that the postwar situation was going well and that the war was worthwhile, while Americans were split on whether the United States would be able to kill or capture Hussein, find weapons of mass destruction, establish democracy and stop attacks on U.S. soldiers.

L. Paul Bremer, the U.S. administrator of Iraq, said the attacks on troops were the work of Hussein's former military and intelligence agents. "These are professional operations," Bremer said of the five-

to- seven-man teams. "These are not spontaneous attacks by angry laid-off workers." Bremer said there is no sign yet that the attacks are centrally coordinated, but he said they appeared to have been organized before Hussein's authority collapsed in early April.

Bush, like Bremer and other administration officials, expressed confidence that the attacks would not succeed in weakening American resolve. "There will be no return to tyranny in Iraq, and those who threaten the order and stability of that country will face ruin just as surely as the regime they once served," the president said.

Bush cast the struggle in Iraq as part of the ongoing war against terrorism in Afghanistan, Saudi Arabia and elsewhere. He said that some of those attacking U.S. forces in Iraq were from the terrorist group Ansar al-Islam and that the U.S. government suspects fighters tied to Abu Musab Zarqawi, whom he called an al Qaeda "associate," are preparing to attack.

"Less than two years ago, determined enemies of America entered our country, committed acts of murder against our people, and made clear their intentions to strike again," he said. "As long as terrorists and their allies plot to harm America, America is at war."

As part of the justification for the war in Iraq, Bush and his lieutenants described ongoing ties between Iraq and al Qaeda. A still-classified national intelligence report from that time, however, raised doubts about those ties, intelligence officials have said.

According to a poll released yesterday by the University of Maryland's Program on International Policy Attitudes, 71 percent said they believed that the Bush administration implied that Hussein was involved in the Sept. 11, 2001, attacks, while 25 percent believed, incorrectly, that Iraq was directly involved in the attacks.

Bush, while allowing no doubt that Iraq will be swiftly converted to a stable democracy, spoke of the menace to the 230,000 U.S. troops in and near Iraq. "Our whole nation, especially their families, recognizes that our people in uniform face continuing danger," he said. "As commander in chief, I assure them we will stay on the offensive against the enemy and all who attack our troops will be met with direct and decisive force."

Of the 195 U.S. military personnel killed in combat and accidents since the war started on March 20 (42 British soldiers have been killed), nearly a third have died since Bush, aboard the USS Abraham Lincoln aircraft carrier on May 1, declared major combat over.

The messiness of postwar Iraq had provoked criticism that the administration did not adequately prepare for the difficult task of rebuilding. Bremer has appealed to the administration to dispatch dozens of people -- particularly Arabic speakers -- to reinforce his modest civilian staff and shift the burden from U.S. military forces that are needed to establish security. Before the war, Bush spoke

optimistically about a clean transformation of Iraq, arguing that U.S. troops would not remain in the region "for one day longer than is necessary."

Sen. Richard G. Lugar (R-Ind.), chairman of the Senate Foreign Relations Committee, said last week that the U.S. presence in Iraq would be necessary for "at least five years" and criticized Bush's rhetoric. "This idea that we will be in just as long as we need to and not a day more -- we've got to get over that rhetoric," he said. "It is rubbish. We're going to be there a long time. We must reorganize our military to be there a long time."

The administration, which declines to forecast the duration of the U.S. presence in Iraq, is due to decide by the middle of the month whether it needs more troops there. Bush's press secretary, Ari Fleischer, yesterday played down the attacks as "pockets of violence" and said it is not surprising that Hussein loyalists are attacking U.S. troops.

[Zeppnote to Putsch: lots of years, lots of tears, lots of body bags. Thanks, you illegitimate cowardly piece of shit.]
"We are going to
fight them and impose our will on them and we will capture or, if necessary, kill them until we have imposed law and order upon this country,"
-- Viceroy Paul Bremer, explaining how America is going to 'hearts and minds' the subjugated people of Iraq

52. Bush's Iraq overloard sez "we will continue to impose our will on this country."

Civilian deaths, particularly of demonstrators, are mounting.

Basic services and basic rights are in scant supply, with neither democracy nor a reliable water supply on offer to Iraqis.

The only advanced programme is for the privatisation of state industry.

This occupation, which has no modern precedent, should be at the centre of political attention.

Ending it needs to be at the heart of public activity.

From The Guardian, 7/1/03:

Hostages of the empire

Andrew Murray
Tuesday July 1, 2003
The Guardian

The words of Paul Bremer, Washington's overlord in Iraq, need no "sexing up".

"We are going to fight them and impose our will on them and we will capture or... kill them until we have imposed law and order on this country," he declared at the weekend.

"We dominate the scene and we will continue to impose our will on this country."

Neither General Dyer at Amritsar nor General Westmoreland in Vietnam could have put it any clearer.

Welcome to the new colonialism.

THE mayor of London has launched an outspoken attack against US President
George W. Bush, branding him "corrupt".

Veteran left-wing firebrand Ken Livingstone said: "I think George Bush is
the most corrupt American president since (Warren) Harding in the '20s.

"He is not the legitimate president."

Livingstone was answering questions on the Iraq war and other subjects
during a two-hour meeting with 200 schoolchildren at London's City Hall.

"This (the Bush administration) really is a completely unsupportable
government, and I look forward to it being overthrown as much as I looked
forward to Saddam Hussein being overthrown," he added.

The mayor's outburst was immediately condemned by opposition Conservatives
and Liberal Democrats who warned it could put Americans off of visiting
London.

Asked about Livingstone's comments, White House Press Secretary, Ari
Fleischer, said: "First of all, I've never heard of the fellow. Second, I'm
not going to dignify it with a response."

The US embassy in London issued a statement saying: "Mayor Livingstone's
opinions about the United States are a matter of complete indifference to
the American embassy, the American government and the American people."

54. First gay marriage in Belgium unexpectedly early

Too bad for Ren&#65533; and Fran&#65533;ois, but they've been beaten to it.

```
On Friday afternoon, June 6, Marion Huibrechts and Christel Verswyvelen,
who've been a couple for sixteen years, are getting married in Kapellen
(near Antwerp). That they don't have to wait until June 16th like
everyone
else is due to an administrative cockup. Initially, there was some
confusion among local authorities about the required fourteen-day
waiting
period between applying for marriage and the actual ceremony. Some of
them
thought they could already start registering applications before the law
came into effect on June 1st. The ministry of justice had to clarify
things
in a letter to local authorities, but Marion and Christel had already
been
given and announced the date of June 6 before this letter was sent out.
Because of this, they were granted an exceptional waiver of the waiting
period.
```

Call for Nominations
uk.gay-lesbian-bi Moderation Panel

Nominations are requested for the uk.gay-lesbian-bi Moderation Panel

The rules under which these elections are being run are as follows:

Composition

1. There shall be a panel of not less than 4 and not more than 12 moderators.

Election

2. Initially moderators shall be the panel elected as part of the charter change process.

3. Then each year there after elections will be held for the posts of moderator.

i. 11 months after moderation comes into effect (and every twelve months subsequently) the moderation panel will appoint a neutral party to conduct the election as vote taker. The vote taker will issue a call for nominations for a new moderation panel.

ii. Nominations will be open for 10 days and to be valid each nominee will have to be proposed and seconded by white list posters (self-nomination is permitted). All white list posters shall have the right to vote, regardless as to whether they were white listed before or after the opening of nominations.

iii. At the end of 10 days a list of candidates (including their proposers/seconders) will be published.

iv. A five day period of hustings will be held during which the candidates will answer questions from posters to the group.

v. The vote taker will issue the first call for votes, to be followed by a second call for votes five days later, the voting period lasting in all for 10 days, votes shall only be valid if submitted on official ballot forms.

vi. Voting will be by the Single Transferable Vote method, with a reopen nominations candidate (RON) added to the ballot.

If RON passes the quota then all the then unfilled places are void requiring a new election for those vacancies.

vii. Each voter shall receive an acknowledgement from the vote taker. They will be given a unique identification as part of their acknowledgement, this will enable them to verify their vote when the result is published while protecting their identity from other voters.

viii. The vote taker will publish the result and a voting list comprising voter identifiers and their vote.

xi. In the event of less than 4 moderators being elected or RON passing quota the vote taker will issue a second request for nominations no later than 1 month after the close of ballot and hold elections for the remaining vacancies.

Those elected at this election shall serve until the annual round of elections are held.

Votetakers Note: The election is being run according to the June 1997 edition of the Electoral Reform Society's guide to running an election under the Single Transferable Vote system. This can be found on their website, at <http://www.electoral-reform.org.uk/>. The results will be processed by the ERS's STV counting software licensed to UKVoting.

Nominations may be made by any white listed poster. Self-nomination is permitted.

Each candidate must receive 2 nominations.

Nominations must be received by 23:59:59 BST on 7th June 2003.

Nominations must be made to glb2003@vote.semolina.org.

Note: This is *NOT* the same as the votetaker's personal address.

Please do not assume that just replying to this message will work. Check the address before you mail your vote. Your mail message should only contain the nomination form below.

Please ensure that you enter your name and a valid e-mail address where asked to do so on the nomination form below. If you do not, your nomination will NOT be counted.

Do NOT remove the placeholders around the nomination form.

THE Swedish government announced today it would allow same-sex marriages to be performed at its embassies in Paris, Madrid and Lisbon.

Only Swedish citizens will be able to register for same-sex partnerships, which are legally recognised in the Scandinavian country of 8.9 million.

"It is natural for Sweden to be able to offer registration of partnership at embassies where the host country does not oppose it," Foreign Minister Anna Lindh said.

"France, Spain and Portugal have informed us that they have no objection to Sweden's request for registration of partnership."

Gay activists welcomed the decision, but questioned why it was restricted to three embassies.

"Swedish embassies are Swedish territory. It's not the host country that decides policy," said Soeren Andersson, chairman of the Swedish Federation for Homosexual, Bisexual and Transsexual Rights.

Sweden and other Nordic countries were among the first to allow same-sex marriages. In February, the country made it legal for gay couples to adopt children.

Gay characters in the BBC Casualty/Holby City series made the news earlier in the year when they kissed before 9pm on a Saturday evening.

Newspapers reported the BBC received over 300 complaints about the kiss. In response to the press coverage GALHA contacted the BBC with a request that the BBC should not bow to bigots.

http://www.galha.org/press/2003/02_18.html

The BBC's response seemed positive:

BBC AFFIRMS COMMITMENT TO GAY REPRESENTATION
http://www.galha.org/press/2003/03_09.html

Although one of the two characters has already been written out, and the other will go shortly, anyone who watched Holby City last night may wonder if the BBC was honest in its reply.

I have had an assurance from the BBC that they did not give instructions to "do away" with gay characters. However recent events in the plots do not amount to "honest representation" and the BBC must know it. There have been several complaints on the BBC Holby message boards about the way 'Ben' was treated.

60. Bravo starts new gay reality show

Newsgroup: rec.radio.amateur.misc

Bravo starts new gay reality show

'Bachelor'-like 'Boy' to mix hetero-, homosexual suitors

NEW YORK, May 27 - NBC-owned Bravo will court viewers this summer with American television's first primetime gay-themed reality dating series. Similar in format to ABC's "The Bachelor," "Boy Meets Boy" features an eligible man looking for love in a pool of 15 potential mates. But in a twist worthy of the bogus baron on Fox's "Joe Millionaire," some of the suitors are actually heterosexual men who were paid by the program to pretend to be gay - unbeknownst to the eligible bachelor.
"I THINK THIS will be truly groundbreaking television," said series executive producer and co-creator Douglas Ross. "One of the reasons we decided to take the basic dating format and throw in this twist is that we
wanted the show to appeal to a broader audience."
The six-episode "Boy" will premiere on Bravo in July at a date and
time to be determined. In each episode, the bachelor will interact with the
other men on group and one-on-one dates and gradually eliminate those he isn
't interested in until one winner remains.
While the actual sexual orientation of at least one contestant will
be disclosed at the outset to viewers - but not the bachelor - the identity
of some of the others will not be revealed until the bachelor himself finds
out. The exact number of heterosexual suitors was not divulged by Bravo, nor
was the sum the network paid.Any sexual intimacy beyond kissing was strictly
prohibited on "Boy," which was shot from May 9-17 in a pair of homes in Palm
Springs.
The bachelor was identified as a 32-year-old from southern California
who works in the human resources division of a law firm. "Boy" is hosted by
Dani Behr ("Extra").
Ross believes "Boy" is a fun but serious sociological exploration of
male stereotypes that enlightened the show's participants and will do

the
same for viewers. (MSNBC is a Microsoft-NBC joint venture.)
"Several of the straight men have very intense experiences," he
said,
declining to divulge specific behavior. "We anticipate a lot of both
gay and
straight viewers will have their assumptions challenged about what it
means
to be gay and what it means to be straight."
Homosexual dating has been featured in segments on several
syndicated
dating series, but there has never been an exclusively gay dating
series in
primetime.

GAY THEMES NOT NEW FOR BRAVO
Bravo has explored gay themes in past programming including "Gay
Weddings," which was also produced by Ross' Evolution Film & Tape
banner.
Another new series coming to the cable network's schedule in July
is "Queer
Eye for the Straight Guy," which follows a team of gay males as they
counsel
fashion-challenged straight men.
In other Bravo programming news, a batch of new specials will
premiere in July and August. "The 34th Annual Songwriter's Hall of Fame"
will be broadcast for the second consecutive year on Bravo, with
honorees
including Clive Davis, Van Morrison and Little Richard. "Songwriter"
airs
July 9 at 9 p.m.
On July 27, the two-hour documentary "Singing in the Shadows: The
Children of Rock Royalty" profiles the struggling progeny of such
acclaimed
musicians as Carly Simon and James Taylor, Ozzy Osbourne, Arlo Guthrie,
John
Lennon and Aretha Franklin.
On Aug. 24, "Desilu" examines how the professional and personal
lives
of Lucille Ball and Desi Arnaz intersected. Another two-hour
special, "The
Animated Century," chronicles 100 years of cartoon films ranging from
Disney
classics to Japanese anime.

http://www.salon.com/opinion/conason/2003/06/30/norquist/index_np.html

June 30, 2003 |

Why do conservatives permit George W. Bush and the Republican leadership such latitude in pursuing policies -- like the Medicare prescription drug benefit -- that should make them scream in protest?

They like power, that's why -- and as Grover Norquist explains in today's New York Times, they believe that a Republican White House and Congress will promote their extreme agenda during a second term.

"The Republicans are looking at decades of dominance in the House and the Senate, and having the presidency with some regularity," he assured the Times.

"So if this year the tax cut isn't the one we wanted -- no biggie. There's a sense that we can afford to wait."

What Grover awaits is the opportunity to demolish every government program, large or small, that assists ordinary Americans, from Social Security to student loans, along with environmental regulation, the minimum wage and every other law protecting workers, progressive taxation, and most of what has made this a fairer, more decent nation during the past century.

He knows that all the presidential soft-soap about "compassionate conservatism" and "bipartisanship" is pure sales talk.

Time to wake up, folks.

Blame Bush in State Fiscal Crisis
Robert Scheer

July 1, 2003

The other day a woman asked me to sign a petition calling for the recall of California Gov. Gray Davis. Why, I asked. Because he bankrupted the state, she said. When I begged to differ that it was the Bush administration and its buddies at companies like Enron that had put the state into an economic tailspin, she said she was being paid according to the number of petitions signed and didn't really care. But voters should care because Davis is being used as a fall guy for problems that are beyond his control.

Remember Enron and those other scandals that cost folks their jobs and their 401(k) savings? They were a result of deregulation, the mantra of the Republicans. Deregulation was most disastrous for California's energy market, in which a crisis cost jobs and threw the world's fifth-largest economy into long-term disruption. This was not the normal workings of the market but the result of market manipulation by officials of Enron and other energy companies, some of whom are on their way to trial.

Still out cruising the boulevards is our president's once close friend, Kenneth "Kenny Boy" Lay. A major contributor to Bush family political campaigns and former Enron chief executive, Lay invented the energy trading game. It was made possible by his successful lobbying for the 1992 Energy Policy Act, signed into law by the elder Bush. That law allowed a minor Texas company to mushroom into the world's largest energy titan before it went poof.

Daddy Bush also tended to Enron's rise by appointing Wendy L. Gramm to head the Commodity Futures Trading Commission, which promptly exempted electricity trading from the regulatory oversight covering other commodities. Gramm went on to serve on Enron's board of directors and its so-called auditing committee. Her husband, Phil Gramm, then a GOP senator from Texas, later pushed through legislation further deregulating the industry.

When the younger Bush ran for president, he turned to Lay, who became the single biggest contributor to Bush's campaign. George W. returned the favor big-time by appointing to the Federal Energy Regulatory Commission members who looked the other way when Enron and its fellow swindler companies were fleecing California. These appointees insisted that California's problems

were of its own making and would have to be solved without the imposition of the wholesale energy price caps that would have saved taxpayers from a crushing burden.

Vice President Dick Cheney emerged from secret meetings with Enron executives and stated that the administration considered wholesale price caps a "mistake" because "there isn't anything that can be done short-term to produce more kilowatts this summer." Either Cheney was lying or his Enron buddies were lying to him because, at the time, Enron was routing electricity from California to sell at a higher price in Oregon. Federal price controls would have prevented Enron and the other companies from playing one state against another.

It is disingenuous for California Republicans to now blame Davis rather than their man Bush for the state's economic problems. Only last week, the Republican-dominated FERC banned Enron from selling electricity as punishment for having severely distorted Western energy markets. Enron and 60 other companies were ordered to show why they should not be forced to return their illegally gained profits.

FERC at the same time said California must honor $12 billion in long-term contracts written under duress with the same companies that were gaming the market. The contradiction was acknowledged by commission Chairman Patrick H. Wood III: "I guess people could go, 'Gosh, these are the same parties that show up in those other [market-gaming] cases.' "

Duh! No kidding. They are being rewarded for scamming the state, which contributed to the budget crisis, and schoolchildren will have to pay the price.

Californians provide much more to the federal government in taxes than they get back in services. The feds should bail out the states, which cannot indulge in the red-ink financing that has become a specialty of the Bush administration.

It is absurd to blame current difficulties on any state's governor, Republican or Democrat. It is the Bush administration that has mismanaged a successful economy inherited from Bill Clinton. It is the Bush administration that should bear responsibility for the difficulties being experienced by state governments - and it should at least help California as much as it is helping our newest state, Iraq.

67. Bush Wants to End Overtime Pay as We Know It

Overtime Pay Proposal Stirs Storm of Debate

By Kirstin Downey
Washington Post Staff Writer
Tuesday, July 1, 2003; Page A11

The Labor Department has been flooded with more than 75,000 letters debating the merits of proposed overtime regulation changes that could affect more than 1 million Americans, the most mail the agency has received on any wage-and-hour topic in at least a decade.

The department and business groups say the changes are an essential updating of outmoded labor rules to better reflect the modern workplace with its plethora of white-collar professional positions. Labor union officials say the changes would undermine the 40-hour workweek and strip overtime pay from many workers who have grown to depend upon it.

The Fair Labor Standards Act of 1938 guarantees many non-managerial workers time and a half for each hour they work beyond a basic 40-hour workweek, but it is complex to interpret, and many jobs fall into the gray area of whether the worker is truly a manager, and thus ineligible for overtime.

The proposed changes would add about 1.3 million low-wage workers to the group automatically eligible for overtime pay, but it could cause other workers -- 644,000 to 8 million workers, depending on who does the count -- to be viewed as managerial employees, opening them up to longer work hours and losing the right to overtime pay.

At the Labor Department yesterday, more than 100 workers gathered to oppose the rule changes, carrying posters that said, "Bush, Why Cut My Pay?" and "Our Grandparents Died for the 40-hour Workweek." Several workers addressed the group about the ways they thought the changes would reduce their pay.

Bob Adams, 44, a bakery manager from Minneapolis, said he earns a salary of $40,000 a year, but makes an additional $3,500 a year in overtime pay, which is the money he uses for "baseball games, concerts, anything that makes my life more than simply going to work and back."

"It's the difference between just making ends meet and having a life," he said, adding that he feared he would lose the overtime and simply be asked to work longer hours, which would, in turn, displace co-workers.

More than 100 Democratic legislators have signed onto a letter written by Rep. George Miller (D-Calif.) urging Labor Secretary Elaine L. Chao to rescind the rule change, which they said would affect a broad range of workers, from paramedics to paralegals, secretaries, grocery clerks and delivery route drivers.

Meanwhile, also yesterday, at a news conference, representatives of the National Retail Federation, the National Council of Chain Restaurants and the U.S. Chamber of Commerce said the changes are badly needed to clarify rules that have grown outdated and are overly cumbersome.

They said they are being battered by class-action lawsuits by supervisorial employees, such as assistant managers, who say they should be eligible for overtime pay. They said the rule changes would more clearly spell out who should get overtime pay.

"The proposal is not as dramatic as some people are making it out to be," said Robert J. Green, vice president of federal relations for the National Restaurant Association.

Last week, the Economic Policy Institute, a labor-affiliated group, reported its estimates showed that as many as 8 million workers could lose access to overtime pay under the rule changes. Labor Department officials quickly criticized the report as wildly off the mark, and a business-backed economist group, the Economics Policy Foundation, said only 1.15 million workers could be adversely affected by the change.

The workers' rally yesterday began with a dust-up over the event's setting. The AFL-CIO had rented a room at the Labor Department for a rally and news conference. The union said it was informed Thursday by department officials that it could not use the space. Union officials charged that they were evicted because they were criticizing the Labor Department.

Department officials said it was an "unfortunate" mix-up, and noted that the form the union submitted in requesting the space did not specify the nature of the event.

"It was a scheduling conflict," said Labor Department spokesman Ed Frank. "We didn't even know what they wanted to do."

He said the department needed the space to provide emergency terrorism preparedness training to its incoming class of departmental interns, who are just arriving in Washington.

U.S.: End Bully Tactics against Court
Letter to Colin Powell

(New York, July 1, 2003) With the expiration of its July 1 deadline to cut off military aid to states supporting the International Criminal Court (ICC), the Bush administration should end its ill-conceived campaign to weaken the court, Human Rights Watch said in a letter to U.S. Secretary of State Colin Powell.

Letter to Colin Powell on U.S. Bully Tactics Against ICC
Letter, June 30, 2003

"U.S. ambassadors have been acting like schoolyard bullies. The U.S. campaign has not succeeded in undermining global support for the court. But it has succeeded in making the U.S. government look foolish and mean-spirited."

Richard Dicker, director of the International Justice program at Human Rights Watch

The American Servicemembers' Protection Act (ASPA) revokes military assistance to countries that have ratified the ICC unless they conclude a separate bilateral agreement with the United States by July 1, agreeing never to hand over U.S. personnel to the ICC.

Despite a yearlong campaign by the U.S. diplomatic corps, only about 48 countries have signed such agreements so far, the majority of them small and poor countries that have not ratified the ICC treaty anyway and therefore have no obligation to transfer U.S. personnel to the court.

"U.S. ambassadors have been acting like schoolyard bullies," said Richard Dicker, director of the International Justice program at Human Rights Watch. "The U.S. campaign has not succeeded in undermining global support for the court. But it has succeeded in making the U.S. government look foolish and mean-spirited."

The letter cites several examples of U.S. hardball tactics:

* U.S. Ambassador Richard Blankenship publicly warned the Bahamas that if it did not support the U.S. position on the ICC, a significant amount of U.S. aid would be withheld, including funds for paving and lighting an airport runway.

* An Assistant Secretary of State informed foreign ministers of Caribbean states that they would lose the benefits for hurricane relief and rural

dentistry and veterinary programs if their governments did not sign.

"U.S. officials are engaged in a worldwide campaign pressing small, vulnerable and often fragile democratic governments," said the Human Rights Watch letter, signed by executive director Kenneth Roth. "Because most ICC member states are democracies with a relatively strong commitment to the rule of law, the threatened aid cutoffs represent a sanction primarily targeting states that abide by democratic values."

The exact number of countries that have signed bilateral immunity agreements is unclear, since some of the agreements are "secret." But at least 38 of them are classified as "less developed" or "least developed" countries by the United Nations Development Program index.

Most of the ICC's 18 judges come from countries closely allied with the United States. Luis Moreno Ocampo, an Argentine national who was most recently the Robert F. Kennedy Visiting Professor of Latin American Studies at Harvard Law School, has recently been sworn in as the court's Chief Prosecutor.

"No one really believes that Moreno Ocampo is likely to indulge in unwarranted prosecutions of American citizens," said Dicker. "It's really time for the Bush administration to wake up from its own nightmarish delirium."

Muslim alliance derails UN's gay rights resolution

By Andrew Osborn, The Guardian, Friday April 25, 2003

"A UN vote on homosexual human rights was yesterday derailed at the last minute by an alliance of disapproving Muslim countries.

"The UN had been due to vote on the matter for the first time in its almost 60-year history, but five Muslim countries delayed the vote until today and introduced amendments designed to kill it off.

"The amendments remove all references to discrimination on the basis of sexual orientation, and render the resolution meaningless. UN sources said Pakistan, Egypt, Libya, Saudi Arabia and Malaysia were doing everything they could to stop the resolution. "I suspect they want to stall as much as possible and lobby other countries to win support for their amendments," said a source.

"The historic resolution on "human rights and sexual orientation" was originally tabled by Brazil at the UN commission on human rights, in Geneva, with the support of 19 other countries including Britain. It calls on all UN member states to promote and protect the human rights "of all persons regardless of their sexual orientation".

"But the sentiments are anathema to many UN states; almost half outlaw gay sexual relations and more than 70 countries keep a total ban on homosexuality - in some cases it is punished by death.

"The British gay rights campaigner, Peter Tatchell, said: "The vote has been derailed and delayed by Islamic fundamentalist states where gay people are either jailed, flogged or beheaded." He said those countries' records of gay human rights abuses showed why the resolution was urgently needed.

Confidence in war effort slips; Bush support still strong
By Richard Benedetto, USA TODAY

WASHINGTON - As the search for weapons of mass destruction continues with no major finds in Iraq and U.S. troops continue to suffer deadly attacks, confidence in the war effort is declining, a USA TODAY/ CNN/Gallup Poll shows. (Poll results)

Most Americans say things are going well for the United States in Iraq, but that answer has fallen to 56% from 70% a month ago and 86% on May 7, a week after President Bush declared combat largely over.

The poll finds most people have confidence in the president's leadership and character, but there is erosion on those questions, too. His scores on being "honest and trustworthy," 65%, and "cares about the needs of people like you," 57%, are still strong, but both are down 8 percentage points from a poll in April.

Analysts suggest that if the search for weapons drags on for months without success, if the U.S. death toll continues to mount and if Saddam Hussein is not found, critics will grow louder, support will drop and the public might begin calling for U.S. troops to leave Iraq.

"This bears the seeds for potential problems for the president down the road as he looks to re-election," said Mark Rozell, a political scientist at Catholic University of America in Washington.

But the news for the Bush administration isn't all bad, and most Americans are giving the president the benefit of the doubt. Six in 10 people say his administration did not deliberately mislead the country about evidence that Iraq had nuclear, chemical or biological weapons that posed a threat to the United States.

And despite a recent rash of attacks on U.S. soldiers in Iraq, three out of four Americans see such deaths as the expected price of war.

Seventy-four percent say the number of U.S. deaths since major combat ended is to be expected, while 69% say it is worth having U.S. troops in Iraq now. And 63% say the administration did a good job planning for a post-combat Iraq.

But the poll shows a 31-percentage-point drop since March 30 to 53% in public confidence that weapons of mass destruction will be found and a 22-point decline to 48% in the belief that Saddam Hussein will be killed or

captured.

There was a 17-point drop since April 16, a week after the fall of Baghdad, to 56% in those saying the situation in Iraq was worth going to war.

"We are a nation that wants to continue to support its troops. But people are starting to understand that this will take more time and more loss of life than they first expected," said Anna Greenberg, a Democratic pollster.

Bush's overall job rating, a solid 61%, has been on a gradual decline from a recent high of 71% in April, shortly after U.S. troops captured Baghdad.

Thad Beyle, a political scientist at the University of North Carolina at Chapel Hill, said the drop in the president's character ratings could come as much from his handling of the economy and other domestic issues as from problems in Iraq.

Meanwhile, a related poll supports shows most Americans believe the United States has clear evidence of a link between al-Qaida and Saddam.

In results released Tuesday, the Program on International Policy Attitudes at the University of Maryland reported that seven in 10 people say the Bush administration implied that Iraq and its leader Saddam Hussein were involved in the Sept. 11 attacks.

A majority, 52%, say they believe the United States has found clear evidence in Iraq that Saddam was working closely with the al-Qaida terrorist organization.

The number that believes the United States has found weapons of mass destruction is 23%, down from 34% in May, according to the IPA which coordinated a survey of 1,051 adults June 18-25.

71. Bush's Failure: Another Homeland Security Top Official Resigns

Top Homeland Security Official Resigns Position

Tuesday, July 1, 2003; Page A06

A high-ranking Department of Homeland Security official in charge of the agency's analysis of intelligence about terrorists resigned yesterday, citing health reasons.

The resignation came less than a month after assistant secretary Paul Redmond angered many House members at a hearing when he testified that his newly established office has not hired enough analysts or set up enough secure communications lines to receive classified FBI and CIA data for analysis purposes.

A department spokesman said Redmond's resignation was "totally unrelated" to his June 5 testimony before the House Select Committee on Homeland Security, which congressional sources described as a major setback for the agency's relations with Congress.

Redmond is a legendary CIA counter-intelligence official who helped unmask some of America's most infamous spies before his 1998 retirement.

In a statement last night, Homeland Security Secretary Tom Ridge said, "The entire country will benefit from Paul's work establishing a new agency, and it will be one of his greatest legacies."

Bush 'indicted' over war crimes

A group of Japanese lawyers unveiled documents Monday "indicting" U.S. President George W. Bush for war crimes allegedly committed against the Afghan people since the United States-led coalition began its antiterrorism campaign in Afghanistan in October 2001.

"This is an act that breaks international rules, such as the idea of (honoring) human rights, that have been formed over so many years," said Koken Tsuchiya, former president of the Japan Federation of Bar Associations and head of the 11-member prosecutors' team in the tribunal. "We decided this case has sufficient reason to be brought to court."

A civic tribunal will be held in Tokyo, with the first hearing scheduled for July 21.

The charges against Bush, according to the indictment, include aggression, attacks against civilians and nonmilitary facilities and the torturing and execution of prisoners.

They said the indictment will be handed to the U.S. Embassy in Tokyo next week.

The tribunal is being organized by Tokyo Zokei University professor Akira Maeda and others.

As 2004 Nears, Bush Pins Slump on Clinton

By Dana Milbank

Tuesday, July 1, 2003; Page A11

With the start of his reelection campaign in the past two weeks, President Bush has revived his pastime of blaming his predecessor, Bill Clinton, for the economic recession.

"Two-and-a-half years ago, we inherited an economy in recession," he told donors at a Bush-Cheney '04 reception yesterday in Miami. He has raised the same accusation in fundraising appearances since mid-June in Washington, Georgia, New York, Los Angeles and San Francisco.

It's a good applause line for a crowd of red-meat political supporters. The trouble is it's a case of what the president has called, in another context, revisionist history. The recession officially began in March of 2001 -- two months after Bush was sworn in -- according to the universally acknowledged arbiter of such things, the National Bureau of Economic Research. And the president, at other times, has said so himself.

The bad news came on Nov. 26, 2001. The NBER, led by an informal economic adviser to Bush, Martin Feldstein, pronounced that economic activity peaked in March 2001, "a determination that the expansion that began in March 1991 ended in March 2001 and a recession began."

At the time, Bush accepted the verdict with perfect accuracy. "This week, the official announcement came that our economy has been in recession since March," he said in his radio address the next weekend. "And unfortunately, to a lot of Americans, that news comes as no surprise. Many have lost jobs or seen their hours cut. Many have seen friends or family laid off. The long economic expansion that started 10 years ago, in 1991, began to slow last year. Many economists warned me when I took office that a recession was beginning, so we took quick action."

Until the NBER's official pronouncement, Bush had avoided the "R" word. He spoke earlier in 2001 of an "economic slowdown" as administration officials noted, correctly, that the pace of economic growth began to slow (but not contract) in 2000, under Clinton's watch. "In terms of how you call it, what the numbers look like, we've got statisticians who will be crunching the numbers and let us know exactly where we stand," Bush said in October 2001.

"But we don't need numbers to tell us people are hurting."

Then, last summer, Bush revised his history of when the recession began. Beginning in August 2002, he began to say that "we did, in fact, inherit an economic recession." Addressing Republican governors in September, he declared: "I want you all to remember that when Dick Cheney and I got sworn in, the country was in a recession." In May of this year, Bush even gave the recession an official starting date three weeks before he took office, saying "our nation went into a recession, starting January 1 of 2001."

The source of this revision apparently was a July 2002 report by Bush's Commerce Department that the economy had contracted in the first quarter of 2001 by 0.6 percent. But that was a quarterly figure that gave no indication when in the quarter the economy turned south. Still, Bush used that to revise the NBER definition so that the economy was in recession "the minute I got sworn in" on Jan. 20.

Feldstein's NBER, which earlier said it gives "relatively little weight" to the quarterly growth figures from Commerce, is not joining in the revision. Two weeks ago, it issued an updated report sticking by its assessment that the recession began in March 2001.

Speaking of moving targets, the White House executed some fancy footwork when the Supreme Court last week issued rulings striking down a Texas law forbidding sodomy and upholding the University of Michigan law school's affirmative action program.

On the sodomy case, Bush's press secretary, Ari Fleischer, has labored to distance the administration from the Texas case. "The administration did not file a brief in this case, unlike in the Michigan case, and this is now a state matter," Fleischer said when asked for Bush's opinion on whether gay men have the legal right to sexual relations in private. When Sen. Rick Santorum (R-Pa.) caused a furor by speaking out on the sodomy case in April, Fleischer had said, "We also have no comment on anything that involves any one person's interpretation of the legalities of an issue that may be considered before the Court."

In fact, Bush has expressed a firm opinion on the Texas sodomy law that the court ruled unconstitutional. He supported it. Human Rights Campaign, a gay-rights group, dug up an article from the Austin American-Statesman of Jan. 22, 1994, titled "Bush promises to veto attempts to remove sodomy law." The newspaper reported:

"Gubernatorial candidate George W. Bush on Friday promised he would veto any attempt by the Texas Legislature to remove from the state penal code a controversial statute outlawing homosexual sodomy. Bush, a Republican, was asked about the sodomy statute shortly after speaking to the Veterans of Foreign Wars and Ladies Auxiliary.

" 'I think it's a symbolic gesture of traditional values,' he said."

On the affirmative action case, Bush announced on Jan. 15 that the administration would file a brief opposing both programs in question, for

Michigan undergraduates and law students. He called both programs "a quota system" and said they were "unconstitutional."

But when the Supreme Court last week upheld the program for Michigan law students -- widely seen as a major affirmation of affirmative action -- Bush joined in the celebration. "I applaud the Supreme Court for recognizing the value of diversity on our nation's campuses," he said in a statement issued by the White House.

EPA Withholds Air Pollution Analysis
Senate Plan Found More Effective, Slightly More Costly Than Bush Proposal

By Guy Gugliotta and Eric Pianin
Washington Post Staff Writers
Tuesday, July 1, 2003; Page A03

The Environmental Protection Agency for months has withheld key findings of its analysis showing that a Senate plan to combat air pollution would be more effective in reducing harmful pollutants -- and only marginally more expensive -- than would President Bush's Clear Skies initiative for power plant emissions.

The Clear Skies proposal is designed to reduce power plant emissions over the next 20 years. A centerpiece of Bush's environmental policy, its passage could burnish his 2004 reelection credentials. But the president's plan does not address carbon dioxide emissions, which many scientists consider an important greenhouse gas that may contribute to the Earth's warming.

Bush's stand has drawn sharp criticism on several fronts, and a bipartisan group of senators has proposed an alternative bill that would limit carbon dioxide emissions. Unreleased information from an EPA internal analysis concludes that the competing bill would provide health benefits substantially superior to those envisioned under Clear Skies.

Because leaked copies of the analysis have circulated among interest groups, some environmentalists have criticized the EPA for not releasing all of it. Withholding some of the findings is "a real outrage," said David G. Hawkins, director of the Natural Resources Defense Council's Climate Center and a former assistant EPA administrator. "They're playing dodge ball with Congress to push the [Clear Skies] bill."

EPA Associate Administrator Edward D. Krenik, however, said the agency has released pertinent information where it was needed. Sen. Thomas R. Carper (D-Del.), author of the competing bill, has been given "all the information that we garnered from his bill" regarding carbon dioxide and three other pollutants, Krenik said. "He has all the information."

A PowerPoint presentation on Carper's bill prepared last fall by the EPA for Jeffrey R. Holmstead, assistant administrator for air and radiation, had more information than Carper was given months later. The Washington Post examined a leaked copy of the presentation.

EPA gave Carper information showing that his bill would cut power plant emissions of sulfur dioxide, nitrogen oxide and mercury earlier and by larger amounts than would the president's bill. Not provided to Carper, however, was the conclusion that these cuts could be achieved while increasing electricity prices by two-tenths of a cent per kilowatt hour more than the Clear Skies initiative would require.

The PowerPoint presentation also said the Carper bill, co-sponsored by Republican Sens. Judd Gregg (N.H.) and Lincoln D. Chafee (R.I.), has a carbon dioxide-reduction plan that can be carried out at "negligible" cost to industry. The presentation also said Carper's bill by 2020 would result in 17,800 fewer premature deaths from power plant air pollution than would Clear Skies. That would save $140 billion a year in health benefits -- about $50 billion more than Clear Skies.

At an April Senate hearing, Carper asked then-EPA Administrator Christine Todd Whitman for the missing information. Last month he joined Gregg and Chaffee in renewing the request.

"All we're interested in is having a full and honest debate so we can make a well-informed decision," Carper said in an interview. "I don't believe that's too much to ask."

The administration and its industry allies are lobbying aggressively on behalf of Clear Skies, and today EPA plans to release an updated estimate of its costs and benefits. The administration has lined up support from a range of government and labor groups, but manufacturers and the utility industry are far from united. James L. Connaughton, chairman of the White House Council on Environmental Quality, said Clear Skies "is very important for the president, and you will see a very strong push."

The administration has refused to consider signing a power plant emissions bill with carbon dioxide caps, and therefore opposes Carper's bill and a version championed by Sen. James M. Jeffords (I-Vt.).

Bush disavowed a campaign pledge to regulate carbon dioxide emissions, saying such regulations would hurt the economy and consumers by proving too costly to the power industry.

The Clear Skies bill would use mandatory caps and a pollution credit-trading program to reduce overall power plant pollutants -- including mercury, sulfur dioxide and nitrogen oxide -- by 70 percent over the next 15 years.

The earliest version of Carper's bill, now called the Clean Air Planning Act, was introduced in July 2002, and the EPA analyzed it in the fall, according to documents Krenik provided to Carper.

The EPA months later sent Carper in two installments its analysis of sulfur dioxide, nitrogen oxide, mercury and carbon dioxide controls, but it has withheld its information on health benefits and details of its analysis of costs associated with the proposal.

Carper portrayed his bill as a compromise between Clear Skies -- which environmentalists call a rollback of current EPA air pollution

requirements -- and the Jeffords bill, opposed by industry as imposing unattainable standards. The EPA analysis shows that the Carper bill fits between these two alternatives, setting emissions ceilings for sulfur dioxide, nitrogen oxide and mercury between 2008 and 2020 that either match or surpass Clear Skies targets, and do it sooner.

On sulfur dioxide, for example, the EPA analysis shows that under the Carper bill, power plant emissions would drop to 4.5 million tons in 2008 and to 2.25 million tons in 2015. Clear Skies would reduce sulfur dioxide to 4.5 million tons in 2010, and 3 million tons in 2018.

Environmental groups generally support the Jeffords bill. But the Defense Council's Hawkins said that while "we have several differences" with the Carper plan, "these are areas where we think people of good faith could reach agreement. The Carper bill is in the ballpark."

Regarding carbon dioxide, Carper's bill envisions an EPA-run program whereby power plants would compensate for emissions either by switching to cleaner-burning fuels or technologies, or by buying offsets in other sectors. For example, a power company could balance its emissions by planting a carbon dioxide-eating forest or subsidizing agriculture producers to change tillage procedures or use carbon dioxide-lowering technologies in feed lots. The EPA analysis said the availability of cheap offsets made the plan's costs "negligible."

Much of industry opposes carbon dioxide caps, holding that no technology exists to attain them. "The only option is to switch from coal to natural gas," said Dan Riedinger, spokesman for the Edison Electric Institute, which represents 70 percent of publicly owned electric generation companies. "Our concern is that imposing a cap on one sector of the U.S. economy will raise energy prices, but do nothing to alleviate greenhouse gas."

Still, some utilities support Carper's plan because it covers all major pollutants at once. "One way to achieve business certainty is to have some sort of agreement on greenhouse gas," said Michael J. Bradley, executive director of the Clean Energy Group, composed of nine utilities. "It's going to come down the road sometime, so you might as well take care of it now ."

The EPA has not publicly criticized the Carper plan except to dispute the senator's interpretation of its likely costs. The EPA analysis estimates that industry would spend $103.4 billion to generate electricity in 2020 under the Carper bill. Carper, Gregg and Chafee, in a letter to the EPA, described those costs as only "marginally higher" than the $100.9 billion envisioned under Clear Skies.

The EPA's Krenik said in an interview the senators' interpretation was "not an accurate reflection" of the costs. He said the EPA always calculates the price of legislation alone, without reference to the costs of raw materials, labor, capital equipment and operations. In this context, he said, Carper's bill would cost about $8.7 billion in 2020 as opposed to $6.5 billion for Clear Skies.

Clean Energy's Bradley dismissed this view as bureaucratic hairsplitting. The EPA analysis, he noted, showed that retail prices for electricity under the Carper bill would be only two-tenths of a cent per kilowatt higher than prices under Clear Skies.

"To suggest that the incremental costs of the legislation are high, like the EPA does," Bradley said, "is inconsistent with this information."

Bush set to flout test ban treaty

Global treaty sidelined as scientists gear up to develop next generation of weapons

Peter Beaumont, foreign affairs editor
Sunday July 28, 2002
The Observer

America's nuclear weapons laboratories have begun preparations to test a new generation of arms after strong signs that the Bush administration may be about to pull out of the landmark Comprehensive Test Ban Treaty.
Amid renewed evidence that pro-nuclear hawks are increasingly holding sway, the Department of Energy's National Nuclear Security Administration is increasing funding for nuclear weapons research and testing programmes. The funding would allow the US to be ready to return to underground tests within 12 months - a requirement of the US Nuclear Posture Review, which was unveiled by the Bush administration this year.

Although key figures are still engaged in a bitter debate over whether the US should withdraw from the treaty, Washington's position on nuclear weapons development and use is increasingly hardline.

It culminated last month in the disclosure by the White House that a 'pre-emptive strike policy' - including first use of nuclear weapons against the chemical and biological facilities of even non-nuclear states deemed to pose a threat to the US - would be incorporated into the National Security Strategy from this autumn.

Although the US is a signatory of the treaty, it has never ratified it. George Bush Snr decided instead to announce a US moratorium on weapons testing in 1992.

Since the launch of the Nuclear Posture Review last January, officials have been ambiguous about whether the US intends to return to testing, preferring to say that the Bush administration does not intend to end the moratorium 'at this point'.

However, fresh concerns over intentions on nuclear weapons research and testing will be ignited tomorrow with the publication of a report into US nuclear weapons policy by the British-American Security Information Council (Basic). According to its author, Mark Bromley, plans for new US nuclear weapons threaten decades of work towards eradicating the nuclear threat.

'With the arrival of the current administration, key nuclear proponents have assumed offices of power and placed the development of new nuclear weapons high on the political agenda,' he said. 'It poses a grave threat to the global testing moratorium and threatens to destroy the already fragile network of international arms control agreements.'

Among the most prominent nuclear proponents is John Bolton, Under Secretary of State for Arms Control at the State Department, who campaigned successfully for the US to withdraw from the treaty to establish an International Criminal Court and has been campaigning with equal vigour for the US to withdraw from the Test Ban Treaty. Although overruled by Secretary of State Colin Powell, senior officials say the debate is far from over.

At its centre is the claim by nuclear hawks of the threat posed by so-called Hardened Deep Bunker Targets - underground facilities impervious to conventional nuclear strikes. US intelligence estimates that more than 10,000 such bunkers exist worldwide. Only a tiny proportion are of strategic significance, but the CIA suspects those are being used to shelter plants for chemical and biological weapons, particularly in 'rogue states'.

While the Department of Energy has approved a feasibility study on modifying an existing nuclear warhead, which would not affect the treaty, scientists have been disappointed with the results. They are now pushing for a new generation of 'mini-nuke' bunker-busters with a yield of five kilotons or less, which would require testing in underground nuclear detonations.

The administration has asked the laboratories to look into research and development options for devices to defeat buried and hardened facilities.

The 1993 Furse-Spratt Provision bans research and development of a nuclear weapon of five kilotons or less. This year, however, that legislation has come under attack from Republicans seeking to water it down to allow research - if not deployment - of a bunker-busting mini-nuke.

76. The Bush Legacy: Pentagon Develops Urban Surveillance System

U.S. Develops Urban Surveillance System

By MICHAEL J. SNIFFEN, Associated Press Writer

WASHINGTON - The Pentagon (news - web sites) is developing an urban surveillance system that would use computers and thousands of cameras to track, record and analyze the movement of every vehicle in a foreign city.

Dubbed "Combat Zones That See," the project is designed to help the U.S. military protect troops and fight in cities overseas.

Police, scientists and privacy experts say the unclassified technology could easily be adapted to spy on Americans.

The project's centerpiece is groundbreaking computer software that is capable of automatically identifying vehicles by size, color, shape and license tag, or drivers and passengers by face.

According to interviews and contracting documents, the software may also provide instant alerts after detecting a vehicle with a license plate on a watchlist, or search months of records to locate and compare vehicles spotted near terrorist activities.

The project is being overseen by the Defense Advanced Research Projects Agency, which is helping the Pentagon develop new technologies for combatting terrorism and fighting wars in the 21st century.

Its other projects include developing software that scans databases of everyday transactions and personal records worldwide to predict terrorist attacks and creating a computerized diary that would record and analyze everything a person says, sees, hears, reads or touches.

Scientists and privacy experts - who already have seen the use of face-recognition technologies at a Super Bowl and monitoring cameras in London - are concerned about the potential impact of the emerging DARPA technologies if they are applied to civilians by commercial or government agencies outside the Pentagon.

"Government would have a reasonably good idea of where everyone is most of the time," said John Pike, a Global Security.org defense analyst.

DARPA spokeswoman Jan Walker dismisses those concerns. She said the Combat Zones That See (CTS) technology isn't intended for homeland security or law enforcement and couldn't be used for "other applications without extensive

modifications."

But scientists envision nonmilitary uses. "One can easily foresee pressure to adopt a similar approach to crime-ridden areas of American cities or to the Super Bowl or any site where crowds gather," said Steven Aftergood of the Federation of American Scientists.

Pike agreed.

"Once DARPA demonstrates that it can be done, a number of companies would likely develop their own version in hope of getting contracts from local police, nuclear plant security, shopping centers, even people looking for deadbeat dads."

James Fyfe, a deputy New York police commissioner, believes police will be ready customers for such technologies.

"Police executives are saying, `Shouldn't we just buy new technology if there's a chance it might help us?'" Fyfe said. "That's the post-9-11 mentality."

Seattle Police Chief Gil Kerlikowske said he sees law enforcement applications for DARPA's urban camera project "in limited scenarios." But citywide surveillance would tax police manpower, Kerlikowske said. "Who's going to validate and corroborate all those alerts?"

According to contracting documents reviewed by The Associated Press, DARPA plans to award a three-year contract for up to $12 million by Sept. 1. In the first phase, at least 30 cameras would help protect troops at a fixed site. The project would use small $400 stick-on cameras, each linked to a $1,000 personal computer.

In the second phase, at least 100 cameras would be installed in 12 hours to support "military operations in an urban terrain."

The second-phase software should be able to analyze the video footage and identify "what is normal (behavior), what is not" and discover "links between places, subjects and times of activity," the contracting documents state.

The program "aspires to build the world's first multi-camera surveillance system that uses automatic ... analysis of live video" to study vehicle movement "and significant events across an extremely large area," the documents state.

Both configurations will be tested at Ft. Belvoir, Va., south of Washington, then in a foreign city. Walker declined comment on whether Kabul, Afghanistan (news - web sites), or Baghdad, Iraq (news - web sites), might be chosen but says the foreign country's permission will be obtained.

DARPA outlined project goals March 27 for more than 100 executives of potential contractors, including Lockheed Martin, Raytheon and the Johns Hopkins University Applied Physics Lab.

DARPA told the contractors that 40 million cameras already are in use around the world, with 300 million expected by 2005.

U.S. police use cameras to monitor bridges, tunnels, airports and border crossings and regularly access security cameras in banks, stores and garages for investigative leads. In the District of Columbia, police have 16 closed-circuit television cameras watching major roads and gathering places.

Great Britain has an estimated 2.5 million closed-circuit television cameras, more than half operated by government agencies, and the average Londoner is thought to be photographed 300 times a day.

But many of these cameras record over their videotape regularly. Officers have to monitor the closed-circuit TV and struggle with boredom and loss of attention.

By automating the monitoring and analysis, DARPA "is attempting to create technology that does not exist today," Walker explained.

Though insisting CTS isn't intended for homeland security, DARPA outlined a hypothetical scenario for contractors in March that showed the system could aid police as well as the military. DARPA described a hypothetical terrorist shooting at a bus stop and a hypothetical bombing at a disco one month apart in Sarajevo, Bosnia-Herzegovina, a city with slightly more residents than Miami.

CTS should be able to track the day's movements for every vehicle that passed each scene in the hour before the attack, DARPA said. Even if there were 2,000 such vehicles and none showed up twice, the software should automatically compare their routes and find vehicles with common starting and stopping points.

Joseph Onek of the Open Society Institute, a human rights group, said current law that permits the use of cameras in public areas may have to be revised to address the privacy implications of these new technologies.

"It's one thing to say that if someone is in the street he knows that at any single moment someone can see him," Onek said. "It's another thing to record a whole life so you can see anywhere someone has been in public for 10 years."

by J.R. Hunt

BASRA, Iraq — In the battlefield, they consider themselves brothers. They've fought together. Slept in foxholes together. They come from different parts of the world but they've shared a common bond for more than 200 years. American G.I.s and British soldiers have formed a cameraderie in the deserts of Iraq not seen in more than a half century. But when they were recently forced to shower together, American forces noticed some big differences with their British counterparts. Differences that at first threatened that unique friendship.

The conversation varied slightly as it played itself repeatedly in makeshift showers all over the Persian Gulf.

"Hey bro, your penis looks kind of weird."

"Aye mate, that's called a foreskin."

"A what?"

"A foreskin. I'm uncircumcized. It's rather common in Europe."

"Dude, you should get that fixed."

The questions soon turned to teasing, to which the Brits were unaccustomed. Word got around the barracks that the British troops were "different."

"Boody right we were pissed with all the pointing and name-calling," said Capt. Simon Brody, a member of the Royale Air Corps. "We tried to find common ground with a game of football, but when we were organized by 'shirts and skins,' we really horribly ostrocized by the Yanks."

When British troops realized that Iraqis and other Muslim men are also circumcized, they came to the conclusion they had, perhaps, the only foreskins in the entire Gulf region. "We suddenly became self-concious," explained one British commander who asked to remain anonymous. "It became impossible for our men to fight with those things flapping around in the wind."

"We felt so ugly. It was as if the entire world was not paying attention to our brave soldiers and just focusing on our bits and pieces. It was awful."

As a gesture of goodwill, U.S Army medics and Jewish Chaplains will now offer free "battlefield circumcisions" to British soldiers on a

volunteer basis. It is one more way to show the bond between Americans and British could not be broken.

"We're truly excited about our new Americanized penises," Lee said. "It's fucking brilliant."

78. Leader of American Taliban and Scalia Seem Threatened by Homosexuality

Jerry Falwell Appears Very, Very Threatened by Homosexuality, As Does His GOOD Buddy Antonin Scalia

A BUZZFLASH NEWS ALERT

This is an actual alert sent out by Jerry Falwell on June 26th. Are Jerry and Antonin Scalia threatened by homosexuality? Sure looks like it. Maybe they are one step away from coming out of the closet.

FALWELL CONFIDENTIAL

DATE: June 26, 2003

FROM: Jerry Falwell

TEXAS SODOMY LAW OVERTURNED - A TRAGEDY FOR AMERICA

In a stunning reversal from its 1986 decision upholding the rights of states
to enact anti-sodomy laws, the Supreme Court, by a 6-3 vote, ruled to overturn a Texas law that banned same-sex sodomy, saying that it violated a right to privacy.

Justice Anthony Kennedy wrote the opinion for the majority, citing a "right to privacy" in his decision. Joining him in the decision were Justices John Paul Stevens, David Souter, Ruth Bader Ginsburg and Stephen Breyer. Justice Sandra Day O'Connor agreed with the ruling, but differed in the rationale for her decision. (Sadly, four of the six Justices voting for the majority . O'Connor, Souter, Kennedy and Stevens ... were appointed by Republican presidents.)

Dissenting were Chief Justice William H. Rehnquist and Justices Antonin Scalia and Clarence Thomas.

Justice Scalia, who chose to read his dissent aloud from the bench, said that the Court "has largely signed on to the so-called homosexual agenda."

"The court has taken sides in the culture war," Scalia said. He further noted that this ruling would invite laws allowing same-sex marriage.

"This reasoning leaves on shaky, pretty shaky grounds, state laws limiting marriage to opposite-sex couples," Scalia wrote.

Mathew Staver, President and General Counsel of Liberty Counsel called the decision a "wakeup call" to the majority of Americans who believe in traditional marriage.

"The goal of the radical homosexual agenda is to eliminate any and all laws regulating consensual sexual conduct," Staver said. "This would mean the elimination of laws banning polygamy as well as those that ban sex between adults and minors."

As recently as 1960, every state had an anti-sodomy law on the books. Today 13 states, including Texas, Kansas, Oklahoma, Missouri, Alabama, Florida, Idaho, Louisiana, Mississippi, North Carolina, South Carolina, Utah and Virginia have laws prohibiting sodomy.

Do we hear the creak of the closet door slowly opening, Jerry and Antonin?

Were you in there together?

79. Bush Replaces Death Tax with Birth Tax

Goodbye, Death Tax. Hello, Birth Tax!

by The Angry Liberal

We've all heard republicans whine about the estate tax. According to republicans, it isn't fair that people who are handed millions of dollars for the grand accomplishment of being born into a rich family should have to
forego a single penny of this unearned income via taxation. After many tormented, sleepless nights, republicans in the House of Representatives decided to put an end to this unspeakable crime. They drummed up support for
its repeal by giving the estate tax a fictitious nickname, the "death tax." Calling the estate tax the "death tax" is, of course, lying. All Americans die for free, and less than 2% die with estates that are taxed at all. Be this as it may, republicans decided to call this tax something really sinister sounding because nobody would support the repeal of the "Last Chance To Tax the Fattest of America's Fat Cats Before They Hand Over Enormous Piles of Cash to Their Lazy, Undeserving Children" Tax. And before you could say "campaign contribution kickback," the House of Representatives
decided that those least deserving of a tax cut should have this unearned income handed over tax-free.

But now that billionaire heirs are giving the tax man the finger (if the House has its way), what do we do about the big hole in the budget that the estate tax used to fill? Cut programs? No way. Showing Americans the real budgetary priorities of the republican party would see it swept from Washington faster than Governor Bush could review a Texas death penalty case. Enter the second part of the republican tax scam: Instead of cutting programs to pay for this ridiculous tax cut, republicans simply decided to steal the money from the Social Security trust fund and borrow the rest to fill the shortfall.

But won't somebody have to pay interest on this huge pile of debt that republicans are racking up from all of this borrowing? Duh! And who do you think will pay it back? That's right, it will be you and me, our children, and their children. Every working American who has the misfortune to be born
poor or middle class will enter the world owing the tax money that republicans are refusing to collect from the "Death Tax." Ladies and gentlemen, I give you the truly republican tax: The Birth Tax.

The Birth Tax is the interest paid on an enormous debt that republicans will
create when they decide not to collect the estate tax anymore. According to
the Center on Budget and Policy Priorities, the cost to the rest of us
taxpayers for the elimination of the estate tax will be $294 billion over
the next 10 years or so. At around 5% servicing costs per year, that means
that after 10 years of borrowing money to offset the estate tax cut, those
Americans who still pay taxes will see a permanent $14.7 billion annual
increase in their tax bill. Of course, that bill will increase the next
year. And the year after that. The Birth Tax will continue to grow as long
as the government borrows money every year to offset the elimination of the
estate tax.

Here is a fun comparison of the "Death Tax" with the Birth Tax:

1. While the "Death Tax" was paid from less than 2% of the of the richest
estates, the "Birth Tax" will be paid by everybody who pays federal taxes,
including those who are so poor that they pay only Social Security taxes.

2. While the "Death Tax" was only collected after rich folks were
completely
finished with the estates (They're dead, remember?), the Birth Tax will
paid
by the living, most of whom aren't finished with their incomes.

3. While the "Death Tax" generally reduced the amount an estate would hand
to an heir (in other words, the heir's unearned income), the Birth Tax
reduces the amount of earned income a hard-working American will keep.

4. While the "Death Tax" went into the general fund to pay for things like
health care for the elderly and homeland security, the Birth Tax will buy
absolutely nothing.

5. While the "Death Tax" was paid only once, the Birth Tax will be paid
yearly and will likely increase yearly, forever.

6. While the "Death Tax" is traced back to Thomas Paine, a REAL American
patriot, the Birth Tax is given to us by pretend patriots, who proclaim
that
their love of America does not extend to funding America with their tax
money.

If the republicans in the House have their way, we employed Americans will
soon be enjoying our new Birth Tax. And we'll really enjoy knowing that
this
tax used to be paid by the very richest of estates after their former
owners
were finished with them, and that republicans decided to shift that burden
to the rest of us instead.

The moral of the story: Republicans value rich guys, even dead ones, above
all other Americans.

80. Iraqis Aren't Buying the "Liberation" Scam

For US troops in Iraq, safety vs. diplomacy

By Scott Peterson | Staff writer of The Christian Science Monitor

AL HASWA, IRAQ - Under the searing heat of Iraq's summer sun, water is like gold. So this weekend, when the mercury hit 110 degrees F., the US Army's 3rd Division rolled into town with 3,000 gallons of the liquid balm, hoping to bring relief to this village 15 miles west of Baghdad.

But there were few takers.

Wariness of this apparent good deed was written on the faces of the villagers as they stared from a distance. After all, tension with their occupiers has been high since 16 men from the nearby town of Fallujah were killed by US troops during protests in April, and house-to-house searches in
May were heavy-handed.

Finally, a group of children broke the stalemate, crowding around the soldiers as they worked the pump. A donkey cart carrying a bright blue 55-gallon drum and two small boys appeared, prompting a soldier to cheer: "Ah, the first customer!"

Amid the surge of lethal attacks against US troops in recent days, the work of the soldiers here in Al Haswa shows the tightrope troops walk as they balance security with trying to win the hearts and minds of regular Iraqis.

When the 3rd Infantry took over here June 3, men in the market shook daggers
at them when they passed. Nine soldiers had been killed in the previous week; none have died since. Children still throw rocks at passing patrols, attacks still occur, and on Friday night, a man spat out in angry English, "Leave!"

But the troops are trying to change perceptions. In addition to the daily water delivery, units operating around Fallujah are helping with repairs to schools and electrical facilities. They are also training and equipping Iraqi police, who received 200 new uniforms a week ago. The first group is to graduate from the US-run "academy" Tuesday.

Now a Bedouin family invites soldiers into their tent for hospitable cups of
tea. During a night patrol, a boy races on his bicycle beside the lead Humvee shouting, "I love you, mister. I love you!"

Still, that reception is far from the rule around Iraq, where a senior military official spoke on Saturday of the current burst of lethal anti-US attacks. "The first clear message is: 'This war is not over. It's not ended,' " he said. "All of us in uniform are targets, we're subject to being
engaged."

Paul Bremer, the US administrator of Iraq, told the BBC on Sunday that "unfortunately we will continue to take casualties." Some Iraqis, he said, "particularly remnants of the old regime ... [are] still fighting us. We will capture and, if necessary, kill them until we have imposed law and order on this country."

Troops are grappling with everything from abductions - the bodies of two soldiers who disappeared last Wednesday north of Baghdad were found on Saturday - to point-blank shootings, like the one that killed a soldier buying DVDs in a Baghdad shop on Friday.

While the Pentagon says the attacks are not militarily significant, for more
than 150,000 troops on the ground, stress levels are high, and the line between self-defense and overreaction is just razor thin.

"Technically, we've done what we came out here to do - provide a safe and secure environment and win hearts and minds," says press officer, Staff Sgt.
Antony Joseph about the Fallujah area, which has taken on a relative air of calm.

Commanders met local leaders to ask how to ease tensions that had seethed in
the aftermath of the killing by 82nd Airborne troops of 16 Iraqis in late April, and tough house-to-house searches in the weeks afterward.

While it may be calmer here, on the night patrol there is palpable tension. US troops say Iraqi attackers signal each other with flares. A red one signals a "soft" target is approaching; green means a hard target like a tank is on its way. Red and green together means the target is within 50 or 100 yards.

"If the lights in town blink, we either take a risk of an ambush and go in, or turn around and haul ... out of there," says Army Gunnery Sgt. Juan Carlos Cardona, as the patrol turns its headlights into the crowded village of Al Haswa. "One thing I've learned in this war, is to be alert 24 hours a day: Stay alert to stay alive."

Staying alive is what the Iraq war is boiling down to for many in the US armed forces, which has lost 22 men in recent weeks to a surge of guerrilla-style attacks.

The patrol feels by turns part occupation army, part vanguard of liberation.
While some jeer or remain stone-faced as the Americans pass, many Iraqis give a thumbs up and return Gunnery Sgt. Cardona's wave. That's a welcome

change for this division's 2nd Brigade combat team - the same unit that captured Baghdad during the "Thunder Run" in the first week of April.

Grinding into town at night, the three-vehicle patrol gently turn around when they come upon a wedding party that was taking up one lane of a road.

From inside a Humvee, behind the bulletproof glass and paper-thin canvas doors, gunfire can be heard. Several of the vehicles have been targeted by grenade and rocket attacks across Iraq. But the view from these armored vehicles is narrow. Entering Al Haswa, Cardona radios to his fellow patrolmen: "Keep your eyes on the rooftops, looking for a weapon. If you see
one, you know what to do."

Cardona and other soldiers admit that that job is far more difficult at night, when many Iraqis sleep on their roofs to keep cool. They are often drawn to the deep, clanking noise of a passing convoy, and race to the edge of their roofs to see.

Even with the troops' night-vision capability, correctly identifying weapons
is an inexact science. An American soldier in Baghdad last Thursday shot dead a 12-year-old boy on the roof of his house. The family says he was unarmed, according to the Washington Post; the military says it recovered a gun from the house.

In that context, convincing Iraqis that US troops are in Iraq to help them is an uphill battle.

A woman with three children - and a pushcart with six empty jugs - stood by on the opposite side of the road from the soldiers distributing water. When she finally crossed, she lost heart and walked right past the gushing fire hose. Finally the children, chanting their surprise and holding the end of the hose invitingly, convinced the woman to return for the water. After that, a trickle of Iraqis turned into a stream, keeping the spigot busy.

But that didn't keep many Iraqi men nearby from complaining. They suggested that the water should be delivered house to house - efforts that in past opened US troops to accusations that they were violating the private lives of Iraqi women at home.

The men also complained that the American presence had not kept Iraqis from "haphazardly" firing into the air during weddings - a tradition that no number of troops from any nation could prevent. "It's been three months, and
nobody has fixed the water pipes," says Jassim Mohamed, a laborer. "It would
take them half an hour if they wanted to do it."

Despite the complaints, some welcome the Americans. "We want more patrols in
the streets, and are relieved that they are here. We want them to live among

us," says Imad Abuziad Jassim, a welder. "We take care of these soldiers - they are under our protective wing."

The children, too, brought drums and sang and danced, getting one soldier to
clap and jump along with them. Spc. Hector Perez amused them by drawing cartoon characters on scraps of cardboard, while standing on the top of his ammunition carrier. "It's something to keep the kids happy," Specialist Perez says.

"Yeah," says driver Levi Molnar, "so they don't throw rocks."

81. Looting Trebles Iraq's Oil Sector Repair Bill. Cheney's Halliburton's makin' out like a bandit.

The U.S. Congress has authorized close to $500 million for repairs but USACE has just given Washington a damage estimate of more than $1 billion.

``We had to go back and inform everybody what the price tag is,'' said Loew.

``The policymakers in Washington are determining what sources of funds will be used for the rest of the work.''

Loew stressed the damage estimate is subject to much uncertainty.

``We know approximately what it is going to be and we'll work to make it less,'' he said, adding the $1 billion figure is over and above $280 million obligated to its contract with Halliburton unit Kellogg Brown & Root (KBR) to run oil facilities.

The USACE is re-tendering the KBR deal, which was awarded in mid-March in a no-competition bidding process.

It will stand until replaced by a competitive bid for a new contract.

``The KBR contract is being re-tendered as we speak,'' said Loew.

``Basically what is available to contractors will be whatever is not done at the point that contract is awarded,'' he said, adding the contract award is expected in mid-October.

Looting Trebles Iraq's Oil Sector Repair Bill

By REUTERS

Filed at 1:28 a.m. ET

BAGHDAD (Reuters) -

Looters and saboteurs running riot in Iraq have trebled the country's oil sector repair bill, slowing efforts to restart exports needed to fund Baghdad's postwar reconstruction.

Gary Loew, director of planning for the U.S. Army Corps of Engineers (USACE) Restore Iraq Oil, said rampant pillaging of Iraq's oil network now accounts for more than $800 million of infrastructure repair costs already in excess of $1 billion.

Yup. The dough's *really* pouring into Halliburton pockets. Bush should be gettin' a major, major campaign contribution from Cheney's company. And Cheney should be gettin' a big buck increase from Halliburton, doncha think? It's back-scratching time.

82. What will the next Bush-discovered Iraqi "WMD" turn out to be?

We've found the weapons of mass destruction!

Yes, after the shocking discoveries of unmanned drones which could barely get off the ground (let alone fly 6,000 miles to America) and the mobile bio-weapons labs which turned out to be balloon-inflating machines sold to Iraq by the British, the latest "bulletproof" evidence of weapons of mass destruction was laid out by the White House last week.

Apparently the CIA found some parts of a gas centrifuge under a rose bush in Baghdad last week after following a tip from Iraqi scientist Mahdi Obeidi.

And lo and behold, the White House claimed that this "bolsters" Our Great Leader's insistence that Iraq had a nuclear weapons program.

Or does it?

See, according to Mahdi Obeidi, he was ordered to bury the parts 12 years ago, "so as to be ready to rebuild the bomb program at some time in the future."

Now, I don't want to be contrarian here, but if the parts were still buried under the bush, doesn't this just prove that Iraq hadn't restarted it's nuclear weapons program?

Not only that, but shortly after the White House had a near-orgasm at the DISCOVERY OF parts of a centrifuge which, along with about 2,500 other centrifuges could one day be used to build A NUCLEAR DEVICE under a rosebush IN BAGHDAD where they'd been for the last 12 years, the International Atomic Energy Agency announced that this was not "evidence of a smoking gun" and in fact "the findings refer to material and documents of the pre-1991 Iraqi nuclear weapons program that have been well-known to [the CIA]."

Stay tuned for next week's episode: WEAPONS OF MASS DESTRUCTION are still nowhere to be FOUND.

In other news, two more American soldiers were killed today IN IRAQ.

FALLUJAH, Iraq, July 1 (IslamOnline.net & News Agencies) - Angry residents in Fallujah vowed revenge Tuesday, July1 , after ten people were reportedly killed in the main mosque which, witnesses said, was pounded by an American helicopter gunship late Monday, June30 .
According to the American Fox News channel and the Associated Press (AP), the death toll of the attack, which was earlier put at eight, mounted to ten people.
A U.S. helicopter had pounded Al-Hassan mosque in Fallujah, west of the capital Baghdad, on Monday night.
Eyewitnesses told Al-Jazeera channel they saw a U.S. helicopter gunship firing a missile at the mosque, where a number of worshippers were listening to a religious lesson.

Guerrilla war feared in Iraq

By Jonathan Marcus
BBC defence correspondent

The mounting casualty toll suffered by US and British forces in Iraq is a worrying reminder, both to their commanders and to their political masters back home, that the process of bringing peace to Iraq will take time and will have a significant cost.

The rash of attacks raises a number of fundamental questions about post-war security operations, with some analysts speaking of signs of a growing guerrilla war against the US occupation.

There is no doubt that attacks against US forces in particular seem to be mounting.

British troops, too, have had a bad week, with six men killed and eight injured in two separate incidents on Tuesday.

Undermining efforts

Opposition in Iraq comes from many sources.

Baath Party loyalists, Iraqi nationalists who oppose the invasion of their country, criminal groups and local war-lords and militias are all trying to carve out and protect their own turf.

As the experience of the British troops indicates, even relatively benign areas can suddenly turn dangerous

---

Bring our troops home NOW!

85. Iraqi elections? Naaaah sez Rummy. "Adolf Hitler was elected.

An astute observation by the Defense Secretary last week shed some light on the way the Bush administration views the electoral process and democracy in general.

Referring to the transition to a democratic government in Iraq, Donald Rumsfeld said "If you think about it, Adolf Hitler was elected. So elections are not the certain judge."

Well, that makes sense.

Iraq should probably give up on the idea of fair elections altogether, just like we have here in the United States.

Rumsfeld was, of course, referring to the difficulty of establishing a government in Iraq that wouldn't immediately

a) turn into a fundamentalist nightmare, and

b) get in the way of us walking off with their oil.

Which begs the question... shouldn't the administration have thought about this before they went in and took Saddam out?

Oh well, too late now.

86. SURPRISE!! As 2004 Nears, Bush Pins Slump on Clinton

As 2004 Nears, Bush Pins Slump on Clinton

By Dana Milbank

Tuesday, July 1, 2003; Page A11

With the start of his reelection campaign in the past two weeks, President Bush has revived his pastime of blaming his predecessor, Bill Clinton, for the economic recession.

"Two-and-a-half years ago, we inherited an economy in recession," he told donors at a Bush-Cheney '04 reception yesterday in Miami.

He has raised the same accusation in fundraising appearances since mid-June in Washington, Georgia, New York, Los Angeles and San Francisco.

It's a good applause line for a crowd of red-meat political supporters.

The trouble is it's a case of what the president has called, in another context, revisionist history.

The recession officially began in March of 2001 -- two months after Bush was sworn in -- according to the universally acknowledged arbiter of such things, the National Bureau of Economic Research.

And the president, at other times, has said so himself.

The bad news came on Nov. 26, 2001.

The NBER, led by an informal economic adviser to Bush, Martin Feldstein, pronounced that economic activity peaked in March 2001, "a determination that the expansion that began in March 1991 ended in March 2001 and a recession began."

At the time, Bush accepted the verdict with perfect accuracy.

"This week, the official announcement came that our economy has been in recession since March," he said in his radio address the next weekend.

"And unfortunately, to a lot of Americans, that news comes as no surprise. Many have lost jobs or seen their hours cut. Many have seen

friends or family laid off. The long economic expansion that started 10 years ago, in 1991, began to slow last year. Many economists warned me when I took office that a recession was beginning, so we took quick action."

Until the NBER's official pronouncement, Bush had avoided the "R" word.

He spoke earlier in 2001 of an "economic slowdown" as administration officials noted, correctly, that the pace of economic growth began to slow (but not contract) in 2000, under Clinton's watch.

"In terms of how you call it, what the numbers look like, we've got statisticians who will be crunching the numbers and let us know exactly where we stand," Bush said in October 2001.

"But we don't need numbers to tell us people are hurting."

Then, last summer, Bush revised his history of when the recession began.

Beginning in August 2002, he began to say that "we did, in fact, inherit an economic recession."

Addressing Republican governors in September, he declared:

"I want you all to remember that when Dick Cheney and I got sworn in, the country was in a recession."

In May of this year, Bush even gave the recession an official starting date three weeks before he took office, saying "our nation went into a recession, starting January 1 of 2001."

The source of this revision apparently was a July 2002 report by Bush's Commerce Department that the economy had contracted in the first quarter of 2001 by 0.6 percent.

But that was a quarterly figure that gave no indication when in the quarter the economy turned south.

Still, Bush used that to revise the NBER definition so that the economy was in recession "the minute I got sworn in" on Jan. 20.

Feldstein's NBER, which earlier said it gives "relatively little weight" to the quarterly growth figures from Commerce, is not joining in the revision.

Two weeks ago, it issued an updated report sticking by its assessment that the recession began in March 2001.

87. War Criminal Rumsfeld Denies Obvious Evidence That Iraq is Quagmire

Patriotic resisters of illegal occupation---believing they were liberated----now characterized in Rumsfeld disinformation campaign as "Baathists" and "terrorists in support of Saddam."

Rumsfeld Says Iraq No Quagmire or Guerrilla War
By Will Dunham

WASHINGTON (Reuters) - Defense Secretary Donald Rumsfeld said on Monday remnants of toppled President Saddam Hussein's government have coalesced into a "terrorist network" in Iraq, but rejected the notion that U.S. and British forces are facing a guerrilla war or are stuck in a quagmire.

During a Pentagon briefing, Rumsfeld compared the postwar situation in Iraq to the difficult path taken by the United States after declaring its independence from Britain and before establishing a new Constitution and electing a president.

Rumsfeld also accused some members of the news media, who he did not identify, of hoping Iraq becomes another Vietnam.

When a reporter identified the Vietnam War during the briefing as "your classic quagmire," Rumsfeld cut her off and said: "There are so many cartoons where people, press people, are saying, 'Is it Vietnam yet?' hoping it is and wondering if it is. And it isn't. It's a different time. It's a different era. It's a different place."

The U.S. military has launched numerous raids in recent days aimed at halting escalating attacks against the American and British troops occupying Iraq.

There has been a mounting death toll for U.S. troops since President Bush announced the end of major combat operations on May 1.

The Pentagon said 17 U.S. troops were killed by hostile fire in June. Since May 1, 65 American troops have died in Iraq, including 25 by hostile fire and 40 in a variety of vehicle accidents and other "non-hostile" incidents.

Rumsfeld said after the fall of Saddam's government, "remnants of the Baath regime and Fedayeen death squads faded into the population and have reverted to a terrorist network. We are dealing with those remnants in a forceful fashion. ... Those battles will go on for some time."

Rumsfeld said "no one raid or five raids is going to deal with the entire problem. The problem is going to be dealt with over time, as the Iraqis assume more and more responsibility for their own country." He said that "I really don't have a time line" for ending the U.S. presence in Iraq.

He said the problems in Iraq are being caused by five categories of people: remnants of Saddam's government; tens of thousands of Iraqi criminals released before the war from prisons; ordinary looters; foreigners who have entered Iraq; and "people that are being influenced by Iran."

Rumsfeld said these five groups "are all slightly different in why they are there and what they are doing," saying this trait "doesn't make it anything like a guerrilla war or an organized resistance. It makes it like five different things going on that are functioning much more like terrorists."

Rumsfeld said the United States faced "a period of chaos and confusion" in its early years, including a depression, rampant inflation, no stable currency and mob uprisings.

"It took eight years before the founders finally adopted our Constitution and inaugurated our first president," he said, adding later: "Were we in a quagmire for eight years? I would think not. We were in a process ... evolving from a monarchy into a democracy."

☐It☐s not fair to our troops to build a country that☐s not even ours
and our lives are at risk.☐

STAFF SGT. CHARLES POLLARD

"U.S. OFFICIALS need to get our [expletive] out of here," said the
43-year-old reservist from Pittsburgh, who arrived in Iraq with the
307th Military Police Company on May 24.

"I say that seriously. We have no business being here. We will not
change the culture they have in Iraq, in Baghdad. Baghdad is so
corrupted. All we are here is potential people to be killed and
sitting ducks."

Many of the soldiers in Pollard☐s unit -- homesick, frustrated and
miserable in heat that soars well into the 100s -- deem their mission
to reconstitute the force impossible.

"I pray every day on the roof. I pray that we make it safe, that we
make it safe home," Pollard said.

"The president needs to know it☐s in his hands, and we all need to
recognize this isn☐t our home, America is, and we just pray that he
does something about it."

Pollard is a 22-year veteran, and he had thought about retiring before
his Iraq tour.

"There☐s a rumor going around that we☐ll be here for two years," Spec.
Ron Beach said.

Others rolled their eyes and shook their heads.

Mistrust, misery in heat of Baghdad

Frustrated U.S. reservists see a mission impossible

By Anthony Shadid
THE WASHINGTON POST

BAGHDAD --

To Staff Sgt. Charles Pollard, the working-class suburb of Mashtal is
a "very, very, very, very bad neighborhood."

And he sees just one solution.

"U.S. OFFICIALS need to get our [expletive] out of here," said the 43-year-old reservist from Pittsburgh, who arrived in Iraq with the 307th Military Police Company on May 24.

"I say that seriously. We have no business being here. We will not change the culture they have in Iraq, in Baghdad. Baghdad is so corrupted. All we are here is potential people to be killed and sitting ducks."

☐THEY☐RE ARROGANT☐

To Sgt. Sami Jalil, a 14-year veteran of the local police force, the Americans are to blame.

He and his colleagues have no badges, no uniforms.

The soldiers don☐t trust them with weapons.

In his eyes, his U.S. counterparts have already lost the people☐s trust.

"We☐re facing the danger. We☐re in the front lines. We☐re taking all the risks, only us," said the 33-year-old officer.

"They☐re arrogant. They treat all the people as if they☐re criminals."

These are the dog days of summer in Mashtal, and tempers are flaring along a divide as wide as the temperatures are high.

Throughout the neighborhood, as in much of Baghdad, residents are almost frantic in their complaints about basic needs that have gone unmet -- enough electricity to keep food from spoiling, enough water to drink, enough security on the streets.

At Mashtal☐s Rashad police station, where Pollard☐s unit is working to protect the police and get the Baath Party-era force back on its feet, the frustrations are personal and professional.

Many of the Iraqi officers despise the U.S. soldiers for what they see as unreasonable demands and a lack of respect.

Many of the soldiers in Pollard☐s unit -- homesick, frustrated and miserable in heat that soars well into the 100s -- deem their mission to reconstitute the force impossible.

The Rashad station, where a new coat of paint has done little to conceal unmet expectations, is an example of the darker side of the mundane details of the U.S. occupation.

While perhaps not representative, it offers a grim, small window on the daunting task of rebuilding a capital and how the course of that reconstruction, so far, has defied the expectations of virtually everyone involved.

"I pray every day on the roof. I pray that we make it safe, that we make it safe home," Pollard said.

"The president needs to know it☐s in his hands, and we all need to recognize this isn☐t our home, America is, and we just pray that he does something about it."

Pollard is a 22-year veteran, and he had thought about retiring before his Iraq tour.

Now, he says, he doesn☐t know when he will return to his job at the maintenance department at a community college in Pittsburgh, and that uncertainty nags at him.

Asked when he wanted to leave, he was blunt:

"As soon as we can get the hell out of here."

This morning, in a dusty second-floor room with sandbags piled against the windows, helmets hung on nails over flak jackets and a sprawling map of Baghdad on the wall, Pollard☐s unit debated that question. Gossip swirled.

"There☐s a rumor going around that we☐ll be here for two years," Spec. Ron Beach said.

Others rolled their eyes and shook their heads.

"You can put me up in a five-star hotel, and I☐m not going to be here for two years," said Sgt. Jennifer Appelbaum, 26, a legal secretary from Philadelphia.

NO HOT MEALS

They started talking about what they lacked: hot meals, air conditioners, bathrooms a notch above plywood outhouses and something to do on their 12 hours off other than sweat.

Electricity is on one hour, off five. Staff Sgt. Kenneth Kaczmarek called his flak jacket an "Iraqi weight loss system" and said he had shed at least 15 pounds.

Pollard said he had lost 18.

Pollard☐s second granddaughter was born this month, but he hasn☐t been able to call home to learn her name.

Kaczmarek☐s daughter, Isabella Jolie, was born May 28 -- eight days after he arrived in Iraq as part of an advance team.

"It makes life miserable," Pollard said.

"The morale, it☐s hard to stay high with these problems."

Once largely undefended, Rashad police station -- 12 tiles missing from its blue sign -- has taken on the look of a bunker.

Two cream-colored, armored Humvees are parked outside; another Humvee with a .50-caliber machine gun is at the side.

Pollard said he wants barbed wire strung atop the cinder-block wall behind, and an engineering team is preparing to heighten the brick-and-cement wall in front. In coming days, he said, he would put sand barricades along the street outside the entrance.

Shots are fired every day at U.S. troops in Baghdad, and on Friday night, an ambush on a military convoy down the road killed one soldier and left at least one other wounded.

As Pollard recalled, the blast shook the entire block.

He said he suspects everyone.

Two Iraqi journalists, one with a camera, visited two weeks ago, and he was convinced the men were casing the station.

He once sat at a desk outside, then moved indoors.

"Let the Iraqis guard the gate," he said, next to a sandbagged window.

The way Pollard sees it, the Iraqi police should be taking the risks, not his 13 reservists at the station.

"It□s not fair to our troops to build a country that□s not even ours and our lives are at risk," he said.

"They□ve got to take control. They may have to kill some of their own people to make a statement that we□re back in control. No doubt."

For the most part, the Iraqi police and Pollard□s soldiers say little to each other -- and even then it□s done through interpreters.

The Iraqis dislike Pollard, and he has little regard for them.

The neighborhood is dangerous, he said, and fighting crime here might require twice the 86 police officers they still have.

But of the 86, he said, at least half should be dismissed for corruption or ineptitude.

□A CROOKED COP□

"This is a crooked cop sitting here," he said, pointing to a major who didn□t understand English.

He walked through the station, leaning into a room with two officers busy at a desk.

"Here□s a room where they□re acting like they□re doing real important paperwork," he said.

He walked outside to a balcony where three officers were sitting on newspapers and a green burlap sack, one with his shoes off.

"This is a couple more lazy cops, sitting down when they should be outside," he said.

They all greeted Pollard with cold stares, forgoing the traditional greetings that are almost obligatory in their culture.

Near an iron gate, where residents gathered in hopes of filing a complaint, Shoja Shaltak, an Iraqi lieutenant, brought a brown folder with an order from a judge to release three men.

Pollard suspected a bribe.

"Tell him he can go, go, go," Pollard said to an interpreter.

"I don□t jump at their requests."

The lieutenant protested, insisting that the order came from a judge.

The interpreter, Ziad Tarek, answered on his own.

"The judge has nothing to do with this anymore," Tarek told Shaltak.

He pointed to Pollard, "He□s the judge now."

Jalil, the veteran Iraqi policeman, watched with disgust.

"It□s embarrassing. It□s embarrassing for us and for the lieutenant," he said.

"We are police and they don□t respect us. How is it possible for them to respect the Iraqi people?"

His complaints were aired by virtually all the station□s officers:

They don□t receive the flak jackets the Americans wear, they have to check out rifles from the soldiers, they have no uniforms, they have no badges and they don□t like Pollard.

Asked if he was afraid to go on patrol, Jalil shot back angrily, "The opposite."

"They□re the ones who are scared," he said.

"I□m ready to go out alone, but they should give me the equipment."

Jalil said he was so frustrated that he planned to quit in days.

He said he can□t support his parents, wife and 8-month-old daughter on a salary of $60 a month.

He spends half of that on daily lunches and the 30-cent fares for a shared taxi to and from work.

With water in short supply or of poor quality, he buys a bottle of mineral water every two days for his daughter -- a cheap variety but still another 50 cents.

Sewage floods daily into his home, where four families totaling 30 people share six rooms.

And, with electricity running no more than six hours a day, Jalil worries that his daughter will become ill from the heat.

"The truth has become apparent," he said.

"The Americans painted a picture that they would come, provide good things to the Iraqi people, spread security, but regrettably" -- his voice trailed off.

"Iraqi people hate the Americans," he said.

The one thing on which everyone agrees is that Mashtal is a tough neighborhood. Gunfire crackles at night.

A chop shop is down the street. Parked outside the station are six stolen cars recovered by the police.

Kaczmarek called it "Chicago in the □30s" and said he saw someone the other day toting a tommy gun.

Jalil called murder the easiest crime to commit.

Last week in his neighborhood, an Iraqi hit his 28-year-old ex-wife with a bicycle, then, as she lay on the ground on a hot afternoon, shot her in the face with an AK-47 rifle.

"People just watched," Jalil said.

"If they interfered, they would be killed, too."

Outside the police station□s gate, Qassim Kadhim, a 30-year-old day laborer, had been waiting for hours to report a stolen motorcycle.

On Thursday, three thieves broke into his house, a two-room shack where he lives with his wife and four children.

He said he knew who they were, and when he went the next day to confront them, one of them beat him with a rifle butt.

He still had a black eye.

"There□s no security, there□s no stability in Iraq," he said.

"I swear to God, things are going to get worse."

MISSION IMPOSSIBLE!

Whichever is the case, the remedy to guarantee that Ham Radio
remains the preserve of Radio Hams and not as CBers-masquerading-
-as-Radio-Hams is to increase the proportion of CW QSO's, to refuse anything
other than CW for DXCC, and for all contests to become CW.

By this means, all those who spent their time whingeing rather than
proving their devotion to Ham Radio will be forced to learn CW at
a respectable WPM rate anyway.

Whatever the Irrelevancies, sorry, Governments, of the world will
decide to impose as the licensing conditions of Ham Radio, what is Ham Radio
itself will be determined by Radio Hams.

We have it in our power to decide who have qualified and are welcome as
Radio Hams,
and who are just CBers, although they may be masquerading with a licence.

IT'S NOT TOO LATE TO STOP THE ROT.

http://www.cnn.com/2003/US/06/30/sprj.irq.iraq.poll/index.html

Poll: Support for Iraq war slipping

WASHINGTON (CNN) --

As a new poll shows Americans are taking a dimmer view of U.S.-led coalition efforts in Iraq, Defense Secretary Donald Rumsfeld said Monday that the fighting there would continue "for some time."

Only 56 percent of Americans view the current fighting as going well in Iraq, according to a new CNN/USA Today Gallup poll.

That is much lower than the 70 percent in late May and the 86 percent in early May who thought the fighting was going well.

The poll has a margin of error of plus-or-minus 3 percentage points.

You pathetic little whiner. You brought this on yourself in message ID:

CCFMa.5768$eW6.1836@fe03.atl2.webusenet.com

Someone was trying to get rid of the trolls in the rec.radio groups by identifying them and preventing people from needlessly responding to them. You took it upon yourself to complain to his news service provider when all he was trying to do was cut down on the clutter in the group.

You got what you deserved netcop. Don't come crying for help now.

ANOTHER CRYBABY. BOO HOO! THE ESTATE TAX WAS TAXING MONEY THAT HAD
ALREADY BEEN TAXED. IT WAS WRONG. HOWEVER, I BELIEVE THIS COUNTRY
SHOULD HAVE MUCH HIGHER INCOME TAX RATES FOR THOSE MAKING THE BIG
BUCKS.

99. Re: Bush Wants to End Overtime Pay as We Know It

Overtime pay is a JOKE in too many cases. I have witnessed government workers working SLOW all week just so they can work overtime and get more money. I say STOP OVERTIME PAY. PERIOD. If a person can't get a days worth of work done in a day, they need to find another job. If there is more work to be done, then more employees need to be hired, NOT pay those already working HIGHER wages to work overtime. Those working overtime have less time to relax; therefore, they produce less during the week. Those supporting overtime are ONLY doing so because they want to bilk their employer out of all the money they can.

CRYBABIES!

All K1TP does now is run pictures of naked women. No radio news anymore, just garbage. It's time he hung it up as a serious news source for Amateur Radio. He has no self respect with the trash he shows and he is no friend of the Amateur. I'll bet his XYL doesn't know about the pictures he posts for the world to see and I'm sure the rest of his family would be shocked to know it.

What a dumbass!

If you are so concerned with a serious news source for amateur radio, you wouldn't be reading Jon's webpage. It's a spoof, get over it asshole!

Boy, it certainly does take some logical contortions to blame W for a crisis that took place entirely on the watch of Democratic leadership. Let me get this straight -- Enron's ascendancy took place entirely under the Clinton administration; it reached the apex of its political and financial power under Clinton; it failed under a Republican government which ignored entreaties to intervene made by Clinton's Treasury Secretary. And somehow Bush is to blame?

For the record, "deregulation" as such was not the cause of California's problems. True deregulation was never given a chance to work in that state -- why else should it have gone off without a hitch in other regions of the country? This is merely an excuse by Democrats - Davis in particular - looking to deflect attention from their own ineptitude.

California's problems were a consequence of a flawed market structure designed by their state legislature and enacted by Gray Davis. This mechanism prevented utilities from signing long-term supply contracts, forcing them to rely on the volatile spot market to cover shortfalls. Further complicating matters was the actual lack of new generation; in ten years not a single new plant had been built in California.

Scheer drops the Energy Policy Act in there, "signed into law by the elder President Bush," but neglects to mention the principal author of this far-reaching (and utterly benign) law (http://www.raponline.org/Pubs/IssueLtr/EPAct92.pdf) was a Democrat; namely, Senator J. Bennett Johnston, then chairman of the Energy and Natural Resources Committee in the Senate. What's so unseemly about a law chiefly concerned with controlling emissions and promoting energy efficiency? Scheer is not concerned with such trivialities -- Lay lobbied for it, some Bush signed it -- thats good enough.

The deregulation endorsed by the CFTC under Wendy Gramm chiefly concerned CFTC oversight of over-the-counter energy derivatives; principally swaps and options. How this all-but-inevitable ruling helped ruin the California power market is left for the reader to decipher, assuming he cares one bit for detail. These unregulated instruments continue to be used in pretty much all commodity and financial markets to constructive effect.

Gay communion

Can the worldwide Anglican church survive the developing schism over whether it should accept the ordination of homosexual clergy?

Stephen Bates
Tuesday June 17, 2003
The Guardian

A funny thing is happening within the Anglican communion. It is threatening to tear itself apart over a handful of people who live in monogamous, stable, long-term, loving relationships and are sufficiently religiously observant to want the church to bless them.

Ideal couples, then, for a church desperately seeking support, you might think. But they are, of course, gay and therefore, in the words of one Anglican archbishop, an abomination.

While the rest of the world considers weightier matters of life and death, the church has converted an issue most of the western world now regards as a private and personal matter into an obsession. Not for the first time, the church's moral censure leaves it in danger of seeming irrelevant - even bigoted - to outsiders of the sort it hopes to attract to its emptying pews.

Many religions have an issue with gays. Cardinal Francis Arinze, seen by some as likely to become possibly the first black pope, was booed at Georgetown University in Washington last month for suggesting that homosexuality, along with other sexual sins such as adultery and divorce, mocked the family. Cardinal Cormac Murphy-O'Connor, who turned a blind eye to a paedophile priest for years, intervened to prevent a bishop conducting a private blessing for the director of Cafod, the international development agency, and his long-term partner.

But it is the Anglican church which is most obsessed with what gays get up to in the privacy of their bedrooms. Since biblical references to homosexuality are scattered and, as far as the New Testament is concerned, solely to be found in the writings of St Paul, one might think it scarcely of all-consuming importance. If Jesus Christ mentioned the subject, none of the gospel writers bothered to note it.

The row is, however, as much about power and authority as sex. During the past 20 years the Anglican communion has attempted to cobble together a painfully achieved compromise to hold its various wings together. The current position is that while gay communicants can be in a relationship, ordained clergy may not - an illogical recipe, on the

face of it, for hypocrisy, deceit and double standards.

In this moral fuzziness, homosexuality has been seized by a group of evangelicals as an easily explicable issue to enthuse and infuriate supporters alarmed by liberal trends within the church. It is becoming, in the words of one commentator, the anti-semitism of evangelicalism.

Despite being the most vibrant section of the Church of England, some evangelicals fear the church is drifting away from them. They have not succeeded in energising England for Christ and some take refuge in a Manichaean struggle for the soul of the church instead.

Their fears were amplified by last year's appointment of Rowan Williams, known for his liberalism towards gays, to succeed the evangelical George Carey as Archbishop of Canterbury. Since Williams is an orthodox and subtle theologian, and an attractive figure to the outside world, his evangelical opponents have struggled to undermine him.

Like most theologians, Williams believes that the Bible has to be interpreted. A text written over hundreds of years for hugely different societies cannot be taken entirely at face value, though for some evangelical fundamentalists, biblical literalism can take surprising forms: the English Churchman - a Calvinist, Paisleyite publication - this week carries a justification of slavery, describing it as "a form of social security for which many starving people today would be grateful".

The evangelicals have some grounds for fearing they are on a slippery slope. The weekend before last, at a service in Concord, New Hampshire, parishioners of the local diocese of the Episcopalian church - the North American branch of the Anglican communion - elected an openly gay bishop, Gene Robinson.

That followed an authorised blessing service the weekend before for a gay couple in Vancouver. It preceded an outbreak of anguish here over the appointment of a gay rights campaigner, Canon Jeffrey John, to the suffragan bishopric of Reading. Several bishops called for John to stand aside and the church's Evangelical Council, insisting it was not "homophobic", said the bishop's consecration should not proceed.

Even more alarmingly for church leaders, Peter Akinola - archbishop of Nigeria and head of the largest single church in the Anglican communion - has denounced Bishop Robinson's appointment as an abomination.

This is the cost of the Anglican communion seeking to maintain an increasingly spurious unity among 70 million communicant members from vastly differing cultures, lifestyles and attitudes.

The church has for generations accommodated differing worship styles and churchmanship. Diversity has always been seen as a strength and safeguard against dogmatism. This is now under threat: a problem compounded by the fact that the third world church has the numbers - 17.5 million in Nigeria alone, a quarter of the entire communion - while the west has the money.

By and large, Church of England bishops have been conspicuous by their reticence in leading the debate or backing their archbishop. They are crossing their fingers that the row can be contained. The fact that the story has caused barely a ripple in the outside world should be a source of consolation.

BBC's teletext service reports that for the first time Gay Police Officers have been given permission to parade in police uniform at the annual Gay Pride march in London on Saturday, July 26th 2003.

"Officers have attended the event before but have had to wear civilian clothes.

The Gay Police Association said that this will send an "unequivocal message" that it is "perfectly acceptable" for officers to be gay and in the police service.

However, a minority of forces are still refusing to allow gay officers to wear uniform at the march."

In the week prior to Pride, Mardi Gras, Curzon Cinemas and Millivres Multimedia have organised a film festival, offering a mix of recent multi-sexual themed films to help celebrate 30 years of Pride.

The route of the march this time is a reversal of last year's, starting at the Victoria Embankment, past the Houses of Parliament and Downing Street, through Trafalgar Square, and on to Picadilly to finish at Hyde Park.

GAY BISHOPS: WHAT'S WRONG WITH THAT?

The Anglican church is on the brink of a 'worldwide split' over the question of allowing gay clergy. The Anglican church in Africa has even threatened to separate from the Anglican church in Britain and America if they continue to allow homosexual priests and Bishops.

Christians ignore almost every other teaching in the Bible, so what do they have against homosexuals? When Christians argue that the Bible forbids homosexuality, this is not only hypocrisy, it is also disgraceful bigotry. They are picking and choosing the parts of the Bible that suit their own hateful and divisive beliefs, while ignoring the rest of the scriptures.

In the Bible God strictly and specifically forbids charging interest on a loan (Ex 22.25), and especially the repossession of property by a lender (Ex 22.27), but this happens every day so why don't Christians complain about this abomination too?

"If you lend money to my people, to the poor among you,
you shall not deal with them as a creditor; you shall not
ask interest from them." (Exodus 22:25.)

"...lend, expecting nothing in return." (Luke 6:34-35).

There are literally thousands of examples of laws found in the Bible which most Christians totally ignore, and many Christians are not even aware of these laws. So why stop at banning homosexuality? Unfortunately, a Christian's knowledge of scripture is typically limited to the same selected readings which are repeated year after year in their Church, and few Christians ever bother to learn about their religion for themselves. These are the only once-a-week Christians who are all that is left of the original tradition started by Jesus Christ two thousand years ago; like 'Sunday drivers', these people are 'Sunday Christians'.

If you want to know why the Church is dissolving, and why the society we live in is becoming increasingly secular, perhaps it's time you found out about the Latin motto found on the US official Great Seal and printed on every one dollar bill: Novus Ordo Seclorum - the New World Order, or the Secular New Order.

The New Secular Order

Gay bishop dispute grows
Conservative and evangelical Anglicans will meet the Bishop of Oxford on Friday in a final attempt to persuade him not to appoint a gay priest as a bishop.
[http://news.bbc.co.uk/1/hi/uk/3005552.stm]

Row over sexuality splits church
For many in Europe and North America, sexuality is no more a matter of choice or morals than anything else we are born with, like hair colour or facial features.
The insistence of some Christians on understanding it in the light of 2,000-year-old scriptures strikes them as puzzling and largely irrelevant.

As I type theres a prog on R4 about a Spanish priest who came out...

The Citizens
Paul Henley presents the fourth of a series of profiles of five extraordinary Europeans, individuals whose actions or creativity have made a difference to the people of their country, and sometimes beyond.

Today, Paul meets Jose Mantero who was a popular parish priest in southern Spain until he gave a candid interview to a gay magazine. It may be an open secret that there are many homosexuals in the priesthood, but admitting that is one of the Roman Catholic Church's greatest taboos. One outraged cardinal described Mantero's confession as, 'A septic boil on the face of the Spanish church.' Not surprisingly, Mantero was sacked last year, but he still has the support of most of his flock.

Unfortunately I can't see either a repeat date or a listen again on the web opportunity.

Evangelicals try to oust gay bishop

Stephen Bates, religious affairs correspondent
Monday June 9, 2003
The Guardian

A delegation of evangelicals from the diocese of Oxford is to meet the bishop, Richard Harries, tomorrow to try to force the rescinding of the appointment of the first openly gay bishop in the Church of England.

The row over the appointment of Canon Jeffrey John as suffragan bishop of Reading comes as Episcopalians in New Hampshire elected Gene Robinson, the first openly gay bishop in the US, at the weekend, and follows the first authorised blessing service for a gay couple in the Canadian diocese of New Westminster a fortnight ago.

African and West Indian church leaders, who have threatened to split the church if the appointments are not withdrawn, are being joined by evangelical bishops in Britain, concerned over the appointment of Dr John, who is the chancellor and canon theologian of Southwark.

Peter Akinola, the primate of Nigeria, the largest single church within the 70 million-strong Anglican communion, last week said the appointment would increase divisions and called on Rowan Williams, the Archbishop of Canterbury, to withdraw it.

The appointment is an early challenge to the archbishop, who is sympathetic to the position of gay members of the church but has said he will uphold the church's position and criticised the Canadian blessing. Dr John, who has admitted to having been in a 20-year relationship, has told the Bishop of Oxford he has been "sexually abstinent for a considerable time". He will also uphold the church's position.

Bishop Harries told his diocesan synod at the weekend there was "cruel homophobia" within the church and that he had decided to appoint the canon because he had the appropriate qualifications. "I was faced with a clear issue of principle. Jeffrey, I judged, has the gifts for the job."

how come that so many of the large dance events are
on the same days as large pride events? do they wanna
keep us faggots from those parties? a few examples:
god's kitchens global gathering (in stratford-upon-avon?)
is on the same day as london pride (july 26th). creamfields
(in liverpool) is on the same day as europe pride / mardi gras
(manchester) (august 23rd). amsterdam pride is the same
day as holland's most famous dance festival - dance valley.

anybody got any other dates for large dance events?
homelands? any other events i should know of?

I've been trying to find out if this year's shenanigans in Hyde Park might inhibit our usual picnic. So far the lack of any detail whatsoever makes it impossible to judge.

However it seems likely that the area taken up by Muddy Grass, renamed Pride in the Park, will be that at the North Eastern part of Hyde Park usual for such events.

Failing any better information I suggest that we assume that the big noise is unlikely to spill over physically (I make no assumptions about aurally [that's AUral. Ed]) into Kensington Gardens and that we may go ahead in our usual manner.

So I propose a picnic in the park at The Queen's Temple (aka Queen Caroline's Temple or Temple Lodge depending on map) with all our usual arrangements. ie all welcome and for a consideration I will cater for those not wishing to carry soggy sarnies on the march.

Anyone with any pertinent information please let me know soonest and unless any let or hindrance be shewn thereto I shall revise and publish the web pages appropriately. (Thank you - but I always mend my own.)

128. Bush: Too early for amendment banning gay marriages

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:10:00 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <727L21TA37806.0474537037@Gilgamesh-frog.org>

WASHINGTON, July 2 (AFP) - US President George W. Bush on Wednesday opted
not to come out in favor of a constitutional amendment banning homosexual
marriages, saying it was too soon to say whether one was needed.
"I don't know if it's necessary yet. Let's let the lawyers look at the full
ramifications of the recent Supreme Court hearing. What I do support is a
notion that marriage is between a man and a woman," he said.
The debate has flared up since the highest court struck down state sodomy
laws, and following Canada's announcement that it would legalize gay
marriages, which would be available to Americans who cross the border.
Senate Republican Majority Leader Bill Frist, a close Bush ally, said in a
televised interview this weekend that he "absolutely" supports passing an
amendment defining marriage as being between a man and a woman.
Two thirds of both houses of the US Congress must approve the measure,
which then needs support of at least 38 of the 50 state legislatures to take
effect.
US law already defines marriage as between one woman and one man for
federal purposes, and allows states to decide not to recognize same-sex
marriages performed in other states.
No US state currently allows gay marriage, but the northeastern state of
Vermont allows civil unions for same-sex couples.

129. German government wants monument for gays persecuted by Nazis

BERLIN, July 2 (AFP) - Germany's centre-left coalition government has submitted plans to erect a monument to homosexuals persecuted under the Nazi regime, officials said on Wednesday.
Johannes Kahrs of the Social Democrats (SPD) and Volker Beck of the Greens said their parties had submitted the proposal to parliament.
"We want to honour the persecuted and slain victims, uphold the memory of the injustice and send a lasting signal against intolerance, hostility and discrimination against gays and lesbians," they said in a statement.
The idea of a monument was enshrined in the coalition agreement drawn up by the SPD and Greens after their re-election last September.
Historians estimate that about 100,000 homosexuals were arrested under Adolf Hitler's 1933-1945 regime, about half of whom served prison terms.
Up to 15,000 are believed to have been sent to concentration camps.

130. Gay modelling agencies?

Hello,

Can anyone let me know if there are any UK based gay modelling agencies. I would be most appreciative of any replies.

Cheers,
Paul.

131. gay pride & dance festivals

how come that so many of the large dance events are
on the same days as large pride events? do they wanna
keep us faggots from those parties? a few examples:
god's kitchens global gathering (in stratford-upon-avon?)
is on the same day as london pride (july 26th). creamfields
(in liverpool) is on the same day as europe pride / mardi gras
(manchester) (august 23rd). amsterdam pride is the same
day as holland's most famous dance festival - dance valley.

anybody got any other dates for large dance events?
homelands? any other events i should know of?

132. Wal-Mart: Policy to protect homosexuals

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:10:01 UTC

SEATTLE, July 2 (UPI) -- Wal-Mart Stores, the nation's largest private employer, has expanded its anti-discrimination policy to protect gay and lesbian employees.

The decision was hailed by gay rights groups, as a sign of how far corporate America has come in accepting gay employees, The New York Times reports.

The decision was first disclosed by a Seattle gay rights foundation that had invested in Wal-Mart and lobbied the company for two years.

The Pride Foundation and investment management firms holding stock in Wal-Mart had met as shareholders with company officials to discuss the policy.

Wal-Mart officials confirmed the policy change Tuesday but said that while the foundation played a role, the most important factor in the decision was a letter from several gay employees that said without the change the employees would "continue to feel excluded."

133. Commentary: The sad, silly sodomy saga

NEW YORK, July 2 (UPI) -- I think people just like saying
the word "sodomy."
It's such an old-fashioned word, the only place it's ever
used is in court. And since it derives from the Bible, it's fraught
with vivid associations. We don't know EXACTLY what they were doing
in Sodom and Gomorrah, but we know the reality TV show would have
been too hot for pay-per-view. And while we're on the subject, why
is Sodom singled out? Why are there no laws against gomorrism?
Rarely has a Supreme Court decision meant so little, and
rarely has the reaction to it meant so much. I was surprised so many
media commentators could be so deathly serious about the subject,
and yet never tell me exactly what John Geddes Lawrence and Tyron
Garner were arrested for. There are many ways to commit sodomy --
two of them in particular compete for popularity -- and I had to
read way down into the fine print of Justice Kennedy's opinion to
find out what the popular positions are in Houston.
You don't even know -- do you? -- because you've been
watching
CNN.
It was anal sex.
My first reaction to the decision was, "Uh, didn't we
already take care of this 20 years ago?" I know I've been
reading op-ed pieces about it for at least that long.
Do we really need the Supreme Court to clean up morals codes
that, if left alone, would probably fall off the books of their own
dead weight? Remember when they had miscegenation laws?
Alienation-of-affection laws? Modernity has a way of marching
through the penal code and just making that stuff dry up and flake
away like dead skin.
After all, before 1961 there were 50 states with sodomy
laws. By the time of Bowers v. Hardwick in 1986 -- the case that
upheld sodomy laws -- we were down to half that number. And before
last week, there were 13 states with sodomy statutes, and only four
of them were homosexual-only, the largest of which was my native
state of Texas. Obviously the enthusiasm for seeking out sodomites
was dying a slow death.
This might be the point, by the way, to discuss the Sandra
Day O'Connor flip-flop. For those of you who were trying to figure
out her batty-as-a-loon position -- she voted for sodomy laws in
1986 and against them in 2003 -- her logic was as follows. She
thinks the only good sodomy laws are the ones in the nine states
that forbid it for both homosexuals AND heterosexuals. That way
everyone has "equal protection." So presumably if a patriarch of the

Presbyterian church was brought up on charges of using a French tickler on his wife, she would vote to uphold his conviction -- just as long as they were rounding up gays on the same charges.

The real perspective on the case came in the middle of Justice Scalia's dissent, where he casually tossed out the fact that, in colonial times, four people were EXECUTED for sodomy in America.

First of all, I hope somebody saved the transcripts on those trials, because that had to be some seriously kinky sex. But second, what illustrates better that relying on precedent in a case like this is pretty much an exercise in barbarism? We're so removed from the Puritan moral codes at this point that we can't even CONCEIVE of a capital crime on morals grounds alone.

But that doesn't answer the basic question, which is: How does a case like this end up before the Supreme Court in the first place? Wouldn't this normally be something handled by the Housekeeping Committee in the state legislature -- the guys who make sure all the duelling laws are taken off the books, and that it ceases to be a crime if you ride your horse on Sunday?

The only person who appeared to be having fun with it was the Chyron operator on CNN. The Chyron is the machine that makes all the little captions at the bottom of the screen, like "Dead Cats in Denver" and "Laci Peterson Gag Order" and "Shoe Mogul Files Chapter 11." On the day of the Supreme Court decision, they kept showing a group portrait of the entire court, in their long flowing robes, and underneath it a Chyron line that read "SODOMY DECISION." But the operator had put the word "sodomy" ABOVE the word "decision," so that "decision" was occasionally covered up by other graphics at the bottom of the screen. Hence we were treated to a very distinguished panel labelled "SODOMY."

I called up my friends immediately. "I think they're asking us to guess which Justice is most likely to avail himself of the liberalized sodomy statutes."

Study their faces carefully. One of them was absolutely beaming with delight, as though he had a guilty little secret, but I won't embarrass him because he was one of the three dissenters.

At any rate, Chyron shenanigans aside, this was a day for apocalyptic predictions and triumphant proclamations.

Moralists predicted that the decision would quickly lead to legalization of incest, bigamy, bestiality, polygamy and prostitution. Ken Connor, president of the Family Research Council, even said the ruling was "classic judicial activism arrogance."

Conservatives angry at THIS court? Wow. That's angry.

The people on the winning side were just as grandiloquent in THEIR predictions, though. This was the first step toward legalization of same-sex marriage, as well as guaranteed partner benefits for gay couples, universal gay adoption rights, and parental rights for gays who father children or share sperm or use their brother's donated sperm for a lesbian live-in or whatever other combinations they're able to dream up.

You know what, though? I don't think so. How do you go from saying "The cops can't throw you in jail because they accidentally glimpse you in flagrante aardvarkus," to "Okay, I guess the door's wide open now -- sex with Great Danes is fine with us"? That's just not gonna happen, if for no other reason than that the animal-rights activists would throw a fit.

As for same-sex marriage, the court was silent on the issue. The decision makes no reference at all to whether John Geddes Lawrence and Tyron Garner were a couple or not. They could both be married to women and their sexual behavior would still be protected by the decision, because the only criteria used were that a) they were adults, b) they were consenting, and c) they were doing it in private.

In fact, the most interesting part of the decision was the tortuous and confusing way that Justice Kennedy explained why the court was reversing its decision in the 1986 case. Presumably there's got to be some HUGE change for the Supreme Court to overrule itself, and the court in 1986 had said this: "Respondent would have us announce . . . a fundamental right to engage in homosexual sodomy. This we are quite unwilling to do."

So I kept looking for the paragraph in the decision where the new court says, "Homosexual sodomy is a fundamental right. We are quite willing to make it one."

But they don't really say that. What they say instead is that the "due process" clause means you can do anything in the bedroom you want, no matter how disgusting somebody else thinks it is.

Okay, but here's the problem. Due process is supposed to apply to "fundamental rights." And fundamental rights, as Justice Scalia points out in his dissent, are supposed to be rights that are "deeply rooted in this nation's history and tradition." If it's something that falls short of a fundamental right, then it can still be limited by statute --a nd then the Supreme Court is duty-bound to keep its hands off of it.

So the question becomes: Is sodomy deeply rooted in this nation's history and tradition?

Justice Scalia says no it's not, because otherwise we wouldn't have had 300 consistent years of laws against it.

To which I say, if you need to tell people for 300 years to stop having anal sex and they KEEP DOING IT, then it's pretty durn firmly rooted in the nation's history and tradition. What we should do is find those four guys from colonial times who sacrificed their lives for sodomy and commission a statue on the Washington Mall. It could be one of those cool George Segal-type statues like they have in Greenwich Village, with the gay guys clapping each other on the shoulder -- but wearing Plymouth Plantation garb, of course.

Let me explain this case. It's simple.

John Geddes Lawrence and Tyron Garner are two of the unluckiest guys on the face of the planet. They were going at it one night --let's imagine they had soft lighting and incense

and their moods were euphoric -- but, unbeknownst to them, the Harris County police received a report of a "weapons disturbance" in their apartment building.

First unlucky fact: they forgot to lock the door. Second unlucky fact: the investigating cops were so gung-ho that they just barged in. Third unlucky fact: our two lovers were so oblivious to outside influence that they continued to shag even after the police entered the room. Fourth unlucky fact: one of the cops was such a good student at the police academy that he actually REMEMBERED the sodomy statutes, which hadn't been enforced for so long the state of Texas can't come up with a single other case that resembles this one. Fifth unlucky fact: the cop is such a total Boy Scout that he decides to make an actual arrest. Sixth unlucky fact: the cop's captain lets the charges go through. Seventh unlucky fact: the judge fails to throw the case out.

Because let's face it -- how many YEARS could go by before another gay couple was seen having sex in the privacy of their own bedroom by a duly constituted peace officer? I think 50 would be a good rough estimate -- and the law would have been erased by then anyway.

So the Supreme Court sped up time a little bit. Let's not get all bent out of shape about it, and let's not make too many claims about what an earth-shattering precedent it is. I like to think of it as a lexicological exercise. We get to be the last people in human history to use the word "sodomy" in daily life, before it becomes one of those words in the Oxford English Dictionary denoted "archaic, obsolete."

Sodomy sodomy sodomy.

See? It's fun, isn't it?

134. Bush: Too early for amendment banning gay marriages

by Mark Segal

PGN Publisher © 2003 Philadelphia Gay News

What does Gay pride mean to you?

When I hear those words, they take me back to my New York City days and an organization known as the Christopher Street Liberation Day Committee. That was the root of our Gay pride heritage.

In 1970, those of us involved in the fledging Gay Liberation Front NY thought there should be some type of commemoration of the Stonewall riots the previous June. Others in the group, as I recall, thought that we shouldn't celebrate riots. We in GLF were nothing without our disagreements. So a new organization was formed to create some form of remembrance.

That is how the first Gay pride march in New York City began. I still have the stickers that we used to promote the event. As we approached that first march in June 1970, we didn't know what to expect. Would people come to march? Would homophobes battle us as we marched toward Central Park? We even had self-defense classes for our marshals at Alternate U.

The day of the march, we gathered on Christopher Street. So did the police. They thought that they could still boss us around. At one point the police didn't like the way we were blocking the street. So they tried to move us. At that point I decided it was time to tell them where to get off. No I wasn't brave; there were a few thousand of us there at the time, and the reason we were blocking the streets was that we were simply an over flowing crowd.

But more simply, I could count, and obviously, they couldn't, since I had the numbers on my side. I simply went up to the blue suit in charge and said very loudly: This is our day and our street. We will do this as we planned. There was lots of applause and shouts. The suit went his merrily away. A side note: I would have forgotten all about what I just wrote if almost the same thing had not happened again in February 2002 at Sylvia Rivera's funeral - at almost the same spot outside the Stonewall - when the carriage carrying the minister during the funeral procession was blocking the interception.

Again, a police officer said, "Hey move it along," and I basically did my same routine. Doug Carver - or was it Jerry House? - reminded me of the above incident, and added "It's nice to see that time hasn't changed you any."

Back in 1970, it was time for us to get our crowd and move on. We did. We were so busy during the march that I didn't get a chance to look back at the crowd until we got to 57th Street. Just writing this sends chills up my back: When I climbed on a light poll at 57th Street I literally could not see the end of our parade. Up to that point, we activists thought we were alone. But we learned that our community thought as we did. That was the day I realized we were a community, and that one doesn't have to be an activist to have pride.

I hope you can join me and thousands of others June 8 to celebrate our pride. Once again, I know it will be a special day with special friends and from what I understand, a few pride surprises.

Happy Gay Pride, Philadelphia.

136. Hunky contestants vie to be Seattle's Reigning Man

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:17:03 UTC

by Teriyaki Temple

This past Saturday at ASA Mercer Auditorium a large crowd gathered to watch 36 of Seattle's hottest men compete for the title of "Seattle's Reigning Man." The model search was produced by SeaCast Talent and Promotions and was hosted by KUBE 93 FM's Terri Free and boasts to have found Seattle's Hottest Men. The Competition consisted of four categories including Photography, Denim, Club Wear, and Undergear/Underwear.

The top 15 winners selected have the honor of being in "Seattle's Reigning Men Calendar 2004-2005" which is set to be released in early to mid August. Keep your eyes peeled for these hotties because they will be making public appearances at various locations on Broadway, in local malls and possibly on the KOMO program Northwest Afternoon.

I had the opportunity to slip backstage into the dressing room during the competition and speak to some of contestants. I was fortunate enough to bump into SML's very own Tony Buff (last year's Washington State Mr. Leather) and asked him what he had hoped to get out of the competition. He said that he was mainly there to have fun and hopefully make it into the calendar (which he did! I had no doubts that he would!) He also said that he hopes that it will be platform to help him get his foot in the door if he decides he would like to further pursue modeling or other jobs in the entertainment field. I wish Tony the best of luck and give him my full support for any of his future endeavors.

While backstage I also got to peek at all the cuties changing into their undies in preparation for underwear segment. My presence backstage was called into question when one of the unsuspecting straight competitors asked me what I was doing there. I told him that my name was Teri and that I was with the press. He said, "That's great, what paper are you with?" I said, "SGN." He said, "I'm sorry I'm not familiar with the paper." And I replied, "Sorry, SGN stands for Seattle Gay News. So you need not worry about your nudity, because that means I'm a Lesbian."

After a good chuckle with some friends I returned to the auditorium to watch them announce the winners. I agreed with many of their choices but something bothered me though. All of the men in the competition were beautiful, studly and I would gladly go on a date with any of them but I think that all of Seattle's hottest men weren't represented because some of Seattle's hottest mean are too shy to show their goods to a large audience.

After the competition I conducted my own search for Seattle's hottest men and here are some photos of who I found. (Also I'm working on a future article of Seattle's Most Eligible Gay Bachelors, so if you know of any

single guys please email me at TeriyakiTemple@aol.com. Thanks a million! :)

137. Welcome to Seattle Gay Pride '03!

Dear Community,

Seattle Pride '03 is finally here! The Freedom Day Committee would like to welcome each of you to join in celebration with us this Saturday and Sunday on Capitol Hill. With a great lineup of entertainers and speakers, an evening showing of The Brady Bunch Movie, and the most fabulous and socially conscious march in town, everyone is sure to have a blast! This year, we have chosen "Families We Make" as our theme, and we can't wait to see all of our community's families celebrating with us this weekend!

It is important for us to realize the value of these families to our community. After decades of living life on the sidelines, we have stepped out of the shadows to forever change the definition of family. We are families of parents and children, families of friends, single parents, parents and pets, couples of all races and sexes, and so many more. We hope that seeing everyone come together this weekend will remind us what a powerful force our combined families can be.

With this week's Supreme Court ruling calling Texas' sodomy law unconstitutional, we can rejoice that our nation's laws are one step closer to viewing all Americans as equal. There can be no doubt this ruling will have a tremendously positive impact on our families and our community, helping further our march towards equality. What a great way to start Pride!

As you enjoy the events in Volunteer Park, we welcome you to stop by the Freedom Day Committee booth and give us your feedback on the event. We will also be looking for volunteers to help make next year's event even better! It takes a very large team of volunteers to make this event happen, and on behalf of all those involved, we wish everyone a safe and happy Pride weekend.

Supreme Court strikes state sodomy laws, 6-3, recognizing "right to privacy" for GLBT Americans

by Robert Raketty
Staff Writer

A surprising crowd of nearly 300 people filled the steps of the Federal Courthouse in downtown Seattle on Thursday afternoon to celebrate what is being hailed as perhaps the greatest victory in the history of the Gay rights movement. On Thursday, the Supreme Court struck down a Texas law that made certain types of sexual intimacy a crime, but only for Gay people. Ruling that the law was an unconstitutional violation of privacy, the court's 6-3 vote effectively overturns sodomy laws in 12 other states, including Idaho.

Seattle's rally was one of at least 36 others held in cities across America to celebrate Thursday's landmark decision.

Gov. Gary Locke, State Rep. Ed Murray (D-43) and State Rep. Joe McDermott (D-34) joined representatives of Lambda Legal and the Northwest Women's Law Center in offering their remarks at Thursday's rally downtown. The crowd joined hands and sang "We Shall Overcome," swaying side-to-side while tears of joy flowed from the eyes of both men and women. In a final act of solidarity, participants raised their hands to the sky and let out cheers of elation.

Seattle's rally was organized by Jamie Pedersen, co-chair of the national Lambda Legal Board of Directors and partner at the local law firm Preston Gates & Ellis. "I felt it was important to take the time out of everything else that I had going on over the last week to make this happen," he said. "It would not have been possible without the great support from a lot of different people. The folks at the ACLU of Washington and at the LGBT Community Center were on board immediately. Quickly the Pride Foundation, the Fairness Lobby and the Northwest Women's Law Center also all got on board. There are a lot people who have offered their help in a lot of ways. It has been a marvelous coming together of our community. I am hopeful that we are getting to the point where we can put the struggles that we had during the late '90's behind us and see some positive motion on the things that we care about."

The much watched Lambda Legal case, Lawrence v. Texas, challenged Texas's "Homosexual Conduct" law. The Supreme Court heard two constitutional issues in the case - whether the law violates citizens' right to privacy, and whether it violates the Constitution's guarantee that all Americans be treated equally under the law. Thursday's ruling focused largely on the

right to privacy according to legal experts.

Lawrence v. Texas involved John Lawrence and Tyron Garner who were arrested in 1998 by police officers who were investigating a false report of a disturbance at Lawrence's Houston apartment. The two were found engaged in consensual sex. They pleaded no contest to the charges, spent a night in jail and each paid a $200 fine. The convictions barred them from holding several types of jobs in Texas and would have required them to register as sex offenders should they have moved to any of several other states. Lambda Legal asked the Supreme Court to hear the case and declare a violation of privacy and equal protection.

"We are very pleased with this ruling. We never chose to be public figures or to take on this fight. But we also never thought we could be arrested this way," said Lawrence during a press call with the SGN. "We're glad not only that this ruling lets us get on with our lives, but that it opens the door for Gay people all across the country to be treated equally. We're grateful to everyone who has respected our privacy over the last few years - even if the State of Texas didn't respect it that night in 1998 - and we thank everyone who saw how important this case was and fought for us. We share this victory with gay people in all 50 states who are better off today then they were yesterday thanks to this ruling."

In a separate 5-4 vote, the nation's highest court took the unusual step of overturning the infamous 1986 case, Bowers v. Hardwick, that upheld a Georgia sodomy law and had declared that Gays had no constitutional right to engage in sodomy, even in the privacy of their own homes.

Local Reaction

Lisa Stone, Executive Director of the Northwest Women's Law Center spoke to the SGN Thursday.

"The Northwest Women's Law Center regards LGBT issues as core to our mission. We brought the lawsuit that struck down Montana's sodomy statute in 7-0 decision of the Montana Supreme Court six years ago," she said. "It is something we spend a lot of our energy and resources on. It's a paramount issue for us. We were just delighted to be standing there with Lambda, Reps. Murray and McDermott, and to raise our hands high in celebration.

"Several things are good about this opinion. The first of course is the results. This invalidates all sodomy laws whether they apply only to Gay couples or Gay and straight couples. It is a strong affirmation of the right to privacy. That's great news for the LGBT community. That is great news for the pro-choice community. The Court relied on lots of pro-choice cases for its finding that privacy is unassailable in some respects. That is well consigned from a court about which we have been quite concerned with regard to choice as well as Lesbian and Gay rights.

"We are jubilant. The Court did today what it should have done 18 years ago in Bowers v. Hardwick. When people engage in behavior in the privacy of their own home they are entitled to their privacy and cannot be interfered

with by the state. The Court certainly overruled Bowers, which is wonderful, and criticized it in sweeping terms. This is better then we hoped for I think."

Pedersen, who took part in a conference call with Lambda staff and members of the board Thursday morning, offered an account of their reaction.

"'Elated' would be an understatement. There are a lot of people who are crying for joy at this point. Folks who have been involved in this struggle since the disastrous loss in 1986, the two steps forward and one-step back of Colorado's Amendment 2, and then the Boy Scouts case. It is a day with a lot of joy for everyone," he said. "This case overturns what was previously the most significant ruling ever for Gay and Lesbian people, which was Bowers v. Hardwick. It says Bowers was wrong when it was decided and it is wrong today and needed to be overruled. Although there have been a number of cases that have come to the Supreme Court's attention that involve Gay people, this is the most head-on addressing of the issue by the Supreme Court. It is a landmark decision and arguably the most important one that has come out for Gay and Lesbian civil rights."

He believes the ruling could have ramifications in deciding future cases and begin a new chapter in the fight for LGBT equality.

"It should be of immediate use to us in a whole series of cases that have to do with child custody and other family decisions as well as marriage," he said. "Lambda has an oral argument tomorrow in a New Jersey marriage case on the state's motion to dismiss our case. The fact that the [Supreme] Court has gone out of its way to say that Gay people are protected by the Constitution, that we need to be treated equally, is likely to be of significant help to us."

Seattle attorney Lindsay Thompson agreed. He serves as president of the Washington Lesbian & Gay Law Society, which filed an amicus brief in the case.

"It raises a question of due process as to whether a Gay couple, arrested under this law, get a different legal outcome than if they were a straight couple. It raises questions of equal protection under the federal Constitution that says you can't craft laws or impose burdens on people unequally without a rational reason for doing so. The Court looked at the rationale for the Texas statute and said moral disapproval of a particular group or the things they may do is not a rationale reason for making them criminals," he said. "I think it is a singular victory. It is much broader in its scope than I think a lot of people thought it would be. Justice Scalia wrote one of his red-faced dissents and predicted one of the effects of the decision may be laying the groundwork for allowing same-sex marriage in the United States. I think he may be right. The difference of course is that I think that is a good thing.

"It struck me as being very thorough. Although the majority goes to some effort to say this is not a decision about marriage, the law that they rely on and the reasoning they use may require that they look at the issue of

same-sex marriage when the case comes up in the future. That is because they have said you can't have laws in place that distinguish conduct between two people in the privacy of their own home based on their gender. So, you can't declare same-sex activity between two consenting adults to be criminal without also making it criminal if straight people do it. Then, it becomes harder to find a rational reason to limiting marriage to straight people."

The American Civil Liberties Union of Washington's Doug Honig called the SGN Thursday to offer his response. He cited examples of the organization's work locally on behalf of the LGBT community and pledged to continue the fight.

"It is a landmark decision and definitely a time for people to celebrate. The highest court in the land has recognized that Gays and Lesbians are entitled to the same level of respect in their intimate relations as everybody else is. Support of equal treatment for everybody under law is at the core of what the ACLU stands for," he said. "We are very glad to join with other organizations in celebrating this important decision. We think it is especially important for the ACLU to be visible in this struggle for Gay rights because we are an organization that has many Gay members, but a majority of our members are heterosexual. It is really important having heterosexual-identified organizations saying that Gay rights are an issue for everybody.

"We need to recognize that everybody is a part of our society and if anybody is being treated unequally then anybody else can be treated unequally. There is an old political slogan, ÔAn injury to one, is an injury to all.' That is really true. If you can take rights from one group of people, you can take away the rights of other groups of people. It is trite but true that Gays are everywhere in our society. Heterosexual people have Gays as friends, as co-workers and as colleagues. To work and care for other people and have them not accorded the same dignity under law is troubling. It is great to see steps forward like this decision.

"For our judicial system, it says that our courts are being educated to understand that it is possible a past decision was wrong and it needed to be changed. The ruling was very explicit in saying that the Bowers decision was wrongly decided. They are basically righting a wrong, a wrong the Court did in the previous decade, and choosing to right it. It is similar to what the Court did when it recognized the decision to uphold that Japanese internment was wrong."

Local significance

Legal experts consider Washington State a "free state" - it does not have a law prohibiting consensual sex. Washington's sodomy law was repealed through an act of the legislature in 1976.

"In Washington, the sodomy laws were repealed by the legislature in the early 1970's. This state has been ahead of that curve for some time. In that sense it doesn't have any real impact on day-to-day life here," said

Thompson. "What it does do is eliminate laws in roughly eleven states around the country that would make it a criminal act for a [same-sex] couple from Washington to have sex. The broad impact of the decision is that it makes Gay and Lesbian people a little more equal than they were yesterday compared to everybody else in the country."

"Idaho does have a sodomy law. It applied to both Gay and straight couples and it is gone now thanks to this decision. So, our near neighbors to the east have just as good news as our friends in Texas and the other states with these laws today," said Stone. "It has never come to our attention in this state and certainly in this city. But I certainly do know that there are some counties in Washington where Lesbian, Gay, Bisexual and Transgender people don't have full access to the law and don't feel like full citizens because the judicial system or the prosecutors in their communities. This should be a reminder to them that there is no separate second status for LGBT folks and that everybody is equal in the eyes of the law. That is really important in some of rural counties in our state."

Rep. Murray lauded the Supreme Court decision in a written statement Thursday. However, he expressed regret that the Court failed to go farther in its decision.

"This is a landmark decision ensuring the right of privacy - not just for Gays and Lesbians but for all Americans," he said. "It is unfortunate, however, that the decision was silent as to whether Gays and Lesbians are entitled to equal protection under the 14th amendment.

"The Court's silence just reinforces the need for our state to pass legislation that would offer legal protections for Gays and Lesbians in housing, banking and employment."

Rep. Murray introduced HB 1809, the Gay Civil Rights Bill, during this year's legislative session. The bill, which would have offered such protections, passed out of the House but stalled in the Republican-controlled Senate.

The SGN also heard from the 15 member Seattle Commission for Sexual Minorities and Seattle Mayor Greg Nickels.

"The Supreme Court decision is monumental in that it protects the fundamental right to privacy for all Americans," said Mayor Nickels. "I'm glad that the Supreme Court has recognized something that we in Seattle have honored for years."

"This court ruling allows Gay men and Lesbians to know that we in our bedrooms are free from persecution," said Night An'Fey, co-chair of the Seattle Commission for Sexual Minorities. "Respect for our private lives and our relationships is something that we have been seeking for years."

Fallout

LGBT community leaders are preparing for a backlash from conservative organizations that feel the decision is an affront to "traditional values,"

opens the door to Gay marriage and loosens the noose on other forms of outlawed sexual activity.

"There is a ton of work to be done. I don't mean to understate the importance of the victory or the power that this tool will have now for us as we apply it against that injustice in various ways but it is clear - although a milestone in our struggle - we are not anywhere close to the end of the struggle," said Pedersen. "There is a moment to pause and celebrate, to be happy. Then we have to remember that in so many ways, people everyday are being denied equality or are being discriminated against. We have to get right back to work. It is just shocking when you think about the ways we are still discriminated against. Gay men can't give blood; Gay men and Lesbians can't serve in the military openly; we don't have marriage rights or any of the rights that flow from that; and in 30 some states it is still legal of us to be fired from employment for no better reason then we are Gay and Lesbian"

"What we will probably see is more attempts to pass Defense of Marriage Acts in states that don't have them," added Thompson. "There is a group that has been pushing a constitutional amendment to the federal Constitution that would declare marriage to be between a man and a woman only. It would not surprise me to see efforts in Congress to try and pass that but I have some doubts to whether they would succeed. Amending the Constitution is a long and difficult process.

"The most immediate impact you will probably see is if a member of the Court retires - and their has been all sorts of speculation in the media that one or two may do that this summer. I would not be surprised to see conservative groups add Ôanti-Gay' to their litmus test of whomever President Bush might nominate. They already said they want somebody who would repeal Roe v. Wade. I imagine there would be a fuss to try and get someone who would vote to repeal this kind of decision too. So, there will be some political fallout but that will sort itself out as such things always do. There is no way to predict what will happen."

Jaci Osegurera, executive director of the Seattle LGBT Community Center, issued a statement Thursday. She urged for continued community vigilance.

"Now that the Court has said Gay people have the right to due process and equal privacy protection, we plan to press for full implementation of this principle," she said. "We are demanding equal marriage rights, such as what they have in Canada; we are demanding equal employment rights, including in the military; we are demanding the equal right to adopt; equal health benefits; and total and equal protection under the law. We will take this victory and demand implementation of the Court's decision and we will be active in the streets to make sure that this ruling doesn't remain just a scrap of paper.

"It was not the Court's [Brown v. Board of Education] decision which ultimately forced the desegregation of the nation's schools, it was the courageous activists in the civil rights movement who began forcing the implementation of that decision in the early 1960s as their movement gained

strength. We will not remain complacent in the face of today's victory. If anything, our work has just begun."

139. Free Personals for Gay Youth Community

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:29:04 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <62X5L4ZK37806.0607638889@Gilgamesh-frog.org>

Over 1200+ site members of the Gayteens Resources site launch their free penpal/personals service. Providing the members the opportunity for contacts and support.

New pen pal/personal feature is ready and is free to use at the site.

With over 1200+ registered members it would be helpful if you could update or renew your profile on the Personals zone of the site. This is an optional feature to help bring local members together for possible friendship or helpful contacts.

The old script was problematic and needed improvements to the point we had to replace the whole software.
For those of you who used it and that are 130 members in total can you register again. I'm sorry to ask again but since we have a large membership base it□s a shame we were not organized to help bring local members together.

This new script gives you 100% control and it□s free for you to use.
Quick Link Here -http://www.gayteens.org
So please register and add a picture to your name.

If you can please use your email address and a password to access your profile.

If you have not visited gayteens.org site for a while it maybe worth checking out for us your account. We changed servers recently and had to transfer everything over it maybe that our member access could have been disrupted so if you can test things out and let us know if you have had any difficulties.

Don□t forget the message boards they had to be replaced as well so if you can post something would also help.

Happy birthday by the way your GTR site
in May celebrated 7 years serving the global youth community.

Keep yourself safe and use condoms correctly.

140. Gay Partners to Get UK Marriage Rights

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:29:04 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <CUS1XHYL37806.0607638889@Gilgamesh-frog.org>

MINISTERS are putting the finishing touches to revolutionary reforms which will give gays and lesbians the same legal rights as married couples for the first time.

New civil partnerships are expected to give homosexual couples pension and property rights, providing they sign an official registration document.

The radical moves will give next of kin rights in hospitals, allow gays to benefit from a dead partner's pension and exempt them from inheritance tax on a partner's home.

The paper is not expected to use the term "gay marriage".

But the civil partnerships are likely to be as close to a marriage contract as possible.

It is thought partners will even be able to dissolve the agreement, in a form of "divorce".

It has been reported that, contrary to predictions, gay couples will not have to spend a prescribed amount of time living together before becoming eligible to sign the new contracts.

Chief executive of gay rights group Stonewall, Ben Summerskill, said: "We are delighted that a long overdue step is being taken by the government.

"Hundreds of thousands of gay people are in stable, long-term relationships but still don't have the same rights as many others.

"It's not just social status that matters, like the right to visit each other in hospital, but the right to share a partner's pension, for example - which is something available to every heterosexual."

He went on: "We hope that Parliamentary time will be made in the next session for the Bill. Every day's delay is a very real human tragedy for individuals all around the country."

141. Cook County Approves Gay Partner Registry

CHICAGO☐Gay men and lesbians will soon be able to sign up for a "certificate of domestic partnership" from the Cook County Clerk, the same office that grants marriage licenses. The certificates will cost $30 ☐ the same as a marriage certificate.

With support from 13 of Cook County's 17 commissioners, the council decided to extend recognition, if not complete legal standing, to same-sex couples starting Oct 1.

143. Silent Birth of Nevada Gay Rights Law

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:29:05 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <0HTBVU8S37806.060775463@Gilgamesh-frog.org>

In a state where 67 percent voted to ban same-sex marriage just seven months ago, Nevada Governor Kenny Guinn and Nevada legislators quietly yet unanimously passed a law extending hospital visitation rights to partners of gays and other unmarried people.

The law, which took effect June 29, coasted through the legislative process so silently the media only became aware of it this week.

144. Increase in STIs in UK slows and number of cases of gonorrhoea down amongst gay men

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:29:05 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <PYGMXHMB37806.060775463@Gilgamesh-frog.org>

New figures from the UK☐s Health Protection Agency (HPA) show that the country☐s sexual health continues to deteriorate, with increases in the number of cases of gonorrhoea, syphilis, chlamydia, and genital warts. However, the increases are not as large as those seen in previous years, and there was a noticeable fall in the number of cases of gonorrhoea seen in gay men.

In June a committee of MPs published a report highlighting a ☐crisis☐ in the UK☐s sexual health, and these figures look set to add to the concern generated by this report.

According to the HPA figures, chlamydia is the most common sexually transmitted infection seen in the UK, with just under 36,000 cases diagnosed in 2002, an increase of 14% on the year before. However, the largest percentage increase was seen for syphilis, with a 67% increase in new cases amongst men and 33% in women, meaning that over 1,000 cases were seen in men in 2002 and 137 cases in women. In the mid-1990s fewer than 100 cases of syphilis a year were diagnosed in the UK, however there have been recent outbreaks of the disease amongst gay men in several cities, as well as an outbreak amongst heterosexuals, leading to a sharp increase in the prevalence of the disease over the past few years.

Public health officials also observed a 10% increase in cases of gonorrhoea in women and an 8% increase in men, meaning that almost 25,000 cases were diagnosed in 2002.

The prevalence of viral STI☐s also increased, herpes by 4% in men and 1% in women and genital warts by 3% in males and 1% in females.

However, there were also some encouraging findings. The rate of increase slowed for syphilis, warts and herpes, and the incidence of gonorrhoea amongst gay men fell by 5% nationally and 11% in London, where over 50% of all cases of gonorrhoea seen in gay men are located.

However gay men, along with young women remain the groups most affected by STIs. Dr Kevin Fenton of the HPA said: ☐40% of new gonorrhoea diagnoses were seen in females under the age of 20." He emphasised the need for targeted sexual health promotion campaigns adding, ☐it is important that people at higher risk should be provided with clear and accurate information about staying healthy, and have ready available access to screening and advice.☐

Last month☐s report by MPs however highlighted long waits for sexual health clinic appointments in many parts of the country and the chronic

underfunding of services.

The comments by Bloomberg - who is hosting the national GOP convention in the city next year - puts him in direct opposition to President Bush.

The GOP platform that year explicitly favored traditional marriages "as the legal union of one man and one woman," and opposed efforts by "federal judges and bureaucrats" to recognize other living arrangements as marriages.

CHICAGO☐Gay men and lesbians will soon be able to sign up for a "certificate of domestic partnership" from the Cook County Clerk, the same office that grants marriage licenses. The certificates will cost $30 ☐ the same as a marriage certificate.

With support from 13 of Cook County's 17 commissioners, the council decided to extend recognition, if not complete legal standing, to same-sex couples starting Oct 1.

Wal-Mart policy bars bias against gay workers

WASHINGTON ☐ President Bush yesterday reaffirmed his belief that "marriage is between a man and a woman," but he sidestepped the question of a constitutional amendment to prohibit gay unions ☐ reflecting the cautious approach the White House is taking to a potentially explosive public debate.

Last week's Supreme Court decision to strike down the nation's remaining anti-sodomy laws has left some conservatives convinced that so-called "defense of marriage" laws prohibiting gay marriage cannot survive future court challenges. As a result, a move to amend the Constitution to define marriage as applying only to male-female couples has rapidly picked up strength. Last Sunday, Senate Majority Leader Bill Frist, R-Tenn., said he supports such an amendment.

In an exchange with reporters, Bush said he is waiting for a legal analysis of the court's decision. "I don't know if it's necessary yet," he said of a constitutional amendment. "Let's let the lawyers look at the full ramifications of the recent Supreme Court hearing. What I do support is the notion that marriage is between a man and a woman."

White House spokesman Ari Fleischer echoed that position in his daily briefing: "This is a matter for lawyers to assess, and I don't know that there is any clear assessment that anybody has at this point about the legal ramifications of a just-made decision."

Bush is stepping gingerly on an issue that could inflame his conservative base if he equivocates or could turn off live-and-let-live swing voters if he takes a stand that smacks of intolerance.

As one Capitol Hill Republican described it: "Bush is trying to defend the traditional idea of marriage without getting into the realm of gay bashing."

The Bush administration has taken some steps to avoid being seen as antagonistic toward gays. About 20 openly gay officials have been appointed without fanfare to government positions, according to The Texas Triangle, a gay newspaper.

Republicans have been thinking for some time that the gay- marriage issue would enter the 2004 presidential election from stage left, through the rising prominence in the Democratic field of former Vermont Gov. Howard Dean. He signed the country's first law legalizing "civil unions" for gays. GOP strategists believe Democrats will alienate moderate voters if their nominee supports gay marriage.

Having the issue boil up on the right, however, could be a problem for Bush.

"This is just not an issue we want to talk about," said a longtime Bush friend. "It plays to a negative stereotype of Republicans as sex-obsessed and narrow-minded. Swing voters ☐ and the libertarian elements in the Republican Party ☐ will not enjoy a debate about a constitutional amendment on gay marriage."

But some leading social conservatives believe the issue cannot be dodged. Gary Bauer, who ran for president in 2000 on a religious conservative platform, said yesterday: "Unless the president's lawyers are from Mars, they will tell him that there is no longer a legislative bar to same-sex marriage. At that point, it will not be possible for the administration to remain neutral as this debate heats up. I don't think they should even try to be cute about it."

153. Drag queen seeks to rule Canada's right wing party

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:52:09 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <MRDS6ZKS37806.0769907407@Gilgamesh-frog.org>

Reuters) - Toronto's best-known drag queen, famous for
six-inch heels, slinky dresses and a failed bid to become the city's mayor,
said on Thursday she wanted to join the race to head the right-wing
opposition Canadian Alliance party.

"I am a supermodel for a super party," said Enza 'Supermodel" Anderson. "I
don't care what you call me but please put in supermodel."

The 37-year-old, who has worked as a singer in Toronto's largely gay Church
St. district, launched her campaign at Toronto City Hall wearing a short
maroon dress, her signature stilettos, a blond wig and bright red lipstick.

Dismissing the Alliance as "racist, supporting bigoted attitudes and an
anti-gay stance," she said the party needed to become more diverse to beat
the Liberals. "I am the one to do it," said Anderson, who prefers to be
called a "she."

"As a new leader of the right, I plan to unite the opposition. Let me tell
'ya, there are a lot of sexy MPs (members of parliament) I'd like to unite
right now."

The Alliance came a poor second to the Liberals in last year's federal
election. The party will next year vote in a new leader -- or perhaps
reelect outgoing leader Stockwell Day, who quit this week to allow for a
leadership race.

But Anderson's platform may not match the tough-on-crime Alliance. She
wants
affordable housing, better public transport and decriminalization of
marijuana and prostitution.

"Why is it that when a drag queen runs for office, people consider it a
joke? But if (Stockwell Day) shows up in a wet suit or if the prime
minister
of Canada shows up in a dinghy, it's considered serious and worthy of
national attention," she said, referring to recent media pictures of
federal
leaders.

Anderson, who says her political platform is "much more than my six-inch
heels," sashayed into politics last November and won 15,000 votes in the
Toronto mayoralty race.

That placed her third on a slate of 25 candidates for the job, won -- as
expected -- by flamboyant Mel Lastman.

Lastman later hit the headlines with ill-timed comments that may have helped
scupper Toronto's bid to host the 2008 Olympic Games. He balked at the idea of traveling to Africa to lobby for the bid, admitting he was afraid of being boiled in a pot with natives dancing around him.

Anderson said she had nearly collected the C$25,000 and 300 signatures needed to be eligible to run to lead the Alliance.

If she doesn't win, she will continue to work odd jobs. But she said she had
stopped doing drag shows now that her political career seems to be blossoming.

Day, quoted in the National Post newspaper earlier this month, refused to rule out any candidate for his job.

"We're a very open party," Day said. "I'm just pleased that we continue to attract people from across the spectrum."

156. Pro-Family Group's Warning Ad Said To Vilify Homosexuals

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:52:09 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <DKSYGNUY37806.0769907407@Gilgamesh-frog.org>

Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur.misc

Pacific Rim Bureau (CNSNews.com) - A pro-family group in Australia is locked in a battle with a Senator over moves by a state government to push through contentious legislation easing legal restrictions on homosexuals.

Brian Greig, a federal senator for the Australian Democrats, recently complained formally about what he called a "deeply offensive" newspaper advertisement run by the Australian Family Association.

The ad warned against the possible ramifications of pending legislation in Western Australia (WA) state, whose provisions include one lowering the age of consent for homosexual sex from 21 to 16.

Under the headline, "Wanted - Your Teenage Son," the ad featured a sketch of a teenage boy, with the claim that "many more boys will be seduced by older men if [Premier Geoff] Gallop's homosexual law goes ahead."

An advertising standards body this week ruled that the ads breached advertising industry ethics by vilifying a section of the community.

But the Australian Family Association (AFA) said Tuesday it has ignored the ruling from a body that has no legal weight, and is continuing its campaign against the legislation.

Phone books, bricks

In a new tactic, Greig's office is now urging people around the country to take advantage of a "Reply Paid" postal service used by the AFA, and inundate the organization with unwanted mail.

"The hideous Australian Family Association is waging a hate campaign in WA, aimed at homosexuals and at stopping law reform," says an email apparently originating from Greig's government email address and distributed via a homosexual newsgroup.

It suggests supporters may wish to send the AFA hundreds of empty envelopes "and perhaps a few dozen wrapped White Pages [telephone directories] or bricks."

"It seems the AFA would have to pay postage at the other end if the Reply Paid address is used, provided there is no return address from the sender.

"The WA GLBT [gay-lesbian-bisexual-transgendered] community appeals for your help!" the email says. It provides the AFA's address and urges people to act quickly before the Reply Paid service is discontinued.

Richard Egan of the AFA's Western Australia branch said around A$3,000 ($1,555) worth of unwanted mail - including several telephone directories - had arrived at the post office Tuesday morning. The post office said it would not be charging the AFA, he added.

Speaking by phone from Perth, Egan expressed surprise that a federal senator would use such tactics, saying the fact it was costing the postal service money was a "scandalous" business."

"It's different to simply trying to meet the arguments of the opposition ... I find it incredibly childish."

The AFA was referring the matter to the president of the Senate, he said.

A spokesperson for Greig professed not to have heard of the email, but said she would look into the matter. No further comment was forthcoming.

'Seduced into sodomy'

Asked about the controversial advertising campaign, Egan said the AFA had not made the claim - as suggested by critics - that homosexuals were pedophiles.

But it had sought to point out that, over the past five years, prosecutions for illicit homosexual activity had tended to involve much older men charged with offenses against minors - rather than teenagers or young men engaged in such activities with each other.

The ad had made no comment on consenting relationships, but warned that youngsters could be "seduced into sodomy" and other sexual acts by older men, he added.

The thrust of the ad was the protection of children, Egan said, adding that it had also warned about another element of the draft legislation - since abandoned - that would have legalized sex for children as young as 13 as long as there was an age gap of no more than two years between the partners.

Egan said the AFA was not taking the finding of the Advertising Standards Board (ASB) seriously, as the body had no legal powers, but was based on a voluntary code established by the advertising industry.

Nonetheless, "we find the ruling quite appalling, suppressing free speech on issues of pending legislation."

In a statement issued after the ASB's ruling, Greig accused the AFA of "disgusting fear-mongering ... clearly designed to stop long overdue gay and lesbian law reform in Western Australia."

Greig conceded that the AFA could not be prevented from running the ads, but called on publishers to refuse to accept "any further homosexual vilification advertisements."

'Radical'

The legislation introduced by the state's Labor government covers a wide range of "anti-discrimination" measures, including provisions that would allow same-sex couples adoption and IVF rights, and the same rights as other "de facto" couples in areas such as property transfer, medical treatment and inheritance.

The government last week won approval from the lower legislative body and had been hoping to have it approved by the upper house and enacted by Christmas. Delays have made this impossible, however, and the process now looks set to resume after the recess, in February.

AFA national spokesman Bill Muelenberg said Tuesday each state in Australia had its own legislation relating to ethical and moral issues, but "all seem to be heading in the same direction" as countries like the U.S. and Canada.

"If Western Australia goes through with this legislation, it will probably be the most radical of the states."

He attributed the liberal tendencies in WA and New South Wales - location of Sydney, Australia's largest city and home to its largest homosexual community - to the presence of a strong homosexual lobby and the failure of opponents to take a strong stand.

The AFA is concerned about a range of pro-family issues, including marriage, divorce, childcare, and life issues, he said. Many members were Christians, although it had Jewish and Muslim members too, and the organization was not specifically a religious one.

157. Sex behind the bars

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:52:10 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <RCNW2K7U37806.0769907407@Gilgamesh-frog.org>

'He may be fucking his cellmate every night but if you ask him: 'Have you had a homosexual experience in prison?' he will truthfully, as far as he is concerned answer, 'No'.

This is a warning that Stephen Donaldson, a Stop Prison Rape activist, once gave researchers of prison sex.

Sexual practices among male prisoners show that sex acts in themselves are not automatically equated with one or another sexual identity. For this reason people working towards better understanding of diverse sexualities and the promotion of safer sex practices are increasingly replacing the use of the terms "homosexuality" or "gay" with the phrase "men who have sex with men".

In men's prisons we find a situation that can seem contradictory: a subculture that supports probably the greatest concentration of male on male sex in the country is at the same time virulently homophobic. In fact, the workings of sex in prison lay bare ideas of gender and sexuality that have a repressive grip on society in general.

Patriarchy and misogyny are rife. Because women aren't available to service men and a particular notion of masculinity (as defined by power and domination) "women" are "created". Part of the horror of being raped or coerced into unwanted sex in prison is that such an event is understood to destroy men's claim to "manhood" and to turn them into "women". And "women" are not worth very much.

In dominant prison culture forced sexual penetration casts on those who are penetrated a detested "woman" identity. "Women" are regarded and treated as sex objects and domestic servants. Prison "marriages" between "men" (husbands) and "women" (wives) are usually brought about by an initial forced sex act. A range of sophisticated techniques -- not only blatant rape -- can be used to trick or manipulate people into a first event of sexual subordination.

In prison marriage relationships "men" are active, they do "business" in prison and provide materially for their "wives". They are the penetrators in sex. Women must be passive, sexually and otherwise. These are the rules governing the "accepted" and most common sexual relationship and type of sex in prison, and are endorsed and entrenched by prison gangs and inmate culture more generally. Not all "marriages" will unfold like this and not all sex occurs within "marriages", but protagonists who negotiate other ways of relating best keep it secret or incur the wrath of the powers of the dominant inmate culture.

To have the "wrong" kind of sex or to have sex with the "wrong" kind of person is punishable. Ushintsha ipondo (literally meaning to exchange a pound) is marked by mutual agreement and is apparently quite common, especially among younger prisoners -- who are often other men's "wives" too. They agree to take it in turn to penetrate or "play the man" and to receive. But this consensual sex is considered deviant because it is associated with homosexuality. It's even more scandalous for an older "man" to be involved.

"It's a serious matter" if you're caught doing it, explains Piet, who spent most of his life behind bars. "It's like being a big man in a house where everything is under your control ... and my wife hears that I've done homosexuality with another man. It would shock her! It's just like that if I get a man of my age and I do Ushintsha ipondo with him. If the gangs hear about this -- Ay!"

Ushintsha ipondo disrupts the process that allocates "manhood" on the basis of penetration and power and interferes with the heterosexually oriented environment that is the preserve of the gangs.

The gangs and dominant inmate culture police sex in prison with a remorseless homophobia. For this reason ushintsha ipondo is outlawed. At the same time, experiences of violence and humiliation in power-defined interactions breed and intensify phobic attitudes. Part of this is a tendency among some to conflate notions of homosexuality with forced sex. Witnessing or experiencing prison sex and sexual abuse is some people's first encounter with male on male sex. It is not surprising that in such a context, notions of homosexuality or "gayness" can become confused with sexual coercion.

For some people prison encounters constitute the yardstick for understanding sex and sexual relationships between "men". And these encounters seem more often than not to be primarily defined by coercion. "Gays" are people who "make" you sleep with them "when you don't know what's going on", says one young offender. Others talk about "victims" of homosexuality and being afraid of homosexuality when it is clear that what they are afraid of is being forced into sex.

Same-sex activity in many subcultures re-enact heterosexual gender roles and the accompanying ways of relating: deviations from these are frowned upon. So the fact that prison "marriages between men and women" are supported while "homosexuals" are punished conforms to this pattern. But the extent of the coercive and repressive power that is so central to the accepted marriage-style sex in prison reminds us more of the heterosexual relations they imitate than same-sex activity in other subcultures. We're consistently reminded of how what goes on inside is connected to the rest of us.

"In fact, those things that are done by women, you must do them," says Jabu when we're talking about how "wives" must behave. "If your husband wants tea, you must go and make tea. If he wants his washing done, you must do it."

On the sex requirement, another remarks: "It's my duty as a wife, every night to give him whatever he wants ... It's just like a woman outside." Not so weird, perverse and fundamentally "other" after all.

Prisoners are not in the business of creating from scratch a whole new society, but rather in drawing on and adapting identities and ways of relating that they bring with them from outside. Intervening in these processes can help stem the flow to the outside when prisoners are released, of these intensified and adapted social prejudices, and the harm they cause. We on the outside have a lot of work to do on the way we relate to each other, too.

158. The gay unfriendly Premier Marais

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-03 23:52:10 UTC
From: dsouter@-remove-bellsouth.net
Message-ID: <X6FV73TK37806.0770023148@Gilgamesh-frog.org>

Just a few months after jumping into bed with the African National Congress, new Western Cape Premier Peter Marais has entangled himself in controversy by launching an attack on gays.

Marais, well known for his hard-line anti-abortion and pro-death penalty views, was quoted in the March edition of the Afrikaans magazine Insig as saying he will "especially" not encourage gay rights and that he "will never push the Cape as a pink tourism city".

Discomfort with the newly formed agreement between the ANC and the New National Party was evidenced by a cool response to Marais's comments from ANC leader in the Western Cape, Ebrahim Rasool, who said an agreement between the two parties allowed them to disagree on issues.

"The ANC respects Premier Marais's right to voice his opinions, even though we may not necessarily agree with him," said Rasool. "Marais is within his rights and is entitled to his opinions."

However, ANC national spokesperson Smuts Ngonyama warned Marais that "If he had to raise issues like that in Parliament, he would be challenged".

Marais once nearly won support in the gay and lesbian fraternity by retorting that Durban mayor Obed Mlaba was "green with envy at our pink community" after Mlaba said that "Cape Town can stay with its moffies and its gays".

NNP media director Francois Beukman said Marais is entitled to his opinions, but that the "NNP is committed to the constitutional positions" on moral issues.

"The issue of gay and lesbian rights is the same as the death penalty, red light districts and the decriminalisation of dagga," says Beukman. "These are all moral issues and when confronted with legislative and policy measures related to issues of conscience and religion, NNP public representatives are allowed a free vote."

Ngonyama played down ANC responsibility for Marais saying they are "not in an alliance" and that "they can follow their own policy. All we can do is try to persuade them to change their policy."

Marais, responding to a question on whether he would try to prohibit gay rights, said: "The Lord always leads me People have become so liberal that they question the existence of God. Not Peter Marais. Look what the Lord did to the City of Sodom. He destroyed it."

He has previously attacked the constitutional provision relating to sexual orientation by saying that "Christians must choose between the Constitution and the Bible, because the former was written by communists under the disguise of democracy".

He also attacked government's position on the death penalty saying, "If the death penalty was a provincial choice, then I would hold a referendum tomorrow to reinstate it".

"The Constitution is clear on issues raised by Marais and we have no doubt that his respect for the Constitution is undiminished," says Rasool.

Marais was not available for comment at the time of going to press.

I just recently purchased a Heathkit SB-200 amplifier which seems to have a self oscillation problem. When the amplifier is keyed through it's relay input I get RF output with zero input ! In fact there isn't even anything hooked to the input jack. This problem occurs mostly on 10 and 15 meters. The SWR and wattmeters on my tuner pin as soon as the amp replay is keyed. By turning the loading down to zero it will usually (but not always) stop. At one point I while testing the amp (when it was working right) I was able to load almost to 800 watts out on 20 meters but when I went to 15 and 10 meters it started this problem and cant seem to get much over 300 or 400 out now. Could this be indicative of a bad 572B tube ? Perhaps a shorted one ? Any hyelp would be greatly be appreciated. I am a new amp owner have just been running 100 watts for the last 30 years !

Carter_P@ncvillage.net (Patrick C) wrote in
news:3fb6d66b.3963673160@ncvillage.net:

That's the destructive urge in liberals. If they can't control it, they must destroy it. Character assassinations are their forte. The ACLU (American Communist Lovers Union) is another useful tool for liberals, causing buildings that are 100 years old that bear plaques of the 10 Commandments to have to have the plaques removed, lest the liberal be "offended". You see, if the liberals engage in offensive behavior, such as "art", (even "public funded" art) they can be as tawdry as they wish, citing the "First Amendment" as the guarantor of their expression. If they are offended by religious material on public buildings, they once again cite the First Amendment, mumbling something about "the establishment clause", a clause that forbids Congress to establish a national religion, and doesn't forbid a community, independent of Congress, to place a plaque of the Ten Commandments on their courthouses.

You see, the serial poster had "2 daddies", and as he grew up, he realized that those formative years, those tender infant years, when he thought that he was being breastfed, he now realizes that it was an impossibility. What he thought he remembered as the breastfeeding experience, those deep but mostly unconscious memories that were inexplicable to him for years, those memories of his "mommy" having a single breast, single but somewhat narrow and long, and located below the waistline, were in fact the recollections of child abuse that occurred at the hands of "both" of his daddies.

He had no sooner come to terms with the above discovery then he was emotionally destroyed by yet another discovery. Argue as he may, he was unable to convince the sex education instructor in school that the rectum is a reproductive or sexual organ. He was informed that the rectum is an excretory organ, producing filthy byproducts of digestion.

He was stunned. So he has set about destroying anyone that expresses views that contradict his knowledge of life, a knowledge conditioned by an abnormal upbringing at the hands of "two daddies". Have pity on him, he truly is a despicable creature.

WHERE ARE ALL THE TOUGH GUYS IN THIS SHORTWAVE NEWSGROUP?

Where are all the tough guys in this shortwave newsgroup like GrtPumpkin32 (Linus), RHF, Bball, N8KDV(Steve), Starman, Phil, Frank Dresser, Dan Conti, Tad Early, Tasd Early, Red October90, Brian Denley, DeWayne, Al Patrick, Agent Smith, Burr, Mike Maghakian, Paul, Joe Strain, bpnjensen (Bruce Jensen), Diver4777, Radioman390, Eric F. Richards, R274C, Hfguy, DougSlug, RFCOMMSYS, Signalchaser, Robert, MJC , Dxlover, Elfa , J Tabor, Telamon, Dxing since 1957, Michael Moore, Mark Keith, Radioguy and the rest of the regular contributors of this shortwave newsgroup. "I THOUGHT ALL OF YOU ARE MACHO MEN", What happened? Perhaps your all R.I.P. (Rest In Peace) dominated by the intellectual gays and politics groups.
Perhaps all of you are hiding at the back of your wives because you cannot fight back against the infiltrators like the gays and the politics groups that dominated the shortwave newsgroup at this time. In short all of you are a bundle of cowards, you are running away from the high ground of the shortwave newsgroup. Wake up, fight back your rights. That is your group, don't allow the infiltrators to throw you out of your own newsgroup.
The infiltrator has discovered that all you in this shortwave newsgroup are all weak. You cannot compose a very intellectual article or contribute valuable information related to shortwave which you can learn out of it. Instead all of you placed rubbish topics, using offensive languages on your posts and insulting each other.
In order to throw out the infiltrators, you should learn how to compose a good article related to shortwave which everybody will learn. Because its not only you are reading or viewing this newsgroup but it becomes the focus of the world to read articles. Even though they are not a member of this group but they read those articles that you post in this shortwave newsgroup. Remember this is the Internet, people get information from this medium.
Google shortwave newsgroup is not moderated why, because they want freedom of speech and expression to post a good article related to the topic and accept criticisms on the article posted on the group and allow also exchanging of views in a certain article. It doesn't muzzle free speech or express its views. Google shortwave newsgroup is like a mirror of democracy in the public arena on the Internet.
Stop hiding, there is nowhere to hide. Go and challenge the gays and politics infiltrators on your shortwave newsgroup. "STOP THEM".

Andre

HIRAM, GA: The FCC on June 28, 2000, sent a Warning Notice to General licensee James V. O'Brien III, W4AMP, and a Notice of Intent to designate O'Brien's Amateur Radio station license for a revocation hearing and his operator license for suspension for the remainder of its term. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth said monitoring information before the Commission dating from January of this year indicates that the licensee is "seriously misinformed about the basis and purpose" of Amateur Radio and about the FCC's enforcement of the prohibition against obscene or indecent transmissions. The FCC alleges the offending transmissions took place on 3894.5 kHz, 144.35 MHz and 223.5 MHz. Hollingsworth said if the alleged operation recurs, the FCC would designate W4AMP for a revocation hearing and O'Brien's General license for suspension. Hollingsworth noted that the FCC's rules prohibit transmitting obscene or indecent words or language and that, for indecency purposes, the FCC uses the same standard for commercial and amateur transmissions. "Obscene speech is not protected by the First Amendment and cannot be broadcast at any time," Hollingsworth said in the letter, which also defined and detailed the proscriptions against indecent and obscene transmissions. In a lengthy e-mail response to Hollingsworth that he shared with the ARRL and others, O'Brien vigorously denied making any obscene transmissions. He said he keeps a "complete and accurate log" of his radio operations and would "gladly submit it for inspection." Additionally, O'Brien said, he has not operated on 3894.5 kHz at all this year. He suggested that any profanity monitored on the two VHF frequencies cited by the FCC was directed at him by an ex-FCC employee who, O'Brien asserted, has been harassing him for more than four years. O'Brien pledged to operate "in full accordance" with FCC rules. He also requested that the FCC provide any recordings, log information, and FCC monitoring information it has regarding the present allegations.

First of all, check see if those plate anti-parasitic osc. chokes are
OK.
The resistor, 47 OHM may have been cracked. If those are good, then
insert the same type of choke on the input circuit, between input
coils and filament where the RF input goes into. Use 2W non inductive
resistor and wind 18 GA wire for about 6 turns and solder at each end.
Hope this will help.

In case you ain't been following it, short-wave
radio preaching kook James Lloyd (..now a contender
for Valedictorian 2003 of the Brother Stair School
of prophetic analysis) has been saying for the past few
weeks that the World ends tomorrow. (July 5th)

Right down to his telling of his "followers" (..all 6.5 of
them) to go to their "rural retreats" asap and prepare
for Doomsday.

I wish that I knew what this fruitcake's real motivations
were. For now it seems we can all sit back, watch the
fireworks and have ourselves a GOOD BELLY LAUGH
on July 7th when all is as it was last week.

Then again, if the world does end on Saturday it will
FINALLY give the Saturday night 3.947 Liberty Net
something to talk about. GRIN

Hey James don't forget the canned food, firearms,
gold coins, colloidial silver and retail-grade tinfoil
wrap to make hats with - you PUTZ.

Better get down to South Carolina with Profit Stair...
He's gettin alot more young *black tail* that you are James!
Baaaaaaaaa Ha Ha Ha Ha!!! PFHBLTTTTTT!!!!!!!!!!

The Earl of Shortwave

ps: I find it **very amusing** that James' prediction of the
end-of-the-world +coincides with+ the annual end-of-the-world
party held by the Church of the SubGenius up in Brushwood
NY! Happening right now, see the link below.
My bets are that "Bob" will arrive in the motherships
LONG before James Lloyd's chickens and cows come
back home to s--t inside the dirt floor of his remote rural studio
in Oregon. Ba ha ha ha ha!!!

PRAISE "Bob" !! www.subgenius.com

aaaaaw! whats the matter little boy? you get spanked again?

The fact is, I can work anyplace I want within the part 97 rules and the bands I am authorised on (6 meters and up). I have to worry a little about power output, but thats not much of a problem considering. Still, I worked a place on 6 you couldn't get to on 11 meters.

Oh yeah, aren't you the one thats been spam flooding the various rec.radio.* groups lately (seem to see your name in there a lot).

besides, if you can't run with the big dogs, don't get off the porch!

down the basics.
hehehehe. is that the best you can do? man, I just love playing with
numbnuts like you. so easy to press your buttons... <snicker>

>
> You'll be too fucking drunk to even key up that cheap assed alinco, babbling booby.
self description again? sorry pal, I don't drink. it costs too much
(health wise).

oh well, Your too easy to fight with anyway. no real challenge. its hard
to have a battle of whits with an unarmed (or in your case, brainless)
man (and an anonymous coward at that).

oh well. you had your fun, now time to put you back up on the shelf where
you belong (with a lot of the other cheap trinkets that get collected over
the years).

What a fall from Grace! From inebriated beaurocrat to inebriated
failure. No wonder he sits up all night masturbating to Internet porn
and flooding the amateur newsgroups with homophobe crap. I guess some
guy's hairy ass is more appealing than his wife! What an ugly, wooden
bitch! Yeccch!
.....

How the heck does this goon know what a "beaurocrat" even means when the
floozie cannot even spell it?
Drop back ten yards, have your old man hold the empty Old Milwaukee can on
his toe and see if you can kick it between the goal posts. The man who holds
the can is the dummy. The man who counts whether or not the can scored a
goal is the Bureaucrat....get the idea? I thought not.

It is rather simple, the concept. You work all your life, or most of it, and
you are falling behind financially. Your husband works at odd jobs, some
full time, some part-time. Your hubbie falls behind on the bills and the
cursed "Bureaucrats" come after him for past due bills. See how it works?
"Beaurocrats" do not do this because their is no such thing as
"beaurocrats".
Meanwhile you and your hubby hide from the Bureaucrats who are dogging you
for overdue bills. This is what Bureaucrats do. They try to get what is owed
them.
On the other side of this coin are the "slackers" Note...it is NOT spelled
'slaked", or 'slackened. Slackers are noted for hiding from Bureaucrats .
Slackards would much rather not pay bills if it can be avoided. Slackards
often change addresses and leave no forwarding address.
Let's see...if I was a slackard, how would I go about this? I'd probably
begin by moving to another town and not leave a forwarding address. I
wouldn't put a mailbox in front of my new rental, either. No mailbox, no
bills. Simple as that. I would keep my new address a secret as long as
possible. Let the creditors waste lots of time looking for me.
"After a few months when the Bureaucrats find me, and they always do, I'd
just pack up my bags and move to another county. Course I'd have to check to
be sure there aint any warrants out before I go there. That seems to be
gitting tougher and tougher to do these days.

Sum day I will moove to another state but for now I cant leave georgia. not without my probashion officer saying I can. I think I want to go to texas....live in the wildurness and git away from all these laws. That way I can live in teh wide open spaces, do a little peyote and chug down some Lone Star. maybe even find me a sweet little Mexican. Gal, that is. I aint into men."

<whiney voice> I'm here and ready to stop them. I don't know what to do though. Between my wife nagging me to do the laundry and wash the kitchen floor I don't know if I have the time. I also have hemerrhoids which my wife says is from sitting in front of the computer all the time so I can't sit for too long. And then I have to take fifi our poodle to have her hair cut and nails trimmed and then it's off to do the weekly shopping. I'd really like to help out because I'm as tough as the next guy. Heck, I used to bench press 120 lbs. I haven't had much time for that sort of thing since I got married but I'm tough as nails and ready to do what you tell me.

Actually, I think he's claiming the "beginning of the end." There should have been some calamity yesterday (the 4th) inaugurating the Tribulation.

As a New Yorker, I'm particularly thankful to see that he's gotten it wrong. He was saying a few weeks ago that my city was history. And I had just finished cleaning all the windows in my apt.

I suppose I should let a few more days go by before I bother cleaning the stove and fridge.

As you can see the mongoloid troll posts from Alt.net as well as Frog and
Dizum remailers where as the real Don, who has no reason to hide behind a
pussy anonymous remailer posts from Bell South through usenetserver.com.

Now that I've pointed this out please look for the flood of posts the
crybaby troll will cast into these groups using my Name and Email address.
Keep in mind that I only post from Comcast and never from any crap remailer.

Or maybe he'll post a list like this one:

The moron list: (Now in order of highest to lowest stupidity)

The Moron List (x@x.net)
RedXIII (x@x.com)
Arctic Cat (ArcticCat@comcast.net)
ArcticCat (arcticcat@NOSPAMcomcast.net)
Roselles is a Moron (blackdiamond2k3@yahoo.com)
Black Diamond (blackdiamond2k3@yahoo.com)
l33tN3w$P0$t3r (3y3H4X0r@J00rB0x0r.com)
Loony Skip Rooney (loony@unclefloyd.com)
100% Chest Pounding American (gimmepron1@yahoo.com)
HaHa (emulation@comcast.net)
Fuck The Middle East (w3_w1ll_k1ll_j00_0sama_b1n_lad3n_@yahoo.com)
DemocRAT Poison (DemocRAT_Posion@yahoo.com)
Speak No Evil (bbbred@hotmail.com)
Sidewinder (izombie5@yahoo.com)
I Zombie (IZombie5@yahoo.com)
Democ 'Rat Poison (izombie5@yahoo.com)
\(Democ\) 'Rat Poison (izombie5@yahoo.com)
Commanche (izombie5@yahoo.com)
Windows for Atari 2600 (Bill_Gates@Is_My_Bitch.com)

Yeah that's great. That's a list of almost every alias and email address
I've posted to usenet with since 1999. He did miss a few. What this tells me
though is that the dork has wasted his life and time to keep track of me for
the last 4 years and two ISP's.

I just suppose there's not much else to do when you're dosed up on meds all day to keep you sane.

Yes Don everyone "gets it". Except you.......

I wouldn't say any more at the moment either. You already look like a
huge jackass. Saying anything else would only confirm the fact.

When it comes to filing charges and no one is quite sure what charges
to file tell your lawyer you won't settle for anything less than
felonious mopery.

ROTFLMAO

the application form clearly says 'copies accepted'

rsgb have since said they will not accept scans
but as they do not say that in the original offer what they say in
the offer stands

but if wish you could get a uk ham to photocopy the advert
from july radcom - mail it to you or fax it - fill it in - then mail
it back to rsgb with $2

as the offer says it is open to all

take advantage of it - its a great offer not to be missed

There is an obvious link between homosexuality and radio. Along with
the Internet it is radio that helps the Gay community communicate.
Did you ever listen to those garbled signals that you could not
decypher no matter how hard you tried? Those signals are Gay people
communicating.

This may at first seem like a strange post to a Ham Radio newsgroup, but I am hoping someone can help us out. We (Canadian Scientists) are currently conducting research in Brazil near the city Rio Claro in Sao Paolo state. We study lizard physiology and hibernation, and are currently conducting a year long study using radio telemeters implanted inside lizards. These telemeters allow us to monitor heart rate, breathing rate and body temperature, and all of this information is uploaded via radio frequencies and recorded to computer.

The telemeters themselves work in the high MHz range. Each animal (we are currently looking at 4 animals) has a unique telemeter with a unique transmission band. The 4 frequencies we are looking at are: 182, 184, 206 and 208 Mhz. This radio frequency information is then decoded with a demodulator, and the information stored as a voltage signal on a standard computer acquisition system.

The problem we are finding is that typically, between 11am and 3pm during the day, our telemeters are encountering massive interference from some external source, and we cannot make any meaningful recordings. Our signal strength goes to pot, and all we get is noise. Strangely enough, during the evenings, the recordings seem fine.

To add to the story, all the telemeters can be turned on or off (they have a battery that should last about 1 year) using a 1.8 Mhz burst (we have a small battery powered wand-like antenna that we wave over the lizards for this express purpose!). Once we started to encounter our interference problem, we began to think that perhaps our telemeters are being turned on and off intermittently by an external source of 1.8 MHz. That was when we realized that Ham Radio operates from about 1.8 to 30 Mhz.

What I wanted to ask the newsgroup was whether anyone thinks that the signal strength from a local ham radio operator would be enough to turn our telemeters on or off (I doubt you would know the answer to this question, but thought I'd ask). Do Ham Radio operators typically use 1.8 Mhz?

Otherwise, does anyone out there know what could possibly be interfering at the higher frequencies (182-208 MHz)? There is a local airstrip and flying club that flies overhead where we are conducting this research, but I do not know if they typically transmit within out frequency range!

But more importantly, if the Ham Radio signal could be the source of our interference, we wanted to know if anyone could help us find out

if there is anyone in Rio Claro that is a Ham Radio operator?!! If so, would they be willing to help us troubleshoot this problem!

Thanks for your time. Please reply directly to this email if you can.

It's certainly possible ham signals would be strong enough to activate your equipment. The 1.8MHz band is nowhere near the most popular ham radio band, but it does see a fair amount of use, including in Brazil.

However, the 1.8MHz band is not good for work over any distance of more than a few dozen km during the day. There is VERY little daylight activity on this band - it is used almost entirely at night.

> Otherwise, does anyone out there know what could possibly be
> interfering at the higher frequencies (182-208 MHz)? There is a local
> airstrip and flying club that flies overhead where we are conducting
> this research, but I do not know if they typically transmit within out

The 182-208MHz frequencies are used by VHF TV channels 7-13:
182 & 184MHz fall in TV channel 8; 206 & 208MHz in channel 12. It is concievable that TV stations outside the area you're working in are "propagating" in via various atmospheric phenomona. (however, that kind of thing tends to be more common right around sunrise and in the evening, not in the middle of the day)

> But more importantly, if the Ham Radio signal could be the source of
> our interference, we wanted to know if anyone could help us find out
> if there is anyone in Rio Claro that is a Ham Radio operator?!! If
> so, would they be willing to help us troubleshoot this problem!

http://www.labre.org is the national organization for Brazilian hams. If there is a ham in the area who might be able to help, they should be able to find them. (and even if the problem doesn't have anything to do with ham radio, hams are more likely to know what frequencies are used by broadcast stations in your area - or what other localized sources of interference are possible)

Two other things you might check...

- How selective is your equipment? (how close does a signal have to be to 1.8MHz to cause problems? Might 1.5MHz or 1.6MHz be close enough? In which case it might be an AM broadcast station that's involved?)

- The timing is suspicious. I'm having a hard time thinking of any radio service that transmits only between 11am and 3pm. Hams typically operate erratic schedules and more likely at night. Broadcast stations operate all day long.

I wonder if your equipment is sensitive to heat and drifts off frequency or otherwise malfunctions in the heat of the day, then returns to normal operation as the sun goes down and it cools off?

Or, some other transmitter (most likely an AM broadcast transmitter that operates all day) is drifting with the heat and causing your problem?

In article <1fxmkwr.17x2yxx3i9hpnN%p_j@postzzmark.net>, p_j@postzzmark.net (p_j) wrote:

Amendment I

Congress shall make no law respecting an establishment of religion, or
prohibiting the free exercise thereof; or abridging the freedom of speech, or
of the press; or the right of the people peaceably to assemble, and to
petition the government for a redress of grievances.

"Congress shall make no law respecting the establishment of a religion" This
is the establishment clause. Congress "shall not establish a religion" is
another way to word it. A courthouse is not Congress, unless congress passed a
law mandating that all courthouses bear the 10 Commandments, the law doesn't
apply.

Not that the courts haven't exceeded their boundaries, they have, and
unconstitutional laws are increasingly being foisted onto the people of this
Republic. Law and constitutionality are no longer synonymous. Laws that grant
favoritism to a group based on its (the group's) sexual preferences or
ancestry are patently ludicrous, especially when the same document (the
constitution) is used to uphold the aforementioned groups rights to
participate in activities involving other non-protected groups. i.e. all
people are equal, unless you are black, gay, or (fill in your minority
preference), in which case you are more equal than others.

Let me know when you stop breast feeding (confer my original post in this
thread) and maybe we can discourse in an erudite manner.

Regards.

>Go back and read it again. Only the saddest propagandists try and fly
>this sad argument. There is nothing there about a national religion.

Never say never.
Nothing is absolute.

Graters,

Sorry to hear about your problems.

The frequencies you are using for telemetry aren't in the ham bands, they are in the TV broadcast bands. It would be unlikely for hams to be causing interference in those frequencies.

I am not familiar with the atmospheric background noise levels in Brazil, but many of the VHF bands get noise like this during the day. Perhaps at the equator it is worse than what you may have found with your testing in Canada.

Can you tell us what the power output is on your lizards, and what the distance is you are listening from ?

You may be able to improve your signal to noise ratios by using a directional antenna such as a Yagi aimed toward the lizards, or adding notch filters tuned to the correct frequencies.

The interference seems to cover a very large bandwidth....suggesting this may not be a ham or aviation transmitter on your frequencies. Hams would transmit on a discrete frequency, such as 146.940 mHz. A TV station could cover 2 of the frequencies at a time though.

Could the problem be in the selectivity of your receiver ? Perhaps there is an FM radio transmission at 91 - 104mHz that is swamping your receiver. Do you have another radio (such as a scanner) capable of listening to the frequencies involved to see what you are hearing....is interference really there at those frequencies, and if so what does it sound like. If the equipment has a signal level indicator you might get an idea of the interference pattern.

The 1.8mHz signal burst is unlikely to be your problem. Do all 4 lizards turn on and off ? It would be an unusual station that transmits once to turn off your lizards at 11am , and once again at 3pm to turn them back on. If there was such interference, I would expect the lizards to be turning off and on continuously from 11am to 3 pm. It sounds more like a signal/noise problem, and you are getting swamped with noise.

If there are any hams out there near your experiment site, they would probably be interested in helping you find out the problem, even if they aren't the ones causing it.

And be sure to mention them in the credits if you get your research published,

Good luck,

*Watt

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th/June, through Sunday, 6th/July there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PY, PZ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T9, TA, TF, TG, TI, TK, TL, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (Addition/Correction to OPDX.616). Paul, A35RK, informs OPDX that Mike/KM9D (aka T21MY), Jan/KF4TUG (aka T2YL), himself, and his wife Va'inga will be visiting with Jytte Jarl, 3D2AJ, and her husband Arnold,

at their home on Vanua Levu. They will be there from July 12-21st. Mike and Jan, who have been sailing around the Pacific the last two years, may stay longer on Fiji. Anyway, Paul states he will be active, on a casual basis, from Vanua Levu, using his Fiji callsign, 3D2RK. This is a holiday for them, not a DXpedition operation, but there will be equipment and antennas available to them. Mike and Jan may also be active from the same QTH, but Paul doesn't know their callsigns yet. QSL 3D2RK via W7TSQ.

3DA, SWAZILAND. Rad/ZS6RAD, Ron/ZS5ABD, Cliff/ZS6BOX and Willie/ZS5WI will be operating from Swaziland from July 29th to August 3rd. They have been granted the callsign 3DA0DX by the Swaziland authorities. They will be joined by Willy/3DA0BD and Andy/3DA0TM. Activity will be on most bands from 160 meters through to UHF as time and conditions dictate. They will be using Phone, CW, WSJT, Slow Scan and RTTY from 0300-0700z and from 1400-2200z daily. QSL via the bureau or direct to ZS5WI: PO Box 1064, Eshowe, 3815, KZN, South Africa (Enclose a SAE, and it will be appreciated if the cost of postage can be covered as they have not secured any sponsorship).

40 METERS TO CHANGE! The following was announced on the ARRL Web site this past week:
"Radio History is Made at WRC-03 with 7-MHz Realignment Compromise (July 3, 2003) -- There's good news from World Radiocommunication Conference 2003 (WRC-03) for 40-meter enthusiasts. In an 11th-hour compromise, delegates to WRC-03, which wraps up officially July 4, agreed to move broadcasters out of 7100 to 7200 kHz in Regions 1 and 3 to make room for the Amateur Service. The agreement eventually will mean a 200-kHz worldwide allocation at 40 meters. Although the change does not go into effect until 2009, that's considered speedy in International Telecommunication Union (ITU) terms. Some of the timelines proposed during discussions on the 7 MHz agenda item would have held off the changes until 2033! The WRC-03 action on 7 MHz makes no change in the exclusive US 40-meter allocation. US amateurs will continue to enjoy the full 7000 to 7300 kHz band they now have."

60 METERS IS UP AND ACTIVE! Martin, W9XN/8, reports that the 1st Continental U.S. QSO on 60 meters took place at on 5403.5 kHz at 0400z, on July 3rd. QSO was between W9XN/8 (Martin) in Westover, W.V. and N0FW (Pete) in Cincinnati (Hamilton), OH. RS reports were 59 both ways. Martin states that he used a TS-430S and 60 Meter Tri-Pole.

7P, LESOTHO (Update to OPDX.612). The July 18-25th 7P8 DXpedition by the Lone Star DX Association and the Texas DX Society has added two additional operators to its team. Noted Texas contester Larry Alkoff, N2LA, and his XYL Karen, K2DXV, of Austin have joined the U.S.-Canada team of K5LBU/7P8CF, W0IZ/7P8IZ, K4SV/7P8DA, W5MJ/7P8MJ, VA7DX/7P8NK and WW5L/7P8TA that will be on an all bands, all modes operation from Mohale's Hoek, Lesotho. The Alkoffs have requested the callsign 7P8LA and 7P8KA. The Alkoffs are members of the Central Texas DX and Contest Club in Austin. A online Web site and log search will be available once the DXpedition begins at: http://www.amsatnet.com/7p8.html

9A, CROATIA. Operators 9A1A, 9A7A, 9A3B, 9A4D, 9A5D and 9A7D will be active as 9A0HQ in the IARU HF World Championship (July 12-13th). Activity will be on all bands and modes. QSL via 9A1A (automatically via the bureau for all contacts).

C6, BAHAMAS. Steve/AK0M and his wife Sandy (callsign not provided) will be active as C6ASB and C6ASC, repectively, on Abaco Island (NA-080) from July 22-30th. Steve informs OPDX that this trip is primarily a family vacation, and he will be on the air as time permits. However, he does mention he will do some participation in the RSGB IOTA Contest (July 26-27th) as a Single-Op. Steve states this operation will be low key, 100 watts (IC-706) and QRP (FT-817) to a vertical from N4JQQ's old QTH, and a Buddipole from the beach. CW is his preferred mode, but there may be some SSB, and maybe PSK31. QSL via his home callsign, AK0M.

CP1, BOLIVIA (Special Activity/Contest). Look for Radio Club La Paz's official club station, CP1AA, to be on the air along with some other CP1 stations July 19th. Stations will be calling: CQ OH! LINDA LA PAZ TEST. A nice diploma will be awarded and a QSL confirming the contact. All amateur stations can participate. Their band/mode schedule are as follows:
MODE BAND CP TIME UTC TIME
SSB 80 1800-2200 2200-0200
SSB 40 1300-2200 1700-0200
SSB 20 1600-2000 2000-0000
CW 20 1600-2000 2000-0000
RTTY 20 1600-2000 2000-0000
QSLs should be sent before August 31st, 2003, to: RADIO CLUB LA PAZ, P.O.BOX 2111, LA PAZ, BOLIVIA. Their Web site is at: http://www.radioclublapaz.netfirms.com

DA0, GERMANY. Look for 55 operators from DARC to activate the callsign DA0HQ in the IARU Contest. QSL via DL5AXX.

HB9, SWITZERLAND. Operators HB9CVN, HB9DOS, HB9DQP, HB9FAE, HB9FBL, HB9FBM, HB9DOM, HB9YC, HB9ALM and HB9BZM will be active during the IARU Contest using the callsign HB9A. Activity will be on all bands and modes.

IOTA NEWS.....
AF-046. A team of operators will headed to Desertas Island, Madeira Islands, between July 23-27th. The main purpose of this trip is to mount a VHF repeater on this island, which will enlarge the VHF communications between all the islands in the Madeira Archiplego. Activity will be on SSB, CW and RTTY, on 80/40/20/17/15/12/10/6 meters. They will try to use the IOTA frequencies and also enter in the RSGB IOTA Contest. Callsigns will be CT9D and CT9M for RTTY. Operators are: CT3BD, CT3DL, CT3EE, CT3IA, CT3EN, CT3IQ, CT3KY, CT3KU and DF4SA. QSL via CS3MAD: Associacao de Radioamadores da Regiao da Madeira, P.O.Box 4694, 9000 Funchal, Ilha da Madeira, Portugal.

AS-NEW. Operators Kim/HL1OYF, Phil/HL1TXQ, Park/HL1EJT, Han/HL1VAU, Kim/HL3QP, Butch/HL9DX, Jeon/DS1EVQ, Cho/DS1KOQ, Jeon/DS3BGI, and Ryu/DS4NYE (ed. This list of operators MAY change!) will

be active between July 17-20th from Chuk Island (a new IOTA in the Kangwon-Do Province group). They will sign homecall/2. Due to the island being a military defense zone, operation will only take place during the daytime hours. The daily schedule will be as follows: Daily operation will start at 2030z and daily withdraw from island will be at 1000z. Since their time is limited, PLEASE DO NOT DUPLICATE QSOs. Activity will take place around the usual IOTA frequencies and DX windows. QSL direct only to Kim, HL1OYF: P.O.Box 54 Dong-jak, 156-600 Seoul, South Korea.

EU-016. Roger, 9A/ON4TX, will activate the Island of Prezba (CI-092) from July 13-27th. No bands or modes of activity were provided.

EU-129. Look for German operators DH1LA, DH2AX, DH7NO, DL2RTK, DL2SWW, DL2VFR, DL6ATM and possibly others to participate in the IOTA Contest (July 26-27th) as DL0KWH from Peenemuende, Usedom Island. They will be active 2-3 days before the contest and will operate using their individual callsigns on CW, SSB, RTTY and PSK. QSL via the Bureau.

EU-136. Operators 9A2EU, 9A3SM, 9A4KJ and 9A5MR will be active as 9A7T/p from Trstenik Island in the RSGB IOTA Contest (July 26-27th) as a Multi-Single Low Power Island Expedition entry. QSL via 9A2EU.

EU-145. Operators CT1AGF, CT1HGS, CT3FN, F6HMJ, G3KHZ, VA2AM and possibly some more CT1 operators will be active in the RSGB IOTA Contest as an Expedition class entry from Culatra Island. Their callsign will be CS5C. QSL route is not yet set, maybe CT1AHU. For more information, visit the Web page at:
http://ct1end.netpower.pt/eu145_culatra_2003

EU-170. IOCA 2003 TOUR UPDATE (Refer to OPDX.614). Emir, 9A6AA, reports that 4 new islands have been added to their list of islands to be activated during their "IOCA 2003 TOUR" (Operators are Eugene, 9A/RZ3EC; Sergey, 9A/UA3NAN; and Emir, 9A6AA. Activity on July 12-19th.) is:
* Kosmerka : CI-441 (near Zirje Island)
* Vrtlac : CI-442 (near Zirje Island)
* Sedlo : CI-249 (between Kurba V. and Zirje Islands)
* Samograd : CI-248 (between Kurba V. and Zirje Islands)

EU-181. Operators LZ1QV, LZ1ZM, LZ1ZU, LZ1TA, LZ3YY, LZ4BU and possibly others will be active as LZ1KSL from Sveta Anastasiya Island in the RSGB IOTA Contest (July 26-27th). QSL via LZ4BU.

EU-187. Operators SV9ANJ, SV9ANK, SV9BGE, SV9BKZ, SV9BMC, SV9BMJ, SV9COL, SV9DJR, SV9FBG, SV9FBM and SV9GPM will be participating in the RSGB IOTA Contest from Dia Island (Crete's costal island) as a Multi-Operator/Mixed Mode/IOTA Island Station (DXpedition)/ High Power entry. They will use the special callsign J49DIA. Their time of activity will be from 1200z, July 26th to 1200z,

July 27th. QSL via SV9ANK.

NA-140. Jay, AE4MK, will be active as W3I from "Maryland West", Kent Island in the RSGB IOTA Contest (July 26-27) as a Single-Op/Phone entry. He plans on operating 12 hours for contest on 40-10 meters between 1200-2400z on July 26th. QSL via AE4MK.

SA-024. Members of the Rio DX Group will operate from Comprida Island (Grid Locator: GG65) July 25th to August 3rd. Callsigns will be PT2C and PQ2C. Activity will be on 40-6 meters CW/SSB, on or near the usual DX and IOTA frequencies. Operators are: PY1NEW (Pete), PY1NEZ (Lima) and PY1VOY (Rick). The team will be active in the RSGB IOTA Contest (July 26-27th and the K/VE Island Contest (August 2-3rd). QSL the following via Direct or by the Bureau: PT2C via PY1NEZ and PQ2C via PY1NEW. Electronic QSL (eQSL) to PT2C and PQ2C will be confirmed: http://via www.eQSL.cc

JX, JAN MAYEN. Ove, LA2IJ, will be active as JX2IJ from July 24-31st. Activity will be mostly on RTTY, but also on SSB. Operating hours are uncertain. Suggested frequencies are: for RTTY 14083 and 21083; and for SSB on 20/17/15/12/10 meters depending on conditions. Ove informs OPDX he will be busy with work most of the days. QSL via LA2IJ direct or via the bureau. If direct, return postage must be 2 USD or 1 IRC due to high postal rates in Norway.

KP4, PUERTO RICO. Alfredo, WP3C, will be active as KP4AH in the RSGB IOTA Contest (July 26-27th) as a Single-Op/24 Hrs/CW Only entry. QSL via DIRECT ONLY to KP4AH.

LIGHTHOUSE ACTIVITY.....
Operators CT1AGF, CT1EPV and CT3FN will activate the Lighthouse on Cabo de Santa Maria Culatra Island (IOTA: EU-145, L.H. numbers: LH 0144 and POR 013 36) using the callsign CS5F from July 19-20th. QSL CS5F via HB9CRV/CT3FN: Hermann Stein, Brueelmatten 13, CH4410 Liestal, Switzerland. For more information, visit the Web page at: http://ct1end.netpower.pt/eu145_culatra_2003

The Bahia Blanca DX Group will take part again in the International Lighthouse/Lightship Weekend (August 16-17th). This time from three different lighthouses at the same time. The group will not use any special callsign this time, only their personal callsigns/provincial letters (depending on the Lighthouse). Activity from all three lighthouses will be on all bands (including the WARC bands) and modes during the 48 hours event, uninterrupted. Here are the lighthouses that will be activated along with the operators:
* Recalada Lighthouse -- Grid: FF91ia (ARG-009, Buenos Aires Province "/D"). Operators are: LU8EBK/Marcos, LU6EPR/Ricardo, LU4DRH/Dario, LU6DRD/Diego, LU8ECF/Hugo, LW9EVA/Hugo, LU8EHQ/ Carlos, LW3DKO/Cira and LW7DNS/Alejandra.

* El Rincon Lighthouse -- Grid: FF80xo (ARG-???, Buenos Aires Province "/D"). Operators are: LU4ETN/Carlos, LU8EBJ/Gabriel, LW3DKC/Sebastian and LW8DMK/Marcelo.

* Rio Negro Lighthouse -- Grid: FE88ow (ARG-???, Rio Negro Province "/V"). Operators are: LU7DSY/Carlos, LU5DRV/Walter, LW9EAG/ Gabriel, LU9ESD/Emmanuel and LU8DWR/Osmar.
Their QSL Manager is LU7DSY/Carlos: P.O. Box 709, 8000 Bahia Blanca, Buenos Aires, Argentina. The BBDX Group's Web site is at: http://www.geocities.com/bbdxgroup

LT1, ARGENTINA. The "Bad Power Team", consisting of operators LU1FAM, LU1FGE, LU1FKR and LW9EOC, will be active in the IARU International Contest as LT1F. QSL via AC7DX. Their Web page is at: http://www.badpower.com.ar

OE, AUSTRIA. Be looking for several OE*XHQ stations to be active and handing out multipliers during the IARU World Championship. For example, don't be surprised to hear OE1XHQ on SSB on one band, and on the same band on SSB hear them signing OE5XHQ. Complete details on WHO is operating WHAT callsigns on what band ....etc is currently not available.

OJ0, MARKET REEF. Seppo/OH1VR and Lasse/OH0RJ will be active from here July 10-14th. They will be active as OJ0VR and OJ0RJ on 160-6 meters. Look for them to be active as OJ0U during the IARU World Championship. QSL via OH1VR, direct ONLY!

OY, FAROE ISLANDS. Karl, DK4ARL, will be active as OY/DK4ARL from August 4-13th. He prefers CW and SSB. Karl will be active from a camping site. His mobile home will be his QTH. QSL via the DARC Bureau.

QSL INFO AND NEWS.....
The 4W3DX (Timor-Leste) logs have now been posted by Thor, TF3MM, on his Web site at: http://www.simnet.is/tf3mm/log4w3dx.html

Pedro, HK3JJH, informs OPDX that he made 2070 QSOs from Titumate Island (SA-093) in October 2002. He received 803 direct QSL cards, and all have been answered direct. He made 1970 QSOs from Morro Grande Island (SA-082) in June 2003, and received 170 direct QSL cards, and all have been answered direct. No QSLs were received via the bureau for these two operations, and Pedro thinks he will not receive any in the future. Pedro wants to remind everyone that the ONLY QSL Manager he has is for his Malpelo operations (N4AA). All other expeditions are answerd only direct to his home callsign.

QSL RECEIVED! George, K8GG, reports "I received my S05X QSLs last week from the April 2003 operation via the URE in Madrid and I received my TX4PG QSLs this week from the April/May 2003 operation via I2YSB. QSLs were mailed 7 weeks after the operation!"

USE THE CORRECT ADDRESS. Ric, DL2VFR, informs OPDX that the new address for DL2SWW and DF9TM (recently active as V31FG and V31DG) is only correct on BUCK.com. The address on QRZ.com is incorrect, and they are trying to have it changed. The correct address is: Family Dreyer, Gartenweg 9,

D-19069 Alt-Meteln, Germany. The Dreyers currently have no internet access, and the fowarding of mail from the old address will end very soon. By the way, V31FG and V31DG cards will be coming from the printer soon.

Rick, NE8Z, announced last week that he is now the QSL Manager for all VQ9DX QSOs going back to 1996. Ron, AA5DX/VQ9DX is his cousin. His mother and Rick's mother (WB8WNJ) are sisters. QSLs are being printed and all old/new logs will be at his QTH within 2-3 weeks. Ron is presently active again on Diego Garcia (AF-007) until the end of July. NE8Z's address is: Rick Dorsch, P.O. Box 616, Hamburg, MI 48139.

SV5, DODECANESE. Look for Hubert, DK9NCX, to be active as SV5/DK9NCX from August 20th through September 3rd. Activity will be QRP and on CW/SSB. QSL via the DARC Bureau.

SV/A, MOUNT ATHOS (Gone Silent!). Bad News! Kostas, SV1DPI, informed the DX community this past week that he telephoned Monk Apollo to ask him to be active again. Monk Apollo told him that his HF transceiver (an old Icom) has been burned up for two months. A friend of his (a radioamateur from Thessaloniki) tried to repair it without success. So he now has no radio, and it looks like no activity until he receives another radio.

T32, EAST KIRIBATI (Also, possibly KH6). Hiro, JA0SC (ex-KH0/JA0SC, 3D2HY, XU7ABE, A35SC, 5W0HY, T22SC, 9N7SC, VK9CI and VK9LI), plans a visit to Christmas Island, East Kiribati, and work on the digital modes mostly as T32SC in early August. He will depart Narita on August 2nd and arrive in Honolulu, Hawaii, on the same day. He might be active as KH6/JA0SC. Hiro will depart Honolulu on Augast 3rd and arrive on Christmas Island on the same day. Using the callsign T32SC, he will be active from Captain Cook Hotel for 7 days. Activity will be on 20-10 meters, mostly using SSTV and RTTY. His equipment is: Rigs - HL-200BDX and FT-100 (Max-power 200 watts); Antennas: 2 element HB9CV and 14-28 Mhz tri-bander. He will depart Christmas Island on August 11th and arrive in Honolulu on the same day. Once again, he might be active as KH6/JA0SC before returning to Narita (August 12th). QSL to his home callsign JA0SC direct (address is OK on QRZ.COM). ADDED NOTE: Hiro will be active in the "26th JASTA SSTV Activity Contest". Contest rules are available at the URL: http://village.infoweb.ne.jp/%7Ejasta/english/index.html

T5/EI5C (Where are the doc's?). Bill Leehan, N5SUM, is trying to put together a list of DXers who like to see or be interested in "pushing" (getting the ball rolling) the Irish IRTS (ARRL) to obtain/submit documentation for their 1994 T5/EI5C operation. Currently, T5/EI5C cards are NOT accepted for DXCC because they never submitted the necessary documents. Bill has tried on several occasions to contact the operator, the club (EI5C) president and the secretary of the IRTS. He has NEVER received the courtesy of a reply, even when he sent money ($$) for postage. If you are interested in helping to get the ball rolling or would like to be added to the list of DXers that need T5/EI5C to count, please E-mail Bill at: n5sum@totacc.com

TF, ICELAND. After his activity from Faroe Island (see OY above), Karl, DK4ARL, will head to Iceland and be active as TF/DK4ARL from August 14-21st. QSL via the DARC Bureau.

TZ, MALI. A intenational team called the "NUMBER-ONES" is preparing to go to the Mali Republic, and will be active on the air from August 12-23rd. Activity will be on CW, SSB, RTTY, PSK, SSTV and Satellite AO-40 with operations on all bands. Their QTH will be from Bamako, the capital city of this beautiful and tropical African country. All operators are veteran Dxpeditioners and "Number One" operators:
From Mexico - The outstanding DXer and well known expeditioner Luis, XE1L.
From USA - The best specialist in digitals and satellites from Oakland, California: Doug, N6TQS.
From Italy - Computers specialist and complete CW/SSB operator (from operations such as EL2PP, 1A0KM, JT1Y, E30GA, T77V, TT8MM, T32R, KH5/I8NHJ, K5K and XR0X), Max, I8NHJ.
From Spain - A young, but veteran, CW operator from Valencia land, Javi, EA5KM. And finally Paco, EA5RD, SSB/Digitals and Julio, EA5XX, SSB/Digitals organizing and planning of this International DXpedition.
There will be more operators added to complete this "DREAM TEAM" operating from Mali. They want to reach every place in the world with very strong signals from Africa in a 10 days, 24 hours, all modes, all bands operation. The URE, Spanish Radioamatuer Association, will be the QSL manager, so the QSL cards will be via EA4URE. More information is forthcoming.

VP5, TURKS AND CAICOS ISLANDS. Matt, IK2SGC, informs OPDX that he will be on North Caicos as VP5/IK2SGC from August 10-19th. Activity will be on 160-10 meters and also 6 meters.

VP5, TURKS AND CAICOS ISLANDS. Dave, AH6HY, will be active as VP5/AH6HY from Grand Turk Island (NA-003), September 26th through October 4th. His activity will be on 40-10 meters SSB only. QSL via AH6HY. His Web site is at: http://www.qsl.net/ah6hy/

VP9, BERMUDA. Lou, K1YR, informs OPDX that he will be operating as VP9/K1YR from VP9GE's QTH from July 9-16th. This will include the IARU Contest. Activity will be on SSB/CW HF and maybe 6 meters. QSL to his home call.

W1AW/3 IARU OPERATIONS. Well-known contester Tim, K3LR, announced this past week: "As many of you already know, next weekend is the IARU HF World Championship contest. Station K3LR (nine band modes) along with two band modes at K3CR and one band mode at W3GH will host the Headquarters station for the American Radio Relay League as W1AW/3 for the 24 hour contest. As you can imagine, this operation is a dream come true for me. Many regular contest men from the K3LR multi multi team will be here to give the ARRL HQ multiplier out to as many stations as possible. Operators scheduled to be on the team are: K3UA, N3RA, N9RV, K8MR, W9ZRX, W2RQ, LZ4AX, K8AZ, K8NZ, W9RE, W3GH and N3GJ. Thanks to Jim/WA3FET and Bob/W3GH for their help in manning their stations for the W1AW/3 effort. Also special thanks to the dedication and hard work by Dave, W9ZRX, we will have real time Intenet linked combined CT log data from the station at Penn State

University (K3CR). We hope that conditions and world wide participation are good for this event."

XU, CAMBODIA. Danny/M0GMT (19 yrs old) and Oliver/DJ9AO (20 yrs old), members of the World Wide Young Contesters Club (http://www.wwyc.net), will be operating from here between August 3-18th. Their QTH will be in Sihanoukville. Activity is planned on all bands 160-6 meters on CW and SSB, if possible with two stations at the same time. The activity will include an entry in the WAE CW Contest. Their assigned callsigns are XU7ACT and XU7ACU. QSLs are via G3SWH. A Web site is available, as well as online log checking, please visit for updated information at: http://www.geocities.com/dxpedition2003

YR0, ROMANIA. The Romanian Amateur Radio Federation will participate in the 2003 IARU World Wide Championship with a team representing 50 operators gathered around the IARU HQ contest station using the callsign YR0HW. This year the RARF will use the suffix HW instead of the usual HQ suffix letters in the honor of YO4HW, their team leader for many years, who died last year after putting a serious effort in this competition. A special colored QSL card will be printed and sent via the bureau to all contacts.

ZA, ALBANIA (ALBANIA HITS THE RADIOWAVES AGAIN!). A press release from Martti Laine, OH2BH: "The International group will be in Albania as you read this. DL6LAU, DL8OBQ, OH2BH, OH2NB and OH3BHL are there and making the preparatory steps for setting up a training program to enhance amateur radio further as well as operating on several new band modes, such as 6 meters and 2 meters.
They will join Geni, ZA1B and operate this callsign until 13 July with two stations. QSL cards will be handled together with the April/May ZA1B operation by OH2BH.
At the end of the week they will team up with the Albanian resident operators for the IARU Radiosport and activate the AARA (Albanian Amateur Radio Association) HQ station. ZA1A may be re-activated for the period of the IARU Contest and the upcoming training program. QSL ZA1A also via OH2BH."

ZONE 2. Two members from "Club de Radioamateur de Beauce" will activate this rare zone between July 8-15th. Look for Jacques/VE2AZX and Rosaire/ VE2GHZ to be active from Sept-Iles, Havre Saint-Pierre and Natashquan. They will operate SSB, mainly between 2300 and 0200z, on HF bands 40, 20 and 15 meters (Suggested frequencies are: 7095/7225, 14195 and 21295 kHz up), depending on local conditions, using the callsign VE2GHZ/2. QSL via home callsign either direct (CBA) or through the bureau.

ZS5, SOUTH AFRICA. Edwin, ZS5BBO, informs OPDX that after a long absence of two years, he has finally put up his beam. He will be active as ZS5T in the up and coming IARU HF World Championship (July 12-13th). He is looking forward to working old friends and making new ones in the contest. Edwin will be operating on 10, 15 and 20 meters. Between now and the contest, Edwin will be active at odd times conducting tests and would appreciate reports from around the world.

You are saying the same thing. What do you think favoring one religion over another would mean? The establishment of a particular religion!

Where does the word "property" arise in reference to the religion aspect of the First Amendment?

Congress doesn't mandate the inclusion of the 10 Commandments on courthouses, therefore the Amendment doesn't apply. The Amendment doesn't say "no religious displays will be permitted on public property", nor does it say that the display "is permissible only of all religions can have access". It says that "Congress shall make no law...." They didn't make a law, localities do the displays of their own volition. I would expect predominately Jewish neighborhood to display Jewish symbols during the holiday seasons, and predominately Christian neighborhoods to display Christian symbols. None of these involve congress.

Let me know when you're fully out of your mother's vagina, obviously the birthing process is, as of yet, incomplete. 1 year of nursing, eventually some kindergarten, move on to primary school, then high school, a little college, and you'll be right in no time.

Good luck, it's a bitch being born feet first isn't it? If your head wasn't so big, you'd have been birthed years ago.

Regards.

BAGHDAD, Iraq (CNN) -- A gunman Sunday shot and killed a soldier who was guarding Baghdad University in the city's center, military officials said.

The soldier from the 352nd Civil Affairs Command had strayed from a larger group and was talking with a local resident when someone walked up from behind and shot him in the back of the head with a handgun, a witness told CNN. The shooting took place around 12:30 p.m. (4:30 a.m. EDT), a military spokeswoman said.

According to U.S. Central Command, the soldier died at a hospital.

It was the second such attack in Baghdad in two days. On Saturday, 24-year-old Richard Wild, a British cameraman, was shot dead by an unknown assailant as he was talking with a group of soldiers.

Prior to Sunday's incident, the United States blamed remnants of Saddam Hussein's government -- Baathists and Republican Guard members -- for attacks that have killed 27 American and six British troops since President Bush declared the end of major combat operations on May 1.

U.S. Joint Chiefs Chairman Gen. Richard Myers told "Fox News Sunday" that much of Iraq is fairly stable, but there is a triangle of lawlessness where fighters opposed to the U.S. presence are staging most of their attacks.

The military is still trying to assess whether the attacks on U.S. military personnel are planned by Iraqis, or whether terrorists from other countries might be behind them, Myers said.

On Saturday, a U.S. soldier was wounded and two Humvees were damaged when a grenade was tossed from an overpass at a U.S. military police patrol in central Baghdad.

That attack came the same day seven U.S.-trained Iraqi police recruits were killed when an "improvised explosive device" detonated in Ramadi, about 75 miles west of Baghdad, according to U.S. authorities.

At least 13 people were wounded in the blast, U.S. military sources in Ramadi told CNN. The recruits had been close to graduating from their training program.

The recruits were walking past a street light from their school to police headquarters at the time, witnesses said. (Gallery: Explosion at Ramadi) The city has strong ties to ousted Iraqi leader Saddam Hussein and his outlawed Baath Party.

Many people said they blamed U.S. forces for the explosion, but the local police chief denied that, saying he thought there was an effort to create tension between the U.S. forces and the police.

Bodyguard captured
Sabah Mirza, a former bodyguard to President Saddam Hussein, was captured, and a cache of weapons was seized from his property, Bernard Kerik, a senior U.S. adviser to the Iraqi Interior Ministry, said Sunday.

Mirza was detained in Baghdad several days ago; the weapons were taken from his Baghdad property Sunday night, Kerik said.

Mirza and his cache of weapons, including thousands of rounds of ammunition, AK-47 rifles and a number of 60-mm mortar rounds, were discovered after U.S. forces received a tip from an Iraqi, Kerik said.

Uranium trail
Former U.S. Ambassador to Gabon Joseph Wilson said Sunday he told the CIA and State Department that Baghdad did not try buy uranium from Niger in the late 1990s to develop nuclear weapons. (Full story)

Two months before the U.S.-led invasion of Iraq, President Bush accused Baghdad of trying to buy "significant quantities of uranium" from an unnamed African country. In his January 2003 State of the Union address, Bush cited a British intelligence white paper.

"If [Bush administration officials] were referring to Niger when they were referring to uranium sales from Africa to Iraq ... that information was erroneous and ... they knew about it well ahead of both the publication of the British white paper and the president's State of the Union address," Wilson told NBC's "Meet the Press."

Bremer: Steps toward government
U.S. civil administrator L. Paul Bremer told reporters Saturday that Saddam's "days are numbered." "Saddam Hussein is finished," Bremer said. "The Baathist regime is not coming back. And if he is alive, we will capture him."

The United States has posted a $25 million reward for information leading to Saddam's capture or confirmation of his death. A $15 million reward each has also been offered for similar information about Saddam's sons, Uday and Qusay. (Hometown view of bounty)

Bremer also said the first step toward formation of a new Iraqi government will be taken in the next two weeks.

"I expect to see the creation of an Iraqi governing council with real responsibilities and power. Among them: helping to launch a constitution process that will pave the way for elections," Bremer said.

He said the nation's constitution "will be written by the Iraqi people for the Iraq people"

Could you please explain to us your fascination with and reasond for
multiple posts about gays in the news? Not does this have nothing at all to
do with the news group topics, it seems to indicate you have an obsession
with homosexuals.
Kindly post a well-thought-out response.

I have been looking at the Heathkit hw-101, the atlas 210x, and various alinco mobiles. My main concern is cost. I only have 250-300 to spend on this unit. I am obviously not particular about type. Is it cheaper to get a mobile and use it as a transceiver or just get an old base station and use that? I am really quite interested in the old analog dial types. Any suggestions? CW is a must.

Search eBay for an Icom IC-735 -- with PS -55 power supply may cost a bit more than your budget but is definitely worth it.

I have two stations:
ICOM IC-735
PS-55 power supply
AT-150 antenna tuner

Wouldn't swap either of the stations for a truckload of other stuff. You can pick up these items on eBay.

So glad you brought the list back.... moron.

It shows just how arrogant and obnoxious you are.... moron

Here you go... moron. Here's an example of the reason you change your nym so often. There are many others which I can post if you would like. Put
yourself at the top of your moron list where you belong....moron.

Here's the link with the whole thread. I'd read the entire thread to understand what kind of obnoxious POS you are.

http://groups.google.com/groups?hl=en&lr=&ie=UTF-8&threadm=2nSdnXlNKIKMoOCjXTWcqg%40comcast.com&rnum=6&prev=/groups%3Fq%3D%2522andy%2Band%2Bbarry%2522%26hl%3Den%26lr%3D%26ie%3DUTF-8%26sa%3DN%26tab%3Dwg

and here's the jist of the conversation starting with a Post by Barry .

Message 7 in thread
From: Andy and Barry (Timetrav2@webtv.net)
Subject: New To Group

Hello, I have been reading this group for about three weeks and thought
I would join in on the fun.

I recently purchased my third SW radio a Grundig YB 400 PE. My first SW
radio was a Sony that I purchased while I was in the service many years
ago. I spent many hours on the deck of a Navy ship listening to SW
broadcast while at sea. The other radio was also a Sony. Both radios
were portables with AM and FM, one had a tape player as well. They were
not top of the line radios but I had lots of fun listening to the world
with both of them.

My Grundig is about ten times the radio that my first radios were
because of the new technology we have gained in the past thirty years.
Anyhow I am looking forward to listening again and maybe chasing down
some QSL's while exploring our tiny little world while riding the radio
waves.

Peace,
Barry

Then you chime in:

From: RedXIII (x@x.com)
Subject: Re: New To Group
Newsgroups: rec.radio.shortwave
Date: 2003-03-22 20:50:28 PST

Andy and Barry huh? What are you? Fags?

Then Barry says:

From: Andy and Barry (Timetrav2@webtv.net)
Subject: Re: New To Group
Newsgroups: rec.radio.shortwave
Date: 2003-03-23 08:15:55 PST

>Andy and Barry huh? What are you? Fags?>

Hey, that's pretty funny stuff. (Not) Andy happens to be my son. I
didn't come over to this group to be in a flame war. I guess I have to
point out to you that your off hand comment most likely shows the level
of the depth of your thinking.

Now go put your name on your moran list.

Barry

As you can see by your own words you are a rude, obnoxious, arrogant POS.

Regards,
-Smith. Agent Smith

snipped the bullshit

Now here's proof of the trolling, flooding jackass that you are.

The message that you replied to was posted nowhere else but
rec.radio.shortwave and you're dumb trolling, flooding ass cross-posts the
reply to rec.radio.scanner & rec.radio.amateur.misc.

Now why would you do that? What could possess you to crosspost that message
to two other groups and not just reply in rec.radio.shortwave? Could it be
to be a trolling asshole? I think so.

Make no doubt about it folks. With this kind of stupidity at work here, it
looks like our spamming, flooding & trolling man is Agent Smith. A man who
continues to ridicule a man in the phony email address he posts with.

I kind of like that idea though, so from now on all my posts will include
the phony email address of AgentSmith@IsATroll.com

Thank you and goodnight. :)

251. GOING TO MONTREAL - HAM INFOS PLS

I had to look up the answer to the first question. Apparently you
can. The governing body in Canada is Industry Canada by the way.
The national amateur radio group is the Radio Amateurs of Canada,
and their website is http://www.rac.ca They have a bit about CEPT
there, and you can go directly to it at http://www.rac.ca/cept.htm
But some of the other pages on the site likely would be useful to a visitor.

There isn't much in the way of local amateur radio stores. Traditionally,
they tended to be mixed in with other operations, ie a store selling
electronic components, and those old school stores have all faded away.
The one amateur radio specific store closed a few years back.

There is Radio H.F. http://www.total.net/~radiohf but while they
sell some ham equipment, it seems more about shortwave receiving equipment,
and I'm not even sure if they've got a walk in store anymore. But
if Sheldon doesn't have what you might be looking for, likely he
could point you to something within range.

The RAC site also has a list of ham distributors at
http://www.rac.ca/infopub.htm#commerce and that's worth a look.
I don't know if there is any such store in Ottawa, which is only
two hours or so away. There is a store in Trois Rivieres, but I'm
not sure if that would be close enough, and I can't remember the name.

The provincial organization is RAQI, http://www.raqi.qc.ca

I don't know about the availability of Echolink locally. Someone
else suggested a couple of clubs, and they have both been around for
years. I'm sure someone there could help you. Of course, there
are also a number of local French language ham clubs.

The clubs I know about don't have meetings in the summer. And the hamfests come in the spring and fall. Of course, you didn't specifiy when you will be visiting. In the fall, things pick up quite a bit.

It's festival season now, and if you come in the next two months or so, you're bound to hit one of them.

Does anyone know if the Ten Tec Delta has an amp replay out out ? I believe it does as I can hear a relay with a slight delay when I key the rig on CW. But there doesn't seem to be an output for it unless it comes out of the accessory jack. My Delta manual gives NO info about this accessory jack nor is there a schematic in the manual. Can anyone help ? My Corsair 2 has a clearly marked aux T/R output that comes out on an RCA jack.

You read it all wrong MJC (..are you the guy
who used to do the Art Bell Parody site?
Are your the famous "MJC" of the Skepticult?
if you are I want to buy you a beer!)

As for J.L. it seems he had a visit from the BLM and
County Sheriff sometime in the past few days.
He was talkin about it today on SW and blustering about
how he ran them off his compound. Looks like ole James
is setting up to become another Koresh. He's starting
to put no trespassing signs all over his property
and quoting esoteric laws of the Magna Carta and
quotes from the Federalist Papers.

Methinks J.L. will be in the news *very soon* as
the next Koresh or similar.

Send a complaint to support@alt.net if you care to ... as they claim to
take some form of stance againt their users forging the identity of others.

From http://www.altopia.com/polfaq.htm :

Q: What is your policy on forgery?
A: We have a policy against a user of Altopia making posts in a way that
uses the email address of another user on Usenet or the Internet, in an
attempt to deceive readers of the true identity of the poster, without that
email address owner's permission. In addition, if you are the victim or
witness to a forgery, you may want to contact the appropriate law
enforcement agency so they may then contact us and follow-up as they feel
appropriate.

What convention should we use on the air to refer to the 5 new channels in the 5MHz band? I recommend we call them Channel E1, E2, E3, E4, and E5. Simple and easy to remember.

73, de Hans, K0HB

Ham brains only respond to freqs, they do not do well with channel
tags. Like on 2M. "The .360 machine". "the .195 machine", etc.

On my Kenwood rig, I have them stored in memory, from memory location 51
to 55.
If Kenwood's methods are the same as the other guys, we could just say
"five one"
"five two" etc.

Certainly nothing wrong with that at all.

But since most of us will probably just poke them into 5 convenient
memory slots, some sort of easy memory aid might be helpful.

Whatever.

That's because our rigs display frequencies. CBers talk about channel
numbers, TV
watchers talk about channels and so on. But broadcast AM radio talks about
frequencies, as listeners' radios are marked with frequencies (often
incorrectly as
54 to 160 KHz). The FCC talks about FM radio channel numbers, but the
public
only knows about frequencies, as that is how most all radios are marked.

>
> CRYBABIES!

RIIGHT. Like it works this why. I am salaried, and expected to put in at least 10% overtime, lest it affects my performance rating and could jeapordize my chance of remaining in my job.

Time to relax? Try being on a project where you have to put in 12+ hours a day over a long period of time. And you get no money for this. And if you work more effectively, it adversely affects your performance rating. Or, how about this neato: Due to the nature of the work, a quarter of your year is spent on the bench interally due to projects not being ready. Then you have to put in the long hours to make up for the hours. And then throw in this wonderful vacation time that counts against your making hours target. The longer you work for the company, the more vacation time you get, thus the more hours you have to make up.

Some people. Do you even have a clue? Did you ever hear the concept of getting paid for the hours you put in?

- Richard Hutnik

Not only that...this jerk is antangonizing people who might think
that gays have human rights and is definately turning off people (like
me) who might be sympathetic to the positions of his automated political
rants and raves. He's shooting his own cause in the foot.

Chamelion Named SpamDude...you're just being a jerk! You think
you're striking a blow for gay rights and giving voice to justifable
liberal viewpoints, but you're just being a jerk. You are making enemies
of some who might be your friends if you weren't just being a jerk. You
don't have to be a jerk...Just stop.

You give him/her/it too much credit. His/Her/Its only agenda is to inflame
the users of this group, no more, no less.

He/She/It lacks the integerity required to have a cause.

I don't know man !! I just made a RESET on my news reader, activated filter, put some names in, and i don't see more of this man called Agent Smith. The group is so clean now in my view!!

Turn on the filter, it's really amazing what it can do!

As I knew it always would. I would upgrade my ham license without EVER taking a CW test. Do I wish CW "Exterminated"- No. You old farts need the CW to pass the time away. I do not. Something like a CW test, keeps many good people like me from enjoying the ham bands. This is 2003, not 1955. Alot has changed.

I speak for many people. They feel the same way I do. We want the CW requirement dropped SOON. I can live with taking a written test(s) to get my HF.

I will be e-mailing my ARRL section manager soon. We will get the code dropped. Then on to bigger things.

Mujahideen Lloyd, the CW requirement is now gone from the international treaty and it will probably disappear from the U.S. requirements too.

If a 5 wpm Extra is a Welfare Extra, what is a no-code Extra? Will the Welfare Extras be looking down their noses at the no-code Extras?

All of these are very disturbing questions for the Archie Bunkers who like to say things like "no code, no ham." First they had to let blacks and asians buy homes in their neighborhoods, and now they have to let ham radio be a hobby based solely upon technical knowledge. This is a black day for them.

Peace be upon you, and also upon the hordes of Archie Bunkers who used to persue you through the news groups.

WRC-03: GOOD NEWS FOR HAM RADIO - BAD NEWS FOR SUPPORTERS OF CW

The 2003 World Radiocommunications Conference in Geneva is over and there is some generally good news for ham radio. Q-News Graham Kemp, VK4BB, has been following this story and has a complete wrap up on the way that amateur radio fared:

--

The 2003 World Radiocommunication Conference concluded its discussions of the issues on its agenda on Thursday afternoon, 3 July, after marathon Plenary sessions that tested the patience and stamina of the conferees. The big news for radio amateurs is that there will be a dramatic improvement for we here in region 3 in regard the 40-meter band!

7100-7200 kHz band reallocated to the amateur service in both region 3 and 1, Region 2 7000-7300 kHz remains exclusively amateur. The change will take effect on 29 March 2009, less than six years from now!

Now the "but".. A footnote containing the names of countries that are mainly in Region 3 and the Arab States makes the band also available to the fixed and mobile services in those countries on a primary basis.

It was not easy to achieve such a positive outcome on this issue. A last-ditch effort to bridge differences was chaired by Alan Ashman of Australia.

Perhaps the magnitude of what has been accomplished for radio amateurs can best be explained this way: Never before in the history of radiocommunication has an HF broadcasting band been shifted to accommodate the needs of another service. This is not simply an accomplishment of the IARU. It would not have been possible without the cooperation of a number of broadcasters and many, many others. The people who worked with us who are not radio amateurs -- including some who were strongly opposed at the start but who acceded to the compromise --deserve much of the credit. For example, Australia came to the conference

with a strong "no change" position and had to shift its position dramatically in order to embrace the compromise.

Agenda item 1.7.1 (Article 25): A package of revisions to the international Radio Regulations that are specific to the amateur and amateur-satellite services, takes effect on Saturday, 5 July 2003. Michael Owen, VK3KI, has guided the work of IARU on this issue since 1996.

Agenda item 1.7.2 (Article 19): 432-438 MHz secondary allocation for satellite-borne synthetic aperture radars was approved in Plenary.

Agenda item 1.1 (footnotes): "Footnote fever" seized some administrations in the closing hours of the conference. Fortunately, the amateur service escaped serious damage from "footnote fever" although it may be a problem in the future if countries want to climb into the footnote for fixed and mobile at 7100-7200 kHz.

As Secretary David, K1ZZ said in wrapping up his report... "It's Over! Well, the work is over; the ceremonial closing of the Conference will occur on Friday afternoon, 4 July. Then we will
all be heading home, except for those who are staying for a two- day meeting to plan the preparatory work for WRC-07.

Yes, it's all beginning again...."

From Q-News Australia, I’m Graham Kemp, VK4BB, reporting for the Amateur Radio Newsline.
--

There are two very important documents that came out of WRC 03 that every radio amateur should read. Both were issued at the close of the conference by the International Amateur Radio Union. The first is a final wrap up on the conference by Dave Sumner, K1ZZ. The other is an in-depth explanation of the changes to the worlds radio regulations authored by Michael Owen, VK3KI. You will find links to both of them on the front page of out website at www.arnewsline.org (Q-News, IARU, ARRL, WIA, others)

**

60 METERS: A LOOK AT NIGHT ONE ON THE NEW GENTLEMENS BAND

Its being called the “New Gentlemans Band” by some. At least thats what monitoring the first availability of the new 60 meter band as it opened to the East Coast on July 3rd. Newsline’s Don Wilbanks, was listening in from the deep South:

--
The ‘New Gentlemens Band” may well be a title that will stick on 60 meters. Even as the new frequencies came to life, there was none of the on-air pushing and shoving thats so prevelant on other bands like 20 and 40 meters. Instead, those observing, operating and posting thir thoughts to the Internet seemed to agree that calm and order was the way most approached 60 meter operation.

Ron Wray, WB5HZ, was one of those listening in. He says over the qrz.com website that it seemed as if someone had kicked an anthill at 11:00 PM Central time. That’s when hundreds of stations were conducting simultaneous QSO’s on all five frequencies.

According to Wray, there were explosions of activity that continued throughout the night as each time zone jumped onto the new band in sequence. And Wray notes the apparent success of the 50 watt effective radiated power limit. He says that from his location in Dear Park Texas, the low power limit made it so that no one signal was sufficiently strong to completely control any particular frequency. And because of this amateurs were able to make solid contacts despite the unbelievable level of QRM.

Robert Harper, AFZ0H, of Park Hills Missouri was another early user of 60 meters. In his posting to QRZ, Harper said that he was very impressed by the discipline of the amateur community on opening night. Despite the noise and the crowd, everyone seemed to keep a level head. He says that it was an atmosphere that reminded him of the "good ol' days," adding that he cannot recall when he last observed such gentlemanly behavior under such crowded conditions.

And Bill Collins K8NQC, may have summed it up best. In his QRZ note he said that multiple QSO's on the same frequency will greatly help the utility of the band. He adds that the absence of big signals is really a plus.

For the Amateur Radio Newsline, I’m Don Wilbanks, AE5DW, in New Orleans,

--

So far there seem to be no complaints about the new spot frequencies that comprise the current 60 meter ham radio allocation. In fact, one ham was heard to say that the rest of high frequency Amateur Radio can learn lessons in sportsmanship and courtesy by simply tuning in. (ARNewsline(tm), from QRZ.com and other sources)

RADIO RULES: ANTI-ENHANCED SSB PETITION ASSIGNED RM 10740

Its taken some time, but the FCC has now assigned the designation RM 10740 to the petition by Michael Lonneke, W0YR, of Round Hill, Virginia, and Melvin Ladisky, W6FDR, of Camarillo, California to limit the bandwidth of Single Sideband an full carrier ampletude modulated signals on all ham bands below 28 MHz. As previously reported, W0YR and W6FDR want SSB signals to be limited to 2.8 Kilohertz and AM to be no wider than 5.6 kilohertz.

The petitioners make no secret that their regulastory request is aimed squarely at those hams who are experimenting with enhanced SSB signals which are wider than the 2.8 kilohertz that they believe should be the maximum bandwidth. They claim that enhanced SSB is bothersome to other operations and that some users of the pseudo mode are unwilling to cooperate in minimizing harm being caused.

What Lonneke and Ladisky have not bothered to explain is why they also targeted users of AM whom even they they freely admit are not causing a problem for other radio amateurs.

Either way, RM 10740 carries a commentary cutoff date of August 2nd. You can let the agency know how you feel by submitting commentary by mail or using the FCC's Electronic Comment Filing System. It'sated in cyberspace at www.fcc.gov. Once there use the websites search function to locate RM 10740. (ARNewsline(tm))

YHOTY 2003: JAY THOMPSON, W6JAY, NAMED ARNEWSLINE(tm) YOUNG HAM OF THE YEAR

He is not yet 18, but he is a champion class hidden transmitter hunter as well as a young ham devoted to public service and to bringing more kids into the hobby. And for these reasons and more, a select committee of judges has named Jay Thompson, W6JAY, of Santa Ana California to receive the 2003 Amateur Radio Newsline Young Ham of the Year Award. We have more in this report:

--

If the name Jay Thompson and the call sign W6JAY sound familiar, its because Jay has made news several times in the world of hidden transmitter hunting. In the five years that he has been licensed, W6JAY has participated in three championship hunts has won virtually every type of medal offered in his age group. One hunt took him all the way to China. And when you travel the world, hidden transmitter hunting can leave you with moments to remember:

--

Thompson: "In China it was raining. And in the bamboo forest, when you shook the trees, you would get a mini-shower fall on you and it would just cool you off after you had been running for a while."

--

But his exploits in T-hunting is not the only reason that Jay was chosen as this years Young Ham of the Year. He is also heavily involved in emergency communications and is a member of the Orange County Hospital Disaster Emergency Communications System. This is a medical communications support group that gave W6JAY his first taste of what responding to a real emergency is like:

--

Thompson: "During the Plecencia Linda train crash I was stationed at a hospital with my dad where we helped to allocate information where patients were going. That helped the hospitals a lot from what I heard."

--

If Jay Thompson sounds enthusiastic about his T-hunting and emergency communications work, you have to hear what he has to say about recruiting youngsters into the hobby. Jay believes that the future of ham radio is with the young:

--

Thompson: “I noticed that there were not very many active young Amateur Radio operators, so I have tried to do my part to get more of them in so that Amateur Radio can have a better future. It starts with the kids and as they grow up they realize that it is such a good activity and will get more people to join. If there are not any kids, then there is not very much of a future for Amateur Radio.”

--

A lot of people seem to agree. In fact ARRL Southwestern Division Vice Director Tuck Miller, NZ6T, calls Jay Thompson: “...a magnet for other young hams to become actively involved in the Amateur service.”

The Young Ham of the Year program is co sponsored by the Amateur Radio Newsline, Vertex Standard which manufactures Yaesu brand ham radio gear and C-Q Magazine. Jay Thompson, W6JAY, will receive his award at a presentation on Saturday August 16th at the Huntsville Hamfest in Alabama.

Right now we ask you to join us in congratulating Jay Thompson, W6JAY, as he is named 2003 Young Ham of the Year.

For the Amateur Radio Newsline, I’m Mark Abramowicz, NT3V, reporting.

--

2003 marks the 17th consecutive year that the award has been presented. (ARNewsline(tm))

**

ENFORCEMENT: FCC ACTS IN THREE CASES

The FCC has contacted three hams on various enforcement matters. The agency’s Daryl Duckworth, NN0W, has more:

--
Audio report only. Hear it at www.arnewsline.org
--

According to Duckworth, that’s the FCC’s enforcement actions through the period ending June 28th. (RAIN, FCC)

**

RESCUE RADIO: PERSONAL LOCATOR BEACONS NOW LEGALLY SOLD IN LOWER 48

Hams could have a new emergency communications job in the near future. T-Hunting down people in distress wearing Personal Locator Beacons.

The CGC Communicator reports that retail stores in the continental United States are now being allowed market the pricey beacon transmitters which can be activated when a person is in a dangerous situation. Proponents of Personal Locator Beacons claim that they will assist rescue teams in finding lost persons in emergency situations.

According to CGC, each beacon must be registered with NOAA before alert activations can be relayed via satellite to the Air Force Rescue Coordination Center at Langley Air Force Base in Virginia. Actual beacon alerts are recieved over the SARSAT COSPAS satellite system which is a long term cooperative effort between the United States and Russia.

More information is on line at www.sarsat.noaa.gov (CGC)

**

RESCUE RADIO: THE DEAN OF ARRL SECTION MANAGERS RETIRES

The dean of ARRL Section Managers, New Mexico's Joe Knight, W5PDY, stepped down from his post on July 2nd. Knight cited poor health in his decision to retire from the volunteer position after serving for nearly 27 years. This is a record of volunteer service longer than any other sitting SM.

Assistant Section Manager Bill Weatherford, KM5FT, of Albuquerque, has been named to fill the remainder of Knight's term, which ends on December 31st. In his departure statement Knight said that he plans to try to help Weatherford as much as he can to assume the Sectiin Managers job. He also thanked his constituancy for the wonderful job that they have done and asked that they support KM5FT in the same way as they did him.

Knight had recommended Weatherford's appointment as his successor. KM5FT is an ARRL life member and has served as an Assistant Section Manager for the past two years. (ARRL)

**

ACCIDENTS HAPPEN: OMAHA’S KETV-TV TOWER COLLAPSES

Joe Eisenberg, K0NEB reports that a broadcast tower being converted for digital television has fallen in Omaha Nebraska. According to a story supplied by Joe, KETV's main broadcast antenna fell to the ground Friday July 4th.

Crews had been working to install High Definition TV technology on the tower since May 30. A new antenna was to replace the aging RCA TW-15 skyhook. A station spokesman said that it is not yet clear how much the tower collapse will set back the stations conversion to digital transmission or how long it will take to clear debris and rebuild. Nor is it known what caused the main tower to fall. (K0NEB)

**

RADIO CONFLICT: PENNSYLVANIA TOWN DISCOVERS WATER AND RADIO WAVES DON'T MIX

Officials in Chambersburg, Pennsylvania have asked the FCC to intercede in a dispute between that township and Radio Station WCBG on 1590 kHz. This, s the borough hires a Louisiana attorney to try to force the owners of the radio

station to cease operating long enough for workers to finish a 2-million-gallon water storage tank project in the nearby Chambers-5 Business Park.

Chambersburg's effort to build a new, elevated, 150-foot-high water storage tank on land adjacent to WCBG's towers have stalled because workers complained of receiving RF burns. Complicating the situation are allegations that the storage tank interferes with WCBG's signal, presumably warping its radiation patterns.

WCBG operates 5 kW non-irectional daytime and, 1 kW directional at night. The whole story is on-line at http://tinyurl.com/g1dk (CGC)

**

ARRL: LOOKING FOR MULTIMEDIA PRESENTATIONS AND VIDEOS

The ARRL’s Field and Educational Services is seeking donations of Amateur Radio related presentation programs or slide shows that utilize Microsoft PowerPoint or similar computer-based slide-viewing software. The department is also interested in VHS and digital video programs to add to materials that it offers hams through the ARRL Video Series. For guidelines on whats acceptable contact Mary Lau, N1VH, 225 Main St, Newington, Connecticut 06111 or e-mail herat mlau@arrl.org. (ARRL)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: 40 METER DX’ER AL HIX, W8AH, - S.K.

On a sad note, the changing of the guard continues with news that an internationally known dx-er has died. And this news hits very close to this anchor desk. As local hams gathered for field day here in Charleston last month, word was received that Albert Hix, W8AH had become a silent key. Al passed away at his home here in Charleston on June 25. He was 85.

W8AH not only loved amateur radio, he loved his country and the freedom she provides. Al was a skilled member of the US Army signal corps, serving during world war 2 when he was appointed radio officer to General George Patton. He also served during the Korean war and returned to Paris to climb the Eiffel tower again for the daily net with the Pentagon.

After his military service, Al returned to Charleston with his wife and worked as an engineer for Union Carbide until his retirement in 1985. He pursued his beloved hobby with a new vengeance, earning his place on the DXCC honor role with 388 countries confirmed. On 40 meters, he holds the top honors with 362

entries. Al made hundreds of friends around the world through amateur radio, many of them he visited with his wife, Connie.

Avid DX'ers knew one side of Al Hix. Many of us knew another side, as WV ARRL section manager Hal Turley, KC8FS, explains…
--

(KC8FS audio)

--
A US Army chaplain presided during Al's funeral and he was laid to rest with military honors. Meanwhile, local hams seemed to man the field day CW station with a special vigor… and without the traditional W8AH at the key at start time.

(KC8FS audio)_

Al is survived by his charming wife, Connie, brother James and by hundreds of ham friends around the world and here at home in the West Virginia hills… where we knew that the only thing bigger than his signal, was the kind heart of W8AH. (ARNewsline(tm))

**

RADIO PUBLICATIONS: CQ RELEASES HAM RADIO MAGAZINE ANTHOLOGIES

Fans of the old Ham Radio magazine, take note: A new series of anthologies, reprinting selected articles from the pages of ham radio, is now available from the folks at CQ Magazine

The first four books in the series were introduced two weeks ago at the 2003 Dayton Hamvention. The topics covered are: "Antennas, 1968 to1972;" "Antennas, 1973 to 1975;"Homebrewing Techniques" and "Troubleshooting Techniques."

Ham radio magazine was published from 1968 to 1990 and is generally acknowledged as the premier amateur radio technical publication of its time. CQ Communications now owns the rights to Ham Radio magazine and decided to release to compilation books based on requests from the Amateur Radio community. They can be ordered on-line at www.cq-amateur-radio.com. (CQ)

**

CONVENTIONS & HAMFESTS: CINCINNATI IN JULY

On the ham radio social circuit word that the sixth annual OH KY IN Hamfest is slated for Saturday July 26th at the Diamond Oaks Caerrer Development Center in Cincinnati Ohio. The event features a giant outdoor flea market, ham radio test sessions, vendor exhibits, door prizes and lots more. Fur further information e-mail Lynn Ernst at wd8jaw@arrl.net (Via press release)

**

CONVENTIONS & HAMFESTS: DENVER COLORADO IN AUGUST

And the Denver Radio Club Hamfest is scheduled for Sunday, August 17th at the Jefferson County Fairgrounds in Golden Colorado. Doors open at 8:30 AM. For more information contact Bryan Steinberg, KCZ0CUA via e-ail to kcØcua@arrl.net, or via the club website at www.qsl.net/w0tx (Via press release)

**

HAM RADIO IN SPACE: ARISS MARKS SUCCESSFUL EURO SPACE CENTER CONTACT

Another big success for Amateur Radio on the International Space Station. This as U-S Astronaut Ed Lu, operating as NA1SS made contact with youngsters on Space Camp at the Euro Space Center in Belgium at 08:25 U-T-C on Monday July 7th. .

The center operated as ON4ESC with bout 150 children gathered in the auditorium. Some of them were Dutch speaking, others spoke only French speaking and 45 were Americans living in Europe.

Ed Lu answered the call from ON4ESC the very second the ISS was in range of the Euro Space Center. He answered 17 questions during the nearly 8 minutes long pass. At its closest approach, the space outpost was 2000 km south of Belgium, over the Pyrenees mountains. AMSAT Vice Chairman Gaston Bertels, ON4WF, was on hand to oversee the operation as well as introducing the young audience to the amateur radio service, amateur radio satellites and the ham radio stations used by astronauts and cosmonauts while operating from space. (ON4WF)

**

DX

In DX, the question is -- did you work them? Of coarse we are talking about DL6LAU, DL8OBQ, OH2BH, OH2NB and OH3BHL who have been Albania in preparation of setting up a training program to enhance amateur radio in that nation. They have also been on the air as ZA1B operating on several new bands and modes including 6 meters and 2 meters. Their operation was scheduled to conclude on July 13th with QSL’s to be handled together with the April and May ZA1B operation by OH2BH. (OH2BH via N4GN)

Bob Cumming, W2BZY, says that he will be active on 50.110 MHz from Costa Rica TI2 through July 27th. This, in an attempt to activate some of the less common grid square in that nation including EJ79. When not on 6 meters, Bob will be looking for contacts on the high frequency bands. QSL as directed on the air. (VHF Reflector)

Also, look for Desertas Island on the air from July 23rd to the 27th. This as the Madeira DX group activates CT9D and CT9M on RTTY from that rare location. The main purpose of this trip is to mount a VHF repeater on the island to enhance F-M coverage across the Madeira Archiplego. The operators will also be active on SSB, CW and RTTY during their stay. Q-S-L to CS3MAD, P.O.Box 4694 - 9000 Funchal -Ilha da Madeira - Portugal. (OPDX)

**

THAT FINAL ITEM: MISSING LILLY FOUND

And finally this week, the story of a ham radio operator and his dog. It happened back in January, but only recently was the story forwarded to us. Here’s Amateur Radio Newsline’s Bruce Tennant, K6PZW with the details.

--
Peter Kringle K-C-9-B-I-W of Superior Wisconsin tells it this way. Back in January Peter came home for lunch to find his dog Lilly missing. She has some how unhooked the standard dog clasp and a locking carabineer.

Peter first walked around the area looking for his dog. He then got in his car and drove their normal walking loop. But he was unable to find Lilly.

At this point he began asking people in the area if they had seen her. He found out that she had been seen in the area a few times and that she had escaped around 10:30am. So Peter called the local dog shelters, leaving a description of Lilly in case some one found her and brought her in.

By this time it was 3 P.M and Peter decided to try something that he had not heard of anyone else every trying before. He turned to ham radio for assistance in finding his mising pup.

Peter picked up his Yaesu VX-5, and called out on the local 146.94Mhz repeater asked if anyone his area could help my look for Lilly. Two amateur radio operators answered his call. This meant that there were now two in cars and K-C-9-B-I-W on foot looking for her. This meant that the searchers were able to cover much more ground in a very organized fashion.

It was just before 4:00 p.m. when one of the hams spotted Lilly and was able to pick her up. He then called out on the repeater to let every know she was safe. A bit later Peter was able to rendezvous and take the wandering Lilly back home. And thats a perfect happy ending to the story and to this weeks newscast as well.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW reporting.

--

Peters Internet positing about the help he received came with an apology. He wants to thank the two hams who helped out, but unfortunately he has forgotten their call signs. He adds that he hopes they will e-mail him so that he can give proper credit where credit is due. And if you want to see what Peter and Lilly look like, look up KC9BIW om the www.qrz.com website. (WA9ICU)

Just talked to an old Navy buddy down in Atlanta. The job market sounds good. His xyl is a Registered Nurse, and he is a special education instructor in a public school. According to the Georgia DOL, nurses make about $34/hour and Special Education Instructors average around $48/hour in the public schools, more in private schools.

He said you can buy a real nice home for around $200,000. Think my xyl & I are going to move to Atlatna soon.

Enrique

Hey, go for it! Just keep in mind that I may be able to send and receive Morse faster than you can type ... :)

I love it when folks talk about the speed of the internet. I have programmed in a number of different languages, but 'cut and paste' doesn't count in my book. Yes, one guy I worked with used to brag how he 'prepared' his essays in college using 'cut and paste'. My question is, how fast can someone actually send a message without cut and paste?

Dang, original thought has reappeared as 'vapourware'.

For the record, 40 per was the fastest test administered by the Navy at Bainbridge, Md. I had perfect copy. How much faster I could go, I don't know. I doubt it was much more that 50, however. So, the question is, can you put 50 words per minute out on your keyboard? Hmmmm ... BTW, I could hit bursts of 92 words per minute on a 100 word per minute teletype back when. Ok, so I'm getting slow. Care to bet that I can't do 60? How about 70 on my keyboard? That doesn't matter; the question is, can you do 40 per with *no* errors.

Your ball!

Dan:
Little Twinkie Two Shoes, EVE, doesn't post here....at least not under his
callsign. Somebody trolled, somebody who obviously listens to 14.313. EVE
doesn't have the balls (his or anybody else's) to post here. It would be fun
if he did, however, because everybody would pile on his case and you know
how much EVE likes those "pile-ons". EVE LIKES to play leapfrog...bends
over, looks over his shoulder, slaps his butt and says, "Come on everybody.
There is always room for one more!"
dit dit dah.....

==========
One underlying factor here...seems that a dimwitted poster who has been
antagonizing "Agent Smith" and posting as same has a penchant for calling
others "morons". Note the repetitiveness?
Gee...if one did not know better, one would surmise that the anal aperture
from Atlanta had some input. Of course this Crusty Cretin has since moved
on, by necessity, to Cedartown. It is one of the Cedartown signatures that
they so love the term, "moron". Of course this term is so befitting of the
author....for the lack of another descriptor they love to use "moron". It is
about all they have remaining on tlheir slate.
May I suggest that these Cedartown denizens use terminology more befitting
them?
Loser is a beginning. Loser is a fitting end.
Agent Smith makes no difference...
There is no in-between. You both are toads.

Bush team united Iraq front unravels

Use of flawed intelligence opens a Pandora's box

ANALYSIS
By Michael Moran
MSNBC

July 11 - The familiar drip, drip, drip of a brewing political scandal echoes through the power centers of Washington and London these days as the Bush administration and the government of British Prime Minister Tony Blair are pelted daily with increasingly pointed questions about the case they made for going to war against Iraq. The admission that the president made an
apparently false allegation against Iraq in his State of the Union address was supposed to help put the issue to rest. Instead, it reopened fissures inside the administration and in Blair's government over the validity of their case for war.

THE FAILURE to turn up chemical or biological weapons in Iraq - initially dismissed as a "sour grapes" issue by Bush insiders - is growing into a genuine political problem, dogging the British and U.S. leaders at every public appearance and sparking various agencies that had a hand in Iraq policy to begin plotting a course through the gathering storm. Throughout the president's Africa trip this week, for instance, Bush and Secretary of State Colin Powell were peppered with questions on Iraq's weapons of mass destruction, and particularly on the president's Jan. 28 claim that Iraq sought to purchase uranium from African countries that mine it.
The image of African leaders standing mutely by as their news conferences were transformed into debates on Iraq could not fail to recall similarly uncomfortable moments during Bill Clinton's scandal-plagued administration.
But the comparisons end there. Clinton's troubles were domestic, in the strictest sense, and largely dismissed as unimportant in the rest of the
world. Today, with U.S. troops dying in Iraq at a rate even the White House sees as politically unsustainable, there is a palpable desire to lay to rest
any questions about the war's real motives and stem any further damage to U.S. and British credibility.
"They have to get by this, and they have to do that very soon," says a source close to the Bush family, who requested anonymity. "The GOP can

bottle up inquiries in Congress, but they can't bottle up public opinion."

DAMAGE CONTROL

As it became clear that yet another piece of prewar evidence had been discredited - and that many intelligence and diplomatic officials had already concluded the charge was false even before the president's speech - efforts to control the damage took center stage. Bush told reporters in Africa on Friday that his State of the Union speech "was cleared by the intelligence services. And it was a speech that detailed to the American people the dangers posed by the Saddam Hussein regime, and my government took appropriate response to those dangers."

His national security adviser, Condoleezza Rice, added that if the CIA director, George Tenet, had any objections about the Africa uranium claim, "he did not make them known." But the CIA, sensing once again it might become a scapegoat, leaked its own take on the affair to the Washington Post, stressing that the CIA had gone so far as to warn the British that "State Department analysts were questioning its accuracy when it came to Niger and that CIA personnel considered reports on other African countries to be 'sketchy.'"

On still another tack, Defense Secretary Donald Rumsfeld on Wednesday told Congress that the decision to go to war was far more complex than the WMD issue and really was not centered on whether Iraq had new or ongoing WMD programs.

"The coalition did not act in Iraq because we had discovered dramatic new evidence of Iraq's pursuit of weapons of mass murder," Rumsfeld said. "We acted because we saw the existing evidence in a new light through the prism of our experience on Sept. 11." Rumsfeld's statement echoed an earlier assertion from his deputy, Paul Wolfowitz, who said the WMD issue was chosen "for convenience" so the administration could lay out a case against Iraq at the United Nations.

'CRYING WOLFOWITZ'?

The ferocity of the leaking and spinning that has followed the White House retraction reflects lingering splits inside the U.S. government over Iraq. The State Department, the military officer corps and many CIA officials were very wary of the idea of an invasion of Iraq and skeptical of intelligence painting Saddam as a "clear and present danger" to the United States even as Osama bin Laden remained at large.

Greg Thielmann, who ran military assessments at the State Department's Bureau of Intelligence and Research until October, said intelligence clearly was manipulated to make the most hawkish case possible for war. He

told Congress at the same hearing Rumsfeld attended that data on the Iraqi threat was "misrepresented on the part of the administration."

He also noted that Powell, his former boss, did not repeat the Iraqi uranium allegation during his own presentations of the case for war.
The infighting, and the admission that a key allegation is probably incorrect, also has emboldened those who have argued all along that the war was fought for reasons other than those stated. Even Democrats who have been tremendously wary of criticizing a popular president while troops are in the field are beginning to stir, though most, like Connecticut Democrat and presidential hopeful Joseph Lieberman, prefer to view it as a case of intelligence agencies misleading the president, rather than the president misleading the nation.
Even before the African uranium charge was withdrawn, leaks from U.S. and British intelligence agencies had raised questions about whether the administration jury-rigged prewar intelligence to paint a far more threatening picture of Iraq's arsenal than data otherwise suggested.
Washington wits have coined the phrase "crying Wolfowitz" to describe the phenomenon, a reference to the deputy defense secretary who was perhaps the administration's leading Iraq hawk.
More substantively, each week has brought new revelations about the shortcomings of "coalition" intelligence. With the war still raging, enormous gaffes committed by British agents came to light, including admissions that some accusations in a highly touted "dossier" on Iraq actually were lifted from a U.S. grad student's 12-year-old doctoral thesis, casting doubts on the reliability of Britain's normally well-regarded spy agency, MI-6.
Prewar Israeli intelligence suggesting Saddam's ballistic missile arsenal might be as large as two dozen Scuds also has been largely discredited, though some Israeli sources continue to claim Iraq hid much of its banned material across the border in Syria before the war began.
In May, sensing a gathering storm over the "missing" WMD, U.S. intelligence analysts began leaking complaints to U.S. news outlets suggesting that they were pressured to "bury," in the words of one, any analysis that did not support the most alarmist view of the Iraqi threat.
In early June, two strangely outfitted trailers were discovered that seemed to fit the description of the "mobile biological weapons labs" Powell accused the Iraqis of operating in a February speech to the U.N. Security Council. No weapons material was found in the trailers, however, and within two weeks, unnamed U.S. intelligence officials had told the Washington Post that the administration suppressed analysts' reports that concluded the trailers were likely to have been just what the Iraqis claimed they were: support trailers used to inflate weather balloons.

Secretary of State Colin Powell called Iraq's denials a "web of lies," during his Feb. 5 speech before the U.N. Security Council. Click above for highlights of what Powell labeled "irrefutable and undeniable" evidence that
Saddam Hussein is concealing weapons of mass destruction.

Powell played several tapes of intercepted communications between officers puportedly discussing hiding data from weapons inspectors. The first involved two officers in the Republican Guard discussing a modified vehicle which Powell said was involved in a chemical or biological weapons program.

Officer 1: "We have this modified vehicle."
Officer 2: "I'm worried you all have something left."
Officer 1: "We evacuated everything. We don't have anything left.

Powell asserted that all Iraqi organizations were ordered to hide their correspondence with the Organization of Military Industrialization. This organization, experts believe, oversees Iraq's weapons of mass destruction activities. Powell also said that Iraqi weapons facilities have had their hard drives replaced and that government officials and scientists have been ordered to keep prohibited items in their home, citing the recent discovery of 2,000 pages of documents recovered in the home of an Iraqi scientist.

Among the satellite photos revealed by Powell

A munitions facility in Taji suspected of housing chemical munitions. One photo reveals decontamination vehicles, a sign, according to Powell, of chemical activity. The second taken on Dec. 22, 2002 shortly before the arrival of weapons inspectors, shows the area cleaned up.

A suspected ballistic missile site. A Nov. 10 photo shows a cargo truck preparing to move ballistic missile components.

A Nov. 25 photo of a suspected biological weapons related facility shows a truck caravan, two days before inspections resumed. Powell said this type of
"house cleaning" occured at almost 30 sites.
Iraq, according to Powell, has prevented weapons inspectors from interviewing Iraqi scientists. The methods included replacing scientists with intelligence agents. Powell said that this happened at one facility in mid-December. On another occasion, Iraqi officials issued a false death certificate for one scientist. Powell also said that a dozen experts have been placed under house arrest.
Powell said that interviews with defectors has revealed the existence of mobile weapons productions labs. According to Powell, the labs -- trucks and
train cars -- are capable of producing a quantity of biological poison equal
to the entire amount that Iraq claimed to have produced in the years prior to the Gulf War.

Powell repeated the point that Iraq has yet to account for vast amounts of chemical weaponry including 550 artillery shells armed with mustard gas and 6,500 bombs from the Iran-Iraq war. He accused Iraq of embedding key

portions of its illicit chemical weapons infrastructure within its legitimate civilian industry.

Backing up his argument, Powell produced an intercepted conversation of one officer asking a second to remove any mention of "nerve agents" from correspondence.

Powell said Saddam Hussein is determined to get his hands on a nuclear bomb and has made repeated covert attempts to acquire high-specification aluminum
tubes from 11 different countries, even after inspections resumed. While Powell noted that there have been differences of opinion over the tubes, he said U.S. experts believe the high-tolerance tubes were acquired for only one purpose, to advance Iraq's illicit nuclear program.

Powell described a "sinister nexus" between Iraq and the terrorist network. As evidence, he said Iraq harbored a network headed by Abu Musab Al-Zarqawi,
a collaborator of Osama bin Laden and his Al Qaida lieutenants. He also noted Iraqi support for anti-Israeli groups, including Hamas and the Palestine Liberation Front.

LANCING THE BOIL
By late May, having spent the previous month insisting WMD discoveries were just a matter of time, senior administration officials and the president himself began to hedge a bit, stressing the difficulty of finding such caches without cooperation from Iraqi experts, and even raising
the possibility these weapons had been destroyed before the war began.

The Pentagon also moved to quash reports that it had orchestrated efforts to "sex up" intelligence on Iraq. In early June, Deputy Defense Secretary Douglas Feith, who coordinates intelligence gathering for Rumsfeld, appeared before Congress to deny these intelligence analysts' allegations.
"This suggestion that we said to them, 'This is what we're looking for. Go find it,' is precisely the inaccuracy we are here to rebut. I know of nobody who pressured anybody," Feith said.
At the same time, Blair faced down a parliamentary inquiry, insisting
that U.S. and British statements on Iraq were based on genuine concerns and the best intelligence available. While the inquiry on Monday acquitted Blair
and his Cabinet of misleading Parliament, the British leader remains under fire by angry members of his Labor Party now trying to prove the war was "illegal" because it was based on allegations that cannot be proven. Of particular damage have been accusations from Blair's former foreign secretary, Robin Cook, who has characterized the Iraq war as a Bush family vendetta.
"This was a war made in Washington, pushed by a handful of neoconservatives and pursued for reasons of U.S. foreign strategy and domestic politics," Cook wrote in the London daily The Independent on

Friday. Cook's broadside coincided with new statements from anonymous
British Cabinet members saying they now had very little expectation that
any
banned weapons would ever be found in Iraq.

Mr. Bush, You Are A Liar

---=

-

By: William Rivers Pitt - 07/11/03

There was a picture on the front page of the New York Times on Tuesday,
July
8. It showed several American soldiers in Iraq sitting in utter dejection
as
they were informed by their battalion commander that none of them were
going
home anytime soon, and no one knew exactly when they were going home at
all.
PFC Harrison Grimes sat in the center of this photo with his chin in his
hand, staring at ground that was thousands of miles from his family and
friends. A soldier caught in the picture just over PFC Grimes' shoulder had=

a look on his face that could break rocks.

212 of PFC Grimes' fellow soldiers have died in Iraq, and 1,044 more have
been wounded. The war created chaos in the cities, and it seems clear now
that very little in the way of preparation was made to address the fact
that
invasion leads to social bedlam, not to mention a lot of shooting. Last
Sunday, CNN's Judy Woodruff showed a clip of a Sergeant Charles Pollard,
who
said, "All we are here is potential people to be killed and sitting ducks."=

According to the numbers, almost two thirds of the soldiers killed in Iraq
since May 1 died in "non-combat related" mishaps like accidental weapons
discharges, accidental detonations of unexploded ordnance, and questionable=

car crashes. There are some in the world who might take comfort from the
fact that only one third of the dead since May came from snipers or bombs
or
rocket-propelled grenades. Dead is dead, however. There is no comforting
them.

A significant portion of the dead and wounded came after Bush performed his=

triumphant swagger across the deck of an aircraft carrier that was parked just outside San Diego bay. Those dead and wounded came because the Bush administration's shoddy planning for this whole event left the troopers on the firing line wide open to the slow and debilitating bloodletting they have endured. A significant portion of the dead and wounded came after Bush=

stuck his beady chin out on national television and said, "Bring 'em on!"

When a leader sends troops out into the field of battle, they become his responsibility. When his war planning is revealed to be profoundly faulty, flawed in ways that are getting men killed, he should not stick his banty rooster chest out to the cameras and speak with the hollow bravado of a man=

who knows he is several time zones away from the violence and bloodshed.

Such behavior is demonstrably criminal from a moral standpoint. The events that led to this reprehensible display were criminal in a far more literal sense.

Bush and the White House told the American people over and over again that Iraq was in possession of vast stockpiles of chemical, biological and nuclear weapons. Bush and the White House said over and over again that this
was a direct threat to the United States. Bush and the White House told the=

American people over and over again that Iraq was directly connected to al Qaeda terrorism, and would hand those terrible weapons over to the terrorists the first chance they got. Bush and the White House told Congress
the same thing. Very deliberately, Bush and the White House tied a war in Iraq to the attack of September 11.

It was all a lie. All of it.

When George W. Bush delivered his constitutionally-mandated State of the Union Address in January 2003, he stated flatly that Iraq was attempting to=

develop a nuclear weapons program. "The British government has learned," said Bush in his speech, "that Saddam Hussein recently sought significant quantities of uranium in Africa." He delivered this proclamation on the basis of intelligence reports which claimed that Iraq was attempting to procure uranium from the African nation of Niger.

Vice President Cheney got the Niger ball rolling in a speech delivered August 26, 2002 when he said Saddam Hussein had "resumed his effort to acquire nuclear weapons." As the data clearly shows, Mr. Cheney was a central player in the promulgation of the claim that Iraq was grubbing for uranium in Africa. This statement was the opening salvo.

CIA Director George Tenet made this same claim in a briefing to the Senate Intelligence Committee on September 24, 2002. This briefing was the deciding
factor for a number of Senatorial fence-sitters unsure about voting for war.
Bush, in a speech delivered on the eve of the Congressional vote for war on=

Iraq, referenced the Niger uranium claims again when he raised the specter of a "mushroom cloud" just three sentences after evoking "The horror of September 11."

That sealed the deal. Congress voted for war, and a clear majority of the people supported the President.

In the last week, a blizzard of revelations from high-ranking members of the
intelligence community has turned these Bush administration claims inside out. It began with a New York Times editorial by Joseph Wilson, former US ambassador to several African nations. Wilson was dispatched in February of=

2002 at the behest of Dick Cheney to investigate the veracity of the Niger evidence. Wilson spent eight days digging through the data, and concluded that the evidence was completely worthless. The documents in question which=

purportedly indicated Iraqi attempts to purchase uranium were crude forgeries.

Upon his return in February of 2002, Ambassador Wilson reported back to the=

people who sent him on his errand. According to his editorial, the CIA, the=

State Department, the National Security Council and the Vice President's office were all informed that the Niger documents were forged. "That information was erroneous, and they knew about it well ahead of both the publication of the British white paper and the president's State of the Union address," said Wilson in a 'Meet the Press' interview last Sunday.

"I have little choice but to conclude that some of the intelligence related=

to Iraq's nuclear weapons program was twisted to exaggerate the Iraqi threat," Wilson wrote in his Times editorial. "A legitimate argument can be=

made that we went to war under false pretenses." He elaborated further in a=

Washington Post interview, saying, "It really comes down to the administration misrepresenting the facts on an issue that was a fundamental=

justification for going to war. It begs the question, what else are they lying about?"

Ambassador Wilson's claims are not easily dismissed. Wilson is a 23-year veteran of the foreign service who was the top diplomat in Baghdad before the first Gulf War. In 1990, he was lauded by the first President Bush for his work. "What you are doing day in and day out under the most trying conditions is truly inspiring," cabled Bush Sr. "Keep fighting the good fight."

A great hue and cry has been raised as to the timing of the data delivery to
the policy-makers. Don Rumsfeld and Condoleezza Rice have both claimed they=

knew nothing of the forged Niger evidence, claiming the information was buried in the "bowels" of the intelligence services. Vice President

Cheney's
office has made similar demurrals. Obviously, the administration is
attempting to scapegoat the CIA.

Given the nature of Wilson's claims, and given who he is, and given the
fact
that he was sent to Niger at the behest of Dick Cheney, it is absurd to
believe the administration was never given the data they specifically asked=

for over a year before the war began, and eleven months before Bush's
fateful State of the Union Address.

27-year CIA veteran Ray McGovern, writing in a recent editorial, described
a
conversation he had with a senior official who recently served at the
National Security Council. "The fact that Cheney's office had originally
asked that the Iraq-Niger report be checked out," said the official, "makes=

it inconceivable that his office would not have been informed of the
results."

Wilson is not alone. Greg Thielmann served as Director of the State
Department's Bureau of Intelligence and Research until his retirement in
September. Mr. Thielmann has come forward recently to join Ambassador
Wilson
in denouncing the Bush administration's justifications for war in Iraq.

"I believe the Bush administration did not provide an accurate picture to
the American people of the military threat posed by Iraq," said Thielmann
on
Wednesday. During his press conference, Mr. Thielmann said that, as of the
commencement of military operations in March of 2003, "Iraq posed no
imminent threat to either its neighbors or to the United States". Mr.
Thielmann also dismissed the oft-repeated claims of a connection between
Iraq and al Qaeda. "This administration has had a faith-based intelligence
attitude," he said.

Thielmann could have saved his breath, and Wilson could have saved himself
a
trip, if the Bush administration had bothered to pay any attention to the
International Atomic Energy Agency. The IAEA's chief spokesman, Mark
Gwozdecky, said on September 26, 2002 that no such evidence existed to
support claims of a nascent Iraqi nuclear program.

White House spokesman Ari Fleischer on July 8 stood before the press corps
and said the President's statements during the State of the Union address
had been "incorrect."

Let us look at the timeline of this and consider the definition of
"incorrect":

=B7 February 2002: Ambassador Joseph Wilson is dispatched by Cheney to Nige=
r

to investigate Iraq-uranium claims. Eight days later, he reports back that the documentary evidence was a forgery;

=B7 August 26, 2002: Dick Cheney claims Iraq is developing a nuclear progra=
m;

=B7 September 24, 2002: CIA Director Tenet briefs the Senate Intelligence Committee on the reported Iraqi nuclear threat, using the Niger evidence to=

back his claims;

=B7 September 26, 2002: The IAEA vigorously denies that any such nuclear program exists in Iraq;

=B7 October 6, 2002: George W. Bush addresses the nation and threatens the American people with "mushroom clouds" delivered by Iraq, using the same Niger evidence;

=B7 October 10, 2002: Congress votes for war in Iraq, based on the data delivered by Tenet and by the nuclear rhetoric from Bush four days prior;

=B7 January 2003: George W. Bush, in his State of the Union Address, says, "The British government has learned that Saddam Hussein recently sought significant quantities of uranium in Africa."

=B7 March-April 2003: War in Iraq kills thousands of civilians and destabilizes the nation;

=B7 April-July 2003: No evidence whatsoever of chemical, biological or nuclear
weapons can be found in Iraq. 212 American soldiers have died, and 1,044 more have been wounded, as a guerilla war is undertaken by Iraqi insurgents;

=B7 July 2003: Amid accusations from former intelligence officials, the Bus=
h
administration denies ever having known the Niger evidence was fake.

The Bush administration knew full well that their evidence was worthless, and still stood before the American people and told them it was fact. Bush sent the Director of the CIA to the Senate under orders to use the same worthless evidence to cajole that body into war.

That is not being "incorrect." That is lying. In the context of Bush's position as President, and surrounded by hundreds of dead American soldiers=

piled alongside thousands of dead Iraqi civilians, that is a crime.

They know it, too.

A report hit the Reuters wires late Tuesday night announcing the arrest of an Iraqi intelligence official named Ahmad Khalil Ibrahim Samir al-Ani. An unnamed "US official" claimed al-Ani had reportedly met with 9/11 ringleader
Mohammed Atta in Prague just months before the attack. The old saw about

Iraq working fist in glove with al Qaeda to bring about September 11 was back in the news.

According to the story, neither the CIA or the FBI could confirm this meeting had taken place. In fact, a Newsweek report from June 9 entitled "Where are the WMDs?" shows the FBI was completely sure such a meeting had never taken place. The snippet below is from the Newsweek article; the 'Cabal' statement refers to Defense Secretary Rumsfeld and his coterie of hawks who have been all-out for war on Iraq since 1997:

"The Cabal was eager to find a link between Saddam and Al Qaeda, especially=

proof that Saddam played a role in the 9-11 attacks. The hard-liners at Defense seized on a report that Muhammad Atta, the chief hijacker, met in Prague in early April 2001 with an Iraqi intelligence official. Only one problem with that story, the FBI pointed out. Atta was traveling at the time
between Florida and Virginia Beach, Va. (The bureau had his rental car and hotel receipts.)"

Amid the accusations that have exploded surrounding the revelations of Wilson, Thielmann and other high-ranking intelligence officials, comes now again reports of the infamous Iraq-al Qaeda connection, an administration claim meant to justify the war. As with the Niger forgery, however, it is too easily revealed to be utterly phony.

It reeks of desperation. This administration is learning a lesson that came=

to Presidents Nixon and Johnson with bitter tears: Scapegoat the CIA at your
mortal peril.

There are many who believe that blaming George W. Bush for the errors and gross behavior of his administration is tantamount to blaming Mickey Mouse for mistakes made by Disney. There is a great deal of truth to this. Groups=

like Rumsfeld's 'Cabal,' and the right-wing think tanks so closely associated to the creation of administration foreign policy, are very much more in control of matters than Bush.

Yet Bush knew the facts of the matter. He allowed CIA Director Tenet to lie=

to Congress with his bare face hanging out in order to get that body to vote
for war. He knew the facts and lied himself, on countless occasions, to an American people who have been loyally supporting him, even as he beats them=

over the head with the image of collapsing towers and massive death to stoke
their fear and dread for his own purposes. In doing these things, he consigned 212 American soldiers to death, along with thousands of innocent bystanders in Iraq. Given the current circumstances, there will be more dead
to come.

There is no "The President wasn't told" justification available here, no Iran/Contra loophole. He knew. He lied. His people knew. They lied.

Death knows no political affiliation, and a bloody lie is a bloody lie is a=

bloody lie. The time has come for Congress to fulfill their constitutional duties in this matter, to defend the nation and the soldiers who live and die in her service. The definition of 'is' has flown right out the window. This 'is' a crime. George W. Bush lied to the people, and lied to Congress.=

There are a lot of people dead because of it.

One Congresswoman, Democratic Representative Jan Schakowsky of Illinois, released a statement on July 8 that cuts right to the heart of the matter:

"After months of denials, President Bush has finally admitted that he misled
the American public during his State of the Union address when he claimed that Iraq attempted to purchase uranium in Africa. That is why we need an independent commission to determine the veracity of the other so-called evidence used to convince the American people that war with Iraq was unavoidable.

"It is not enough for the White House to issue a statement saying that President Bush should not have used that piece of intelligence in his State=

of the Union address at a time when he was trying to convince the American people that invading Iraq was in our national security interests. Did the president know then what he says he only knows now? If not, why not, since that information was available at the highest level.

"What else did the Bush Administration lie about? What other faulty information did Administration officials, including President Bush, tell the
American people and the world? Did the Bush Administration knowingly deceive
us and manufacture intelligence in order to build public support for the invasion of Iraq? Did Iraq really pose an imminent threat to our nation? These questions must be answered. The American people deserve to know the full truth."

The voice of Rep. Schakowsky must be followed by others both within and without the majority. If nothing is done about this, American justice is a sad, sorry, feeble joke.

George W. Bush: The misleader

By John David Rose

Think About It

Another bloody week. Another half-dozen American soldiers killed. Another dozen or so wounded. Instead of throwing kisses at our troops as Bush's war hawks had predicted, the people of Iraq are throwing grenades.

As sons of American mothers bleed and die in Iraq, Bush swaggers up to a podium and from 3,000 safe miles away taunts the Iraqis. "Bring 'em on," he sneers.

Easy for him to shoot off his mouth when his own neck is not on the line. He's not patrolling the streets of Baghdad, sweating bullets under body armor, praying to get back home without being killed by those he "liberated."

Will someone inform our local breast-beating TV anchors that Iraq did not attack us, we attacked them. Thus the war was not to "protect our freedoms."
What was it for? Good question. Keep asking it.

Independence Day/week was not a good one for the nation. Under a photo of a Humvee burning on a Baghdad street was the headline: "Anger rises for troops' families as deployment in Iraq drags on."

"U.S. 'still at war' general declares: 10 GI's wounded," was another front-page report. In the right-hand column: "U.S. jobless rate increases to
6.4, highest in 9 years - 30,000 jobs lost in June."

The biggest story of all is Bush's complete fizzle in the economics department. He has the distinction of being "the first president since Hoover to oversee a decline in the country's employment," writes the N.Y Times.

Dubya's economic record since elected: The economy has lost 3 million jobs. The nation's growth rate is at a record-setting low (1.4 percent per year). The federal deficit is $3 trillion and climbing.

Trying to save Bush, the Fed dropped interest rates to a 45-year low. Still the economy keeps shedding jobs - almost 400,000 since January.

History shows that every Republican president since Hoover has brought economic stagnation and big federal deficits. Democrats in the White House have given us strong economic and employment growth.

Bush Senior added $200 billion to the Reagan deficit and attacked Iraq while
the economy stalled.

Reagan made a deal with Iranian terrorists to beat Carter, shipped chemical weapons to Hussein, enacted the greatest tax increase on the working class in our history, attacked the tiny island of Granada and left us $300 billion
in debt.

(What is it about Republicans and attacks on smaller countries? Is it a manhood thing?)

Before Reagan was the hapless Gerald Ford who pardoned Mr. Watergate, Nixon.
Only Eisenhower did no harm.

G.W. Bush is living up to his Republican heritage: Shaft the middle-class, suck up to the rich, leave the nation worse off than when you took office.

Big mouth, no results. Bin Laden is still at large, even with a price of $25
million on his head. So is Hussein.

Bush misled us about Iraq's weapons of mass destruction; misled us about Iraq's ties to al-Qaida. He misled us about Iraq's nuclear capability, misled us about its chemical and biological weapons, misled us about the mobile chemical labs.

Now he's misleading us about his deceptions.

Wake up America. Iraq and terrorists are the least of our problems.

http://icberkshire.icnetwork.co.uk/0100news/nationalnews/content_objectid=13166645_method=full_siteid=50102_headline=-Iraq-weapons--no-threat-before-war
--name_page.html

Iraq weapons 'no threat before war' Jul 11 2003

Iraqi chemical weapons posed no significant risk to Britain in the run-up to
the recent war.

That is the verdict of a former head of the international body monitoring
proliferation of the arms.

Ron Manley, who was director of verification at the Organisation for the
Prohibition of Chemical Weapons and worked in Iraq, said it was unlikely the
Iraqis possessed enough viable agents to arm more than a couple of
missiles.

Any agents produced before the start of UN weapons inspections in 1991 would
be useless by now, and there was no sign of the large factories that would
have been needed to produce them after the inspectors' departure in 1998,
said Mr Manley.

Despite his expertise on the subject, Mr Manley, who retired from OPCW in
2001, said he had not been approached by British or American intelligence
for his assessment of the risk posed by Saddam Hussein.

He told the BBC Radio 4 Today programme: "There were only two real scenarios
which anyone considered - either there were weapons hidden from 1991 or they
were manufacturing weapons after 1998.

"If there were weapons from before 1991 hidden in Iraq, knowing what we know
about Iraqi agents and the chemistry of their agents, these weapons would be
useless by today because of decomposition.

"If they were manufacturing after 1998, then I think the question is where?

"You can't make chemical weapons of military significance in a small room.
You need big chemical infrastructure and that sort of infrastructure would

be seen."

There was no doubt that Saddam had previously produced chemical weapons and would have done so again given the chance, Mr Manley went on. "The view of myself and a number of other people was that there was no question that the Iraqis had a chemical weapons programme. There's no question that given the opportunity they would have produced chemical weapons again," he said.

343. More Bush Regime Lies: The Case of the Aluminum Tubes

Focus turns to tubes sought by Saddam
By James Harding and Guy Dinmore
Published: July 9 2003 22:07 | Last Updated: July 9 2003 22:07

When President George W. Bush made the case for war against Saddam
Hussein's
regime by warning that Iraq was "reconstituting its nuclear weapons
programme", allegations of attempted uranium purchases from Africa were
just
one element in the argument.

The more important evidence, cited repeatedly by Mr Bush and his
administration, were intercepted aluminium tubes.

In his State of the Union address in January, Mr Bush said: "Our
intelligence sources tell us that he has attempted to purchase
high-strength
aluminum tubes suitable for nuclear weapons production."

But as the president's claim of an Iraqi link with Africa comes under
closer
scrutiny following the White House admission that the statement was based
on
"bogus" information, the assessment of the aluminium tubes is being
questioned too.

The bureau of Intelligence and Research (INR) in the State Department
disputed claims made by the Central Intelligence Agency and the Pentagon
that the tubes were intended for a nuclear weapons programme. The bureau
was
not convinced that they could be used as centrifuges to enrich uranium,
according to US officials privy to its findings.

The Department of Energy backed up the INR, an official familiar with the
intelligence and the dispute between the agencies said.

The State Department's contradictory conclusions were entered as a footnote
to the National Intelligence Estimate of Iraqi Weapons of Mass Destruction
drawn up last October. The classified document, compiled by the CIA,
concluded that most intelligence experts believed the tubes were for use as
centrifuges.

A counter argument that the tubes were too long was rejected on the basis that they could be shortened, an official said. Another reservation that the
tubes were not high quality enough was dismissed on the basis that Iraq, under sanctions, might not have had access to the best quality components.

When he went before the United Nations Security Council on February 5, Colin
Powell, secretary of state, sided with the CIA. But he did admit to the disputed nature of the intelligence.

"There is controversy about what these tubes are for," he said. "Most US experts think they are intended to serve as rotors in centrifuges used to enrich uranium. Other experts, and the Iraqis themselves, argue that they are really to produce the rocket bodies for a conventional weapon, a multiple rocket launcher."

The International Atomic Energy Agency, the UN nuclear watchdog, also doubted the tubes were made to be used as centrifuges.

The INR has also questioned the conclusion of the CIA and the Pentagon that three trailers found in Iraq in April were mobile biological weapons laboratories. It also disputed the reports that Iraq had sought uranium from
Niger.

On June 26, Richard Boucher, State Department spokesman, said the administration was confident the trailers were mobile labs.

Another State Department official said: "The INR is the red-headed step-child of the intelligence community who doesn't swing a heavy bat. But it seems they were on the right side of interpretations."

374. ATN Log periodic

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-12 21:16:49 UTC
From: TS <tstone12002@yahoo.com.au>
Message-ID: <5V_Pa.2175$wU5.221@news-server.bigpond.net.au>
Source record: 65243
Cross-posted to: rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi all

Was wondering if there is anyone out there who can help? I have just purchased a 7 element ATN 18-30-7 log periodic that covers 18-30Mhz. I believe there is another ATN aerial with the same boom length of 6 metres that covers 14-30Mhz. I was hoping someone with one of these beasts could advise the element lengths etc so i can convert mine to cover 20metres. I assume i will need to rearrange the elements, drill alternate mounting holes and change some element lengths and make some crossover straps for phasing harnesses but thats just a formality. My aerial comes with a diagram of the element lengths etc so was hoping someone could scan and send. I could start from scratch and try and design a unit but this would save me a heap of time. It appears that ATN is long gone. Any help would be greatly appreciated. I have quite a collection of amateur radio related service manuals in pdf and or jpg format so maybe i can return the favour.

email for reference is tstone12002@yahoo.com.au

Thanks in advance.
Cheers
Tony

375. Help Please: LCD Display Problem

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-12 21:20:20 UTC
From: Scott <inspector3985@yahoo.com>
Message-ID: <7su0hv8hvlnj3vm1si1lfpukkl5n7plbnj@4ax.com>
Source record: 65244

I have an old Icom IC2-sra that has a display problem. It came back from the shop a while ago. Now when the display is viewed directly it is totally blank. The only way I can see information is to tilt the rig about 45 degrees either up or down and then the numbers appear. Can anyone tell me why this is happening and is there a way to correct the problem. Thanks .... Scott VE1AFN...

Well I use a Tennadyne T8 for 13.5 to 30 MHz. It is a 6 meter [18 feet] boom. I am not familiar with the ATN 18-30-7 LP.

But, LP design is based upon a specific ratio for adjacent lengths and element spacing. So, just 'fiddling' with adding elements and adjusting spacing gets to be serious business. You will have to re-space ALL elements on the boom, and increase the length of ALL the elements to achieve the desired ratios.

The ARRL Antenna Handbook has an excellent section on LPs. Buy or borrow a copy and read up on LPs. It's quite a project!

Dear Tony (VK2TS):
Nice to see a real antenna question from an actual radio amateur...
It seems to me that two of your choices are:
1. Distributing seven elements on the same boom using the same attachment points. All except the front (smallest) element could be lengthened by a constant ratio so that the rear (longest) element is self resonant at about 12 MHz. An estimate for the ratio by which elements are lengthened may be found by dividing 18 by 14.
Seven elements to cover the octave you are interested in on a six meter boom is OK, but a longer boom and a few more elements can provide less variation in VSWR with frequency and more gain.
2. It sounds as if the boom you have is of one piece. [One alternate scheme for the boom of a LPDA is to construct the boom in two pieces so that the boom is also the transposing transmission line.] I say this because you mention "crossover straps for phasing."
Thus an alternative is to leave what you have alone and extend the boom. Place additional elements along the extension spaced with the same ratio presently used and having lengths that progress with the same ratio presently used. This might involve the least amount of work and certainly would produce a better antenna. The extension of the boom might be a size larger than the present boom so as better to support the longer elements and so as to facilitate "splicing" to the present boom.

Extending is what I would do.

You forgot to turn the PGP on you stupid twit. You're getting sloppy troll
boy.

By the way, to anyone else.... This is not the Real Don Souter. The Real Don
Souter does not use PGP or post anonymously. It's just our resident troll
the fake Agent Smith.

He's already been in the original list. The little pussy thinks he's smart cuz he can make a list of my former aliases proving he's not had a life in at least 4 years.

I just know I've had a run in with his dumb ass in the past. There ain't no way in the world he could have even guessed half of those aliases unless he was being a pest before I switched from SNIP to Comcast.

Hi Mac

The lengthening of the boom and the further scaling of larger elements does sound like a damn good idea ! Thanks for the ideas,,,,much appreciated.

Cheers and 73's
Tony VK2TS

You haven't mentioned the fact that he was impersonating you at one time.

He's also impersonated me under two different aliases those being Rain Maker and The Moron List.

He also impersonates two different people when he posts as Agent Smith. One being a Agent Smith that posts not from altopia, but from Cox.net and the other being a totally different person that goes by That Other George.

He impersonates Don Souter who does not post from altopia or the Frog remailer, but from Usenetserver.com through Bell South.

He's impersonated Lord Floyd, Wilf Kelly, RedOctober90, RFCOMMSYS & Frank White.

You should add these to your list.

402. Poor Georgie. Can't get folks to believe his lies.

The $3.9 billion figure is almost double the $2 billion per month estimate issued by administration officials in April. In addition, the cost of operations in Afghanistan are now $900 million to $950 million monthly, Mr. Rumsfeld said.

From The New York Times, 7/10/03:
http://www.nytimes.com/2003/07/10/international/worldspecial/10MILI.html?hp

Rumsfeld Doubles Estimate for Cost of Troops in Iraq

By THOM SHANKER

WASHINGTON --

Gen. Tommy R. Franks said today that violence and uncertainty in Iraq made it unlikely that troop levels would be reduced "for the foreseeable future," and Defense Secretary Donald H. Rumsfeld nearly doubled the estimated military costs there to $3.9 billion a month.

"We have about 145,000 troops in there right now," General Franks told the Senate Armed Services Committee. He said he had talked to "commanders at every level inside Iraq," and found that the size and structure of those forces were appropriate for the current situation.

Mr. Rumsfeld has never laid out a timetable for bringing American troops home, and has repeatedly pledged that the forces would stay as long as required, but no longer.

Even so, the acknowledgement today of the scope of the long-term military commitment to Iraq was the strongest indication to date that the reconstruction effort requires the continued deployment of large numbers of troops -- and that the undertaking carries a hefty price tag.

Under intense questioning from Senator Robert C. Byrd, Democrat of West Virginia, Mr. Rumsfeld or his aides telephoned Pentagon financial officers during a break and reported back to the committee that cost estimates for the Iraq campaign had reached $3.9 billion per month, on average from this past January through September.

A Pentagon official said the $3.9 billion figure "is the estimated cost to maintain the current force level in Iraq," which includes expenses for military operations, including fuel, transportation, food, ordnance and personnel, but not reconstruction costs.

404. Was war based on a lie? Ask Cheney

If intelligence information was manipulated by the Bush administration in an apparent attempt to strengthen the argument for war, which members of the administration were involved in the manipulation?

Wilson's statements suggest that a good place for the Senate to start looking for answers is in the office of Vice President Dick Cheney.

From The Madison Capital Times, 7/11/03:
http://www.madison.com/captimes/opinion/column/nichols/52530.php

Was war based on a lie? Ask Cheney

By John Nichols

The web of deceit on which the Bush administration built its case for war with Iraq continues to unravel.

The latest revelation of wrongdoing comes from Joseph Wilson, a former National Security Council aide, who has raised the prospect that Vice President Dick Cheney and his aides knew that the "case" President Bush made for going to war with Iraq was based on fabricated data.

Wilson, the former U.S. ambassador to the West African nation of Gabon, traveled to Africa in February 2002 at the behest of the Central Intelligence Agency to investigate murky allegations regarding Iraq's supposed attempt to buy uranium from Niger.

On Sunday, in a damning New York Times opinion piece and in an interview on NBC's "Meet the Press," Wilson argued that his inquiry found little evidence to support the allegation that the government of Saddam Hussein had sought to purchase materials needed for nuclear weapons development from Niger, the world's third-largest producer of mined uranium.

Wilson says he concluded in short order "that it was highly doubtful that any such transaction had ever taken place."

(All indications are that Wilson came to the right conclusion, as a United Nations review of documents that purported to detail the Iraq-Niger uranium dealings revealed them to be forgeries.)

What is most significant about Wilson's revelation is his assertion that his conclusions regarding the dubious nature of the Iraq-Niger "connection" were communicated to high-level officials in the Bush administration long before the president ordered the invasion of Iraq on the grounds that the country posed an imminent threat.

How high up in the Bush administration are the officials in question?

Referring to inquiries regarding a possible Iraq-Niger link, Wilson says, "The question was asked of the CIA by the office of the vice president. The office of the vice president, I am absolutely convinced, received a very specific response to the question it asked, and that response was based upon my trip out there."

405. Bush Knew Iraq Info Was False!

From CBS News, 7/10/03:
http://www.cbsnews.com/stories/2003/06/25/iraq/main560449.shtml

Bush Knew Iraq Info Was False

WASHINGTON, July 10, 2003

CIA officials warned members of the Presidentï¿½s National Security Council Staff the intelligence was not good enough to make the flat statement Iraq tried to buy uranium from Africa.

(CBS)

Senior administration officials tell CBS News the Presidentï¿½s mistaken claim that Iraq tried to buy uranium from Africa was included in his State of the Union address -- despite objections from the CIA.

Before the speech was delivered, the portions dealing with Iraqï¿½s weapons of mass destruction were checked with the CIA for accuracy, reports CBS News National Security Correspondent David Martin.

CIA officials warned members of the Presidentï¿½s National Security Council staff the intelligence was not good enough to make the flat statement Iraq tried to buy uranium from Africa.

"To put it bluntly, if Bush has taken Congress and the nation into war based on bogus information, he is cooked.

Manipulation or deliberate misuse of national security intelligence data, if proven, could be "a high crime" under the Constitution's impeachment clause.

It would also be a violation of federal criminal law, including the broad federal anti-conspiracy statute http://caselaw.lp.findlaw.com/scripts/ts_search.pl?title=18&sec=371, which renders it a felony "to defraud the United States, or any agency thereof in any manner or for any purpose."

It's important to recall that when Richard Nixon resigned, he was about to be impeached by the House of Representatives for misusing the CIA and FBI.

After Watergate, all presidents are on notice that manipulating or misusing any agency of the executive branch improperly is a serious abuse of presidential power."

John Dean

http://news.bbc.co.uk/2/hi/uk_news/politics/3059903.stm

Friday, 11 July, 2003

Quit before it gets nasty, Blair told

Tony Blair's troubles are set to worsen - and he should quit as prime minister before things get "ever nastier", former cabinet minister Clare Short has said.

The ex-international development secretary - repeating a warning she made soon after leaving the government - said Mr Blair faced increased "muttering" among union leaders and was losing support among voters.

She said an "elegant handover" of the Labour leadership was in the party's interests.

Ms Short said the centralisation of power at Downing Street was behind a fall in the prime minister's popularity.

And, alongside her criticism of Mr Blair over Iraq, she also questioned the prime minister's handling of the debate over the single currency.

The former minister said the prime minister had seen himself as "a kind of higher mortal than the rest of us" and had decided it was acceptable to "slightly fool" the public in making decisions over Iraq.

He had been guilty of "half-truths, slight deceptions, exaggeration" in the run-up to the war, she said.

Ms Short added: "I'm sure he's convinced that what he did was right but I'm also sure that he fooled the country in a series of ways in a way that's intolerable when it's a matter of war and peace and human beings' lives and the future of a country."

The comments come after another difficult week for the government with the continuing row over Iraq and a major backbench rebellion over foundation hospitals.

Ms Short said: "There's two good years until the next election. We'll see how this plays out. I think the best solution for Tony would be if he planned to move on before it gets ever nastier."

Maybe Georgie and his puppy, Tony, can move on and keep each other company at the ole Crawford ranch.

407. Help: Need schematic for Zenith T505M radio

Dear Tony: You are welcome.
What might, or might not as I have only minimal information, prove to be the easy way to scale the new elements is to realize that the tips of the new elements will be close to being in line with the tips of the "old" elements. This is close enough particularly if, to maintain the principle of each element being designed to fail with the same amount of wind/ice pressure, the majority of the ends of the new elements are of the same diameter as those of the "old" elements. In other words, if the original antenna was designed to the above principle, the new elements will look like the longest "old" element with added buts that are larger. Having the additional boom be the next size larger than the old boom facilitates this and the splicing of the booms. Consider a "plastic" rope strut to stiffen the boom.
Ice may well not be a major consideration for you as it is here. However, a few years of wind induced vibration has a tendency to damage the places where the longer elements are attached to the boom. Internal and/or external boom/element sleeves in those areas can extend the lifetime significantly.
Keep us all posted on your progress. Several of us will be interested in the specifics of the original antenna.

yeah? so? just another wannabe nitpicker with too much time on his/her
hands.

I love how you try to modify statements after the fact to make it appear
that statements were amde, that werent (obfuscation I believe the term
is).

I really must have hit a raw nerve to get you fussing and cussing so....

In about two weeks (and for ten days thereafter) the largest collection of aircraft in the world will be converging on Oshkosh WI from all corners of the USA and several countries. The show actually starts on the 29th of July and ends on the 5th of August, but the heaviest traffic is going to be the weekends of 26 July and 2 August.

There is a large crossbreeding of pilots and hams. Our (admittedly nonscientific) research shows that approximately 15% of all certificated pilots are also certificated amateur radio operators. Given that there will be about 10,000 aircraft flying in at some point during the week, that means 1500 pilot-hams will be in the air somewhere over this country.

Most of us flying our own aircraft have installed ham rigs in the airplane, predominantly 2-meters. Most of the rest will at least have an HT with them.

If you hear one of us on 52 simplex, please give us a shout. Flying between, oh, say, Salt Lake to Minneapolis is hours and hours of nothing but hours and hours. And, please excuse us if you turn it back to us and we don't immediately respond. Every now and again the ground controllers want us to talk with them, and with all due respects, they've got priority.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL DX Bulletin, K1VV, K1XN & GoList, NC1L, W2BZY, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K5ZTY, N5FG, N5IB, W7LY, K8YSE, WZ8D, CT1EEB, DL/VE3ZIK & Contesting.info, DL1EK/DL7VOA & DX Newsletter, DF6IC, F5NQL & UFT, FJ5DX & La Gazette du DX, I1JQJ & IK1ADH - 425 DX News, IN3XUG, JA1ELY, JI6KVR & JA-IOTA Islands News, JJ1TBB, JJ2QXI, JT1BV, VA3RJ & ICPO, VE3FAL and YV5MBX for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th/July, through Sunday, 13th/July there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, I, IS, J3, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T32, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

HELP "MAY" BE ON THE WAY! Last week it was announced that Monk Apollo does not have a working radio, so this means Mount Athos (SV/A) is now silent. The members of the Northern Ohio DX Association have decided to help Monk Apollo get back on the air. Since NODXA has not heard of any other organization stepping forward to help, they have decided to try to collect funds to purchase another radio for Monk Apollo. Currently,

NODXA is looking for "PLEDGES ONLY" to see if there is enough interest to help supply Monk Apollo with another radio. Once NODXA is sure that there is enough interest, there will be an address announced to where to send the donations (also some other details). For now, please send your "PLEDGES ONLY" to: kb8nw@arrl.net

9M6, EAST MALAYSIA. Operators JA2KPV/Hiro, JF2UED/Tetsu and JJ2QXI/Mack will be active from Hillview Gardens Resort station, 9M6AAC, between July 24-29th. The operators' callsigns to be used will be 9M6/homecall. They will participate in the IOTA Contest (just for fun). They are planning to operate on 160-6 meters, including the WARC bands, on CW/RTTY/SSB. Mack informs OPDX, "I know 9M6 is not so rare of an entity, but I would like to take as much time as possible to be on the air based on QSO requests." For any SKED on a particular band/mode or comments, please visit the Web page at: http://jj2qxi.tripod.com/
QSLs should go to operators' home callsign.

9N, NEPAL. Kiyo, JH3PAS, will take a holiday in Katmandu, Nepal, August 11-19th. He will be using the callsign 9N7AS on the HF bands, CW, SSB, RTTY and PSK31. This is his third visit to Nepal, and this time he wants to make many contacts with U.S. and S.A. stations. He will concentrate on 30 meters and CW, RTTY/PSK31 modes. Don't expect any low band activities because of the summer season. QSL via his home callsign by SASE direct only to: Kiyotaka Ichikawa, IssikiI-Nishi 1-74-3, Hiraoka, Kakogawa, 675-0117 JAPAN.

BN0, TAIWAN. Mark, JJ1TBB, informs OPDX that he has just received his authorized license and callsign from the Taiwan Authority to operate as BN0F dated July 1, 2003. He passed Taiwan's Advanced class examination during this past March. The CTARL executives said that he was the first case as a foreigner to pass Taiwan's exam written in Chinese. Mark would like to operate 80-6 meters CW/SSB and is preparing to import a Cushcraft R6000 antenna. The BN0F QSL route is via JL1ANP, Mr. Tadashi Watanabe. Mark adds that he still has permission to use/operate as BU2/JJ1TBB. The BU2/JJ1TBB QSL route is the same as BN0F.

C6, BAHAMAS (Update/Additional). As mentioned in last week's bulletin, Steve/AK0M and his wife Sandy/KC0RD will be active as C6ASB and C6ASC, repectively, on Abaco Island (NA-080) from July 22-30th. QSLs for both callsigns go via AK0M.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, announced this past week that the following stations are approved for DXCC credit for Timor-Leste:
4W1BK (Effective 22 May 2003) 4W3CW (Effective 16 May 2003)
4W3AN (Effective 19 May 2003) 4W3DX (Effective 22 May 2003)

FO/A, AUSTRAL ISLANDS. Richard/DJ4OI, Andy/DL3GA, Markus/DL1IAN and Joachim/DF6IC plan to be active from Tubuai, Autral Islands (OC-152), from September 18th to October 3rd. They plan to have two stations with beams and linears and be active on 80-6 meters, including the WARC bands on SSB, CW, RTTY and possibly the other digital modes. Their callsigns will probably be FO/homecall/A. QSL via homecall, bureau cards are welcome.

IOTA NEWS.....
EU-012. Look for Peter to sign MM5PSL/p from Fair Isle (SCOTIA SH-09, WW Loc. IO99en) and Fair Isle South Lighthouse (ARLHS reference SCO 079) from August 3-6th. He will try to operate as much as possible and late into his night. QSL direct to WA7OBH.

EU-042. Thomas, DJ5DT, will be active as DJ5DT/p from Sylt in North Frisian Islands during the RSGB IOTA Contest (July 26-27th) as a 12 hour CW entry. QSL via DJ5DT.

EU-080. (UPDATE to OPDX.610) Remember a multi-national team will be active from Ons Island, July 25-27th, and during the IOTA Contest. Jose, CT1EEB, reports that the online logs will be posted as soon as the activity begins. For details, please have a look at: http://www.qsl.net/ed1ons
The ED1ONS QSL card Jpeg file is already on the homepage and QSLs should be ready by the first day of activity. QSL via ED4URJ. This DXpedition is sponsored by REP - Oliveira de Azemeis Regional branch and URE - Jarama Regional branch.

EU-084. Claes, SM0MPV, will be active as SK0HS/5 to be active from Vassaro Island during the RSGB IOTA Contest (July 26-27th) as a Single-Op/Low Power entry. QSL via the Bureau or SM0MPV.

EU-123. Operator MM0ROB and possibly others will activate Great Cumbrae as GM5C for the RSGB IOTA Contest (July 26-27th). QSL via GM0DEQ.

EU-140. Walter, IN3XUG, was active this past weekend as IV3/IN3XUG from Grado Island (GO001 for Italian Island Award). He should be QRT by the time you read this. QSL via his home callsign.

EU-145. Operators CT1AGF, CT1EPV and CT3FN will be active as CS5F from the Lighthouse Cabo de Santa Maria, Culatra Island, July 19-20th. LH reference numbers: LH 0144 / POR 013. QSL via HB9CRV/CT3FN: Hermann Stein, Brueelmatten 13, CH4410 Liestal, Switzerland. For more information, visit the Web page at: http://ct1end.netpower.pt/eu145_culatra_2003

NA-026. Mike, N2GC. will be active from Long Island in the RSGB IOTA Contest (July 26-27th). QSL via N2GC.

NA-031. Two operators form Kansas, Alan/W0NO and Bruce/K0BJ, will be activating Block Island, Rhode Island, from July 20-28th, including the IOTA Contest. Activity and shakedown will occur during the week with individual callsign while they also do sightseeing with their families. QSL via bureau or direct.

NA-062. John, W0JLC, will be active as W0JLC/4 from Marathon Island, FL, during the RSGB IOTA Contest (July 26-27th) as a Low Power entry. QSL via the Bureau.

NA-068. Members of the Fredericton Amateur Radio Club, VE9ND, will activate Miscou Island as a Multi-Op entry in the RSGB IOTA

Contest Weekend. Also, listen for VE9ND and others on 6 meters
as they activate FN78 from this location as well. QSL via
VE9XA's home address. Operators will be VE9AV/Dave, VE1ACU/
George, VE1JH/Brent and VE9XA/Tim.

NA-111. Andy/NP3D and Sergio/W2WB will be active and using their own
callsigns from Long Beach Island during the RSGB IOTA Contest
(July 26-27th). Both will be Single-Op entries. QSL direct to
their home callsigns.

NA-141. Charles, W4SAA, will be active as W4SAA/p from Virginia Key
during the RSGB IOTA Contest (July 26-27th) as a Single-Op/
24 hour/CW entry. QSL via W4SAA, Bureau or the address on
QRZ.com.

SA-015. Javier, YV5MBX, reports to look for YW5M from Los Monjes,
July 14-20th. Activity will be on 160-2 meters CW/SSB. The
suggested frequencies are:
CW - 1825, 3510, 7010, 10110, 14010, 18010, 21010, 24845
and 28010 kHz
SSB - 1850, 3795, 7085, 14185, 18145, 21285, 24945 and 28485 kHz
6m - 50110 kHz
2m - 146.520 MHz simplex
QSL via W4SO direct or by the bureau.

KP2, U.S. VIRGIN ISLANDS. Jeff, WB9CEJ, will be active as KP2/WB9CEJ from
St. John and St. Thomas, U.S. Virgin Islands (NA-106) between July 14-19th.
His activity will be mainly on 20/17/15 meters, using CW/SSB. QSL to his
home callsign.

MUSEUM SHIPS WEEKEND ACTIVITY.....
The Museum Ships Special Event, sponsored by the USS Cassin Young ARC,
will take place between 0001z, July 19th to 2359z, July 20th. Over 72
ships and submarines will be taking part in this world-wide event. For
a list of stations, please visit:
http://www.qsl.net/ww2dd/event.html

Look for NA5DV to be active from the historical San Jacinto Battleground
State Park in south Texas. The Houston Vintage Radio Association is
restoring the original radio room with vintage radios and will be
operating the station on this Special Event weekend. Look them up at:
http://www.hvra.org

Members of USS Kidd ARC will operate W5KID in Baton Rouge, LA, aboard
the USS Kidd, DD-661, with a minimum of two stations through the weekend.
They will periodically put out a beacon on the APRS network, so you can
go to the following Web page for updates on the frequencies where they
are operating at: http://www.findu.com/cgi-bin/find.cgi?call=w5kid

Lightship Columbia WLV-604 will be active as W7BU during the Museum
Ships Weekend. QSL via W7LY. A #10 S.A.S.E. envelope will get you a
certificate from the last Lightship to see service on the Pacfic coast.

Fred Lesnick, VE3FAL, will be operating from aboard the Tugboat James Whalen on Saturday, July 19th, from 10am-4pm local time. This is also in conjunction with the annual HarborFest, so lots of people will be in and out. He is going to be putting up a 40 foot vertical that was given to the owner when one of the Canada Steamship Lines ships was scrapped in Thunder Bay. A picture of the Whalen is on the following Web page at: http://www.city.thunder-bay.on.ca/index.cfm/fuse/html/pg/297.htm

NEW AWARD AVAILABLE. OPDX has been informed that the IOTA-JA is now issuing "Japanese IOTA Islands Award". The JIIA Award is intended for working the IOTA island of Japan. The rules for this award can be found on the following web site at:
English edition: http://www3.ocn.ne.jp/~iota/newpage61.htm
Japanese edition: http://www.h4.dion.ne.jp/~ji6uru/jiia.html
The JIIA award issue is done on Monday, July 14, 2003.

PJ7, ST. MAARTEN (Possibly FS also!). Igor Slakva, VA3YDX (also US1IDX), will be active from PJ7-land as PJ7/VE3YDX from July 12-26th. He also hopes to be active as a mobile (FS/VA3YDX/m) from the French (FS) part of the island. He is on vacation with his family, so operating may be somewhat limited from his usual style. He hopes to be on RTTY and PSK as well as SSB and CW. His rig is an ICOM w/100 watts and wire antennas. He will be in the HK Contest as well as the NA QSO RTTY Party. QSL via his home callsign VA3YDX direct to: Igor Slakva, 2900 Bathurst Street, apt. #307, Toronto, Ontario M6B 3A9, CANADA. Bureau is "OK" also.

PZ, SURINAME. Three members of the Magnolia DX Association (MDXA) will be teaming up with PZ5RA to sponsor a major operation from here between October 20-28th. They will have two full HF stations, complete with beams and amplifiers and will be on all bands 160-10 meters. The team will also participate in the 2003 CQWW SSB Contest as PZ5A and as a Multi-2 entry. This is a first ever 2x1 PZ special callsign for a contest operation. Individual team members will sign PZ5CQ (KD5CQT), PZ5FF (K2FF) and PZ5UE (W5UE) before and after the contest. QSL PZ5A via W5UE. QSL PZ5CQ, PZ5FF and PZ5UE pre/post contest activity to the individual's home callsign. For updated details, watch MDXA's Web page at:
http://www.mdxa.org/pz_2003.html

QSL INFO AND NEWS.....
The complete RTTY logs for the 9N7DX Nepal DXpedition (April-May, 2003) are now available on-line at the following two Web sites:
Main site: http://www.qsl.net/va3rj/search_9n7dx.html
Mirror : http://webhome.idirect.com/~va3rj/search_9n7dx.html

Activity by AT0HQ was the HQ station of the Amateur Radio Society of India (ARSI), their national Society, for the IARU HF Championships Contest over the past weekend. Operator was Arasu, VU2UR. QSL via SM3DBU.

Willie, DJ7RJ, has just received the QSL cards from the printer for his January J79RJ operation and will begin to start sending them out.

Twelve IARU Italian HQ Stations were expected to be active in this past weekend's IARU Contest. Multiple stations were active as IUxHQ (e.g. IU2HQ,IU4HQ,IU9HQ) QSL all to ARI. Operators involved were I4UFH, IK2NCJ, IV3TAN, IK2QEI, I2WIJ, IK0YVV, IK0XBX, I0SNY, IT9EQO, IK2JUB, IK4MGP, IV3TAN, IV3OWC, IK2PFL, IK0AZG and possibly others.

Naran, JT1BV, informed OPDX that he would be active on 40m during the past weekend's IARU HF World Championship. He states to QSL via the address on QRZ.com.

QSL JT1T (a Multi-Op/Single in the IARU Contest) via the JT1KKA or the JT Bureau.

Activity by JY6ZZ was the first ever IARU HQ activity in a IARU Contest this past weekend. According to Koji, JY9NX, Jordan's JY6ZZ RJARS HQ Station will not send QSLs via the mail. All QSOs will automatically be confirmed via the bureau. Operators were JY4NE, JY9QJ and JY9NX.

A multi-op team activated R7HQ during the IARU Contest this past weekend. QSL via RW3RN (All QSOs will be auto-confirmed via the Bureau). Operators were RU1A, RW2F, UA6AF, RU6LWZ, UA9AYA (80PH,15PH) and UA9AT (160PH).

A multi-op team activated SK9HQ during the IARU Contest this past weekend. QSL via SSA bureau.

T5/EI5C (Where are the doc's? -- Update!). Last week OPDX was asked to send out a "feeler" about the 1994 T5/EI5C operation. OPDX was contacted by ex-DXCC Manager Bill Kennamer, K5NX (ex-K5FUV), and he reported: "That operation was bogus. The reason they never sent doc's was that there are none. I found the operator had no license of his own, was bootlegging the club call, and had no authorization for Somalia."

TI2, COSTA RICA. Bob, W2BZY, will be active as TI2/W2BZY from now through July 21st from San Jose, Costa Rica. Activity will be on 40-6 meters. QSL via his home callsign.

TZ, MALI (Update and AMP put to the test!). The August 12-23rd DXpedition to Mali keeps preparing for their operation. They announced this past week that the team will be testing a new concept in Amplifiers. These amps are tiny and light but very powerful amps build in Spain with 400 watts outpower on SSB and CW. This DXpedition will be the amp's presentation and hard test to show that they are designed specially for DXpedition and mobile operations. The DXpedition team will keep preparing everyhthing to work SSB, CW, RTTY and AO-40 SAT, all bands and especially 6 meters (if there is opening from Africa on this magic band). Antennas will be outstanding since they will use a very big roof surface to install them over a 4 floor building by the Niger River coast. Verticals, yagis and dipoles will be used to be on the air with 3 stations, 24 hours a day. The QSL Manager is EA4URE, the Spanish National Bureau.

VP2M, MONTSERRAT. Look for several members of SWODXA Southwest Ohio DX Association (SWODXA) to be active from July 23-29th. Thanks to Keith, VP8MEG, the group will be on the island for the IOTA Contest. The 8

members are: Joe/W8GEX, Byron/WA8NJR, Kirk/W8QID, Jim/K8FL, Wayne/K8LEE, Bill/W8KVU, Phil/W9IXX and Mike/N9NS. The team plans to have 5 stations on the air. Two on SSB/CW both with a 3 element triband beam and a 5 band HexBeam. They would like to thank Mike Traffie of Traffie Technology for the use of the HexBeam antenna. The PSK-31 and RTTY stations will use a R-7 vertical and 3 element beam on 6 meters. The two HF stations will be running MFJ 500 watts solid state amps. On six meters they will be using a 3 element beam provided by WZ8D and a Icom 706. Their grid square will be FK86. They also just received the callsign VP2MX which used to belong to Bob Billings, VE1YX. Please do not send Bob all the QSL cards. The QSL Manager is N8QET. Please mail them with a SASE for USA. All others send at lease 1 up-to-date IRC or 1 USD, include a SAE also. This trip is dedicated to the memory of Frank Schwab, W8OK, who was a long time member of the SWODXA.

XU, CAMBODIA (Update). OPDX was informed that Danny/M0GMT and Oliver/DJ9AO will use their assigned callsigns between August 3-18th as follows:
XU7ACT for normal operations
XU7ACU for the WAE CW Contest, August 9th and 10th only
QSLs are via G3SWH. A Web site is available, as well as online log checking. Please visit for updated information at:
http://www.geocities.com/dxpedition2003

YJ, VANUATU. Operators Trent/VK4TI, AJ/VK2IR, Chris/VK3FY and Les/VK3WA will be active as YJ0X in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Single entry. Other operators are invited to join the crew by sending an E-mail to: trent@sampson.net.au
QSL via VK4TI, using the QRZ.com address.

422. Blair Resignation Called For!

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-14 00:04:06 UTC
From: AgentSmith@IsALoser.net
Message-ID: <7SHBPQBY37816.0861805556@anonymous.poster>

The controversy over Iraq is set to follow Blair to Washington this week, when he meets with President George W. Bush on Thursday.

The U.S. president is facing congressional Democrats' calls for investigations into the quality of U.S. intelligence about Iraq.

Bush last week withdrew a statement he made in January that Iraq was seeking to buy uranium from Niger after it emerged the claim was based on forged documents.

From Bloomberg, 7/13/03:
http://quote.bloomberg.com/apps/news?pid=10000087&sid=aTexVUAqB_sE&refer=home

Blair Resignation Call

Support for Labour and Blair is falling amid the row over the justification for war, polls show.

A YouGov. Ltd survey last week said 54 percent of voters say they no longer trust the prime minister.

Short today said Blair should quit because he's a liability to the Labour Party.

``It would be in the interests of Tony Blair himself and his legacy of the Labour Party, and actually of the country, if he would think of making a voluntary departure,'' Short told GM-TV.

Bush overstated Iraq links to al-Qaida, former intelligence officials say

By Matt Kelley, Associated Press, 7/12/2003 12:20

WASHINGTON (AP)

As President Bush works to quiet a controversy over his discredited claim of Iraqi uranium shopping in Africa, another of his prewar assertions is coming under fire: the alleged link between Saddam Hussein's regime and al-Qaida.

Before the war, Bush and members of his cabinet said Saddam was harboring top al-Qaida operatives and suggested Iraq could slip the terrorist network chemical, biological or even nuclear weapons.

Critics attacked those assertions from the beginning for being counter to the ideologies of Saddam and al-Qaida and short on corroborating evidence.

Now, two former Bush administration intelligence officials say the evidence linking Saddam to the group responsible for the Sept. 11 terrorist attacks was never more than sketchy at best.

''There was no significant pattern of cooperation between Iraq and the al-Qaida terrorist operation,'' former State Department intelligence official Greg Thielmann said this week.

Intelligence agencies agreed on the ''lack of a meaningful connection to al-Qaida'' and said so to the White House and Congress, said Thielmann, who left State's Bureau of Intelligence and Research last September.

Another former Bush administration intelligence official, who spoke on condition of anonymity, agreed there was no clear link between Saddam and al-Qaida.

''The relationships that were plotted were episodic, not continuous,'' the former official said.

A United Nations terrorism committee says it has no evidence other than Secretary of State Colin Powell's assertions in his Feb. 5 U.N. speech of any ties between al-Qaida and Iraq.

And U.S. officials say American forces searching in Iraq have found no significant evidence tying Saddam's regime with Osama bin Laden's terrorist network.

Iraq Cost Could Mount to $100 Billion

Impact on Other Programs Feared

By Jonathan Weisman
Washington Post Staff Writer

Sunday, July 13, 2003; Page A22

The cost of the war and occupation of Iraq could reach $100 billion through next year, substantially higher than anticipated at the war's outset, according to defense and congressional aides.

This is raising worries that other military needs will go unmet while the government is swamped in red ink.

The cost of the war so far, about $50 billion, already represents a 14 percent increase to military spending planned for this year.

Even before the United States invaded Iraq in March, President Bush had proposed defense budgets through 2008 that would rise to $460 billion a year, up 74 percent from the $265 billion spent on defense in 1996, when the current buildup began.

At the same time, the federal budget deficit is exploding.

This week, officials expect to announce that it will exceed $400 billion for the fiscal year that ends Sept. 30, the largest in U.S. history by a wide margin.

Former White House budget director Mitchell E. Daniels Jr. said last month the deficit should be smaller next year, but economists at Goldman Sachs Group Inc. -- factoring rising war costs -- said Friday the deficit may climb even higher than their previous $475 billion estimate.

"It's already unclear whether [the Bush defense buildup] is sustainable," said Steven M. Kosiak, a defense budget analyst at the Center for Strategic and Budgetary Assessments.

"Add another $50 billion, and it's doubly unclear."

Administration officials concede that spending levels in Iraq are considerably higher than anticipated.

At the onset of war, Dov Zakheim, the Pentagon's chief financial officer, said post-combat operations were expected to cost about $2.2 billion a month.

By early June, he had adjusted that forecast to $3 billion.

But with about 145,000 U.S. troops still in Iraq, some under fire, costs have continued to climb.

The average monthly "burn rate" from January to April, a span encompassing the "heavy combat" phase of the war, was $4.1 billion, Zakheim said.

That is not much higher than current expenditure rate of $3.9 billion a month for the occupation, even though most of the Navy and Air Force contingents have been sent home.

"We've peaked out," Zakheim said, "but we are still there in a way that we perhaps didn't think we would be at this point."

Defense experts worry that the cost of actual operations in Iraq understates the impact of those operations on military and federal spending.

Indirect costs of a protracted conflict could include new funding for military recruiting and the retention of exhausted troops ready to leave the services, Kosiak said.

If 100,000 or more troops remain in Iraq a year from now, there will be political pressure to increase the overall size of the Army.

Rep. Duncan Hunter (R-Calif.), chairman of the Armed Services Committee, said Friday he would seek to add two new heavy divisions to the existing 10, or as many as 32,000 troops.

Hunter inserted language in the defense authorization bill pending in Congress to prohibit any base closings that would harm the Army's ability to field 12 divisions.

During the 2000 presidential campaign, Republicans contended that President Clinton had stretched the military too thin with the deployment of 10,000 troops in the Balkans, Kosiak noted.

Now, there are 16 times that many soldiers in Iraq and Afghanistan alone, and the grumbling is beginning again.

Sens. James M. Inhofe (R-Okla.) and Jack Reed (D-R.I.) practically pleaded with Defense Secretary Donald H. Rumsfeld for a larger Army when he appeared last week before the Armed Services Committee.

"I know your close communications with the [Army] Reserve component will convince you, as it's convinced me and many of the members of this panel, that there's got to be relief," Inhofe told Rumsfeld.

Right now, the Army's 3rd and 4th Infantry divisions, 3rd Armored Cavalry Regiment, 2nd Armored Cavalry Regiment, 101st Airborne

Division, 1st Armored Division and 173rd Airborne Brigade are all serving in Iraq, as are elements of the Army's V Corps, according to the Army.

Nineteen of the Army's 33 brigades are deployed abroad.

Only one division, the 1st Cavalry, is being held in reserve.

Rep. John M. Spratt Jr. (S.C.), the ranking Democrat on the House Budget Committee and a member of the Armed Services Committee, said the war will likely lead to delays in new weapons purchases and some weapons development.

Loren B. Thompson, a defense analyst at the conservative Lexington Institute, said elements of Rumsfeld's "transformation" of the military into a smaller, quicker force will undoubtedly have to be put on hold.

"The big budgetary question is not what it's costing us today," Thompson said.

"It's the costs of reservists not reenlisting. It's the cost of active-duty [troops] giving up on a career that proved just too difficult to sustain, and the costs of equipment that is not being maintained at any level that can be considered adequate."

Pentagon officials are not nearly so pessimistic.

Although Zakheim refused to venture how many troops would be in Iraq in a year, Defense Department documents sent to Congress last week indicate the Pentagon "assumes that only a limited number of U.S. forces will remain" there by September 2004.

However, Gen. Tommy R. Franks, the retired commander of U.S. forces in Iraq, told lawmakers last week that troops could be in Iraq as long as four years from now.

Zakheim strongly dismissed concerns over morale, troop retention and recruiting.

"The people on the ground really seem to want to stay there," said Zakheim, who recently returned from Baghdad.

"Even the people I visited in hospital, their number one objective is to get back into theater. People sign up to do just what they're doing."

Such comments have fueled Democratic criticism that the administration is not facing up to the facts in Iraq, nor is it addressing the hard choices they present.

"It's been hide the ball every step of the way," said Sen. Kent Conrad (N.D.), ranking Democrat on the Budget Committee.

"They've consistently understated the cost by a factor of several-fold, and they've done everything they can not to share information."

Said Spratt:

"Fifty billion dollars to a $400 billion deficit -- that's a significant addition that should have some bearing on tax cuts and other spending decisions."

Two antiwar activists, Elias Vlanton of Takoma Park, and Niko Matsakis of Boston, are keeping a running tally of the war costs on their www.costofwar.comWeb site.

Among the site's assertions: the $67 billion spent this year on the war and Iraqi reconstruction could have put 9.5 million more children in Head Start, financed the hiring of 1.3 million schoolteachers, or covered the health insurance costs of 29 million children.

Next year's costs are more difficult to discern. Although the administration has "a pretty good sense of what's going to be on the ground" Sept. 30, Zakheim said, it will not request funding now for Iraqi operations in the fiscal year that begins Oct. 1.

The defense spending bills for fiscal 2004 pending in Congress do not provide money for the occupation.

"We at least need to have some good estimates," Spratt said.

"This is a big footnote to the budget. The budget does not adequately reflect all the costs that we know are going to be incurred in the coming fiscal year."

Even Republican aides on Capitol Hill complain that the Defense Department has been far too reluctant to own up to the budgetary costs of the war.

Zakheim defended the administration's budget policymaking as "open" and "above board," saying that ongoing military operations have traditionally been funded through emergency budget requests, not the base Pentagon budget.

"It is far more responsible to the taxpayer for us to get a better fix on what the costs are going be, then come in" with a request, he said.

"Maybe in two months' time, things will be so different that everything we're talking about now will be seriously OBE'd" -- overtaken by events.

Trading on fear

From the start, the invasion of Iraq was seen in the US as a marketing project.

Selling 'Brand America' abroad was an abject failure; but at home, it worked.

Manufacturers of 4x4s, oil prospectors, the nuclear power industry, politicians keen to roll back civil liberties - all seized the moment to capitalise on the war.

PR analysts Sheldon Rampton and John Stauber explain how it worked.

Our President Is A Criminal
By Daniel Patrick Welch
7-12-3

It's well past time to say it. Despite the weaseling and finger-pointing--in fact, because of it--the Forged Niger letter is indeed the smoking gun, and the chips have yet to stop falling. Who wrote the damn thing, and on whose orders? Who cares whether Tenet, his job on the line, acquiesced to including a literal truth that actually amounts to one of the great frauds of the century? The sheer audacity and cynicism of this coterie of hacks and hustlers is simply astounding. As a teacher, I won't let six-year-olds get away with such transparent sophistry. The bottom line is that Bush knew the information was bogus, and used it anyway to convince millions to go along with his phony war.

For that alone, for the memory of the thousands of dead Iraqis and Americans, he deserves the il Duce treatment (figuratively speaking, Mr. Ashcroft-no need to start tapping my phone or putting me on no-fly lists). The criminal enterprise called the Bush administration is (Helen Thomas was right) the worst ever. Their campaign in furtherance of the conspiracy to defraud the public into buying the Iraq war is one of the the most cynical abuses of power in U.S. history. It deserves to be treated as such.

Alarmist? You bet. This guy already thinks (and occasionally tells foreign leaders) that he gets his orders from God. If these radical extremists can get away with this, then the dumbing down of America will be complete, and the stage will be set for the next wave of the nascent fascism. La Cosa Bush (apologies to the mafia) is, like all crime families, violent, arrogant, and beyond the reach of the law--so far. Bush's handlers no longer even have the decency, courage or self-restraint to prevent his criminally stupid comments from wreaking havoc around the globe. Was last week's pseudo-macho invitation to "Bring 'em on" even a mistake? Or was it another calculated ploy to make him look "tough" to the American people, playing to the ugliest side of the American psyche while once again enraging thinking people the world over. No matter--he must be stopped. This cabal has been lying, cheating, and manipulating national tragedy to force their right wing agenda down our throats long enough.

And half-measures won't do any more. None of this vague safe rhetoric about "misleading" or cautious calls for those who "know who they are" to step down. WE know who they are, the junta that has hijacked our government and our national agenda. The cartel must go:

Bush, Cheney, Powell, Rice, Rumsfeld, Wolfowitz, Perle should all resign, be fired or impeached immediately, before their conspiracy of lies and their mutual pact of self-protection is allowed to further endanger the country and the world. Cornered criminals, especially stupid ones, are a dangerous lot, and there is no telling to what lengths they will go to cover their own behinds.

On a mission from God, installed by a viciously partisan Supreme Court, the skids are greased for a further slide into misadventure, bankruptcy and ruin. With the addition of Congress on their side, they are acting with particularly reckless abandon--and impeachment is not in the cards as long as the GOP circles the wagons. None will have the courage or integrity Goldwater showed when he told Nixon the jig was up. Power corrupts, and the Republicans are so drunk with it they won't turn on their Lord Fauntleroy until he robs a bank on camera in broad daylight.

But that is no reason not to tell the truth: whatever their chances, some of the braver souls in congress should introduce impeachment legislation immediately: Conyers, Kucinich, Lee, Paul? The media has already shown they will not help; moneyed interests overwhelmingly favor the right. A campaign based on the old game of raising oodles of money and buying ads is a sure failure. The only thing that can save us now is a grassroots, velvet revolution, the principled, impassioned movement calling for these people's head on a spike.

And maybe, just maybe, this one isn't an impeachable offense, but I'm just plain getting sick of Rumsfeld's smug, arrogant grin on the tube. What the hell is he smiling at all the time? Is it funny, somehow, that thousands of Iraqi civilians are dead after his "precision" bombing? It is ironic, admittedly, another fraud, to be sure-but hardly amusing. Maybe it's just part of what you do when you think you can get away with anything.

Senate Intelligence Chair Pat Roberts foreshadowed just how twisted the logic is going to get when he said that what concerns him most "is what appears to be a campaign of press leaks by the CIA in an effort to discredit the president," Yeah, right. The black bag set, whose penchant for secrecy and service verges on pathology, are the real problem here--not the curious fact that even some of them have finally decided that things are so bad that someone, somewhere has to speak out.

It's time to close the curtain on this Bizarro World. Saddam loyalists--not nationalist resistance to occupation--are the real problem in Iraq. Protesters are terrorists, but we are fighting for our freedoms. Bush's popularity remains robust, yet huge shows of force and repressive rules on free speech are needed to keep the viewing public from seeing that he is dogged by prostest at every turn. War is peace, freedom is slavery, and some animals are more equal than others. The lies won't stop until we fire the liars.

Paranoia can be treated you know!
So everyone who posts here is the same person?
But you seem to post only off topic. What does
that say about you? Hmm?

PA-SitRep (Pennsylvania Situation Report) is developing
a group of PA-SitRep Contacts, most of whom (51)
are Amateur Radio Operators. We are currently seeking
additional Amateur Radio volunteers. Here is our
current list of PA-SitRep Contacts (the lists are divided
by Western, Central and Eastern PA Regions):

http://www.pa-sitrep.com/contact.htm

PA-SitRep Contacts are asked to monitor emergency
situations from their local areas and post emergency
situation reports to the PA-SitRep Discussion e-mail
list which is used, in part, for monitoring developing
emergency situations. If warranted, PA-SitRep
Administrators move the emergency situation reports
to our main emergency alert PA-SitRep list where the
alert is distributed to over 600 subscribers throughout
the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant
enough network of Contacts throughout Pennsylvania in
order to provide timely and accurate Emergency Situation
Reports, free of charge, to those subscribed to our
emergency alert e-mail distribution lists and any other
interested groups or agencies - much in the same way that
SKYWARN provides weather situation reports for the
National Weather Service.

If you're interested in volunteering as a PA-SitRep,
please visit the website to learn more:
http://www.pa-sitrep.com

Can anyone send me a copy or lead me to a manual or engineering specs for a Tristao MA-550, 55 foot tubular tower, pretty much the same as a US towers MA-550 if not identical. I have heard that there is a ham in calif that has manuals etc. for many of the older towers but don't know who it is or if it is true or not. I would appreciate any assistance on this thank you. Its worth it. Iraq has 100 billion barrels of oil still in the ground.
5% of all of the 2 trillion barrels that have ever been in the
ground. We are at the peak of getting the least expensive oil
pumped. Don't believe every thing you hear... it is significantly
about oil.

PA-SitRep does not report local/minor police incidents. The purpose
of the list is to alert the participants of MAJOR emergency situations
that would be of interest to the residents of Pennsylvania.

Thank God it's still legal for us to do that.

Tony,

Adding more elements seems like the only practical solution. You would probably have to add 6 -8 feet to the boom, and 2 more elements. Keep in mind the longest element will be about 38 feet long. That is why they make the 18 -30 MHz version. BTW, Tennadyne used to make an 18 -30, but I don't see that listed on their web site any more. You might want to check them out anyhow for any ideas.

For any of these newer style units with over 100 memories, it would be
almost insane to try to set them up through their own keypads.

Giving alpha labels to everthing is especially difficult.

Also, this means you have a backup copy of your programming on your
PC, and can readily print out a hard copy to work with others or as an
ultimate backup.

In cases where both RT Systems and Yaesu make programming software,
the consensus seems to be that RT Systems is easier to use.

Happy trails,

Iraqi City of Peace Moving Toward Chaos
By BY HAMZA HENDAWI
The Associated Press

KARBALA, Iraq - Abdel-Aziz al-Nasrawi was nervous. He sat on the edge of his
chair and spoke in whispers. Occasionally, he stole a look at the American officers and their translators seated across the room to see if they were eavesdropping.

A 53-year-old lawyer who became deputy governor of this holy Shiite Muslim city last month, al-Nasrawi has a lot on his mind these days.

"The problems are immense," the silver-haired al-Nasrawi said with a hint of
desperation.

Since the fall of Saddam Hussein, Karbala has been viewed as an island of peace and stability in a country wracked by violence and social turmoil. But
there are signs the peace in this city of 500,000 could soon unravel.

U.S. military commanders, al-Nasrawi confided, are not flexible enough and misinterpret simple acts of piety as religious extremism. The authority of the city's 1,400-strong police force is constantly challenged by Karbala's people, many of whom are armed.

Beyond those problems, he said, a rift between two rival Shiite Muslim groups has deepened, filling the city with tension that could turn into violence. Drugs and pornography are spreading, he complained, and the economy hasn't recovered from the war.

Last week, U.S. forces in Karbala, 62 miles south of Baghdad, were attacked for the first time since they captured the city in April. There were no casualties and local U.S. military commander Marine Lt. Col. Matthew Lopez dismissed it as an "isolated incident."

But the symbolic significance of the incident cannot be overlooked.

Young men said the only reason they haven't attacked American forces is the lack of a fatwa, or edict, for holy war issued by a top Shiite cleric.

"The circumstances are not right to call for jihad," said Sheik Abdel-Mahdi Abdel-Ameer, the Karbala representative of Grand Ayatollah Ali Husseini al-Sistani, a reclusive cleric based in the holy city of Najaf who leads one
of the two rival Shiite groups. "At present, we are using peaceful means to demand a constitution and a representative government. But it will be a different story if those demands are not met."

Leaders of the rival al-Sadr group - followers of a senior cleric assassinated in 1999 by Saddam Hussein - are more extreme. They say the Americans corrupt local young people by handing out pornography and entertain prostitutes.

Their leader in Karbala, sheik Khaled al-Kazimi, told a visitor of the demands he brought three times to a local U.S. commander. He boasted of "our
people" who monitor U.S. bases in the area to see whether "immoral things" take place.

"I told him (the commander) to withdraw his forces to a point 15 kilometers (9 miles) out of Karbala and leave us in charge of security here. I said I will personally take the blame if things go wrong," he said. Three other clerics and a relative listened attentively.

"These Americans are technologically advanced, but they are not clever," he said.

Al-Kazimi could not recall the name of the commander he met. Lopez said it was not him and laughed when told of the demand.

Al-Nasrawi said problems in Karbala are compounded because the Americans don't appreciate the city's special cultural and religious nature. That misunderstanding led to the Americans' disbanding a volunteer, 500-strong police force set up by the clerics the previous month.

The volunteers, who prevented the kind of widespread looting that plagued Baghdad in April and May, showed religious zeal in policing the city, admonishing women who did not adhere to Islam's strict dress code in public and raiding places where they suspected pornographic material or drugs were being sold.

"They think it's Hollywood, but it isn't," al-Nasrawi said. "This is a holy city and must be treated as such."

Lopez, a Chicago native, disputes the claim that his more than 11,000 men are insensitive, saying his troops don't go within 200 yards of the city's shrines. "We are not cultural experts, but we have experts who are educating
us."

Pilgrims crowd Karbala's shrines, praying, offering supplications to their revered saints or reading from the Quran. Outside, merchants sell worry beads, books, scarves embroidered with religious phrases or pictures of clerics.

Rocks from Karbala are sold for faithful to rest their foreheads on during prayer. Families of poor pilgrims, unable to afford a hotel, squat for days on straw mats spread on sidewalks, eating food brought from home.

Such harmonious scenes of piety, however, conceal the dangerous rift between
the two Shiite factions. The rivalry, centered on delicate theological issues and the control of shrines, is played out in most of Iraq's Shiite-dominated areas.

But Karbala's religious stature gives the dispute more significance.

A deal between the two sides to take turns leading Friday prayers in Imam al-Hussein mosque, the city's holiest shrine, collapsed earlier this month when al-Sadr said only its imams had the right to lead the prayers.

Rival supporters came to blows July 4 inside the shrine and the al-Sadr group later warned worshippers in fliers plastered on the mosque's main gate
that God would not accept the prayers if they were made under an imam from al-Sistani.

"No one should have a monopoly over the Friday prayers," counters Abdel-Ameer, of al-Sistani. "God asks all Muslims to perform it."

Rumsfeld says more GIs may be needed
Brian Knowlton/IHT IHT
Monday, July 14, 2003

WASHINGTON Defense Secretary Donald Rumsfeld predicted Sunday that attacks on coalition troops in Iraq could grow "more vicious" this summer, and said=

for the first time that an increase in U.S. force levels was at least a possibility.

"We're still in a war," he said on one of two television appearances. Since=

May 1, when President George W. Bush declared that major hostilities had ended in Iraq, 31 U.S. soldiers have died in the hostilities there.

Rumsfeld, who testified at length on Wednesday before Congress, and was closely questioned on troop levels, made no reference then to the possibility of having to increase them. Sunday, he put current troop strength at 147,000 and added, "My guess is that number's going to stay there for the foreseeable future."

Over time, as Iraqi police officers are trained, a nascent Iraqi army grows=

and other countries send more troops, the U.S. presence might decline.

But while it seemed unlikely, he added, U.S. troop strength "could be increased," depending on demands.

Those demands are likely to be pressing in the short term, Rumsfeld said on=

NBC-TV.

"I'm afraid we are going to have to expect this to go on," he said of the recent series of anti-coalition attacks. There was speculation, he added, that with July bringing the anniversaries of several dates important to Saddam Hussein and his former Ba'ath leadership, "we could see an increase in the number of attacks."

[A group claiming to be an Al Qaeda wing said in an audiotape broadcast Sunday on an Arab television station that its members and not the followers=

of Saddam were behind attacks on U.S. forces in Iraq, Reuters reported from=

Dubai.

["I swear by God no one from his followers carried out any jihad operations
like he claims," said the unidentified voice on the tape, which was
broadcast by Al Arabiya television, based in Dubai. The attacks "are a
result of our brothers in jihad."

[The tape also warned of a new anti-U.S. attack in coming days, which would=

"divide the back of America completely."]

Rumsfeld said it was still unclear whether the attacks in Iraq, many of them
ambushes or sniper attacks, were nationally coordinated.

What is increasingly clear, he said, is that "it's coordinated in regions
and areas - cities in the north particularly."

Rumsfeld again rejected the idea that the United States was being pulled
into a guerrilla war of indeterminate duration.

"We've been there less than 10 weeks, is that bogged down?" he said. "How
long were we in Germany? How long were we in Japan?"

"The president has said we are going to use as many forces as are necessary=

for as long as it takes."

While coalition forces are "making progress" in rooting out a violent
mixture of Saddam loyalists, criminals and others hostile to the foreign
powers in Iraq, he said, "The more progress we make, I'm afraid, the more
vicious these attacks will become."

Asked if the coalition faced a "rough summer," he said, "I think that's
right."

"The fact that Saddam Hussein has not been found does cause a problem,"
Rumsfeld said, because of the fear the ousted president still inspires. He
said he assumed Saddam was still in Iraq.

But he also said he felt fully confident the coalition would restore peace.=

Meanwhile, amid the violence, public support for Bush's handling of the
military operations in Iraq has continued to decline steadily.

While 74 percent of Americans surveyed by Newsweek on April 10 and 11
approved Bush's handling of military operations, the latest poll, taken last
Thursday and Friday, found just 53 percent support. S. soldiers and Iraqi
police, The Associated Press reported.

A white Volkswagen was destroyed and a badly mangled and headless body lay
nearby, said police Sergeant Adel Shakir. He said the body was thought to
have been one of two men who were trying to get the explosive-packed car
near the station. U.S. forces cordoned off the area.

Meanwhile, the U.S. Army stepped up pressure on pro-Saddam holdouts Sunday with a fourth large offensive in central Iraq.

At least four suspected loyalists were killed and big weapons caches were captured in the operation, called Ivy Serpent, which aims to blunt potential
anti-American attacks ahead of now-banned holidays of the Ba'ath Party.

The military announced that one soldier was killed and two others injured early Sunday when a tractor-trailer accidentally crashed into their vehicle,
parked at a checkpoint outside a base in Diwaniyah, south of Baghdad.

Also Sunday, Iraqi police and coalition forces exchanged fire at a military=

checkpoint in the Iraqi capital, witnesses said. It was not clear if there were casualties.

462. Bush Junta Disguising Combat Deaths as "Accidental"

http://www.commondreams.org/headlines03/0715-03.htm

Published on Tuesday, July 15, 2003 by the Portland Press Herald (Maine)
Another Scenario Emerges in Death of Army Reservist
by Jen Fish

Time magazine has outlined a new scenario for the death this month in Iraq of an Army reservist from Kennebunk, adding more confusion as the family awaits the results of an official investigation.

The case raises a very troubling question, which is, are combat deaths being
disguised as accidents . . . so it would appear less harm is being caused by
the Iraqi resistance than is the case?

First Sgt. Christopher Coffin, 51, became the fifth soldier with Maine ties=

to die in Iraq after his vehicle ran into a ditch on July 1. He was a member
of the 352nd Civil Affairs Command assisting convoys traveling between Baghdad and Kuwait.

The details of Coffin's death have been mired in confusion since the day it=

was announced by the military.

Initially, a press release from Coffin's unit stated he died after his vehicle swerved to avoid a civilian vehicle.

But a report from the U.S. Central Command issued a day before said a member
of Coffin's unit was killed July 1 when his convoy was hit by "an improvised
explosive device."

That report did not name Coffin, but he was the only member of his unit to die that day.

Now a new report from Time, citing "Coffin family members and U.S. government officials looking into the case," says Coffin's vehicle was deliberately run off the road, then surrounded by an angry mob. A Humvee following Coffin stopped to help, but was also overwhelmed and then set on fire.

A third team of soldiers, the article says, was brought in and fired rifles=

in the air to disperse the crowd.

Representatives from Army headquarters and U.S. Central Command had no comment on Time's report.

Members of Maine's congressional delegation said they, too, could neither confirm nor deny the account. But the Coffin case, they agreed, has been disturbing for a variety of reasons.

"The case raises a very troubling question, which is, are combat deaths being disguised as accidents . . . so it would appear less harm is being caused by the Iraqi resistance than is the case?" asked Rep. Tom Allen, D-Maine.

Allen said that although he does not dispute that accidents happen, it seems
that there are "an awful lot of accidents."

"I believe we don't want to go through what we went through in Vietnam, where the reports of casualties could not be relied on," he said. "I think there should be an investigation not just of this one accident but the remaining deaths, so the American people know the whole story."

Civil Affairs Specialist Chris Coffin wasn't supposed to be in harm's way in
Iraq. He was killed there this month.

According to the Army, there have been 64 Army casualties since May 1, with=

32 attributed to hostile activity.

A spokeswoman for Sen. Olympia Snowe said Snowe, too, is disturbed by the inconsistencies in the Army's reporting of the Coffin case.

"The family's grief has been compounded by conflicting information, and they
deserve to know the truth of the circumstances surrounding Sgt. Coffin's death," Snowe, R-Maine, said in a written statement.

Both Snowe and Sen. Susan Collins, R-Maine, have worked with the family and=

announced earlier that the U.S. Army Adjutant General's office had convened=

an official board of inquiry to investigate the case.

A board of inquiry is a higher level of investigation than the routine inquiry conducted in any fatality.

"I have spoken personally with Mrs. Coffin and pledged to do everything I can to get to the bottom of this appalling lack of information," Collins said in a written statement. "It is unacceptable that the family grieving over the death of their loved one should have to endure the added distress of not knowing with certainty how he died."

In the meantime, members of the Coffin family are awaiting the results of the board of inquiry. It could take months for the board to come to any conclusions.

Candy Barr Heimbach, Coffin's sister-in-law, said the family is simply waiting for the investigation to run its course, and will not comment on the
case until that process is complete.

463. Public Doubt Growing Quickly as Bush's War Lies Unravel

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-16 11:57:12 UTC
From: snivel@netkops.com

PUBLIC DOUBT GROWING QUICKLY AS BUSH'S WAR STORIES UNRAVEL
By Bill Gallagher

DETROIT -- The lies and calculated deceptions George W. Bush used to make his case for war with Iraq are unraveling. At long last, more Americans are realizing how intelligence information was shaped and warped to support the case for an attack on Iraq to protect us from the "imminent threat" of Saddam's phantom weapons.

Nearly every day now, American soldiers die and the resistance to the occupation of Iraq grows stronger and more organized. In a chilling interview with Newsday, a leader of Saddam Hussein's Fedayeen militia describes the strategy that will challenge the new American empire.

The militia fighter, living on the run and known as Khaled, described the secret leadership structure and how the insurgents operate in five- and six-member cells. He says they are in it for the long run.

"We have many more people and we're a lot better organized than the Americans realize. We have been preparing for this kind of guerrilla war for
a long time, and we are much more patient than the Americans. We have nowhere else to go."

American forces are living in a shooting gallery, and it's likely to get worse as the insurgents exploit the growing hostility toward the occupying troops.

Patience is not one of our distinguished national virtues and, given the dangers and the price tag of $4 billion a month for occupation, twice the original estimates, polls show American confidence in the ignoble experiment
in Iraq is waning rapidly.

In his State of the Union address, President Bush said, with resounding, unequivocal certainty, that Iraq was seeking nuclear material from Africa. That assertion was based on a British intelligence report that was actually built on forged documents.

CIA Director George Tenet has fallen on his sword and is taking the rap for the president's propagation of fraud to buttress support for war. The speech

never should have included the Iraq-Niger uranium allegations, Tenet said in
a prepared statement. "This was a mistake," he said. The Bush presidents always surrounded themselves with dutiful butlers willing to clean up their messes.

What's hilarious now is listening to the Clintonian parsing the "straight-talking" Bush and his minions are using to justify the deception.

Let's see. We were just quoting the British. The information showing the fraudulent documents never made it to the White House. It was only 16 words in a long speech. We know Saddam's a bad guy and if he wasn't shopping for uranium then, he would be sometime. At the time it was said, it was believed
to be true.

Maureen Dowd of The New York Times notes, "More and more with Bush administration pronouncements about the Iraq war, it depends on what the meaning of the word 'is' is."

Rather than pledge to find out what really happened, King George says with sublime arrogance that, since Tenet took the fall, the matter is over. Ari "I'll say anything" Fleischer says, "The president has moved on. And I think, frankly, much of the country has moved on, as well."

What they're really saying is that they don't want to get straight answers about how in God's name the President of the United States could possibly foist such a colossal lie on the world and what role top manipulators in the
White House played in pouncing on the bogus information the CIA had already had serious doubts over.

Field Marshall Rumsfeld says he became aware of the fraud in March, and you have to assume the president was aware of the truth also. Why then did they wait until July to confess?

The president is really unrepentant about using the phony Iraq-Niger claim. He just brushed it off, saying, "There is no doubt Saddam Hussein was a threat to world peace."

Let's remember the context of all this. The Bush administration was always willing to inflate and exaggerate the threat Saddam posed whenever possible.
They consistently leaned on the side of pumping up whatever evil intentions he had.

What's worse than the now-admitted "mistake" -- and you can bet there are many others -- is the deliberate rhetorical connection repeatedly made to tie Saddam and Iraq to al-Qaeda and Osama bin Laden. That is the biggest lie
of all, but it worked so well in convincing the Congress and the American people that the two were inseparable partners in terror that Bush and company will never admit to that whopper.

As they scramble to cover up the deceptions for war with Iraq, the Bush people are doing a marvelous job in covering up the truth about intelligence
information the government possessed before Sept. 11.

Note this very well. George W. Bush never wanted an independent commission to investigate the events leading up to the worst terrorist attack in American history. He fought its creation and now he's doing everything he can to scuttle its work.

The Sept. 11 commission leaders -- chairman Thomas Kean, the former Republican governor of New Jersey, and Lee Hamilton, former Democratic member of the House from Indiana -- know the White House is stalling in providing documents and testimony needed for the commission to do its work.

The Pentagon and the Defense Department are not cooperating quickly or fully, and both agencies want to have witnesses interviewed in the presence of government colleagues from the departments -- a situation the commission considers "intimidation."

The delays and the witness "minding" seriously impair the commission's ability to present a full report to the nation by its deadline next May.

In an editorial, The New York Times warns we should all heed Kean and Hamilton's warning. "When these seasoned, mild-mannered men start complaining that the administration is trying to intimidate the commission, the country had better take notice."

The Bush administration scoffed when UN weapons inspectors interviewed Iraqi
scientists, with Saddam's agents present, and were required to have "minders'" as they toured suspected weapons sites. How could the scientists possibly be candid and tell the truth under those circumstances, Bush operatives wondered.

Now the administration wants its own "minders." The Times points to the dangers. "Acting more like the Soviet Kremlin than the American government, the administration has insisted that monitors from various agencies attend debriefings of key officials by investigators. ... This is a thinly veiled attempt at intimidation."

The president is already nervous about the release of a report on the Joint House and Senate Intelligence Committee hearings on Sept. 11.

Explosive areas are expected to be mistakes and gaps in systems that ignored
evidence that al-Qaeda planned a significant assault using hijacked airplanes, and new information that links members of the Saudi royal family to funding the Sept. 11 attacks.

Those are not matters the president wants to give a full public airing. As has become the predictable pattern for George W. Bush and company, they will
use an avalanche of lies to try to keep the truth from the American people.

But since the people are smarter than the politicians and the corporate media propagandists who've aided and abetted the lies, the time has arrived when the public appetite for truth is growing.

That threatens George. W. Bush.

to all you muhfuggahs in l-o-v-e...

http://www.danielpwelch.com/0307opic.htm

Our President is a Criminal
Daniel Patrick Welch

(7/03)

It's well past time to say it. Despite the weaseling and
finger-pointing--in
fact, because of it--the Forged Niger letter is indeed the smoking gun, and=

the chips have yet to stop falling. Who wrote the damn thing, and on whose
orders? Who cares whether Tenet, his job on the line, acquiesced to
including a literal truth that actually amounts to one of the great frauds
of the century? The sheer audacity and cynicism of this coterie of hacks
and
hustlers is simply astounding. As a teacher, I won't let six-year-olds get
away with such transparent sophistry. The bottom line is that Bush knew the=

information was bogus, and used it anyway to convince millions to go along
with his phony war.

For that alone, for the memory of the thousands of dead Iraqis and
Americans, he deserves the il Duce treatment (figuratively speaking, Mr.
Ashcroft-no need to start tapping my phone or putting me on no-fly lists).
The criminal enterprise called the Bush administration is (Helen Thomas was=

right) the worst ever. Their campaign in furtherance of the conspiracy to
defraud the public into buying the Iraq war is one of the the most cynical
abuses of power in U.S. history. It deserves to be treated as such.

Alarmist? You bet. This guy already thinks (and occasionally tells foreign
leaders) that he gets his orders from God. If these radical extremists can
get away with this, then the dumbing down of America will be complete, and
the stage will be set for the next wave of the nascent fascism. La Cosa
Bush
(apologies to the mafia) is, like all crime families, violent, arrogant,
and
beyond the reach of the law--so far. Bush's handlers no longer even have
the
decency, courage or self-restraint to prevent his criminally stupid
comments
from wreaking havoc around the globe. Was last week's pseudo-macho
invitation to "Bring 'em on" even a mistake? Or was it another calculated

ploy to make him look "tough" to the American people, playing to the ugliest
side of the American psyche while once again enraging thinking people the world over. No matter--he must be stopped. This cabal has been lying, cheating, and manipulating national tragedy to force their right wing agenda
down our throats long enough.

And half-measures won't do any more. None of this vague safe rhetoric about=

"misleading" or cautious calls for those who "know who they are" to step down. WE know who they are, the junta that has hijacked our government and our national agenda. The cartel must go: Bush, Cheney, Powell, Rice, Rumsfeld, Wolfowitz, Perle should all resign, be fired or impeached immediately, before their conspiracy of lies and their mutual pact of self-protection is allowed to further endanger the country and the world. Cornered criminals, especially stupid ones, are a dangerous lot, and there is no telling to what lengths they will go to cover their own behinds.

On a mission from God, installed by a viciously partisan Supreme Court, the=

skids are greased for a further slide into misadventure, bankruptcy and ruin
With the addition of Congress on their side, they are acting with particularly reckless abandon--and impeachment is not in the cards as long as the GOP circles the wagons. None will have the courage or integrity Goldwater showed when he told Nixon the jig was up. Power corrupts, and the=

Republicans are so drunk with it they won't turn on their Lord Fauntleroy until he robs a bank on camera in broad daylight.

But that is no reason not to tell the truth: whatever their chances, some of
the braver souls in congress should introduce impeachment legislation immediately: Conyers, Kucinich, Lee, Paul? The media has already shown they=

will not help; moneyed interests overwhelmingly favor the right. A campaign=

based on the old game of raising oodles of money and buying ads is a sure failure The only thing that can save us now is a grassroots, velvet revolution, the principled, impassioned movement calling for these people's=

head on a spike.

And maybe, just maybe, this one isn't an impeachable offense, but I'm just plain getting sick of Rumsfeld's smug, arrogant grin on the tube. What the hell is he smiling at all the time? Is it funny, somehow, that thousands of=

Iraqi civilians are dead after his "precision" bombing? It is ironic, admittedly, another fraud, to be sure-but hardly amusing. Maybe it's just part of what you do when you think you can get away with anything.

Senate Intelligence Chair Pat Roberts foreshadowed just how twisted the logic is going to get when he said that what concerns him most "is what

appears to be a campaign of press leaks by the CIA in an effort to
discredit
the president," Yeah, right. The black bag set, whose penchant for secrecy
and service verges on pathology, are the real problem here--not the curious=

fact that even some of them have finally decided that things are so bad
that
someone, somewhere has to speak out.

It's time to close the curtain on this Bizarro World, where lies are the
norm and logic no longer applies: Saddam loyalists--not nationalist
resistance to occupation--are the real problem in Iraq. Protesters are
terrorists, but we are fighting for our freedoms. Bush's popularity remains=

robust, yet huge shows of force and repressive rules on free speech are
needed to keep the viewing public from seeing that he is dogged by prostest=

at every turn. War is peace, freedom is slavery, and some animals are more
equal than others. The lies won't stop until we fire the liars.

A Firm Basis for Impeachment
Robert Scheer

July 15, 2003

Does the president not read? Does his national security staff, led by
Condoleezza Rice, keep him in the dark about the most pressing issues of
the
day? Or is this administration blatantly lying to the American people to
secure its ideological ends?

Those questions arise because of the White House admission that the charge
that Iraq tried to buy uranium from Niger was excised from a Bush speech in
October 2002 after the CIA and State Department insisted it was unfounded.
Bizarrely, however, three months later - without any additional evidence
emerging - that outrageous lie was inserted into the State of the Union
speech to justify the president's case for bypassing the United Nations
Security Council, for chasing U.N. inspectors out of Iraq and for invading
and occupying an oil-rich country.

This weekend, administration sources disclosed that CIA Director George
Tenet intervened in October to warn White House officials, including deputy
national security advisor Stephen Hadley, not to use the Niger information
because it was based on a single source. That source proved to be a forged
document with glaring inconsistencies.

Bush's top security aides, led by Hadley's boss, Rice, went along with the
CIA, and Bush's October speech was edited to eliminate the false charge
that
Iraq was seeking to acquire uranium from Niger to create a nuclear weapon.

We now know that before Bush's January speech, Robert G. Joseph, the
National Security Council individual who reports to Rice on nuclear
proliferation, was fully briefed by CIA analyst Alan Foley that the Niger
connection was no stronger than it had been in October. It is inconceivable
that in reviewing draft after draft of the State of the Union speech, NSC
staffers Hadley and Joseph failed to tell Rice that the president was about
to spread a big lie to justify going to war.

On national security, the buck doesn't stop with Tenet, the current fall
guy. The buck stops with Bush and his national security advisor, who is

charged with funneling intelligence data to the president. That included cluing in the president that the CIA's concerns were backed by the State Department's conclusion that "the claims of Iraqi pursuit of natural uranium
in Africa are highly dubious."

For her part, Rice has tried to fend off controversy by claiming ignorance. On "Meet the Press" in June, Rice claimed, "We did not know at the time - no
one knew at the time, in our circles - maybe someone knew down in the bowels
of the agency, but no one in our circles knew that there were doubts and suspicions that this might be a forgery."

On Friday, Rice admitted that she had known the State Department intelligence unit "was the one that within the overall intelligence estimate
had objected to that sentence" and that Secretary of State Colin Powell had refused to use the Niger document in his presentation to the U.N. because of
what she described as long-standing concerns about its credibility. But Rice
also knew the case for bypassing U.N. inspections and invading Iraq required
demonstrating an imminent threat. The terrifying charge that Iraq was hellbent on developing nuclear weapons would do the trick nicely.

However, with the discrediting of the Niger buy and the equally dubious citation of a purchase of aluminum tubes (which turned out to be inappropriate for the production of enriched uranium), one can imagine the disappointment at the White House. There was no evidence for painting Saddam
Hussein as a nuclear threat.

The proper reaction should have been to support the U.N. inspectors in doing
their work in an efficient and timely fashion. We now know, and perhaps the White House knew then, that the inspectors eventually would come up empty-handed because no weapons of mass destruction program existed - not even a stray vial of chemical and biological weapons has been discovered. However, that would have obviated the administration's key rationale for an invasion, so lies substituted for facts that didn't exist.

And there, dear readers, exists the firm basis for bringing a charge of impeachment against the president who employed lies to lead us into war.

The software is from RT Systems. It seems to have some bugs as reported on the 8900 Yahoo group. Will not pull frequencies into the computer that are outside of the 2 meter / 440 Mhz range. Will not properly program text into the radio display. Some problems with hyper memory programming. More bugs being reported every hour. See the Yahoo FT-8900R group for the details.

Steve

Not having the 8900, I cannot comment on details of that particular
software.

But their tech support has been helpful on the few occasions I have
needed to contact them.

Happy trails,

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday July 20th 2003
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)

The recent post (in rec.radio.scanner) about cell phone jammers got me thinking...
Both as part of my job and part of the radio hobby, I have attended many communications-themed events and made some interesting acquaintances. I am sure we have all seen some of the things that I have, but I just realized after reading the "cell phone jammer" post that this seldom-acknowledged movement might be far more widespread than I imagined.
Any thoughts? Have others made these observations as well?
Also...
On a side note, a friend's brother works for one of the US federal three-letter agencies. During a recent raid that was intended only to net a drug lab and some firearms, the agents discovered an electronics workshop that included, among other things, a wideband VHF jamming device based on a USCG-surplus marine transceiver and, most shocking, a very complex work-in-progress to use Nextel phone parts coupled with stolen Nextel tower equipment to be able to monitor and intercept Nextel services.
He could not tell me much about that bust, but I'd love to know anything else that anyone may know about the prevalence of these technologies.

Tenet to Testify on Iraq Uranium Claim
Wed Jul 16,11:14 AM ET Add Politics - U. S. Congress to My Yahoo!

WASHINGTON - CIA (news - web sites) Director George Tenet was expected to testify behind closed doors Wednesday about President Bush (news - web sites)'s claim in his State of the Union address that Iraq (news - web sites) was trying to buy uranium in Africa to restart its nuclear weapons program.

Tenet, who was to appear before the Senate Intelligence Committee in a closed-door session, has already taken responsibility for the line's getting
into the January speech. The White House says that while it believes the statement was accurate, it should not have been included in the president's speech.

In Rome on Wednesday, the head of a parliamentary intelligence committee said Italy may have passed on to the United States and Britain the disputed claim that Saddam Hussein (news - web sites) had been seeking uranium in Africa.

Premier Silvio Berlusconi's government has denied that Italy's intelligence services passed on "documents" about the matter. But committee chief Enzo Bianco, speaking after a top government official addressed the commission in
secret, did not deny that the information may have been passed on informally.

"This is possible," he said. "I don't rule it out."

Cabinet undersecretary and top Berlusconi aide Gianni Letta, who briefed the
intelligence commission Wednesday afternoon, refused to comment on the hearing.

Rep. Jane Harman (news, bio, voting record), D-Calif., the top Democrat on the House Intelligence Committee, said her committee's inquiry into intelligence on Iraq will look into Bush's claim - a statement apparently based on a series of documents now known to be forgeries.

"The speech should not have cited British information about which the U.S. intelligence community had expressed serious doubts," Harman, newly returned
from a trip to Iraq, said in a statement. "I appreciate that the administration and (Tenet) have acknowledged that it was a mistake to have included this information in the president's speech, but big questions remain about who forged the documents and the paper trail that followed."

Democrats renewed calls Tuesday for an investigation into the Bush administration's handling of prewar intelligence on Iraq's weapons programs,
some of which turned out to be bogus.

Separately, Rep. Henry Waxman (news, bio, voting record), D-Calif., sent a 12-page letter to House Intelligence Committee Chairman Porter Goss on Tuesday that spelled out his questions about prewar Iraqi intelligence and called for immediate, open hearings into the documents purporting to be from
Niger.

"It is now abundantly clear that something fundamentally wrong has occurred," Waxman wrote. "The issues about the Niger hoax ... should not be allowed to fester."

Republican leaders sought to knock the criticisms aside. Goss, R-Fla., refused to be drawn into the controversy over how the Niger uranium allegation found its way into Bush's address, and said he remains confident in Tenet as CIA director.

House Majority Leader Tom DeLay, R-Texas, also defended Tenet, and dismissed
the controversy as an "incredibly overblown" result of Democratic presidential hopefuls vying for support in advance of their primaries.

DeLay said that Bush "didn't lie. He didn't mislead anybody. His statement was accurate." The majority leader also responded forcefully to a question of whether Tenet should depart the government. "Absolutely not," he said.

The Bush administration has acknowledged its error in using the Niger allegations in Bush's speech, despite serious doubts expressed by the intelligence community.

Sen. Edward M. Kennedy, D-Mass., appearing on NBC's "Today" show Tuesday, said "there is a broader issue, and that is the failed policy toward Iraq." Sen. Bob Graham (news, bio, voting record) of Florida, a candidate for the Democratic presidential nomination, accused Bush of deception.

"He deceived the American people by allowing into a State of the Union speech - at a critical point when he was making the case for war with Iraq -
a statement that he either knew was wrong or should have known was wrong."

Another Democratic presidential hopeful, Ohio Rep. Dennis Kucinich (news, bio, voting record), joined two former intelligence officials to blast Bush

administration use of intelligence.

Andrew Wilkie, a senior analyst from Australia's Office of National Assessments, said the war on Iraq was sold using inaccurate information.

"In that time, I saw not a single piece of critical hard intelligence to substantiate the claim of any cooperation between Iraq and al-Qaida," said Wilkie, who resigned before the war to Australian government support for the
war.

Wilkie was joined by Ray McGovern, a CIA analyst who retired in 1990 and now
heads a group of retired intelligence officers critical of the Bush administration's handling of prewar intelligence.

Overseas, Italian prosecutors have opened an investigation into reports that
Italian intelligence agencies gave those documents to U.S. and British intelligence, the foreign minister in Rome said Tuesday.

Foreign Minister Franco Frattini said Tuesday that Italy "never, never gave documentation relative to this issue to other nations' intelligence services."

to all you muhfuggahs in l-o-v-e...

http://www.cnn.com/2003/WORLD/meast/07/16/otsc.whitbeck/index.html

Harris Whitbeck: Iraqis cheer U.S. death

BAGHDAD, Iraq (CNN) --Major combat in Iraq was declared over more than two months ago, but U.S. troops in the country are being killed on an almost daily basis.

CNN Correspondent Harris Whitbeck in Baghdad has details of the latest attacks and measures under way to improve security.

WHITBECK: We have a couple of incidents to report. The first one occurred earlier [Wednesday] morning. One soldier was killed and three were wounded when the convoy they were traveling in, on Highway 1, west of Baghdad, was hit by an explosive device.

The convoy had just passed wreckage of an abandoned vehicle when an explosion was heard. One truck in that convoy was destroyed, and the soldier
who was killed was in that truck. Those who were wounded were evacuated to a
military hospital.

When that explosion was heard, a group of Iraqi civilians, who were nearby, gathered at the site of the aftermath [and] were watching what was going on.

And when they apparently realized that this was an attack on a U.S. military
force, they erupted in cheers. And that cheering went on for several minutes.

Meanwhile, later [Wednesday] in western Baghdad, one U.S. soldier was injured when a grenade was thrown at his truck, which was parked in front of
a bank in the Mansour district of western Baghdad. Again, that was another apparent attack on U.S. forces here.

The U.S. military authorities here are very concerned about what might happen over the next few hours.

Thursday is the anniversary of the Baath Party's rise to power in Iraq. That
is Saddam Hussein's former political party. And people feel that Saddam Hussein's loyalists might try to launch more attacks on U.S. forces here as

a way of commemorating that event.

Now there are some steps being taken to improve security in the Iraqi capital, and [Wednesday] the first 96 graduates of the Baghdad Police Academy were graduated. U.S. Administrator Paul Bremer was at that ceremony.

The idea of this training course, which lasts for about three weeks, is to provide the trainees with knowledge of basic policing techniques and also knowledge of basic human rights issues that the police force would have to deal with as they patrol the city's streets.

The idea of the Baghdad Police Academy is to graduate eventually about 900 officers who would take over a lot of the policing work that's now being handled by the U.S. military.

http://www.nytimes.com/aponline/international/AP-Iraq-Backyard-Cache.html

July 14, 2003
Dug - Up Iraqi Parts' Potential Faces Doubt
By THE ASSOCIATED PRESS

Filed at 7:47 p.m. ET

VIENNA, Austria (AP) -- A top U.N. weapons hunter says it would have been ``virtually impossible'' for Iraq to revive a nuclear bomb program with equipment recently dug up from a Baghdad backyard, as the Bush administration contends.

Jacques Baute said the long-term monitoring of Iraq's nuclear establishment planned by the U.N. Security Council would have stifled any attempt to build
a huge uranium-enrichment plant for making bomb material.

``This is a mistake people are making,'' Baute said. Such contentions ignore
the fact that Iraq would have operated for years under international controls had the U.N. plan not been aborted by war, he said.

Baute also said in an interview with The Associated Press that it appears the unearthed cache of uranium enrichment parts, surrendered by an Iraqi scientist last month, lacked critical components, and its accompanying blueprints were marred by errors.

Baute, a French nuclear physicist, led the International Atomic Energy Agency inspection teams that -- until the U.S.-British invasion in March -- crisscrossed Iraq in search of banned weapons.

His assessment of the hidden equipment came as a furor grew in Washington over President Bush's use of an earlier allegation -- that Baghdad sought uranium from Niger -- to bolster the White House case for war.

It was Baute's investigation last February that unmasked as forgeries the documents that underpinned the claims about Niger.

National Security Adviser Condoleezza Rice is holding to the Niger story, noting that the British government now says other, unspecified intelligence supports the uranium allegation. But London hasn't supplied Washington with any such information, Rice acknowledged.

Likewise, Baute's office has received nothing from the British three weeks

after asking for the purported independent evidence, said sources at IAEA headquarters in Vienna, speaking on condition of anonymity.

The U.N. agency's experts believe all reports of a Niger connection stem from the same bogus documents.

Eliminating Iraq's supposed weapons of mass destruction was the main reason given by Bush for invading the Arab country. But three months of searching by the U.S. military has found no banned arms, just as some 700 inspections by U.N. teams from November to March also uncovered no signs of nuclear, chemical or biological weapons programs.

Before the war, Baghdad said all its chemical and biological weapons had been destroyed during U.N. inspections in the 1990s.

However, President Bush said Monday he remained convinced that Saddam Hussein was trying to develop a weapons program that threatened the world and justified the United States going to war. ``Our country made the right decision,'' Bush said.

State Department spokesman Richard Boucher had no comment when asked about Baute's statements. But he told reporters: ``I think the findings in Iraq demonstrate that Iraq had not abandoned its intentions on nuclear programs. Just buried them. Maybe more. We'll see. We'll find the full extent of that as time goes on.''

Iraq never had nuclear arms but was making progress building sophisticated centrifuges to produce enriched uranium for bombs when the 1991 Gulf War intervened. Inspectors dismantled the program.

In early June, the centrifuge program chief, Mahdi Shukur Obeidi, turned over to U.S. authorities equipment and documents he said he buried in his garden in 1991, when he said Iraqi leaders told him to hold the parts to revive the program.

The IAEA notes that Obeidi's account tends to undercut one White House contention: that Saddam's government had secretly resumed its nuclear program in recent years.

White House press secretary Ari Fleischer has instead now focused on the Obeidi cache's potential, saying it would have allowed Iraq to rebuild weapons facilities ``once sanctions were ended.''

But Baute, in the interview Friday, pointed out that once U.N. economic sanctions were ended, after inspectors certified Baghdad's weapons work had ceased, the Security Council was to have imposed an Ongoing Monitoring and Verification regime on Iraq -- controls short-circuited by the U.S.-British invasion.

Inspectors, with unhindered access under U.N. resolutions, would have kept close watch on Iraq's military-industrial complex, aided by air and water sampling technology, satellite and aerial surveillance, and monitoring of Iraq's imports.

An enrichment plant, a vast array of thousands of centrifuges, would have been easily detected, said Baute, who once helped build French nuclear bombs.

``To have turned it into a full-blown enrichment program while OMV was in place would have been virtually impossible,'' he said of the Obeidi equipment.

Although U.S. officials have not shared their Obeidi data with the IAEA, Baute's experts closely examined available photos of the components and found they included one critical part, the bottom bearing assembly.

But other vital elements apparently are lacking, Baute said, including the advanced carbon-fiber rotor, the spinning tube in which uranium gas is separated.

``It is far, far from being a complete set,'' he said.

He also noted the Iraqis would have had to expose themselves by searching for foreign manufacturers to duplicate complex components.

As for Obeidi's documents, they appear to be copies of centrifuge drawings and papers seized by IAEA inspectors in 1995, Baute said.

``These Iraqi drawings seem to contain mistakes,'' he said. German engineers
who secretly assisted the centrifuge program apparently didn't leave their hosts finished designs, and the Iraqis erred at times in filling in gaps.

Why This Bush Lie? Part 1
It wasn't his first.
By Timothy Noah
Posted Tuesday, July 15, 2003, at 4:01 PM PT

Chatterbox is gratified that the country has come to share his enthusiasm for dissecting the lies uttered by or on behalf of President Bush. Or rather, for dissecting one lie: Bush's assertion, in this year's State of the Union address, that Saddam had "recently sought significant quantities of uranium from Africa." This information, the Bushies now concede, was based almost entirely on documents that the CIA and the White House knew to be false. (Pedants' corner: Bush actually said that British intelligence had
"learned" about Saddam's yellowcake safari, but the attribution amounted to a lie because you can't "learn" something that isn't true.)

But what makes the yellowcake lie so special? That it was a justification for going to war? Then what about Bush's comic insistence in May that "We've
found the weapons of mass destruction"? That lie was arguably worse than the
yellowcake lie, because it was retrospective rather than speculative, and more demonstrably untrue. What about the cost of the war, which the Bush administration insisted couldn't be estimated in advance? Larry Lindsey reportedly lost his job as chairman of the National Economic Council for blabbing to the Wall Street Journal that the war would cost between $100 billion and $200 billion. Mitch Daniels, then White House budget director, scoffed at Lindsey's estimate and said the cost would be more like $50 billion or $60 billion. But now the Washington Post is estimating the cost of the war and its aftermath at . $100 billion.

Why was there no media frenzy when Bush lied about this year's tax cut? "My jobs and growth plan would reduce tax rates for everyone who pays income tax," Bush said before Congress passed it. Not so! The Urban Institute-Brookings Institution Tax Policy Center found 8.1 million taxpayers who would receive no tax cuts. Or what about when Ari Fleischer said the prisoners of war at Guantanamo were "receiving far far better treatment than they received in the life that they were living previously"? This was difficult to square with the fact that there had, at that time, been 27 suicide attempts. Or what about Fleischer's denial (twice!) that Bush had come out against civilian nation-building during the 2000 presidential campaign? Fleischer tried to convince reporters that Bush had

criticized only nation-building by the military. But Bush had said, "I don't
think so" in response to the following question in the Oct. 11 debate: "Is
it time to consider a civil force of some kind, that comes in after the
military, that builds nations or all of that?" Or what about the White House
fact sheet that insisted the tax cuts hadn't contributed to the deficit
("The budget returned to deficit because of war, recession and emergencies
associated with the terrorist attacks of September 11th"), even though,
buried inside the White House budget documents, some renegade bureaucrat
wrote, "The deterioration in the performance of the economy together with
income tax relief . produced a drop in the surplus to $127.1 billion (1.3%
of GDP) and a return to deficits"? (Incidentally, the budget deficit is now
projected to be $455 billion.)

And these lies are all just from this calendar year. They don't include what
is probably Bush's most significant lie concerning domestic policy: that his
restrictions on stem-cell research left scientists with 64 stem-cell lines
to use in their research. "[M]ore than 60 genetically diverse stem cell
lines already exist," Bush said in his August 2001 stem-cell speech. "They
were created from embryos that have already been destroyed, and they have
the ability to regenerate themselves indefinitely, creating ongoing
opportunities for research." Not true! Until recently, there was only one
stem-cell line that researchers could use. Now there are 11. In this
instance, Chatterbox knows why the lie got lost in the shuffle. It's because
just about everybody (including Chatterbox) dropped the subject after Osama
Bin Laden's major distraction on Sept. 11.

So: How is the yellowcake lie different? Why is it the first Bush lie to
send the media pack into a feeding frenzy? Why did it prompt David Broder of
the Washington Post to see "the shadow of defeat" cross Bush's presidency?
Why yellowcake? Why now? Chatterbox will explain all in his next entry.

481. Bush's Uranium Quicksand: Bush's Denials are Laughable

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-17 13:20:21 UTC

http://www.nytimes.com/2003/07/15/opinion/15TUE2.html

July 15, 2003
Uranium Quicksand

In trying to defend the indefensible in its depiction of Iraq's nuclear weapons program, the Bush administration is now making a legalistic argument
that would be laughable if the matter were not so serious. Because the British government believed in January that Iraq had been trying to import large quantities of uranium from Africa, top administration officials are saying, Mr. Bush was technically correct when he cited the British concerns in the State of the Union address. The explanation conveniently glosses over
the fact that long before Mr. Bush delivered the speech on Jan. 28, American
intelligence officials had concluded that the British charge was probably unreliable.

The British-made-us-do-it defense might be more compelling if London had a better track record when it came to assessing Iraq's unconventional weapons programs. In fact, parts of the British dossier on Iraq's arms that was published with great fanfare in February were lifted verbatim from unsubstantiated Internet sources. Prime Minister Tony Blair's warning last September that front-line Iraqi military forces could launch chemical or biological weapons on short notice proved to be embarrassingly misinformed once the war in Iraq began.

George Tenet, the director of central intelligence, was wary enough of the uranium report that he advised the White House last October to remove a reference about it from a speech Mr. Bush was planning to deliver in Cincinnati. It was dropped. Secretary of State Colin Powell found the supporting evidence so questionable he choose not to cite the accusation in his presentation about Iraq to the United Nations Security Council in February.

Yet the charge still found its way into the State of the Union speech. Mr. Tenet has accepted blame for the C.I.A.'s failure to tell the White House to
yank it, but the real question is why the White House put it in the address - and kept it there - long after it had been debunked. The decision to attribute it to British intelligence was clearly a desperate effort to get around the objections that had been raised by the C.I.A. and other

American intelligence agencies. By clinging to that weak justification, the White House is only compounding its mistake. The honorable response at this point would be to concede the error and apologize to the American people.

482. The Lying Bastard's Amazing New Reason for the War With Iraq

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-17 13:20:25 UTC
From: AgentSmith@IsATroll.com
Message-ID: <QGK5VHIG37819.6391782407@anonymous.poster>

to all you muhfuggahs in l-o-v-e...

http://www.salon.com/opinion/conason/2003/07/15/bush/

Joe Conason's Journal
President Bush's astonishing new reason for the war with Iraq: Saddam wouldn't let weapons inspectors in.

- - - - - - - - - - - -

July 15, 2003 | A "darn good" quote that almost nobody quoted
"We gave him a chance to allow the inspectors in, and he wouldn't let them in."

George W. Bush uttered that amazing sentence yesterday to justify the war in
Iraq, according to the Washington Post.

What? Yes, I promise that's what the man said. (And by "him," the president clearly meant Saddam Hussein -- not Kim Jong Il, who actually has refused to
let international inspectors into North Korea.)

Now a presidential statement so frontally at variance with the universally acknowledged facts obviously presents a problem for the White House press corps. He wasn't joking, and he didn't sound disoriented or unwell. Although
Dana Priest and Dana Milbank wrote the story as delicately as they possibly could, they couldn't make it seem less weird:

"The president's assertion that the war began because Iraq did not admit inspectors appeared to contradict the events leading up to war this spring: Hussein had, in fact, admitted the inspectors and Bush had opposed extending
their work because he did not believe them effective."

Appeared to contradict the events leading up to war? Indeed, that's an exceedingly mild description of what Bush said. There's no plausible explanation, unless the president suddenly flashed back to his Yale sophomore philosophy seminar, grappling with the argument that everything we
perceive is mere illusion.

For the moment, however, let's just assume reality does exist. What possessed the president to make an assertion that everyone on the planet knows to be untrue? And who is going to take the responsibility for this

one? Did George Tenet vet Bush's statement? Do the British have a secret dossier proving that Saddam never actually admitted Hans Blix and the UNMOVIC teams? Will Condi Rice or Donald Rumsfeld show up on Fox News next weekend to explain why Bush's statement is "technically accurate," even though he shouldn't have said it?

As hard to explain as what Bush said is the press corps' failure to report his stunning gaffe. The sentence quoted above doesn't appear in today's New York Times report, for example. Yet there is no question about what he said -- undoubtedly to the amazement of both Kofi Annan, who was sitting beside him at the time, and the dozens of reporters who were present during their brief joint press conference.

Anyone who doesn't believe me (or the Post) can watch Bush say the exact words quoted above here, toward the end of the White House's own videotape of his remarks, under the headline "President Reaffirms Strong Position on Liberia."

Another recent president once said something that was blatantly untrue, if fairly trivial, and the videotape of his statement was replayed again, and again, and again, and again ...

TS-2000 keying problem
Rig was OK but after moving to other QTH next day, I was not able to use the
hand key (not automatic one).
VOX is on but not possible to send in CW-mode.
Measure about +4,5Volt on the key "hot" wire in key up position.
Anyone had this problem before?

I'm assuming that deliberate cell phone jamming, that might be done by
places that don't like people using their phones, is in fact, completely
illegal. True? Has anyone ever been caught and prosecuted for this?

Yes indeed it is, but if the person in question is impersonating one
of the regulars here and you block sender them you're really not
blocking the offending party. It's best to get a newsreader that
allows you to block domains and then setting it up to block anything
from alt.net, dizum.com and the Frog remailer as these are the places
the majority of the spam/floods/trolling comes from.

Nah for 0 MHz -- have a switch labeled 0 MHz -- fed by a battery.

Its the 0.00000000000000000000000000000001 Hertz that will be a problem

All in good fun.

Seriously you need to decide on accuracy and stability first which will
dictate whether you will be building an analog, or synthesized unit.

For an analog homebrew project -- see URL:
http://www.vintage-radio.com/projects/signal-generator.shtml
Covers 150kHz to 12 MHz. For the lower frequencies -- get a hold of some of
the later solid state Heathkit Audio generator manuals.

Or from scratch -- consider the following books:
http://www.sss-mag.com/cosc.html#books

Go to radio shack and buy a filter. If they still sell them that is.

Or build one yourself....get a old AM/FM radio. Rip out the AM antenna, remove the wire. Wind several turns of heavy copper insulated wire around it. Place a 500 to 1000uf cap on either end to ground. Positive to coil of course. Connect in series with battery feed line to rig.

If that dont work, go to shielded cable and the filter and maybe reroute the wire so its not too close to other wires.

The workaround is to have a variable oscillator beating against a fixed oscillator. So you have your variable oscillator going from 30 to 42MHz (I just picked those out of my hat), a fixed oscillator running at 30 MHz, and a mixer fed with both oscillators. The output of the mixer will be 0 to 12MHz (plus some other things).

Hi John,

I need to get one of the MAX038EVKIT oscillator evaluation kits shown at the website below but can't check the price nor order it without being a logged-in member, and don't believe that would work out for a one piece hanm radio use purchase. Where/how can I just order a single unit?

I have an AS-NEW, MINT AOR AR-8600 wideband scanner/receiver available for sale. Bought it and it has BARELY been used (less than 2 HOURS total) and just sits here on my shelf.Rather than just taking up space, I have decided to give it a "new home" where someone will use it to its full capabilities . Unit has the optional DSP installed,as well as the "voice inversion" plug-in (allows decryption of simple voice-inversion encryption..this not available generally for purchase within the USA !) FULL 800 Mhz coverage (NO "BLOCKS" or "missing 800 Mhz range")...cellular-capable.1,000 channels and coverage from 100 khz to 2 Ghz.
Receive Modes: WFM, NFM, SFM, WAM, AM, NAM, USB, LSB, CW
Sensitivity: 100 kHz ~ 1.9 MHz
AM: 3.5 uV (10dB S/N)
1.9 MHz ~ 30 MHz
AM: 2.0 uV (10dB S/N)
30 MHz ~ 470 MHz
AM: 1.0 uV (10dB S/N)
NFM: 0.35 uV (12dB SINAD)
WFM: 1.0 uV (12dB SINAD)
470 MHz ~ 820 MHz
NFM: 0.5 uV (12dB SINAD)
820 MHz ~ 2000 MHz
NFM: 2.5 uV (12dB SINAD)
Selectivity: SSB/NAM 3kHz (-6dB), 9kHz (-60dB)
AM/SFM 9kHz (-6dB), 20kHz (-40dB)
WAM/NFM 12kHz (-6dB), 25kHz (-40dB)
WFM 150kHz (-3dB), 380kHz (-20dB)
Aerial connection: 50 OHM BNC
Audio output: 800mW (8 OHMS) MAX @ 10% THD. Internal speaker, rear chassis 3.5mm socket, front panel 3.5mm socket
Power Consumption: 400mA typical usage, 50mA on standby. 10.8 - 16V d.c..
Negative ground .Dimensions: 155(W) x 57(H) x 195(D) mm excluding projections
Weight: 2kg approx.
Memory channels: 1,000 (20 banks)
Select scan channels: 50
Priority channels: 1
Search banks: 40
PASS channels: 50 per search bank + 50 for VFO search
Scan/Search Rate: 37 increments per second maximum
Item includes power supply , whip antenna, and owner's manual..sorry, no box. Unit is absolutely FLAWLESS and PERFECT both cosmetically and functionally: problem-free and as-new !Pics on AOR website. Payment by MONEY ORDER ONLY: NO EXCEPTIONS ! Price INCLUDES insured , tracked, and WELL-PACKED S/H by USPS.(Please consider this when purchasing).Sorry, NO TRADES or "offers" needed.Price firm.This radio is a superb performer and is only being sold as is

not being used due to other interests and failing health.Please Email me DIRECTLY if interested (do not leave messages on site here as I dso not get here too much these days). Price (DELIVERED AS NOTED) is $ 670.00 THANK YOU for you interest.

> spam/floods/trolling comes from.

Exactly. Impersonation is exactly the tactic of many in these newsgroups. A person disagrees with something a person says and then begins flooding the newsgroup with messages appearing to come from the person he disagrees with. Of course, everyone gets angry at the person the messages appear to be coming from, not the person actually sending the messages. People then use filters to block the person the messages appear to be coming from, preventing his participation in this newsgroup (which thrills the person actually sending the messages).

The solution is exactly as you say - block domains instead of senders.

Digikey sells a single unit of the chip for $24, but 25 is their
minimum order. You will have to recreate the kit with your own parts.

The data sheet shows most of what you will need.
http://rocky.digikey.com/WebLib/Maxim/Web%20Data/MAX038.pdf

Maxim is also pretty good about giving out samples but you will have
to register.

zzzzzzzzzzzzzzzz.......*fart*, *belch* , zzzz.....Uhhh...Did I go
anywhere? I was just taking a nap.

"I THOUGHT ALL OF YOU ARE MACHO MEN",

No. I'm a redneck. Macho men went out about 1980.

What
> happened? Perhaps your all R.I.P. (Rest In Peace) dominated by the
> intellectual gays and politics groups.

Nope. I ignore both. Also political gays and intellectual groups.

> Perhaps all of you are hiding at the back of your wives because
> you cannot fight back against the infiltrators like the gays and the
> politics groups that dominated the shortwave newsgroup at this time.

No. When the queers and political trolls take over, I go over to other
groups for a while. I can't stop them from posting. But I can stop me
from reading their sick crap.
> In short all of you are a bundle of cowards, you are running away from
> the high ground of the shortwave newsgroup.

This NG was never on too high a ground even in normal times....Many
endlessly prattle on for months about brain damaged shortwave
broadcasters. If thats high ground, I'll keep my life preserver on.

Wake up, fight back your
> rights. That is your group, don't allow the infiltrators to throw you
> out of your own newsgroup.

This is no ones and everyones group. No one can throw anyone out of
it, so it's a waste of energy to even worry about it.

> The infiltrator has discovered that all you in this shortwave
> newsgroup are all weak.

True, I don't work out, or lift weights as much as I should...I'm too busy smoking cigs and drinking coffee...

You cannot compose a very intellectual article
> or contribute valuable information related to shortwave which you can
> learn out of it.

If they want good info, they should buy books. I'm not the U of H....If I happen to spit anything out vaguely useful, so be it...Otherwise, it's not my job. It's my right to be as ignorant and useless as I want. After all, I'm a redneck. I have a reputation to uphold.

Instead all of you placed rubbish topics, using
> offensive languages on your posts and insulting each other.

I only get offensive when I'm offended upon. But yes, If you offend upon me, I'm likely to take a *&^% down your neck. After all, I'm a redneck. I have a reputation to uphold.

> In order to throw out the infiltrators, you should learn how to
> compose a good article related to shortwave which everybody will
> learn.

What are we publishing companies now? I have a life, and more important things to do than prattle on in a lengthy article about shortwave radios. There is so much written about shortwave and shortwave radios over the years, it's mostly a rerun at this point anyway... Wanna learn something? Buy a frigging book. The ARRL antenna handbook make good throne reading material. All *real* redneck amateurs have a copy of the antenna handbook, AES catalog, and a penthouse in their throne rooms. Not necessarily in that order...

>Because its not only you are reading or viewing this newsgroup
> but it becomes the focus of the world to read articles.

Hummmm....People worldwide want to listen to the mutterings of an ignorant redneck? That boggles the mind really.

Even though
> they are not a member of this group but they read those articles that
> you post in this shortwave newsgroup.

No one and everyone is a member of this group.

Remember this is the Internet,
> people get information from this medium.

Hummm....Don't forget what the airlines teach their pilots when setting up their flight computers and autopilots. Garbage in = garbage out. All info on the web should be filtered before use.

> Google shortwave newsgroup is not moderated why, because they
> want freedom of speech and expression to post a good article related
> to the topic and accept criticisms on the article posted on the group

> and allow also exchanging of views in a certain article.

There is no such thing as a "google shortwave newsgroup". This is usenet. Google doesn't have anything to do with it, unless you post from there, and their archives of old posts which they took over from deja.

It doesn't
> muzzle free speech or express its views. Google shortwave newsgroup is
> like a mirror of democracy in the public arena on the Internet.

Ditto.... sigh...

> Stop hiding, there is nowhere to hide. Go and challenge the gays
> and politics infiltrators on your shortwave newsgroup. "STOP THEM".

I'm fairly young, have my health, why on earth would I want to do a thing like that? Hell, all you have to do is wait until that "queers and the straight guy" show are on TV, and they will all be gone for awhile. Hell, you complain about this weaselly ass NG. They are starting to put shows about queers on nationwide TV. It won't be long until it's considered normal acceptable behavior to be a queer. I dunno about you, but that bothers me more than a few lounging around on this newsgroup in their pink crotchless fishnet pantyhose . Hell, just thinking about that, is good for a quick laugh. I don't give a damn what anyone says, I think any man that wants to physically invade the poopshoot of another man is a sick individual and in need of help. But I'm a redneck. That makes it acceptable for me to think this way. No one will ever accuse me of being politically correct. Most people that are P.C. are half queer anyway...:/ MK

A DDS chip like the Analog Devices AD9850 will give you something close to
that. It won't quite go down to 0 MHz, though. You could just switch it off,
of course.

If you read my original post again or at least the topic, it says 0-12 (not 0, 12) MHz. And that would mean something in the range between 0 and 12. I don't remember when and WHERE i said that i need 0 MHz oscilator. The only one who talks about 0 MHz osc is you.

Big thanks to all other people who gave me good starting points. I was thinking about some CMOS devices, but most of them are square output. This MAX038 baby looks like a dream come true!

I also need to say big thanks to Old DXer. That is exacly what i was looking for !!! A finished project. If anyone knows similar links with finished oscillator projects of this freq. range, you can simply add it in a follow up to this message.

Thank you all again!!

And of course, even if such a full range oscillator was not intended
by the original poster, I'd say there often is a big difference between
oscillators in the KHz range and those in the MHz range. Obviously,
the concept of an oscillator doesn't change, but the specific design
does.

You can use resistors and capacitors to set the frequency down near
the audio range, and do your best to avoid coils down there due
to their size, while once you get into radio frequencies, one tends to
use coils for the frequency control element.

Time after time, I see people asking questions about oscillators,
and often they are coming to radio frequencies from an audio background.
So they think in terms of just scaling some favorite audio oscillator
up to radio frequencies, when a simpler solution would be to use an LC
oscillator.

Somewhere in this thread, the 8038's more recent spawn was mentioned.
Obviously, it will work over that full range, but I'm suspicious about
how good it will be at radio frequencies, as I would about any RC
oscillator. It seems a stretch to expect it to work as well at 12MHz
as at 10KHz.

I agree. But on the other hand if you controll this 8038 with another PLL synthesizer, i think the overall performance should be ok from 10 kHz to 12 MHz. I think that is the way how most of "pro stuff" works.

So what is so wrong with emulating Klintoon?

If Bush lies, all he has to say is:
"I don't recall."
"I don't remember."

Klintoon family famous quotes!

515. Announcing the 5th IARU Region 3 ARDF Championships for 2003

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-18 15:46:31 UTC
From: Mark Harrison <vk3byy@nerg.asn.au>
Message-ID: <3f181658$1@news.alphalink.com.au>

Cross-posted to: aus.radio.amateur.misc,rec.radio.amateur,rec.radio.amateur.misc

Here is an update on the 5th IARU Region 3 ARDF Championships.

For the uninitiated, ARDF is an Amateur Radio Direction Finding contest and is similar in many
ways to Orienteering - except that the control points are not marked on the map - they must be found using portable radio direction finding equipment. Everything else is the same - map reading and compasses are essential, as is the means of strategy of getting to the controls as quickly as possible. Even though it started as an amateur radio activity, you don't need to be an amateur to participate as you won't be transmitting. ARDF is active in many countries around the world.
For more on ARDF, see the web site: http://www.ardf.org.au

The IARU Region 3 (International Amateur Radio Union - Asia-Pacific region) is
holding it's Amateur Radio Direction Finding Championships this year in Australia around the city of Ballarat, a large provincial city in the state of
Victoria.

The event runs from Friday 28 November 2003 to Wednesday 3 December 2003.

The Victorian ARDF Group, which is organising the event, is expecting up to 100 participants from member societies in IARU Region 3 including Japan, Korea, China, New Zealand, and Australia.
Guest competitors from other IARU Regions are also invited to attend in the world-wide Friendship categories.
The championships are hosted by the Wireless Institute of Australia (WIA), with the WIA Victorian Division sponsoring this important event.

Full details of the event including competitor and volunteer registrations can be found at:
http://www.ardf.org.au

Please register early as alternative accommodation will be limited due to another large national sporting event held at this time.

The proposed program in 2003 is:
Friday 28th November: Arrival Day
Saturday 29th November: Equipment Check & Opening Ceremony
Sunday 30th November: 2m ARDF Competition
Monday 1st December: Tour Day
Tuesday 2nd December: 80m ARDF Competition &
Award Presentations & Closing Banquet
Wednesday 3rd December: Departure Day

Ballarat is a historic gold mining town in North Western Victoria, but is only about 1.5 hours travelling time from Melbourne Airport.
Transport will be provided from Melbourne Airport to the Mt. Helen Victoria University Campus which is the event centre and accommodation.

A special event amateur radio station will be available for use by our visitors.

Competitors may enter the official Region 3 competition or the world-wide Friendship categories.
Team results will only apply for Region 3 competitors.

A and B teams (2 teams of up to 3) will be allowed in any age/sex category (over and above this further Region 3 competitors may be allowed in the friendship only category if there are vacancies).

Possibly; however, Reagan had an excuse.

His brain wore out in his later years. The
Klintoons started the wave of "selective
memory" for reasons of convenience and
non-accountability.

Very handy, too. Nyuk, nyuk, nyuk. :-0

Zero MHz is real easy, just throw a capacitor, transistor,
resistor, tube, or any other electronic component on the bench.
There, an oscillator that oscillators at zero MHz.

Hmmm...

522. AM or FM?

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-18 19:10:28 UTC
From: a1eah71@aol.com
Message-ID: <20030718151028.03043.00000216@mb-m01.aol.com>
Source record: 65141

I have a written report on a spectral analysis of a radio reception. Does this report contain sufficient information to decide whether they used a AM or FM receiver?

They reported:

"On Channel-I spectra, several narrow-band high-energy tones are intermittently present for short durations. . . . Also at the end of each tone there is evident a sharp drop in total Channel-I energy. This indicates some kind of AGC (Automatic Gain Control) action."

"These narrow-band tones are called heterodynes. They were generated when another transmitter came on the radio channel, while the transmitter with the stuck-open mike was transmitting. The difference in their carrier frequencies resulted in the heterodynes. If the second carrier is strong it should also activate the AGC action in the IF (Intermediate Frequency) stage of the radio receiver. . . ."

"Most radio receivers have an AGC circuit at IF stage to maintain a steady IF signal level at the detector or discriminator. If there is a sudden increase in the RF signal (such as caused by switching on a strong carrier). AGC acts rapidly to reduce the IF amplifier gain to bring down the signal within acceptable limits. On the other hand if there is sudden decrease (such as caused by switching off a strong carrier) in the RF signal level, AGC acts more slowly to restore the IF amplifier gain. This is a typical characteristics [sic] of an AGC circuit: fast attenuation and slow recovery. The AGC action also affects the audio output level because of the drop in overall gain of the system. Therefore, when a heterodyne begins, we should expect a sudden drop in the recorded level of the signal picked up by the stuck-open mike. And after the heterodyne ends, we should expect a slow recovery in the audio signal to its original level. This phenomenon is indeed observed in Channel-I spectra."

CNN lies.

July 17, 2003 --

Open up almost any American or European publication these days, and you'll
be bombarded with grim news about "horrific" conditions in Iraq - and
America's "poor handling" of the post-war reconstruction effort. All of
which, it is claimed, is made all the more tragic - because President Bush
and British Prime Minister Tony Blair maliciously exaggerated the threat
from Iraq. They may have won the war, but they're losing they peace.

Author and Middle East expert Amir Taheri spent several days on the ground
in Iraq last week and found reality to be starkly different from what is so
ubiquitously reported.

Here is a first-hand account of an Iraq that is rapidly moving forward in
nearly every aspect of life - political, economic and cultural. And a people
that, while understandably skeptical after decades of tyranny, is
nonetheless hopeful - and grateful for their liberation.

- THE EDITORS

BAGHDAD, IRAQ

'THE Iraqi Intifada!" This is the cover story offered by Al- Watan Al-Arabi,
a pro- Saddam Hussein weekly published in Paris. It finds an echo in the
latest issue of America's Time magazine, which paints a bleak prospect for
the newly liberated country. The daily Al Quds, another pro-Saddam paper,
quotes from The Washington Post in support of its claim that "a popular war
of resistance" is growing in Iraq. Some newspapers in the United States,
Britain and "old Europe" go further by claiming that Iraq has become a
"quagmire" or "another Vietnam." The Parisian daily Le Monde prefers the
term "engrenage," which is both more chic and French.

This chorus wants us to believe that most Iraqis regret the ancien regime,
and are ready to kill and die to expel their liberators.

Sorry, guys, this is not the case.

Neither the wishful thinking of part of the Arab media, long in the pay of
Saddam, nor the visceral dislike of part of the Western media for George W.

Bush and Tony Blair changes the facts on the ground in Iraq.

ONE fact is that a visitor to Iraq these days never finds anyone who wants Saddam back.

...

"We see our liberation as the start of a friendship with the U.S. and the U.K. that should last a thousand years," says Khalid Kishtaini, one of Iraq's leading novelists. "The U.S. and the U.K. showed that a friend in need is a friend indeed. Nothing can change that."

Even the radical Shiite cleric Muqtada Sadr now says that "some good" could come out of the coalition's presence in Iraq. "The coalition must help us stabilize the situation," he says. "The healing period that we need would not be possible if we are suddenly left alone."

...

Yet another fact is that all 67 of Iraq's cities and 85 percent of the smaller towns now have fully functioning municipalities. Several ministries, including that of health and education, have also managed to get parts of their operations going again. The petroleum industry, too, is being revived with plans to produce up to 2.8 million barrels of crude oil a day before the year is out.

...

The flower stalls along the Tigris are also making a comeback.

"Business is good," says Hashem Yassin, one florist. "In the past, we sold a lot of flowers for funerals and placement on tombs. Now we sell for weddings, birthday parties and gifts of friendship."

The free-market economy is making its first inroads into Iraq's socialistic system in a number of small ways. Hundreds of hawkers are offering a variety of imported goods and making brisk business by selling soft drinks, often bottled in Iran, and biscuits and chewing gums from Turkey.

Some teahouses, in competition to attract clients, offer satellite television as an additional attraction. Every evening people pack the teahouses to watch, and zap and discuss, what they have seen in an atmosphere of freedom unknown under Saddam. It may be hard for Westerners to understand the Iraqis' exhilaration at being able to watch television of their choice.

But this is a country where, under Saddam, people could be condemned as spies and hanged for owning a satellite dish.

Scheer Deception: The Lies and Jargon of Robert Scheer
By Ben Fritz (ben@spinsanity.org)
October 8, 2001

Many pundits sling jargon or make blithely irrational arguments. Some, however, seem to specialize in twisting the facts to fit their ideology, continually making assertions that are at best unsupported and at worst blatantly false until they--and presumably their readers--come to accept these false tropes as truth. Robert Scheer, a nationally syndicated columnist for the Los Angeles Times, has established himself as the leader of this breed, with some of his worst spin coming since the September 11 attack. Sadly, this is only the latest iteration of a trend that can be seen in Scheer's columns throughout the year.

A brief history

Scheer has had an interesting career in journalism. He started at the radical left publication Ramparts in the 60s, then become a national correspondent for the L.A. Times for 17 years. For the past eight, he has been a columnist whose work appears weekly in the Times and papers across the country. He also co-hosts a radio show on an affiliate of National Public Radio in Los Angeles and writes for publications like The Nation. Throughout his career, Scheer has been one of America's leading liberal pundits, reliably bashing Republicans and many conservative Democrats.

Dissemble, spin, repeat

An overview of Scheer's writing reveals that one of his favorite tactics is to create a politically potent trope and repeat it over and over until it seems true. When faced with criticism, Scheer simply dismisses his critics without addressing their arguments and continues to repeat his idea, as if the more he says it, the truer it becomes.

An excellent example of this tactic can be found in what my co-editor Brendan Nyhan has labeled the "Taliban aid trope." Scheer created this trope in May, when he attacked a "gift of $43 million to the Taliban rulers of

Afghanistan," saying it "makes the U.S. the main sponsor of the Taliban and rewards that 'rogue regime' for declaring that opium growing is against the will of God."

Drawing on work by Bryan Carnell of Leftwatch, Brendan pointed out that the $43 million was not aid to the Taliban government. Instead, the money was a gift of wheat, food commodities, and food security programs distributed to the Afghan people by agencies of the United Nations and non-governmental organizations (NGOs). Secretary of State Colin Powell specifically stated, in fact, that the aid "bypasses the Taliban, who have done little to alleviate the suffering of the Afghan people, and indeed have done much to exacerbate it."

Since the US began focusing on the Taliban for harboring Osama Bin Laden, whose Al-Qaeda network is the primary suspect in the September 11 attacks, Scheer has repeated this false assertion about U.S. aid to Afghanistan, and in fact twisted it even further. In a September 17 column, he says that the aid was a tacit endorsement of Bin Laden:

This is typical of the mixed signals we've been sending. Call it what you will, even humanitarian aid, and funnel it through the United Nations, but the effect is the same: to send to the Taliban a signal that its support of Bin Laden has been somehow acceptable.

Note how Scheer takes note of his critics' points by prefacing them with "Call it what you will," as if these points were arbitrary labels and not facts. They are facts, however, and Scheer is simply trying to avoid them.

Scheer wasn't done spreading this trope, or with his irrational dismissal of critics, however. Two weeks later, on October 1, he spun humanitarian aid for the Afghan people as some sort of a fairy tale:

Believe that [the Taliban convinced farmers to stop growing opium through religious appeals rather than by force], and you can believe that the $43 million in aid that Secretary of State Colin Powell announced that same week--to help the Afghans, "including those farmers who have felt the impact of the ban on poppy cultivation, a decision by the Taliban that we welcome"--was simply humanitarian aid and not really a reward to the Taliban for helping the U.S. in its drug war.

Again, Scheer does not explain to readers how humanitarian aid funneled through the U.N and NGOs can be considered a gift to a government that never receives funds or controls any food aid. Notice also how he selectively quotes Powell, avoiding the statement mentioned earlier in which Powell explicitly notes that the aid will bypass the Taliban. Even more disturbing, however, is a fact brought to our attention by Dan Kennedy of the Boston Phoenix in an email: Powell's statement was made in response to a question about future aid and had nothing to do with the $43 million aid already provided. Once again, Scheer is twisting the truth to fit his argument.

Although Scheer's use of the Taliban aid trope has been the most disturbing this year, it is not the only falsity he has repeated. In another instance, Scheer has twice tried to frame the current economic slump as a recession

caused by President Bush and Congressional Republicans. This started in July, when Scheer argued that Al Gore should criticize the Bush Administration and Republicans for economic policy:

The job market was never better than under Bill Clinton and it's not too much to expect Gore to hold the Republicans, who have controlled both houses of Congress and the White House, responsible for the loss of 300,000 jobs in the last three months alone.

The truth that Scheer is avoiding here, however, is that the current downturn began while Bill Clinton was still President. Furthermore, in the three months prior to July, Bush's economic policy had barely begun to take effect. There is no logical reason to hold the economic policy of Bush and Republicans in Congress responsible for a downturn that began before Bush's inauguration.

Earlier in that column, Scheer also dissembles when he refers to a "recession" that at the time had not been established (although it is now quite likely that we are in one). Blaming Bush for the weak economy, regardless of the facts, is a favorite tactic of Scheer's, however. He did so again just a month later, as my co-editor Brendan Nyhan pointed out, when he succinctly referred to "a recession [Bush] helped create." At this point, however, there was still no evidence that the U.S. was in a recession, nor was there evidence that the slow economy was caused by President Bush.

Such facts seem to matter little to Scheer as he creates his false tropes. The truth is merely an obstacle to be illogically dismissed.

Labels and frames

Another favored tactic of Scheer's, and one that can be seen in his false tropes as well, is to bash President Bush and other Republicans whenever possible. There is nothing wrong, of course, with criticizing political opponents. What is troublesome, however, is that Scheer often does so not with reasoned criticism, but irrational broadsides and unsupported allegations.

When it comes to President Bush, Scheer seems to have two insights that he repeats endlessly: the President is rich and he is dumb. From global warming to economic policy, Scheer seems to always find a way to return to these two points.

During a discussion of the importance of Social Security and Medicare, for instance, Scheer sees fit to state that many benefit from these programs, "[u]nless your family happens to be super rich like the president's." In a column on global warming, Scheer again takes an unnecessary swipe at the Bush family's wealth, making ridiculous generalizations about young people in the process:

Here's a guy born with credit cards in his cradle, enough to take him anywhere in the world, first class, who nevertheless pointedly refused to go. Even kids without any money manage to scrape up a few bucks and go see the world, but not young George, who satiated his curiosity about foreign

lands with a few beer busts down in Mexico.

Scheer's ostensible point here is that Bush "never seemed to think that there was a world out there worth visiting, let alone saving," as if a vacation in Europe would necessarily make him more competent in foreign policy. Notice also the irrelevant assertion that Bush went on "beer busts down in Mexico," which is, again, hardly relevant to his current foreign policy. Also notable here is Scheer revealing his own class bias, as he absurdly asserts that even the poorest of young people manage to travel around the world.

The broadsides don't stop there, though. Another one of Scheer's insights into Bush's foreign policy is that it "can more charitably be viewed as the confused performance of a struggling C student." In the same column, Scheer's conclusion about the Bush's administration's rejection of many foreign treaties is, again, that the President is dumb: "[I]t is therefore unfair for critics to hold his proposals to too high a standard of logic and sophistication," he writes. "After all, this is George W. Bush we're talking about."

Scheer also plays on a common and again unsupported liberal trope: that Bush is merely a front man and Vice-President Cheney is running the country. "It's a sad measure of the president's need for adult supervision," Scheer wrote in July, "that Cheney has become the first vice president in modern U.S. history to seize control of the White House and render the president himself a public relations front man sent around the country to do photo ops." Once again, Scheer presents no evidence to support his attack, simply asserting that "[e]veryone knows that Cheney, not Bush, runs the show."

To be fair, however, Scheer doesn't exclusively pick on President Bush. Vice President Cheney himself came under attack in a column on environmental policy that labels him "an oil-guzzling, intellectually irresponsible, anti-environmental oaf."

Best of breed

At a time when all too many pundits engage in their share of lies, spin, and jargon, Robert Scheer stands out in a class by himself. In column after column, his favored tactics have been irrational criticism, distortion, and spin. At his worst, Scheer's false tropes spread and become part of the commonly accepted discourse. Since September 11, for instance, as Dan Kennedy noted in the Boston Phoenix, the Taliban aid trope has been repeated in The Nation, The New Yorker, The Denver Post and Salon. For those concerned about the rise of irrational discourse in American politics, Robert Scheer stands out as one of the worst offenders.

Drudging Up Personal Details
http://www.washingtonpost.com/ac2/wp-dyn/A8158-2003Jul17?language=printer

By Lloyd Grove

Friday, July 18, 2003; Page C03

Some folks in the White House were apparently hopping mad when ABC News correspondent Jeffrey Kofman did a story on Tuesday's "World News Tonight" about the plummeting morale of U.S. soldiers stationed in Iraq.

So angry, in fact, that the next day, a White House operative alerted cyber-gossip Matt Drudge to the fact that Kofman is not only openly gay, he's Canadian.

Yesterday Drudge told us he was unaware of the ABC story until "someone from the White House communications shop tipped me to it" along with a profile of Kofman in the gay-oriented magazine the Advocate. On Wednesday, for 6 hours 38 minutes, the Drudge Report bannered Kofman's widely quoted ABC story -- in which enlisted people questioned the Army's credibility and one irked soldier went on camera to call on Defense Secretary Donald Rumsfeld to resign -- and linked to the Advocate piece with the understated headline "ABC NEWS REPORTER WHO FILED TROOP COMPLAINT STORY IS CANADIAN."

White House Press Secretary Scott McClellan "is having a rough first week," Drudge said. "The White House press office is under new management and has become slightly more aggressive about contacting reporters. This story has certainly become talk radio fodder about the cultural wars-slash-liberal bias in the media."

A network insider was less sanguine about the White House tactic: "Playing hardball is one thing. But appealing to homophobia and jingoism is simply ugly."

Kofman said from Baghdad, where he is covering the 3rd Infantry Division: "This morning I had a meeting with one of the commanding officers and we talked about my report and the response back home. He said he'd read about it on the Drudge Report and had just one question. 'Is it true that you're Canadian?' I just smiled and said, 'My life is an open book.' "

ABC News spokesman Jeffrey Schneider told us: "Sadly, when people feel wounded by a truthful report, they attempt to attack the messenger." A White House spokesman, meanwhile, disavowed the incident: "This is the first

we've
heard of it, and it would be totally inappropriate if true."

Cannibalism on the Right
. The most dangerous place in Washington, it seems, is between Rep. Joseph Pitts (R-Pa.), chairman of the conservative Values Action Team, and the Rev.
Lou Sheldon and his daughter Andrea Lafferty of the Traditional Values Coalition.

Pitts, on defense for the team. File Photo
Judging by the letter Pitts sent Sheldon and Lafferty yesterday, he'd just as soon strangle them as write to them.

"Dear Lou and Andrea," Pitts began his scorching missive, in which he kicked
their group of the Values Action Team. "As you are now well aware, your recent conduct has infuriated the pro-life community in Washington."

Sheldon and Lafferty's staunchly antiabortion group recently sent out direct-mail pieces attacking 25 Republican House members for allegedly letting the abortion drug RU486 into the United States by supporting the importation of cheap pharmaceuticals from Canada. "Your willingness to attack Members of Congress whom you should regard as friends without so much
a warning is offensive," Pitts raged. "The spurious nature of the claims . .
. shows a lack of regard for the truth. Your unwillingness to return calls or accept an invitation to discuss this matter betrays a lack of forthrightness or good will."

Sheldon and Lafferty didn't return our phone call, either.

THIS JUST IN...
. Looks like possible California gubernatorial candidate Arnold Schwarzenegger has already won the crucial Jean-Claude Van Damme Primary. "Arnold is a cool guy," the fading action star told reporters at the Ischia Film & Music Global Fest near Naples, Italy, yesterday. "He works out in the
gym every day. He is very smart and intelligent. He's a pal of mine. I love him. I will vote for him. He's responsible, and that's important in politics." All the Belgian-born Van Damme has to do now is become an American citizen.

. Looking at George W. Bush's White House, we can hardly believe there was a
time when presidents enjoyed good relations with the news media. Yesterday at the National Press Club, Jerry Ford reminded folks that there was indeed such a time. The 90-year-old ex-president, joined by his 85-year-old wife, Betty, handed out the Gerald R. Ford Prizes -- for distinguished reporting on the presidency to our Post colleagues Bob Woodward and Dan Balz, and for national defense reporting to the Wall Street Journal's Greg Jaffe. "In

four
decades as a reporter, Gerald Ford was the nicest, most decent person I
ever
covered," CBS News veteran Bob Schieffer told the lunchtime crowd. "Mr.
President, we love you."

. Guess we shoulda czeched, huh? We were the target of a barrage of
e-mails,
and a few phone calls, concerning yesterday's report on Laura Bush lunching
with Craig Stapleton, whom we identified as "U.S. ambassador to
Czechoslovakia." A typical message: "Craig Stapleton is the ambassador to
the CZECH REPUBLIC, not Czechoslovakia, which as we all know, split into
TWO
republics, the Czech Republic and Slovakia, about a decade ago. Moron."

With Anne Schroeder

Revisionist Iraq history from White House

Palm Beach Post Editorial
Thursday, July 17, 2003

It wasn't only 16 words in the State of the Union address. Iraq's nuclear threat sounded whenever President Bush, his spokesman Ari Fleischer, Defense
Secretary Donald Rumsfeld or national security adviser Condoleezza Rice beat
the war drum.

"We don't want the smoking gun to be a mushroom cloud," for example. Ms. Rice said that on CNN's Late Edition Sept. 8. In Mr. Bush's Oct. 7 Cincinnati speech -- the one from which he removed a reference to nuclear material from Niger, according to CIA Director George Tenet -- the president
said, "The evidence indicates that Iraq is reconstituting its nuclear weapons program." The only top official who didn't pound on nukes was Secretary of State Colin Powell, who omitted any reference from his Feb. 5 United Nations presentation.

In fact, nuclear weapons were critical to the administration's case for war.
Chemical and biological weapons of mass destruction are scary but amorphous.
Every country has the ingredients. The trick is to prepare them for battlefield use -- to "weaponize" them, then devise a way to deliver them. Iraq used chemical weapons against Iran during the 1980s, but they have a short shelf life. There's no point in stockpiling them until war is imminent. By contrast, nuclear weapons can't be made in a typical laboratory
and need a long lead time. Iraq was working toward nuclear capacity when Israel attacked its Osirak reactor in 1981.

The clear and present danger that would have justified preemptive war last spring, if there was one, would have been Saddam Hussein on the verge of having nuclear weapons. Was he? British Prime Minister Tony Blair said he could be in "45 minutes." But that comment is now inoperative.

Two specifics backed up the nuclear claims. One was the alleged purchase of fissionable material from Niger, which Vice President Dick Cheney's office went to great lengths to nail down as bogus and based on forged documents.

The other involved aluminum tubes that the Energy Department and International Atomic Energy Agency say aren't usable for making nuclear weapons. Britain is sticking by its claim to intelligence about African materials purchases, but all its specificity is gone.

Where are we now? A White House spokesman called the reference to uranium from Africa in the State of the Union a "mistake." Ms. Rice says the CIA cleared it. Mr. Tenet says he "concurred" with it and shouldn't have, but he
has to say that to keep his job; in fact, the CIA doubted the Brits' claim. House Majority Leader Tom DeLay, R-Texas, downgraded the "mistake" to a "little flaw."

President Bush says he has confidence in everybody. No one, though, has explained what possessed him to assert something that Mr. Tenet and the vice
president's office knew was dubious.

In new talking points, the White House notes that the reference was "only" 16 words in a long speech and was attributed to someone else (Britain). Iraq
needed attacking, the story goes now, because Hussein was a nasty tyrant who
disturbed the peace. But the world is full of tyrants, one only 90 miles from our shores. All have potential chemical and biological weapons; some have oil fields as well.

No matter what they say now, administration officials sold Congress and the public on the proposition that Hussein was frighteningly close to having nuclear weapons that would threaten the Middle East and the United States. The question was, "Why war now?" and the answer was, "Nukes any minute." Americans died for that proposition and still are dying. It's no "little flaw."

Throughout that entire long winded message, you ignored the key issue in this situation - did America have a legitimate cause to invade Iraq. How bad Saddam was, or how much Americans disliked him, or how unpopular he was with some in his own country, does not provide that legitimacy. We invaded because we claimed Iraq (the whole country - not just Saddam) was an immediate threat to this country because of WMD. We killed many thousands of Iraqi (not just Saddam) because of that claim. It now appears that threat was somewhat overstated and may turn out to be entirely false. If that is true, this country ignored our own laws (treaties with other nations) and violated international law. Americans must then ask themselves if they intend to follow Bush, and the people behind his administration, as they lead this country into lawlessness. This is not a Republican versus Democratic choice - it is a choice between right and wrong.

Feed the square output to a coil+capacitor in parallel and you'll get
a sine wave. Tune the this 'tank' circuit for harmonics of the
funamental and you can double, triple, quadruple and so on the
original square wave's frequency.

547. Bush Lies about Iraq are only the Symptoms, Not the Disease

Bush Lies About Iraq Are Only The Symptom, Not The Disease
by Ira Chernus

Sometimes it is a pleasure for a columnist to say "Maybe I was wrong." A few
weeks ago, I wrote that most Americans don't care whether the Bush administration lied to take us to war in Iraq. In this postmodern world, I said, hardly anyone asks whether words match the factual reality. It's all just a kaleidoscope of media images, anyway. So evidence that our leaders lied is shrugged off.

Well, maybe I was wrong. The flap over the falsified intelligence reports on
Iraq grows bigger every day. Now centrist pundits, like the Washington Post's venerable David Broder, warn that it could open the door to a Bush defeat in 2004.

Of course, Broder adds, Bush's re-election chances depend above all on what happens to the economy in the next 15 months. If we are still in the doldrums a year from October, the Democratic candidate will have one simple message: "It's the tax cut, stupid." Bush's tax giveaway busted the federal budget, lined the pockets of the rich, and did nothing for the rest of us.

Maybe the people will wake up from their postmodern slumber and begin to care about sifting truth from falsehood, in economic and foreign policy. But
let's not ignore the effects of postmodernism too quickly. The mainstream press wants us to focus on one very specific lie: Iraq never tried to buy uranium from Niger. It's a typical postmodern soundbite. No big picture, no historical context, no larger implications.

This kind of thing can bring a president down. Richard Nixon did not resign because he was caught undermining fundamental principles of American democracy. He resigned only because he was caught lying about paying hush money to a few low-level operatives.

Do we want to defeat George W. because of one specific lie about Iraq, Niger, and uranium? Or because he lied about what the CIA told him about that specific issue? Maybe so. Maybe the end - ousting Bush - is so important that the means hardly matter. We could probably build an anti-Bush
campaign on a series of very specific grievances, like the Iraq / Niger issue and the ongoing deaths of U.S. soldiers in Iraq, and have some chance

of success.

But then we simply pave the way for a postmodern Democratic president who will manipulate media images as shamelessly as any Republican. We also endorse the same principle that Bush invokes to cover up his lies: the end justifies the means.

The Bushies invoke this principle on two levels. They tell the public that we are purely good and Saddam was utterly evil, so anything that helped to oust him was good-even a few little falsifications of fact. This is a powerful argument for most Americans. We ignore it at our peril. We have to be able to respond to it thoughtfully and persuasively.

Of course, the policy elite merely smile at such moralistic simplicities. They know that the real goal of U.S. policy is not to purify the world morally. It is the same goal U.S. leaders have been pursuing for decades: a unified global economic system, based on what they call "free market" principles. If lies and moral platitudes as well as bombs are needed to do the job, they say, so be it. The end justifies the means.

If we want to avoid that trap, we must resist not simply Bush, or the Republicans, but the whole postmodern impulse to substitute image for reality. Catchy soundbite images have their place. They can get people's attention. If the current flap about a single Bush lie opens a chink in his armor, it will also open some mainstream minds to an alternative message. It
is an opportunity we cannot afford to miss.

But Bush's lies are only a symptom. We need to focus on the underlying disease. We must patiently explain the larger context and the principles on which our opposition to the Bush administration rests. We need an analysis that is clear, sophisticated, and true to reality. As the great poet says, we must know our song well before we start singing, cause it's a hard rain gonna fall.

Right now, we should be busy explaining why Bush's lies are merely a symptom. If you want to see the whole disease, look at the links between our
economic woes and Bush's Iraq lies. Lies had to be told because Saddam had to go-not because he was a ruthless dictator, but because he was a successful model of resisting economic globalization. Now U.S. corporate interests are streaming into Iraq, buying up Iraqi assets at bargain-basement prices and elbowing out the Iraqi competition. The same tycoons who will reap the benefits of Bush's tax cut are also reaping the benefits of his war and the intimidation it was intended to spread around the world.

Ultimately, the links between the economy and foreign policy must be understood at a very abstract level. The globalization that U.S. leaders have pursued for decades is based on false principles. First, that society is collection of isolated, competitive individuals-a war of all against all.

Second, that letting this war rage unchecked, in an unregulated, "winner-take-all," global market economy, creates a rising tide that raises everyone's boat. Third, that this same economy gives every poor person's children a chance to become fabulously wealthy. As long as people believe these principles, they will accept tax cuts for the rich at home, wars against the poor abroad, and the lies that are told to justify it all.

It's not enough to criticize. We must offer an alternative. We must explain over and over, in every possible way, that all of humanity is a single interwoven family. We all depend on each other. If you want to raise everyone's economic boat, watch the smallest, weakest, leakiest boat. When we cooperate to help the very neediest, and measure our own well-being by the well-being of the very neediest, that's when we all benefit the most. The U.S. cannot begin to lay claim to any pure goodness until our policies are based on these humane principles.

You need not be a Marxist to acknowledge what Marx proved: ordinary people can understand all this. Don't underestimate their intelligence. Give them a
sophisticated, compelling analysis of the system that governs their lives, and they will take the time to study and understand it. They will begin to doubt the goodness of the system and the people who rule it. Give them an alternative that works better for them, explain it clearly, and eventually they will understand and embrace it. If we don't go beyond symptoms and postmodern soundbites - if we don't trust the intelligence of the people - we will never get to real democracy.

Something to Hide?

By David Ignatius

Friday, July 18, 2003; Page A19

As political crises mount in Washington and London over evidence about Iraq's weapons of mass destruction, it would be especially useful to have the testimony of a leading expert on the subject, Saddam Hussein's science adviser, Amir Saadi.

Saadi (the seven of diamonds in the coalition's deck of cards) surrendered voluntarily to U.S. authorities in Baghdad on April 12. He was the first senior Iraqi official to do so. Because he had never been a member of the Baath Party, U.S. officials were hopeful that he would provide honest information.

TV addicts will remember Saadi as the articulate, cleanshaven English speaker who tried (never entirely convincingly, to this viewer) to explain Iraq's dealings with U.N. weapons inspectors. He was educated in Britain and
Germany and married a foreigner, who was never allowed to live with him in Baghdad. Although he served as minister of petroleum and industries at various points, he was never particularly close to Hussein.

"He wanted to make himself available to the coalition forces for questioning
and cooperation," said Saadi's German-born wife, Helma, in an e-mail message
this week. One of Saadi's American supporters agrees: "He has everything to gain by being honest, and absolutely nothing to gain from continued deception."

So where has Saadi been for the past three months? His family believes he has been imprisoned at the Baghdad airport along with other Iraqi captives. His wife said that she has been communicating through the Red Cross and that
in his last communication, on June 15, he told her he was "being treated correctly," was "allowed to shower once a week" and was passing the time reading and writing.

Saadi's friends say there has been quiet discussion about his case with the Coalition Provisional Authority headed by L. Paul Bremer. Believing that Saadi is "clean," some officials of the authority have recommended three

times to higher officials at the Pentagon that he be released, according to Saadi's friends. Each of these requests has been rejected, they say.

But why muzzle Saadi? At a time when there are political firestorms in America and Britain over Iraq's WMD program, why not let one of Iraq's leading scientists answer questions? For example: When (if ever) were banned
weapons destroyed? If they were destroyed, why didn't Iraq make a full disclosure, as demanded by the United Nations? Was Hussein afraid that if he
admitted he had destroyed his WMD stockpile, he would lose a deterrent against attack by Kurdish and Shiite enemies of his regime? These are precisely the questions Saadi could help clarify.

Saadi's silence, I suspect, is evidence that the Pentagon and the White House have concluded that any public release of his testimony would undercut
their position. After all, this White House is so desperate to protect President Bush on WMD issues that it is prepared to sacrifice CIA Director George Tenet. If Saadi's testimony could help the president, surely we would
have heard it by now.

I have the same question about another man who voluntarily surrendered to the coalition, Iraqi Deputy Prime Minister Tariq Aziz. He turned himself in April 24 after several days of negotiation involving an Iraqi American intermediary in the United States.

Aziz in his later years was not an intimate of Hussein -- that's why he was only the eight of spades in the coalition's deck. But he knows things that would be relevant to the British and American publics. Like Saadi, he has little incentive at this point to lie. His family even wants him to publish his memoirs.

I spoke with his son, Ziad Aziz, yesterday from Amman. He said his only official contact from his father was a June 14 letter via the Red Cross saying he was in good health. The younger Aziz recalled that when he said goodbye in Baghdad, his father seemed ready to cooperate fully. He, too, might be able to tell the world important information, were he free to do so.

What's bothersome about these cases is that they reinforce the impression that the Bush administration has something to hide. Why not disclose the testimony of people the coalition worked so hard to catch? The only convincing explanation, argues a former CIA official, is that their accounts
would "directly refute the Bush administration's insistence that WMD still exist somewhere -- an assertion that we all know is growing more questionable every day."

The solid rationale for this war was liberating Iraq from Hussein's brutal regime, rather than the shakier WMD evidence. How bizarre that Bush and

British Prime Minister Tony Blair decided to play a weak hand and that they now keep doubling their bets as its weakness becomes more apparent.

http://abcnews.go.com/sections/world/US/uranium030714_timeline.html

Evolving Untruths
A Timeline: How Did False Evidence Make It to the President?

Major combat in Iraq is over, but some of the evidence President Bush used to justify the war is still being hotly contested.

In January 2003, the president used his State of the Union speech to argue for war on Iraq. He said: "The British government has learned that Saddam Hussein recently sought significant quantities of uranium from Africa."

Those allegations has turned out to be false, and now the president is facing one of his biggest political challenges since the war on terror began.

ABCNEWS has assembled a timeline to help readers understand how the false information made it into one of the president's most important speeches.

February 2002
The CIA dispatches Ambassador Joseph C. Wilson to Niger to investigate claim
of attempted uranium sale to Iraq, reportedly in response to questions from aides in Vice President Dick Cheney's office. Wilson spends eight days in Niger and concludes the allegations are "bogus and unrealistic." Wilson later says he reported this verbally to the CIA in a debriefing upon his return.

March 9, 2002
CIA reportedly sends cable that does not name Wilson but says Nigerien officials denied the allegations.

September 2002
The story that Iraq purchased uranium from Niger is published in a British dossier. The CIA "tried unsuccessfully . to persuade the British government to drop [the references]," according to a July 12, 2003, Washington Post report.

Late September 2002
CIA Director George Tenet and top aides make two presentations on Capitol Hill. They reportedly are asked about uranium purchase story. They say there
was info that Iraq had attempted to buy uranium but there were doubts about its credibility. Tenet did not tell lawmakers that an envoy had been sent to
Niger, according to a July 12, 2003, Washington Post report.

October 2002
The National Intelligence Estimate is produced. It says "a foreign government service reported that as of early 2001, Niger planned to send several tons of pure uranium (probably yellowcake) to Iraq," according to a July 11, 2003, statement from Tenet. It also states: "We do not know the status of this arrangement." Much later in the text, State Department researchers call the allegations "highly dubious."

October 2002
The CIA releases a White Paper document that omits the uranium allegations.

Oct. 7, 2002
The president gives a speech on Iraq in Cincinnati. He does not refer to the
uranium story at the urging of the CIA, according to a July 2003 Washington Post report.

Dec. 12, 2002
American intelligence agencies say Iraq's 12,000-page weapons declaration to
the United Nations doesn't account for chemical and biological agents that were missing at the end of the Gulf War.

Dec. 19, 2002
The State Department says in a fact sheet that Iraq omitted its attempts to purchase uranium from Niger in its report to United Nations on its weapons program.

Jan. 23, 2003
National Security Adviser Condoleezza Rice publishes a piece in New York Times, "Why We Know Iraq Is Lying," and says that the declaration of weapons
"fails to account for or explain Iraq's efforts to get uranium from abroad."

Jan. 23, 2003
At the Council on Foreign Relations, Deputy Defense Secretary Paul Wolfowitz
also faults the Iraqi report, saying "there is no mention of Iraqi efforts to procure uranium from abroad."

Jan. 28, 2003
The president gives his State of the Union address. He says: "The British government has learned that Saddam Hussein recently sought significant quantities of uranium from Africa."

Jan. 29, 2003
At Pentagon briefing, Defense Secretary Donald Rumsfeld says Saddam Hussein "recently was discovered seeking significant quantities of uranium from Africa."

Feb. 5, 2003
Secretary of State Colin Powell makes his presentation to the United Nations. He omits the uranium story. Three months later, he tells reporters

he did not repeat the allegation because "I didn't sense in going through it
all that I saw enough substantiation of it that would meet the tests that we
were applying."

March 7, 2003
International Atomic Energy Agency head Mohamed ElBaradei says "the reports of recent uranium transaction between Iraq and Niger are in fact not authentic" and "unfounded."

March 16, 2003
On NBC's Meet the Press, Vice President Cheney says: "I think Mr. ElBaradei,
frankly, is wrong."

March 20, 2003
President Bush announces the start of the military campaign against Iraq.

May 2, 2003
President Bush declares the end of major combat operations in Iraq.

May 30, 2003
In response to growing criticism of U.S. pre-war intelligence, CIA Director George Tenet releases a statement defending the agency's findings. He writes, "The integrity of our process was maintained throughout and any suggestion to the contrary is simply wrong."

June 8, 2003
On ABCNEWS' This Week, Rice says that at the time the State of the Union address was being prepared, "there were also other sources that said that . the Iraqis were seeking yellowcake, uranium oxide from Africa. And that was taken out of a British report. Clearly, that particular report, we learned subsequently, subsequently, was not credible."

June 12, 2003
The Washington Post quotes a White House spokesman acknowledging documents "detailing a transaction between Iraq and Niger were forged." However, the spokesman says they were "only one piece of evidence in a larger body of evidence suggesting Iraq attempted to purchase uranium from Africa."

July 6, 2003
Ambassador Wilson publishes an op-ed in the New York Times, for the first time identifying himself as the Niger envoy. Wilson writes: "Based on my experience with the administration in the months leading up to the war, I have little choice but to conclude that some of the intelligence related to Iraq's nuclear weapons program was twisted to exaggerate the Iraqi threat."

July 9, 2003
White House press secretary Ari Fleischer tells reporters, "With the advantage of hindsight, it's known now what was not known by the White House
prior to the speech. This information should not have risen to the level of

a presidential speech."

July 9, 2003
In testimony before Senate Armed Services Committee, Rumsfeld says it was only "within recent days" that he learned that reports about uranium coming out of Africa were bogus.

July 11, 2003
The president says, "I gave a speech to the nation that was cleared by the intelligence services."

July 11, 2003
Rice tells reporters the CIA cleared the State of the Union speech "in its entirety."

July 11, 2003
Tenet releases a statement saying the CIA approved of the State of the Union
speech before it was delivered. Tenet says, "These 16 words should never have been included in the text written for the president."

Thank you Paul! This is a good hint. Can you tell me in which book did you learn it? I would really like to get into this stuff.

Amateur Radio Newsline™ Report 1353 – July 18, 2003

Amateur Radio Newsline report number 1353 with a release date of Friday, July 18th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

WRC 2003 says no more Morse but it may be years before codefree operation comes to the USA. Find out why on Amateur Radio Newsline report number 1353 coming your way right now.

(Billboard Cart Here)

**

INTRODUCTION

G’day and welcome to the first Amateur Radio Newsline report ever recorded in Australia. I’m this weeks host Graham Kemp, VK4BB, at the Q News studios in the city of Brisbane. And our first story as you might expect has to do with WRC 2003.

**

WRC FALLOUT: S.25 AND A CODEFREE USA

The now concluded World Radiocommunications Conference may have rule that Morse Code is no longer a world standard for getting a high frequency ham license, but don’t expect it to disappear very quickly in the USA. That’s because there’s lots to be done by Congress and the FCC before any action can or will be taken. Our team coverage starts here:

--

I’m Bruce Tennant, K6PZW in Los Angeles.

The International Telecommunication Union has dropped the international requirement that amateurs operating below 30 MHz must first pass a Morse code exam. According to the CQ website, this was among several actions related to amateur radio taken by the World Radiocommunication Conference and reported by the International Amateur Radio Union. The change took effect on July 5.

According to the IARU, the new language of International Radio Regulation Article 25.5 now reads: "Administrations shall determine whether or not a person seeking a license to operate an amateur station shall demonstrate the ability to send and receive texts in Morse code signals."

This leaves the question of requiring a code test optional for each government licensing authority. According to an IARU explanation, several countries still

feel the code is important as a license requirement and wanted to be sure that any country dropping it did so via what it called a positive decision not to require Morse.

In the United States, FCC rules continue to require passage of a 5 word-per-minute code test for access to the amateur bands below 30 MHz, although it is widely expected that opponents of the code requirement will quickly file petitions with the FCC to drop it.

How long will it take? Amateur Radio Newsline's David Black, KB4KCH, has that part of the story from our South East bureau in Birmingham Alabama.

--

Nobody can be quite certain when or even if the Morse requirement will disappear in the United States, but here's the way it has to play out thanks to the way our government works.

Since the agreements reached at WRC '03 are essentially an international treaty, the document has to be ratified by the United States Senate. Depending on their workload, that could happen before years end or it could be put off into the 2004 session or even beyond.

Senate approval has to take place can the FCC begin the process under the Administrative Proceedures Act and issue a Notice of Inquiry. A Notice of Inquirey or N-O-I is the first step in the rule making process to make any change and gives the general public a chance to voice its opinion. And by public we mean every American. Not just ham radio operators.

If there is enough interest shown in going ahead then a Notice of Proposed Rule making will be issued that again invites public comment. This will be followed by another time period for reply comments by those who might have arguments to counter what some initial commenters have to say. Then matter goes to the staff to prepare a Report and Order or Memorandum, Order and Opinion that is circulated to the five Commissioners who run the agency. If they approve, then the change become law on a date specified in the document.

So once again the rhetoric question of how long? Here's our guess. About two years minimum from the time the Senate ratifies the accords, but only if the FCC decides to proceed immediately there after.

Why two years? Well as Fred Maia W5YI of the NCVEC pointed out to us, since Novice Enhancement some two decades ago, just about every major change in the structure of ham radio has taken about two years. Fred is a pretty good Washington watcher and his guess is 2005 at the earliest. But for now, we will all have to just wait and see.

For the Amateur Radio Newsline,. I'm David Black, KB4KCH, reporting. Graham..

--

As we go to air, the ARRL Board of Directors is meeting to discuss the WRC '03 agreement and its impact on the U-S Amateur Service. Next week the

people who give ham radio tests -- the VEC's will be meeting with the FCC to do the same. (IARU, ARRL, CQ, FCC, ARNewsline(tm))

**

WRC FALLOUT: SWITZERLAND GOES 100% NO-CODE

Meantime, Switzerland may be the first country in the world to take advantage of the revised Radio Regulations. According to the website of the Swiss national amateur radio society, the licensing authority there will be writing to all Swiss CEPT Class 2 amateurs to give them "provisional authorization" to immediately start using the High Frequency bands.

Meantime the Radio Society of Great Britain says that nations Radiocommunications Agency has already stated that it will bring in code-free High Frequency licences as soon as it is practical to do so. An announcement will be made as soon as permission is given for United Kingdom Full and Intermediate Class B amateurs to start using the H-F bands. (RSGB)

**

WRC 2003 FALLOUT: IMPROVED EMERGENCY COMMS - WORLDWIDE

Ham radio emergency communications also got a boost at WRC '03. Jeramy Boot, G4NJH, is in Nottingham England with more:

--

Paul Gaskell, G4MWO, the RSGB Radio Communications Voluntary Services National Co-ordinator, has pointed out the enhancements to amateur radio emergency communications that have come about due to the revision of Article 25 of the ITU Radio Regulations.

Article 25.3 now reads: "Amateur stations may be used for transmitting international communications on behalf of third parties only in the case of an emergency or disaster relief. An administration may determine the applicability of this provision to amateur stations under its jurisdiction."

This is a notable change from the old wording, which was: "It is absolutely forbidden for amateur stations to be used for transmitting international communications on behalf of third parties."

Paul says, "A completely new regulation, Article 25.9A, has been approved, a provision which needs no explanation: It reads: 'Administrations are encouraged to take the necessary steps to allow amateur stations to prepare for and meet communication needs in support of disaster relief.'"

It is hoped that administrations will make regulations that facilitate amateurs preparing for emergency situations and providing communications in emergencies and for disaster relief. This was an important IARU objective.

Jeramy Boot, G4NJH

--

Reports from the 2003 World Radio Communications Conference and its impact on Amateur Radio can be found on the IARU website. Its in cyberspace at www.iaru.org. (RSGB)

THE WAR ON TERROR: FCC ESTABLISHES OFFICE OF HOMELAND SECURITY

The FCC has taken another important step in helping to fight the war on terrorism. This as the agency names James Dailey as Director of the its newly established Office of Homeland Security.

Operating under the Enforcement Bureau umbrella the FCC Office of Homeland Security will deal with many emergency related issues including those involving Amateur Radio. It will also oversee the establishment of an Emergency Relocation Board or E-R-B. The E-R-B will deal with the evacuation of FCC headquarters with little or no advance notice as well as overseeing the relocation of selected FCC staff members. More is on the web at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-167A1.doc and http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-236436A1.doc (CGC Communicator)

**

RADIO LAW: AB-1228 SIGNED BY GOVERNOR

California hams now have their own PRB-1 “like” protection. This as Governor Gray Davis signs Assembly Bill 1228 on Monday, April 14 th.

Assemblyman Bob Dutton and his staff shepherded the measure through the Local Government Committees and the floors of both houses of the legislature. It eventually passed without a single dissenting vote. The new law officially recognizes the doctrine of Federal preemption as outlined in PRB-1 over Amateur Radio antennas and their support structures as now being California state law.

In his cover letter to the California Legislature, Governor Davis took time to acknowledge the numerous Californians who are licensed amateur radio operators. He said that each year these volunteers give thousands of hours of service to the state and local governments. He added that since the September 11, 2001 attack on America, the state has also have come to rely on them and appreciate their commitment to the security and well being of all those living in the state.

California is the 20th state in the nation to adopt PRB-1 like ham radio anenna legislation. (ARRL SW Div. Bulletin)

**
RESCUE RADIO: RACES VS. FIRES ON THE 4TH
Radio Amateur Civil Emergency Service volunteers acted as dispatchers for the Huntington Beach, California, Fire Operating Center over the July 4th holiday weekend. Operating from the city's Central Net Training Center, eleven members of the towns own Radio Amateur Civil Emergency Service took incoming fireworks related calls from the public, verified addresses, and dispatched the appropriate fire patrol arson investigator teams.
But thats not all. Two communications volunteers were also assigned as spotters on the roof of City Hall. Two other hams got the experience of a lifetime when they lucked out and were attached to the Huntington Beach Police Department eye-in-the-sky helicopter.
Equipped with digital cameras interfaced to two-way ham radio gear, the field team transmitted live slow-scan television images from their lookout locations to the Fire Operating Center and the Huntington Beach Police Department sub-station command post. Glorria Morrison, who is the city's Emergency Services Coordinator said that everyone is proud to have such an extensive network of dedicated and skilled communications volunteers in Huntington Beach. (KH6WZ)
**

RESCUE RADIO: VARACES PULLS OUT OF VA STATE EOC

Meantime, a big change in emergency communications support has taken place in the state of Virginia. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the rest of the story:

--
The tug of war between the independent VARACES Incorporated and the ARRL affiliated Virgina state ARES and RACES group has tipped in favor of the ARRL group. This, according to the latest Repeater Journal that reports VARACES State Emergency Officer Tony Amato, KR4UQ, annouced in March that he and other officers were withdrawing support of operations at the state Emergency Operations Center in the city of Richmond.

VARACES had been providing staffing for the E-O-C since 2001. This following its split from the ARRL after the League's Executive Committee removed Lynn Gahagan, AF4CD, from his post as Virginia Section Manager. Amato, who had been Gahagan's S-E-C cited difficulty in working with the states Department of Emergency Management Operations Director Fred Vincent. Amato claimed that Vincent would not make a clear choice between his group and the ARRL. For his part, Vincent had stated a desire to work with volunteers from both ham radio groups.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, reporting.

--

Those leaving have been replaced by a ham radio group organized by the local Richmond Amateur Radio Club. (Repeater Journal)

**

OMARC 2003 TECH CLASSES IN SEPTEMBER

Steve Hajducek, N2CKH, says that the The Ocean-Monmouth Amateur Radio Club of New Jersey will again sponsor Amateur Radio Technician theory classes this fall. Classses beginTuesday, September 16th at 6:00pm and will continue through November. All training and testing will be held at the InfoAge Center in Monmouth County, New Jersey. For more information and directions go to www.qsl.net/n2mo on the World Wide Web. (OMARC)

**

NEW FOR HAMS: GLOBAL OVERLAY MAPPER

Tim Makins, EI8IC, in County Roscommon Ireland says that what is perhaps the most comprehensive set of world prefix maps ever assembeled is now freely available. This, in the demonstration version in his new Global Overlay Mapper software.

Makins says that Global Overlay Mapper represents a new concept in the field of maps for radio amateurs. That the software is packed full of features for all Amateur Radio enthusiasts, including seven Continental maps, 27 Sub Continental Maps, country outlines, 2204 maps of major cities C-Q zones, ITU zones, time zones and much more.

The on-line demo-version comes with with two fully featured maps to view. Online purchasing of the whole package is availasble in four major currencies. Download for use on your own computer and try it at www.mapability.com or www.qsl.net/ei8ic (EI8IC)

**

YOUTH RECRUITMENT: SPECIAL OFFER FROM HAMTESTONLINE.COM

The HamTestOnline website has announced its new Youth in Amateur Radio program, which gives eligible school, scouting and youth amateur radio clubs a 50% discount on website subscriptions for students 18 and under.

HamTestOnline says that its offering this discount to support activities aimed at bringing kids into amateur radio such as the ARRL's The Big Project. For more information on the HamTestOnlineT website's Youth in Amateur Radio program, visit www.hamtestonline.com or send an email to K1RV@hamtestonline.com (Press release)

FOR YOUR READING PLEASURE: UNDERSTANDING, BUILDING AND USING BALUNS AND UNUNS FROM CQ

If you're interested in how antennas work but don't know an unun from an onion, Understanding, Building & Using Baluns & Ununs from CQ Magazine should be part of your ham radio library.

The new book by Jerry Sevick, W2FMI, is the successor to his earlier work, Building & Using Baluns & Ununs. The new edition includes new tutorial material, designs and explanations of how and why they work. And like its predecessor, this book provides a unique opportunity to learn about the application of these devices to dipoles, Yagis, log periodics, Beverages,

antenna tuners and countless others.

Interested? You can find out more and place your advance order on line at www.cq-amateur-radio.com. Orders may also be placed by phone -- Monday through Friday -- 9 a.m. to 5 p.m. Eastern time at 1-800-853-9797. (CQ)

5 MHZ FOLLOW-UP: OPERATING TRENDS DEVELOP

A follow-up now on what's taking place on the new domestic United States 5 MHz allocation. As reported last week, opening night on July 3rd saw many stations making rapid contacts and cooperating together for an enjoyable operating experience. Now, according to noted High Frequency back-pack operator Bonnie Crystal, KQ6XA, the novelty of the 5 MHz channels has settled down to a usable level for calling and QSO's.

Writing to the q-r-zed dot com website Crystal notes that 5 MHz daytime propagation out to 250 miles is good, although summer noise limits the comfort level when working the 50 Watt domestic stations. Nights bring good D-X and regional propagation, but lightning storms tend to make it harsh in some areas.

But her most important observation is that of a very positive trend. KQ6XA says that hams still are acting like they are on their first date, treating the new channels appropriately and showing off their best operating habits. She says that they are observing the kind of brevity in operating procedures commonly used on a high-level VHF repeater or regional linked F-M system.

Crystal adds her hope that in the future 5 MHz will continue to be an example of the best ham radio good operating techniques and behavior. From listening on the air, many others appear to agree. (qrz.com, ARNewsline (tm))

**

INTERNATIONAL - AUSTRALIA: 5TH ANNUAL IARU REGION 3 ARDF GAMES ANNOUNCED

The IARU Region 3 Amateur Radio Direction Finding Championships will be held Friday, November 28th to Wednesday, December 3rd in Ballarat Australia.

Ballarat is a large provincial city in the state of Victoria. The Victorian ARDF Group, which is organizing the event says that it is expecting up to 100 participants from member societies in IARU Region 3 including Japan, Korea, China, New Zealand, and Australia. Guest competitors from other IARU Regions are also invited to attend in the world-wide Friendship categories.

This years championships are hosted by the Wireless Institute of Australia, with the WIA Victorian Division sponsoring this important event. Full details including competitor and volunteer registration forms can be found in cyberspace at www.ardf.org.au (WIA)

**

AWARDS: WORK A COLORADO MOUNTAIN

Two new awards are now available for ham radio contacts to and from the 14,000-foot mountains of Colorado. The Summit Award is earned by making contact with 10 or more stations operating from the peaks. The companion Pinnacle Award recognizes operation from 14,000 foot summits, requiring radio operation from 5
or more of the peaks.

Award recipients will receive an attractive, colorful certificate with name, call sign and the number of peaks worked or activated on it. A $5 fee is required to cover the cost of the certificate and any associated expenses.

To get yours, first hold the QSO’s and then take your web browser to www.Colorado14erEvent.org. Questions should be directed to Paul Ermisch KB0LUR by e-mail to awards@colorado14erevent.org. And colorado14erevent is all one word. (K0NR)

**

DX

In DX, keep an ear open for GM3PPG stroke P to be active on 160 to 10 meter S-S-B from South Uist through August 8th, including the RSGB IOTA Contest on the 26th and 27th of July. The island counts as EU-010 for the RSGB Istands on the Air awards program. (GB2RS)

And R1PQ will be on the air from the Novaya Zemlya Archipelago through the 25th of July. Activity will be on 40, 20, 15 and 10 meters using CW, SSB, PSK and RTTY. The operation commemorates the British, Russian and American polar convoys between 1941 and 1944 and will have two stations active 24 hours a day. (GB2RS)

**

THAT FINAL ITEM: 73 TO THE W5YI REPORT

And finally this week we pause to bid farewell to a competitor and a friend. This, with word that the W5YI Report ham radio newsletter has ceased publication with it’s July 15th issue. Bill Pasternak, WA6ITF spoke with Fred Maia whose call sign appeared on the famed publication and they reminisced about the past:

--

The W5YI Report was the last of the paper ham radio newsletters delivered by the postal system. At one time there were three. The very first was H-R Report from Ham Radio magazine in 1974. It was eventually taken over by Burt Hicks, WB6MQV and renamed the Westlink Report. Hicks ran it for 13 years

before closing down in January of 1995.

The ARRL Letter came into being in 1981 as a public version of the previously private ARRL Directors Letter. It initially dealt only with matters of interest to League members, but over the years has developed into a high quality publication covering every aspect of the hobby with items of interest to members and non-members alike.

W5YI Report was started by Fred Maia, W5YI in the late 1970's. This, as an information provider to the Richardson Wireless Klub near Dallas Texas. Other hams who saw it asked Fred to make it available to them:

--
Audio only at www.arnewsline.org
--

Initially Fred did not charge for those who supplied him with self addressed stamped envelopes. Eventually his subscription list grew to a point where Fred had thousands of envelopes in his home and the numbers were getting out of hand. So he decided to simplify matters by converting to a paid subscription operation.

--
Audio only at www.arnewsline.org
--

And as soon as word got out that Fred was accepting subscriptions, they came pouring in. And the rest -- as they say -- is history.

In 2000, Fred sold his company that included the newsletter, but agreed to stay on for three more years with the W5YI Report. He set this summer for his departure. July 15th was the publication date he selected and that's now past:

--
Audio only at www.arnewsline.org
--

If you are a paid subscriber to the W5YI Report, fear not. Fred has you covered. He has arranged for the remainder of your subscription to be covered by C-Q Magazine based on the value of the remaining portion of your subscription. And if you already get C-Q, your subscription will be extended by the appropriate number of issues.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, with my longtime ham radio friend Fred Maia, W5YI.

--

And what about Fred? He is not going away by a long shot. To find out what he has planned for his own future and his thoughts on the future of ham radio, be sure to tune into this weeks RAIN Report. Its on-line in streaming audio right now at www.rainreport.com and on the phone at 847-827-7246

557. Trickle Down Lying: Time for Impeachment

Trickle Down Lying; The WMD Hype Gamble Failed and it's Time for the Bush Regime to Pay, Starting with Cheney's Impeachment

Rob Kall opednews.com

Wasington Post writer Howard Kurtz says, "But in the bluest of blue-state precincts, it's hard to tell which emotion is stronger: disgust with Dubya or anger at the American public for failing to share their outrage."

I am outraged. I know, because I hear from my readers that there are many more people who are outraged with the lying in the Whitehouse. It's a full-fledged, sloppy, incompetent cover-up and it's only a matter of time before the liars get their due comeuppance. One thing we know is that the CIA told the White house not to use the Nigerian Uranium claims of nuclear threat months before the State of the Union address. Condoleeza Rice already
knew. You don't blame someone for not telling you twice.

It can be a noble gesture, sacrificing yourself for the team. CIA director Tenet may be a stand up guy for falling on the sword for our lying president, but he doesn't deserve our esteem for covering up for a team that
cheats and lies. He already told the president's people that they shouldn't use the Nigerian story. They went ahead and used it anyway. They gambled that they'd come up with something, anything that would cover their butts. Sorry team, the gamble failed. Now, even if some weapons of mass destruction
are found that still doesn't cover the cascade of lies that erupted from all
over the Bush administration.

The good news is, the longer the Republicans avoid facing the lies, avoid dealing straight on with the fact that Bush's and Cheney's and Powell's and Rice's and Wolfowitz's and Perle's lies mislead the congress into passing the legislation allowing Bush to go to war, the more the American public will see that the unified "team" is a corrupt one. It's a corrupt team that cheats and lies.

The Post's Kurtz quotes Wall Street Journal Writer Al Hunt, who says, " The phony Iraq-Niger deal may be the smoking gun in what was a pervasive pattern of exaggeration and distortion to justify the war against the Iraqi dictator. Some of these claims -- the alleged Baghdad-al Qaeda ties, the extent of his biological and chemical weapons or even his nuclear designs --

reflected selective use of conflicting intelligence.

"The false Niger connection was much more. Yet Congress, under pressure from
the White House, is abdicating its responsibility to investigate why the public was misled on such a momentous matter. . . .

"If Bill Clinton could be impeached for lying about sex, or Al Gore discredited for exaggerating his relationship with James Lee Witt, then lying about the reasons for going to war -- whether it was the president or one of his subordinates -- ought to command an inquiry from the people's representatives."

Kurtz points out and many on the left exasperatedly agree that if Clinton been the perpetrator instead of Bush, the congressional right would be howling shrilly for his head. Instead, they silently allow the pathetic parade of excuses the Whitehouse has brought forward. How long before Bush blames his dog for eating the note from the CIA telling him that the allegations were bogus?

It's time to start the impeachment momentum. We need to impeach Cheney first. We learned the lesson from Nixon Agnew. What's the point of getting rid of Bush if Cheney takes his place, since Cheney is far worse than Bush. He's the man pulling the dummy's strings. There's ample evidence that Cheney
knew and Cheney lied. Hell, Condoleeza and Rummy will probably be happy to bush, oops, that was a genuine typo. Make that push Dickie to the head of the falling on a sword line.
Agnew was a corrupt vice president and once confronted, he went quietly, leaving little as a legacy except his famous phrase "nattering nabobs" referring to the press. it was good riddance to him and it cleared the way for Nixon to reach a point where he could no longer hide behind lies-- his lies and the lies of his sleazy cronies.

Bush is now in the same boat. Nixon left and Gerald Ford became president. I'd take Dennis Hastert, the speaker of the house and third in succession to
the presidency, over Bush in a moment. But, as a reader has pointed out, Nixon appointed Ford to be vice-president after Agnew resigned. The thought of Bush getting to appoint a VP is frightening. I wonder who he'd chose-- Pat Robertson, Grover Norquist, Rush Limbaugh.... or, if he goes tot he house of representatives, there's Tom DeLay, or from the senate, Rick Santorum.

It will take an outcry from the public to get the impeachment process started, to get the people in the red states, the people who don't ordinarily follow politics to even find out that Bush lied and soldiers unnecessarily died. . If you wrote to your congressman or senator to protest
the war, it's time to write again to demand at least an investigation. If you protested against the war before, it's time to protest now against the lies that led us to war. The majority of Americans are not following this

story. One poll suggests that over 60% of the population doesn't know about it. Get the word out.

This works pretty good at the third and fifth harmonics, but there is
no second or fourth harmonic in a perfect square wave.

http://www.williamgreider.com/rants/article.php?article=little_caesar

Little Caesar's Quicksand

Leave aside the growing doubts and dissent about Iraq, the explosive problem
facing Bush is how to manage the emotional distress of his bellicose supporters. The White House propaganda performed brilliantly during the run-up to war, producing varying rationales for invasion that floated past us like soap bubbles (as each bubble popped, another came along to replace it). But, now that Americans are getting randomly shot and maimed, domestic opinion about the nature of this "triumph" is taking on a darker flavor, including a thirst for vengeance.

On C-Span radio the other morning, I heard a Vietnam combat veteran earnestly worrying that our troops in Iraq might be "hand-cuffed." He had heard a rumor about rubber bullets that upset him. Another caller made the point more angrily "For every American who gets killed, they should take 20 Iraquians (his term) and hang them from lamp posts." This, he explained, is how the Klingons from Star Trek would handle it.

Then I got an email from a right-wing friend, a learned man with a Ph.D. in history: "We need a tough-minded Patton or MacArthur in full dress uniform...Follow the Roman rule: haul those people off in slavery and burn down the country...For every ten Americans slaughtered, burn down whole villages."

These savage responses -- barbaric self-indulgence given that the U.S. invaded this foreign country without provocation -- should not be dismissed as entirely irrational. Many people feel personally injured -- and betrayed -- by what's happening in Iraq because they were led to support the
war by a series of melodramatic lies. They became emotionally invested in what they were told to believe. The Iraqi dictator was to blame for 9/11. Saddam could wipe out London in 45 minutes (as the first poodle put it). Saddam has amassed killer toxins and nuclear weapons to supply the terrorists threatening our country. Saddam is a tyrannical killer and this will be a high-minded war of liberation, opening a democratic future for Iraq, nay, for all Arabs in the Middle East.

If one believed in those claims three or four months ago, it is not unreasonable to feel cheated by events (only Saddam the beast has been confirmed). Yet, for many Americans, it is easier emotionally to blame the liberated and ungrateful Iraqis than to confront the deceitful propagandists
in official Washington. This unstable emotional brew is what Bush and his

political lieutenants now have to manage and very carefully if they wish to avoid getting pulled deeper into the mire. The president's taunting bravado -- "bring 'em on" -- may or may not frighten the jihad irregulars in
Iraq but it definitely pumps up yearnings for retribution back home.

Whatever unfolds in Iraq, Bush's political imperative is to get this story off the evening news, out of the main headlines, well before his reelection contest starts next year. He cannot do that by agitating popular taste for blood or by staging Israeli-style raids on Arab villages, satisfying though the assaults might be to some. The presidential dilemma is how to retreat artfully from what he started without diminishing the macho-man reputation. It is the classic dilemma colonialist powers often faced in hostile colonies. The empire can't stay, but it can't get out, not with it mighty honor intact.

Imperialist conquest is not a philanthropic enterprise -- my historian friend is quite right about that -- and this is the central contradiction in
Bush's brave, new foreign policy. Many in America's governing elites seem to
have forgotten the ugly truth and millions of citizens bought into the supposed altruism of waging an aggressive war (reassured by the essays in leading newspapers by Brit expatriates extolling the glories of their empire). Angry confusion is what happens when a country goes to war on false
premises, when the political opposition is too faint-hearted to ask tough questions, when the mass audience is deluged by well-crafted propaganda. If things go badly, the patriotic fervor can turn ugly.

Big Caesar, the original Julius, conquered for honest reasons. He wanted the
real estate and resources for Rome and for keeps, not to improve the conquered. He routinely slaughtered thousands of captured troops or enslaved
them (accepted practice in his day that also enhanced Rome's security). The Romans were great builders and modernizers, their armies spread culture and language. But Caesar did not blather on about freedom and self-government. With or without elections, no Iraqis will be allowed to govern that country unless Washington approves. America rules Iraq until its troops are out.

Let me be the first to resurrect the fabled Aiken "peace plan" enunciated by
Senator George Aiken, Vermont Republican, during the terrible years of Vietnam: "Declare victory and get out." Hundreds of thousands of lives would
have been spared in Indochina if LBJ or Nixon had had the courage to follow Aiken's advice. My hunch has always been that Bush intended a prompt exit from Iraq along those lines -- say anything, do anything, whatever it takes to extract the bulk of American forces before the next presidential campaign

is underway. Change the subject so American voters can think about something
else. If that sounds excessively cynical, it seems to have worked with Afghanistan.

I do hope Bush finds the wisdom to embrace the Aiken plan (and that he executes the withdrawal deftly enough to sedate the angry couch warriors). Yes, Iraqis would be left with a broken country and vulnerable to fratricidal civil conflicts, maybe an elected government of Islamic theocracy. But it is their country, not ours. And many lives would be spared, theirs and ours. Democracy means people get to make their own mistakes. Spread the word.

A perfectly symmetrical square wave doesn't contain any even harmonics. For best results when using this technique to generate even harmonics, the square wave needs to have a longer "on" period than "off" period or vice-versa.

IMO you are being led astray. I don't see why the emphasis on frequency multiplication. It is fairly simple to make an LC oscillator cover a 2 to 1 frequency range, or even 3 to 1. That could mean 4 to 12 MHz in one tuning range and 1.3 to 4 in another. The problem is lower frequencies. These days it is hard to find a large-enough variable capacitor for operation down in the few-hundreds of kilohertz range, let alone lower.

I know of only two ways that will cover the whole zero to 12 MHz range without bandswitching or switched filters.

One is the direct digital synthesizer DDS. Single chip DDS units are available [Analog Devices Inc] fairly cheaply, but they are tiny and require a computer or equivalent to control them. You get "perfect" frequency accuracy and stability and a sine-wave output.

The other is a beat-frequency method with two oscillators operating considerably above 12 MHz. One crystal controlled, the other knob controlled tuning from the crystal frequency to 12 MHz higher. Feed them into a double-balanced mixer (MiniCircuits) followed by a low-pass filter that passes 0 to 12 MHz, and strongly rejects the crystal osc frequency and all higher. One knob, no switching, no computer needed for control - but also much poorer frequency accuracy and stability.

Good point, John. But fortunately, I've never generated a *perfect*
square wave! :-) In practice, it's probably more accurate to say that
the even harmonics are well down on the odds. Blame it on dv/dt.

It is the Usenet caucus of the Democratic Party which is encouraging
all of the hateful, off-topic spew. They send the stuff out via a
mailing list and ask their mindless goons to repost it to Usenet.

Ever since Clinton got impeached, and Algore couldn't steal the
election, they've been out to destroy Usenet discourse as a part of
their anti free-speech agenda.

<snip beat freq method>

If Tom - or anyone else - wants to do this the DDS way, there's a
0-10MHz function generator project in Australian Silicon Chip magazine,
May 2003 edition. It's a stand-alone box and delivers the following
specs:

Waveform Generation: 32-bit DDS, 10-bit DAC
Distortion: <1% @ 1kHz
Frequency Range: 1Hz to 10MHz in 1Hz steps
Frequency Display: "Sliding Window" 7-digit
(EEPROM frequency retention)
User Input: Three push buttons
Sinewave Output: 0-5V p-p adjustable, 50 ohm
Squarewave output: CMOS/TTL compatible, 50% duty cycle
Output Connectors: RCA (Cinch)

Power: 9VAC 1--mA plugpack

This project is designed to replace the earlier DDS generator described in Electronics Australia magazine August 1996. Copies of the article, or back-issues of Silicon Chip, can be ordered from http://www.siliconchip.com.au and they also have a list of kit sources online.

Sure. Simple actually. On the hetrodyne oscillator board you will find several crystals. The lowest freq is the 75/80 meter band.

You can simply replace that with another crystal 500khz HIGHER in frequency and now operate from 4.0 to 4.5mhz. Or install a switch or relay circuit to switch in the 'additional' crystal.

A slight amount of adjustment will probably be needed to broaden the tx output so that is is even across the new spread. Or maybe it will do fine as is.

I have done this mod on a SB-102 and it will work fine.

Yes,

Jack up the Ford and drive a Chevy under it! (Sorry, couldn't resist)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th/July, through Sunday, 20th/July there were 209 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5W, 5X, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EZ, F, FG, FH, FK, FM, FO, FO/a, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

THE NODXA "Radio For Apollo" PROJECT UPDATE (by Editor Tedd, KB8NW).
Let me first say "HOW I AM IMPRESSED" with the DX community. Ten minutes after last week's bulletin was released, pledges were coming in quickly. In 24 hours, close to 1000 USD were pledged with three associations stating

they would contribute something. Some individuals also stated they would donate more, if needed. The members of NODXA say "THANK YOU". However, the NODXA project is now on hold. Something is in the works and currently can not be publicized just yet. Details are forthcoming. Monk Apollo is aware of the ham community's efforts to help put him back on the air. He is also very grateful and prays for the ham community. Please stay tuned for updates. Once again, I thank the DX community.....
73 de Tedd KB8NW (President of NODXA and Editor of the OPDX)

3B8, MAURITIUS. Mart, DL6UAA, informs OPDX that Jacky, 3B8CF, is now active on RTTY everyday (except weekends) between 1300-1430z on 15 meters (around 21083-21084 kHz). He has repaired his old TONO-7000 and is now active. NA stations try 0300z on 14084 kHz (That's the time before he goes to work).

3C0, ANNOBON ISLAND (Update). Operators Franz/DJ9ZB/3C0F, Elmo/EA5BYP/3C0A, Victor/EA5FO/3C0R and Vicente/EA5YN/3C0V will be active from Annobon Island, between September 27th and October 10th. Activity will be on all modes/bands CW, SSB, RTTY, PSK, some SSTV and 160-6 meters. They hope to have at least two stations on the air 24 hours a day. Mounting this DXpedition is an expensive operation for operators. Any donations to help the operators, as small as it may be, will be gratefully appreciated and can be sent via the DX Club Tabarca Island, c/o President Elmo EA5BYP, P.O. Box 3097, 03080 Alicante, Spain. E-mail is: cayuco@telefonica.net Any additional donations included with your QSL card requests will be much appreciated. They would like to say thanks in advance. QSL via DJ9ZB.

7P8, LESOTHO (Update/Now Active). The Lone Star DX Association and the Texas DX Society's 7P8 DXpedition is now active until July 25th. The team includes: Charles Frost, K5LBU/7P8CF; Igor Zdorov of Minneapolis, MN, W0IZ/7P8IZ; Dave Anderson of Ashville, NC, K4SV/7P8DA; Madison Jones of Houston, TX, W5MJ/7P8MJ; Neil King of Port Coquitlam, British Columbia, Canada VA7DX/7P8NK; Tom Anderson of Colleyville, TX, WW5L/7P8TA; and Elizabeth White of Missouri City, TX, KA2UCA/7P8EW. Operators K4SV and VA7DX will also be operating from 3DA after 7P8. Their callsigns will be 3DA0SV for Dave Anderson/K4SV and 3DA0WC for Neil King/VA7DX. Larry Alkoff, N2LA, and his XYL Karen, K2DXV, of Austin who had joined the team withdrew from the DXpedition because of construction on their new home near Austin. Activity will be on all bands/modes. QSL via their home callsigns. They now have two Web pages for DXers to monitor updates for the DXpedition and on-line logs search. The web pages are:
http://www.k4sv.com/lesotho.html
http://www.amsatnet.com/7p8.html
To help pay shipping expenses of donated equipment, the team is selling a commemorative T-shirt like the one the team will be wearing on its QSL card. Short sleeve shirts in sizes Medium through X-Large are 20 USD and a limited number of long sleeve shirt in XXL and XL are aviable at 25 USD. Stateside and Canadaian postage is included in the cost. Add 5 USD for DX airmail delivery. Order through Frost or Tom Anderson via their callbook addresses.

9A, CROATIA (Croatian Island and IOTA Activity). Members from Radio club "Josipovac" (9A3QB, 9A3SO, 9A3IQ, 9A7DCO, 9A7BFR, ...) will participate in IOTA contest under 9A6K, from the Island of Kakan (EU-170). Before and after contest (on July 24-31st), they plan to activate (under 9A6K/p), the next following Croatian IOCA islands (mainly EU-170):
- KUKULJAR, CI-231, LH E3224* - PRCEVAC MALI, CI-329
- BABULJAK, CI-495 - KRALJAK, CI-328
- VODNJAK, CI-494 - DUPINICI, CI-327
- BISAGA, CI-459 (NO IOTA) - KAMESNJAK MALI, CI-325
- BOROVNIK, CI-254, (NO IOTA) - KAMESNJAK VELI, CI-326
- LJUTAC, CI-255 (NO IOTA) - PRISNJAK, CI-374 (NO IOTA), LH E3202*
- BAVLJENAC, CI-246 - MURTER, CI-074 (NO IOTA)
QSL via 9A3QB, Mirko (via bureau).

C6, BAHAMAS. Ian, N8IK, will be active as C6AMK Coco Cay, Bahamas, August 8-9th. Activity will be 40 meters CW only. QSL via N8IK.

CY9, ST. PAUL ISLAND. Operators Robert/N0RN, Vance/N5VL, Igor/W0IZ, Joe/KO4RR, Andrea/K5AAH (YL), Alan/K5AB and Dale/VE7SV will be active this week as CY9A from July 24th to August 2nd. Their announced suggested frequencies are:
SSB - 7055/T, 7240/R, 14195, 14295, 14260, 18140, 21295, 21260, 24140, 28395 and 28460 kHz
RTTY - 14083, 21083 and 28083 kHz
CW - 1826.5, 3505, 7005, 10105, 14025, 18075, 21025, 24894, 28025 and 50106.6 kHz
QSL via N5VL. For updates, visit the Web page at:
http://www.hometown.aol.com/vlepierre/myhomepage/index.html

DX RENTALS.....
SUPERSTATION RENTAL (PEI DX Lodge). Robby/VY2SS and Ken/K6LA/VY2TT are pleased to announce the opening of the Prince Edward Island (PEI) DX Lodge - Rental Superstation. Check this out at:
http://www.peidxlodge.com

Charles Harpole, HS0ZCW, reports that he will have within the next 6 to 8 months a ham shack rental in Bangkok, Thailand. It is a single room air conditioned condo with American style bath on the top (14th) floor of a large condo building in north-central Bangkok, about 20 minutes from the airport. Automobile parking all around the condo. There are plenty of taxis. There is a very large food court and other shops as a part of the complex. The radio is TS-50S with separate memory keyer, Bencher, Heil, and IBM laptop, with an all band wire antenna for now. Bringing your transmitter into Thailand is not legal without declaring it upon arrival and waiting a month or more for approval of it. Operating licenses can be obtained in advance by writing (for citizens of USA, UK, and a few other countries) via recripocal agreements. Contact Charles directly for more details if you are planning a stop-over in Bangkok in the future. His E-mail address is: k4vud@hotmail.com

FO, FRENCH POLYNESIA. Operators Barry/ZS1FJ/G4MFW/ZL1MFW, Phil/G3SWH and Deon/ZS1ZL continue to be active for the rest of the week (July 26th) as FO/G4MFW and FO/G35WH (Yes, FO/G"35"WH. It seems the FO authorities misread

the "S" for a "5" on Phil's license.). Remember, QSL FO/G4MFW to ZS1FJ and FO/G35WH to G3SWH.

GJ2/MJ0, JERSEY. Look for Rich, K2WR, as GJ2A in the RSGB IOTA Contest (July 26-27th) as a Single-Op/High Power/Mixed/24h/Island entry. Also, look for him to use GJ2A again in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/High Power entry. QSL both operations via GJ3DVC or GJ Bureau. Look for some activity outside of the contest (before and after) as MJ0AWR, mainly on CW. QSL MJ0AWR to K2WR direct or via W2 Bureau.

HA5, HUNGARY. Robert, PA3GEO, will be active as HA5ORP from July 28th through August 13th. Activity will be on all HF bands on CW/SSB. He will use mobile whip antennas and also a wire openline dipole. His radio will be a FT-757 GX-II w/100 watts. QSL via PA3GEO to the QSL Bureau.

HI3, DOMINICAN REPUBLIC. Operators ON4IQ, ON4QX, HI8ROX and HI3TEJ will be active as HI3/ON4IQ in the RSGB IOTA Contest (July 26-27th) as a Multi-One entry (IOTA NA-096). QSL via ON4IQ.

IOTA NEWS (Remember, the RSGB IOTA Contest is this weekend!).....
CONTEST. Ric, DL2VFR, reports that 78 stations are listed so far for the contest on the Web page at: http://www.iota-post.com
German participants are:
EU-042 Sylt Island. DJ5DT/p via bureau
EU-042 Pellworm DL4OK/p via bureau
EU-057 Greifswalder Oie DL0HGW/p via bureau
EU-057 Ruegen DF3UFW/p via bureau
EU-128 Fehmarn DJ7AO via bureau
EU-128 Fehmarn DL5KUA via bureau
EU-129 Usedom DL0KWH/p via bureau

AF-036. Members of URE and the Armed Forces Radio club will be on Chafarinas Islands July 23-28th. They will be participating in the IOTA Contest, and outside the contest they will be on the air on all bands from 80-2 meters on SSB, CW and RTTY. The team members are: EA4BT, EA7AAW, EA7JB, EA7TL, EA9NP and EB4EPJ. The callsign to be used on HF is EG9IC, and on 6 meters they will use EH9IC. A online log search will be available after the DXpedition at: http://www.ure.es
QSL via EA4URE.

AS-NEW. There has been an announcement that a new IOTA will be activated in October this year. It will be from Vietnam (3W) and the last new island from 3W-land. The callsign to be used is XV3C. More details are forthcoming.

AS-072. Look for Rich, 9M2/G4ZFE/p, to be active from Pulau Pangkor, Western Malaysia, in the RSGB IOTA Contest (July 26-27th) as a Single-OP/CW/Low Power entry. QSL via G4ZFE (direct preferred).

AS-136. Students from the amateur radio club station at Shanghai Jiaotong University (BY4AJT) will be active as BI4HS from Hengsha Island, July 25-28th. Look for them in the IOTA Contest. Suggested frequencies are (+/-):
SSB - 7050, 14260, 21260, 28460 kHz
CW - 7025, 14030, 21030, 28030 kHz

EU-001. Operators SV5FRB, SV5FRD, SV5FRP and the Scouts amateurs from Pserimos Island (only 17 people are permanent habitants) will be active as J45FRE in the RSGB IOTA Contest (July 26-27th) as a Multi-Op/DXpedition entry. QSL via SV5FRD.

EU-016. Look for S50R and S50K to be active from the Island of Vis (Croatia) in the RSGB IOTA Contest (July 26-27th). QSL via S50R. For more info, visit: http://lea.hamradio.si/~s50r/

EU-038. Look for DJ1YFK to be active as PA/DJ1YFK/P from Texel Island during the RSGB IOTA Contest (July 26-27th) as a Single-Op/All Band/CW/12h entry. QSL via DJ1YFK, 100% via the Bureau.

EU-052. Kostas, SV1DPI, will be active as SV1DPI/p from Zante Island, July 25th to August 3rd. He is going there for a vacation, but will try to be active some hours and participate in the IOTA Contest. QSL preferable via bureau.

EU-057. Look for DL0HGW/p on Greifswalder Oie (GIA O-012, WLH-0114) to be active in the IOTA Contest. QSL via bureau. For more details: http://www.radiosport.de

EU-070. Look for Christian, F8HJV, to be active as F8HJV/p from Levant Island (DIFM ME012), from July 25th to the end of August. His frequencies and mode: mainly 40 and 20 meters SSB. This will be a vacationning style operation, but Christian will enter a little bit in the IOTA Contest. Go easy on Christian, he is not used to pile-ups. QSL via his home callsign.

EU-088. Operators OZ2TF, OZ7KDJ and OZ9V will activate Anholt Island (Reference Number for the Dansk Island Award NK-001) during the RSGB IOTA Contest (July 26-27th). Activity will be on 80-10 meters CW/SSB. Callsign will be OZ8MW/P.

EU-091. Members from the Salento DX Team (A.R.I. Sezione di Lecce) will activate Isola Grande (I.I.A. LE-001) as IZ7AUH/p in the IOTA Contest as a Multi-Op entry. Operators are: Frank/IZ7AUH, Alfredo/IK7JWX, Elvira/IV3FSG, Michele/IK7FPX, Angelo/IZ7CTE (CW) and Enzo/I7PXV (CW). QSL via home callsign, bureau or direct. The operators outside of the IOTA Contest will be active also on 6 meters (JN80WG) and on the WARC bands.

EU-114. Look for GU8D on Guernsey Island to be active in the IOTA Contest. QSL via G3LZQ.

EU-137. Operators SM7BHM and SM7GXR will be active as SK7A/P from
Lindoe Island in the RSGB IOTA Contest (July 26-27th) as
a SSB entry. QSL via SK7BQ.

EU-146. Four Dutch amateurs will be active as PA6Z from the Island
of Goeree during the RSGB IOTA Contest (July 26-27th). PA6Z
will be active on 80-10 meters on SSB only. QSL is via PA1KW:
Bert v. Holst, Ien Dalessingel 357, 7207 LJ Zutphen,
The Netherlands.

EU-146. For the third year in a row PI4HQ will be active in the IOTA
Contest. The original group with PA7BT, ON4IA, ON5UM, ON6CC and
ON6NL got a lot of support and will activate Schouwen Island.
On the days prior to the contest the crew will be active under
their own callsign/PA. They will enter the contest as a
Multi/Single station. They hope to be in the top-ten again
and hope to improve their last year's 8th position! For some
pictures of their last year's trip, visit the Web page at:
http://www.qsl.net/on5ll
QSL is OK via the bureau or to Peter, PA3CAL.

EU-149. Operators Jaak/ES1FB and Oleg/ES1RA will be active from Rammu
Island, July 25-27th, as ES1FB/2 and ES1RA/2. QSL via their
home callsigns.

EU-174. Panos, SV8DTL, will be active in the IOTA Contest from
Thasos Island.

EU-178. The team of ES2QH/Aarne, ES2NA/Andy, ES1DW/Tom, ES2RJ/Tom,
ES2EZ/Jerry and ES2TGO/Harry will be active as ES2WX from
the small Island of Kihnu, July 25th through August 4th.
Activity will include the RSGB IOTA Contest and the Estonian
Open Field Day. Operations will be on HF (for IOTA Contest
and VUSHF skeds), 50, 144, 432 and 1296 MHz. QSL VUSHF QSOs
via ES2RJ and HF QSO via ES2NA.

NA-067. Jon, WB8YJF, will be active from Ocracoke Island, NC, (USI
NC001S) as WB8YJF/NA67 from July 20-27th. This will include
the IOTA Contest. Activity will be on CW, RTTY, and some SSB.
QSL via direct if possible (FAST turnaround!).

NA-127. John, VE1JS, will be active from Brier Island, in Southwest
Nova Scotia during the IOTA contest July 26-27th. QSL direct
to: John Scott, General Delivery, Sandy Cove, NS, Canada B0V 1E0
or via the VE1 Bureau. No other QSL routes will work. All cards
will be answered in the same way as they are received.

NA-128. Nenad, VE3EXY, will once again head back to Orleans Island.
This time it will be for the IOTA contest. He will be there
from July 24th to July 26th (1600z) using the callsign
CK2/VE3EXY/P. Activity will be on the contest frequencies
and no low bands. This will be your last chance to work
him from this island because he will not go there any
time soon. QSL via VE3EXY. For those who are interested in

the Canadian Islands Award, Orleans Island has the CISA reference number QC007. QSL cards are already printed, and the CISA number is on his QSL card.

NA-140. Operators K3PFW, W3PP, W2GJ, N3PT, KW3Z, WV8RS, KD3IH, N3WYN, KB3HTA and KB3HTF will be active as W3TBG from the Smith Island during the RSGB IOTA Contest (July 26-27th) as a Multi-Op/ High Power entry. They will be active from the fire station using a beam and dipole antennas. QSL via W3TBG.

LIGHTHOUSE ACTIVITY.....
Ray Knuth, KB8ZYY, is expected to be active from Ausable Pierhead Lighthouse (USA 929) during the lighthouse weekend (August 16-17th). The lighthouse is in Ausable Township (Iosco County), Michigan, at the mouth of the Ausable River. Activity will be on CW/SSB on the suggested frequencies for the lighthouse event. QSL to KB8ZYY with a SASE.

Operators EA6LP/Juan, EA6YW/Gori, EA6DD/Biel and DK4TP/Herbert will activate Cap Salinas Lighthouse (BAL-070) as ED6LGH from the southern most part of Mallorca Island (EU-004), August 15-17th. QSL via bureau or EA6LP.

MD4, ISLE OF MAN. Once again MD4K will be active in the 2003 IOTA Contest. Operators this year are G0HSS, G1GEY, G3NKC, G4MJS, G4XUM and M0BEW, gratefully assisted by GD4GNH and GD0TEP. Please check out their Web page at: http://www.md4k.com
QSL cards can be sent direct or via bureau to G3NKC (Chestnut House, 510 Crewe Rd, Wistaston, Crewe. CW2 6PS); or requested on line through the Web page (no card necessary!)

P4, ARUBA. By the time you read this, Colin, KU5B, will be active as KU5B/P4 or P40CJ now through July 24th. He will be operating from his hotel and various contest locations. Equipment used will be a Yaesu FT-840 w/100 watts into a dipole at the hotel. Activity will be on 10, 15, 20, and 40 meters both SSB and CW, with a main emphasis on CW. QSL via KU5B with SASE. His Web site is at: http://www.qsl.net/ku5b

QSL INFO AND NEWS.....
4U1UN QSLS. Your editor saw Jerry, WB8LFO, over the past weekend and asked him about the QSL cards and logs for 4U1UN. Jerry told your editor he is in the process of moving to Flordia and that "ALL" logs (1986-1996) have been returned to the UN. All QSL requests for those years should be QSLed via the following address. DO NOT send QSL cards to WB8LFO, only to: Box 3873, Grand Central Station New York, NY 10163 USA.

Patrick, WD9EWK, informs OPDX that he is the QSL Manager for several stations, in addition to activity with his own personal callsigns WD9EWK and VA7EWK. Here is a current list of the stations who have WD9EWK for their QSL route:
4A2Q (3-4 May 2003 only), AY8XW (2002 only), KG6OJZ, L20E (say

"Lima-Two-Zero-Echo"), LU3XQ, LU5ER, LU5EVK, LU5XPZ, LU6XQ, LU7JA, LU9XT, W9K (August 2002 only), XE2BOA, XE2BSS, XE2TG, XE2TPJ, and XE2VAS.
Patrick has received the 4A2Q QSL cards from the printer over the past weekend and mailed out the first batch of those cards - going to hams in the USA and Mexico, July 14th. The cards are the folding type, similar to those used on other DXpeditions in the recent past. More 4A2Q cards, going to XE hams, will be mailed from a Mexican post office on July 18th. Those who sent a card for 4A2Q without an SASE or something for paying the return postage will get a card shortly, now that he has some spare "green stamps". There is more information about 4A2Q on the Web page at: http://www.qsl.net/4a2q/
Marco XE2TG, of Hermosillo in the Mexican state of Sonora (south of the US state of Arizona, or for grid hunters DL49), has accepted Patrick's offer to be his QSL Manager. Marco enjoys CW, and especially enjoys operating on 6m and 160m. He was one of the operators at 4A2Q, doing CW from there. Patrick has his 2003 logs through last week, and he will receive updates from him regularly. If you need a QSO confirmed from previous years - or even with his previous callsign, XE2TSG - he can do that as well. Patrick can receive cards through the QSL bureau system, or directly at (the same address as on QRZ.com, Buckmaster, and the FCC database): Patrick Stoddard, 6938 W. Palo Verde Drive, Glendale, AZ 85303-4405 USA. He maintains a Web page with his QSL Manager information at: http://www.qsl.net/wd9ewk/qsl-mgr.html

TZ, MALI (Update).The intenrational team going to Bamako, Mali, August 12-22nd, have announced that their callsign for the operation will be TZ6RD. The QSL Manager will be EA4URE the Spanish National Bureau. Currently, operators confirm are: XE1L, N6TQS, I8NHJ, EA5RM, EA5RD, EA5KY and EA5XX.

VP2M, MONTSERRAT. Three members of the Florida DXpedition Group (FDXPG), Bob/K9MDO/VP2MDO, William/N2WB/VP2MWB, and Bill/W4WX/VP2MHX will be on Montserrat July 22-29th. They each will have their own station set up and will operate most bands and modes. QSL VP2MDO and VP2MHX via their home callsigns and VP2MWB via N2OO only. Please send SASE if you want direct reply.

VP2V, BRITISH VIRGIN ISLANDS. Mike Foster who used to have the callsign VP2V/7Q7FM now has the new callsign VP2VFM. He was heard this week on 14200 kHz at 0102z. QSL is ONLY DIRECT to G0IAS (with return postage please).

VP6, PITCAIRN ISLAND. Lyle Burgoyne, VP6LJ, is back on the island. He used to serve as priest on the island for two years in the mid 90's. He is expected to be there for at least one year. Over the past fews weeks, he has been active on 20 meters SSB. Watch 14190, 14245 and 14268 kHz after 0500z (sometimes earlier).

W0DXCC 2003 CONVENTION. The doors of the Bloomington, Minnesota, Holiday Inn on Highway 35W and 94th Street will open to Amateur radio operators with DX in mind on October 18th at 8 AM. Well-known W0-DX speakers will be

featured! CQ Hall of Fame Inductee and "Mr. W0DXCC 2002" Glenn Johnson, W0GJ, will speak on his experiences with four-square antennas and will offer us the latest news from Bhutan, and Ralph Fedor, K0IR, will present a seminar on his DXpeditions to various rare and very rare Antarctic DX Entities. Radio City, Mounds View, will present a fascinating demo comparing today's top radios and Timewave Technology will demonstrate the art of digital signal processing technology. Other outstanding speakers already booked for the Convention include K9LA, Carl Leutzelschwab with an intriguing talk on the challenges of W0-land propagation and W0IZ, Igor Zdorov, with a presentation on his DXpedition exploits to rare African and Asian DX Entities. "We are adding more great speakers and will be releasing the information shortly", Chairman Lou Sica, AC0X, reports. The Convention will conclude with a 7PM Banquet at the Holiday Inn with a Keynote Speaker. Details for the Convention can be requested by E-mailing < w0dxcc@w0dxcc.com > or sending a self-addressed stamped envelope to: W0DXCC 2003, PO Box 390633, Minneapolis, Minnesota 55439-0633. Information is also available on the W0DXCC 2003 home page at: http://www.w0dxcc.com

XU, CAMBODIA (An IOTA and possibly XW!). Jaak, ES1FB, reports he will go to Shianoukville, Cambodia, from October 19-28th. His callsign will be XU7ACE, and he plans to be active in the CQ WW DX SSB Contest as a Single-Op/All Band entry. He also plans to be active as XU7ACV from Koh Poah Island (IOTA AS-133), October 21-23rd. Plans also include a trip to Vientienne, Laos, October 30th through November 4th. Possible callsign is XW1FB (?). QSL all operations to his home callsign ES1FB. For updates and a log search, visit the Web page at: http://www.hot.ee/xu7ace> www.hot.ee/xu7ace

XZ, MYANMAR. Sigi, DL7DF, reports, "We actually had a special target in Africa for our 2003 DXpedition, however we ran into trouble getting the license. But we will go to another country instead - Myanmar, XZ. Myanmar is not amongst the top 10 of the most needed DXCC entities anymore but we hope for a success anyway." Operators DL7BO, DL7UFR, DL7DF, DL7KL, DJ6TF, DK1BT, DL4WK and plus two of their XYLs are planning to be active as XZ7A between September 30th and October 17th. They will have four stations active from two different operating places. One of the places is in the capitol, the other one in a sea village. The location in the capitol is very promising because they will be using a roof on a 25m high building. Their planned activity will be on 160-6 meters, CW, SSB, RTTY, PSK31 and SSTV. They will have two linears, beams, a Titanex V80 vertical, a R7 plus a 6m yagi. On this operation they will be emphasizing the low bands because the last activity was in 1998 and 2000. Pilots will once again be Bernd/DF3CB and Floyd/N5FG. Updated news, online logs and pictures, will be available during the DXpedition at: http://www.qsl.net/dl7df/

YJ, VANUATU (Update to OPDX.617). Trent, VK4TI, informs OPDX that the team who will be active as YJ0X in the CQ World Wide DX SSB Contest, intends to be in YJ8-land roughly 4 days prior and two days after the contest. They intend to leave the antenna at the site for future operators. He also mentions Les, VK3WA, is an excellent CW op, and they have had requests for RTTY. Their main focus was for the CQWW Contest as well as sightseeing. However, it does look like Vanuatu is a bit more needed

than they thought by judging by the E-mails received here since the posting of their operation. QSL via VK4TI, using the QRZ.com address.

Drop ten tec a note. I'm sure they could help out. Or go to ten tec on line and see if they have the manual there. They have a good portion of them on line.

May not be ten tec site, but do a google search.

Now that Bruce Parens and NCI have won the CW wars, what will happen to the exclusive CW allocations if a CW requirement is dropped? Certainly there can be no argument for keeping the current band structure in place, and phone operations probably ought to be spread out into what was once exclusively reserved for CW operators. Not only would this alleviate the congestion in the phone bands, but it would finally and officially place CW into perspective: Just another optional mode of operation without any exclusive rights to any frequency.

Remember it is not only CW that uses these sections of the bands but also the other digital modes. The large number of hams in the US combined with the limited amount of HF spectrum allotted to hams means some time of regulation may continue to be necessary here. While a voluntary band plan might work, I wouldn't count on it. I've read postings from Europeans where they have problems because people will not follow the band plans especially during their contests. They have a lot fewer hams than we do.

Given the activity on the air right now and the last several weeks, the congestion has been in the CW/digital subbands not the phone bands. Conditions on phone have been poor and there has, in general been little activity, other than a pileup or two on a DX station. Expanding the phone bands won't clear up those types of activities.

So since there isn't any real congestion in the phone bands right now, there is no need to expand them at the expense of all the digital modes (PSK31, RTTY, Amtor, Packet, a myriad of lesser known modes, and also CW).

Except in the USA, most amateurs do not labor under "sub-bands" based on mode. As an example Canadian amateur have no such restrictions. It's a source of continuing wonder to me that the FCC continues to arbitrarily slice and dice the bands based on mode, license class, power levels, and similar artificial constructs of their imagination.

I agree with Dee's post in it's entirety. While I can accept the
paring down of the present "Novice" allocations to make more phone
spectrum available on those bands, CW and the other narrowband modes
still enjoy significant following among ALL operators on all HF bands.

Perhaps it might be more "palatable" to those who disdain Morse
Code if we simply refer to them as "narrow band" and "wideband"
allocations?

I imagine that the "class" restrictions will fade soon.

As for mode restrictions, see my comment on Dee's post...Perhaps
if we consider these as "wideband" and "narrowband" allocations it
would be more palatable to all (or at least more)?

Not only that but the stupid allocation of the 7.00-7.100 as a CW
only band makes 40 meters almost unusable outside of the U.S. That's
our entire 40 meter band, and so we can't work the states without spilt
operation, which doesn't often work because we are swamped with European
brodcasters.

We can't work locally, because by convention, we use ssb in the upper
half and get destroyed by all those digital signals that come from the
U.S. and clobber us.

IMHO the best thing to do is open 7.050-7.100 for ssb in the U.S. and move
the digital stuff to the old novice band.

Geoff.

This cannot be, for no one wants to take anything away from Morse code users.

Hi,

I'm trying to help my elderly Dad (95) to tune his YEASU FT-990. He is trying to use CW, and I thing I have everything set right, but am not sure. I can not get any needle movement, unless the MOX button is pushed in. I can not locate the Manual for it.

So, what would be the correct settings for transmitting and receiving CW on the Yeasu 990 and what does MOX mean?

Thanks

Richard Wakeman

WTF is a spnak? Is that what you keep getting from your mommy when she catches you on her computer?

Normally, I wouldn't reply to this drivel but I thought I should set the record straight. I am not under arrest. No "MIB" types or
any other officials have said boo about how I sign something so laughable as a post on usenet. I doubt they would even care. The
very notion that someone could get arrested for impersonation because of a usenet post is laughable.

Please, Clown. Call the FBI. Call them up and tell them that I'm Bill Conduit, I'm holed up Oakland furiously forging US government
agent messages from Phoenix and my Rottweiler is trained to kill on command. I'm sure they could use a good laugh.

Go ahead. Here's the number: 602-279-5511

Please call so that the proper authorities can be notified and you can get the mental help you so desperately need.

Thanks.

-Regards,
Smith... Agent Smith.

Why not, 8 years ago, the Arrl did a survey. They asked amateurs who had passed a morse code exam if they EVER used morse code. Two out of three responded "no". I.e. 2/3's of the hams surveyed NEVER used morse code.

Of course in those days they spun it as "1 out 3 sometimes uses morse code".

So if it came to a vote you'd have a hard time keeping things as they are.

Keep in mind that the US has over 600,000 amateurs. The only other country with similar numbers is Japan, most of whom are limited to very low power operation however. If Japan is excluded, all the other countries combined don't have as many amateurs as the US. The foreign countries do have band plans. Unfortunately they do not honor these band plans during contests. It is unlikely that the US would do any better in following voluntary band plans so with our numbers of hams, it may very well be wiser to keep regulated restrictions.

The recent WRC conference has directed broadcasters to move out of the 7.00
to 7.200 segment by 2009 and that will become a ham only band worldwide.

Opening up 7.050 to 7.100 for ssb in the US won't solve your problems. You
will still get clobbered by the US digital signals as they won't move. It's
too well established in the band plans for people to change.

MOX is manual transmit. It's how you can put out a constant carrier for
tuning.

There should be two ways to set your transceiver for doing CW.

Method 1.
Set radio to CW mode
Push the send button to go to transmit mode
Key your CW transmission with straight key or paddles/keyer
Push the send button to return to receive mode

Method 2.
Set the radio to CW mode
Turn the VOX on
Key your CW transmission
Note in this case, the radio automatically switches into transmit when you
key down and returns to receive when on key up. You can set the VOX delay
so that you can return to receive between every dot or dash (full breakin)
or so that you don't return to receive until a longer pause occurs, allowing
you to send whole letters, words, or phrases before reverting automatically
to receive depending on the delay setting (this is called semi-breakin).

The ARRL had a new survey in the last 6 months. Half of the respondants use morse any where from occasionally to 100% of the time. Morse code usage appears to be on the rise. In the past year, participation in the ARRL Morse contests showed an increase of 20% over the previous year. Participation in the voice contests was practically the same as last year with virtually no growth.

So that 8 year old survey does not reflect today's situation.

Bush Overheard, in Merry Old Ireland

By Al Kamen

Monday, July 21, 2003; Page A19

It's a most rare moment whenever anyone outside the government is actually able to sit in on meetings amongst the major players and then report on them right afterward. Usually we have to wait years for memoirs, and those have an annoying tendency to be biased.

But British Prime Minister Tony Blair afforded that extraordinary real-time access to Peter Stothard, former editor of the Times of London, for four weeks in March and April. The result is Stothard's new book, "Thirty Days," which turned out to coincide with the start of the war with Iraq.

Stothard was the constant fly on the wall, sometimes in critical meetings, sometimes just outside the door. The book naturally focuses on Blair, and some say Stothard was a bit too kind to him.

But President Bush and top U.S. officials were often on the stage. For example, Stothard is there April 7 when Blair greets Bush for a summit in Belfast, Northern Ireland. British troops had secured Basra that day.

Blair asked Bush if he'd had a good trip. " 'Yes,' Bush replied, 'I go to sleep, wake up and here I am in Merry Old Ireland.' " Stothard mildly notes that "Northern Ireland is not normally known as 'merry,' " and that, in any event, they were not in the Irish republic, but in Great Britain.

The two leaders wanted to work out what role the United Nations would play in postwar Iraq. Blair wanted to describe it not as merely "important," which had been the understanding, but "of vital importance," according to Stothard. The Brits were happy that Bush agreed to promise in the next day's news conference that the United Nations would play "a vital role."

Indeed he did. The press near national security adviser Condoleezza Rice counted how many times Bush said "vital role." The figure was eight.

"You were brilliant," British Foreign Secretary Jack Straw told Bush after the news conference. Rice was less ebullient.

"Rice begins gently to suggest to her boss that some of their colleagues back in Washington might not be best pleased. When she becomes more vigorous," Stothard wrote, Bush "leads her away from the crowd. "He looks at

first concerned, then a bit frosty."

Later, at a photo session, "Rice continues her commentary on the excess vitality of the press conference," Stothard writes. "'Ease it, Condi, ease it,' says the president. The dispute ceases."

Shortly thereafter, Rice is "sitting on a bench under a large tapestry of Don Quixote tilting at windmills and talking on her mobile phone to Washington.

"'Yes,' she says firmly, 'a vital role for the U.N. I just want to make sure that the DOD doesn't say anything wrong about this. Yes, it's important that we all use the same language.' "

Don't Put the Pandas on the Cover Next
Our July/August issue of Zoogoer, the magazine of the National Zoo, has a lovely photo on the front in keeping with the July 4th holiday. Yes, it's a bald eagle, looking probably much like the one that was killed at the zoo on that very day.

"The bald eagle's return from the brink of extinction," Lucy H. Spelman writes in her letter from the zoo director, is a great success story, "and one that we share with our visitors in a new Bald Eagle Refuge exhibit."

The former eagle, apparently killed by a fox, was not in the new exhibit, but rather in the old one, which Spelman described as "in great need of renovation." Doubtless could use some enhanced security.

As it turns out, the fallen bird was one of a pair given to President Ronald Reagan by the West German government when he visited that country in 1982. That year marked the 200th anniversary of the selection of the bald eagle as the central figure in the Great Seal of the United States. Unclear what happened to the other eagle.

Well, when the magazine went to press it must have seemed like a good idea to go with the eagle on the cover. But, as they say, timing is everything.

Unfortunate Choice of Metaphors
Quote of the week: "Only in Washington would the guy who tried to hit the brakes get blamed for the crash by the people who had their feet on the accelerator." -- Rep. David R. Obey (D-Wis.), commenting Monday, before the Santa Monica tragedy, on CIA Director George J. Tenet's taking the hit for not excising those 16 little words on Iraqi nuclear programs from Bush's State of the Union speech.

Wanted: WMD and Health Ministry Adviser
This just in from Shreveport, La. Federal agents last week arrested a Shreveport contractor who was wanted on charges he misapplied other contractors' payments totaling more than $1.4 million. The contractor, Joseph Whitaker, was nabbed at a LaQuinta Inn in El Paso, Tex., the Associated Press reported, less than 24 hours before he was going to leave for Iraq.

Was he going to Iraq to escape prosecution? No, he was reportedly going to take a position as a senior adviser to the Iraqi Ministry of Health, according to the AP. Whitaker's construction company, now in bankruptcy, was the lead contractor on a $7.1 million hospital project in Louisiana. Fifteen subcontractors have filed liens against the hospital, saying Whitaker did not pay them.

Moving Around
Makan Delrahim, chief counsel and staff director of the Senate Judiciary Committee, is leaving the Hill to be deputy assistant attorney general in the Justice Department's antitrust division.

Political consultant Robert Rosen, who headed the White House advance office in the Clinton administration, is moving to the Hill to be political director for Sen. Edward M. Kennedy (D-Mass.) Rosen replaces Stephen Kerrigan, who is moving to Massachusetts to work for Attorney General Tom Reilly.

Bush Warns Iran, Syria to Stop 'Terror' Support
By REUTERS

Filed at 4:20 p.m. ET

CRAWFORD, Texas (Reuters) - President Bush accused Iran and Syria on Monday of supporting militants seeking to undo the fragile Middle East peace process and warned they would be held accountable.

Bush issued the warning at a news conference with Italian Prime Minister Silvio Berlusconi on a hot day at Bush's central Texas ranch.

Berlusconi, currently president of the European Union, called for European solidarity with the United States amid French attempts for Europe to separate itself from America.

``Selfishness, narcissism and division will never win,'' Berlusconi said. ``We need to revive the huge strength of cohesion.''

On Iraq, Bush said he would welcome more international support for helping increase security in the chaotic country, where American troops continue to die every day under guerrilla attack by Saddam Hussein loyalists and others.

``The more people involved in Iraq, the better off we will be,'' said Bush, who is under increasing political pressure to bring home U.S. troops.

But he doubted a new U.N. resolution was necessary as a mandate for the support, saying the existing resolution 1483 ``empowers countries to make a proper decision to get involved in Iraq.'' Some countries are asking for a new resolution, and U.S. officials have not ruled it out entirely.

Bush's blast at Syria and Iran was unprompted. It came in his opening statement as he talked about the possibility for progress in the Middle East, with Palestinian Prime Minister Mahmoud Abbas coming to Washington for talks on Friday with Bush and Israeli Prime Minister Ariel Sharon to follow in the days ahead.

``Today Syria and Iran continue to harbor and assist terrorists. This behavior is completely unacceptable and states that support terror will be held accountable,'' Bush said.

Bush has branded Iran -- along with North Korea and the Iraq of ousted President Saddam Hussein -- as a member of an ``axis of evil'' that threatens to spread terrorism. Washington charges Iran is not doing enough

against members of the militant al Qaeda network.

U.S. officials have also accused Syria of backing Palestinian and Lebanese groups it classifies as terrorist, concerned their conflict with Israel could endanger the Middle East peace process.

Bush urged Middle Eastern governments including Syria and Iran to support Middle East peace efforts.

``Both Prime Minister Abbas and Prime Minister Sharon are showing leadership and courage. Now it is time for governments across the Middle East to support the efforts of these two men by fighting terror in all its forms,'' Bush said.

A senior Bush administration official said Bush raised the topic as a timely reminder that the war on terrorism continues and that it is a hopeful moment for Middle East peace efforts.

Bush and Berlusconi have been close allies on the Iraq war and its aftermath. Bush said he told the Italian that the United States would not be cowed by the guerrilla attacks.

``We're patient, we're strong, we're resolute, and we will see this matter through,'' he said.

Welcome to the Soviet Style Republican Congress Presided Over by Stalinist Wannabes Bill Thomas and Tom DeLay

A BUZZFLASH NEWS ANALYSIS
With a Little Help from Our Readers

Yes, on July 18th, Soviet style Republican thug, House Ways and Means Chairman Bill Thomas, called the Capitol Police to stop Democrats from protesting his Brezhnev style committee dictatorship. But, of course, Thomas (who had an adulterous affair with a pharmaceutical company lobbyist while writing Medicare prescription legislation a couple of years back) wouldn't have called the cops without the okay of the Stalin of the U.S. Congress, the "Toxic Psychotic" Tom DeLay. (As we've noted many a time, Denny Hastert is just a figurehead. He was chosen because he was the only Republican who had no sexual skeletons in his closet. Denny is more interested in a turkey leg than the leg of a woman. Tom DeLay figured it was better to pick a guy for house speaker who had gravy stains on his tie than a guy who had panties -- or jock straps --in his desk drawer.)

Here's what two Democratic congressmen had to say about Thomas's KGB style behavior:

"My friends, this is how tyranny begins," said Lloyd Doggett, D-Texas, a Ways and Means Committee member. "It is our responsibility to stand against a police state, to stand in favor of open dialogue rather than to permit a bill to pass with only the votes of one party, and move toward a one-party state."

"I never thought, as a member of Congress, that I would be threatened with arrest in the library of the Ways and Means Committee," [Congressman John] Lewis said during the House debate.

See: "Democrats outraged that capitol police were called during meltdown at House Ways and Means Committee vote"

You see, Thomas claims that a 71-year-old Democratic was on the verge of physically harming Republicans:

Republicans defended Thomas, saying he had no choice but to call in police to head off physical attacks they said appeared imminent from Rep. Fortney "Pete" Stark, a 71-year-old Democrat from California.

They said Stark had threatened Rep. Scott McInnis, a 50-year-old Colorado Republican calling him "you little wimp" and "you little fruitcake."

House Minority Leader Nancy Pelosi, D-Calif., insisted that the police had already been called before the confrontation involving Stark and said Republicans were "in denial about their behavior.

Did Bill Thomas violate the Constitution? One BuzzFlash reader thinks so:

House Republicans Openly Violated the U.S. Constitution Today

U.S. Constitution, Article I, Sec. 6:

"[The Senators and Representatives] shall in all cases, except treason, felony and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House, they shall not be questioned in any other place."

After the Capitol Police Were Called by the GOP Thugs, The Republican Thugs Defeated This Nancy Pelosi Resolution to Protest the Stalinist Rule of Tom DeLay and Bill Thomas:

H.Res. 324 - Whereas during a meeting of the Committee on Ways and Means on July 18, 2003, for consideration of the bill H.R. 1776, the chairman of the Committee on Ways and Means offered in the nature of a substitute; Whereas during the reading of that amendment the chairman of the Ways and Means Committee directed majority staff of the committee to ask the United State Capitol Police to remove minority-party members of the committee from a room of the committee during the meeting, causing the United State Capitol Police thereupon to confront the minority-party members of the committee; Whereas pending a unanimous-consent request to dispense with the reading of that amendment the chairman deliberately and improperly refused to recognize a legitimate and timely objection by a member of the committee; Now, therefore, be it Resolved, that the House of Representatives disapproves of the manner in which Representatives Thomas conducted the markup of legislation in the Committee on Ways & Means on July 18, 2003, and finds that the bill considered at that markup was not validly ordered reported to the House.

Do we live in a police state? One BuzzFlash Reader Wants to Know.

"A top House leader called the Capitol Police to evict Democrats from a committee room.Infuriated, Ways and Means Committee Bill Thomas (R-Calif.) instructed the Capitol Police to remove the Democrats from the [Ways and Means Committee] library.After the one remaining Ways and Means Democrat got in a spat with a GOP committee member, Thomas dispensed with the reading of the bill altogether and pushed through the legislation, without a single Democratic vote."
- CBS Marketwatch and Washington Post, 7/18/03

"A branch of the Department of Homeland Security got involved in the search for a plane believed to be carrying Texas House members.a federal agency responsible for fighting terrorism played a role in looking for a plane that supposedly had some of the exiled legislators in it.U.S. House Majority Leader Tom DeLay said Thursday that his staff had asked the FAA to find former House Speaker Pete Laney's plane. Mr. DeLay, a Republican from Sugar

Land, previously had acknowledged only asking the Department of Justice to clarify what role, if any, federal law enforcement might appropriately play in forcing Democratic state legislators back to Austin."
- Ft. Worth Star-Telegram, 5/16/03, Dallas Morning News, 5/23/03

"On Wednesday morning, when the ABC news show reported from Fallujah, where the division is based, the troops gave the reporters an earful. One soldier said he felt like he'd been 'kicked in the guts, slapped in the face.' Another demanded that Defense Secretary Donald Rumsfeld quit. The retaliation from Washington was swift. 'It was the end of the world,' said one officer Thursday. 'It went all the way up to President Bush and back down again on top of us. At least six of us here will lose our careers. Abizaid said that soldiers quoted yesterday on ABC News' 'Good Morning America' questioning their mission in Iraq and calling for Rumsfeld's resignation were wrong and could be disciplined."
- SF Chronicle, 7/18/03 and Washington Post, 7/16/03

U.S. Troops Fix Bayonets Against Iraqi Crowd
Sun Jul 20, 4:07 PM ET Add World - Reuters to My Yahoo!

By Miral Fahmy

NAJAF, Iraq (Reuters) - U.S. Marines fixed bayonets on Sunday to disperse an angry crowd of 10,000 Iraqi Shi'ites in the holy city of Najaf after tempers flared over rumors of U.S. harassment of a radical cleric.

Marchers dispersed after two hours but some of the Shi'ite cleric's supporters warned of an "uprising" in the city if the Americans failed to pull out within three days.

"If they don't leave, they will face a popular uprising," said Sayed Razak al-Moussawi, an aide to the anti-U.S. cleric Moqtada al-Sadr.

Protesters presented the U.S. forces with a list of demands.

Under a fierce sun, aides to Sadr struggled to restrain his supporters and the show of force by the Marines halted the march on the U.S. administration office in the dusty and impoverished city, 160 km (100 miles) south of Baghdad.

In heated negotiations, nose-to-nose with one of Sadr's aides, the U.S. commander in Najaf, Lieutenant-Colonel Chris Conlin, denied reports his men had surrounded Sadr's house on Saturday and warned his men would respond if threatened.

Passions sparked by the incident were indicative of problems facing U.S. troops among the long-oppressed Shi'ite majority. Attacks on U.S. troops since the fall of Saddam Hussein (news - web sites) have mostly been by Sunni Muslims.

Many protesters were bussed into Najaf from Baghdad's poor Shi'ite bastion, Sadr -- formerly Saddam -- City. Others rode in on battered pick-up trucks and even ambulances.

"Moqtada, have no fear, your army of volunteers is here," they chanted, rhythmically beating their chests in a traditional Shi'ite ritual. "We would sacrifice our lives for you."

The demonstration set off from the gold-domed Imam Ali mosque. Carrying banners, the crowd circled the mosaic-encrusted shrine, inspiring worshippers to join in their political chants.

"Long live Sadr; America and its government in Iraq (news - web sites) are infidels," cried Ayyad Abdullah, who like many protesters, wore the white shroud in which Muslims are buried. "Moqtada can give the Shi'ites everything they want. We'd happily die for him."

Conlin said he believed Sadr had limited support in Najaf, where other, more senior religious figures are based.

Sadr, a young cleric with limited religious authority, denounced the U.S. occupation of Iraq in a sermon on Friday and condemned U.S. efforts to launch self-rule by a new Governing Council.

Cheney Task Force Had Eyes on Iraq Oil
Fri Jul 18, 8:21 PM ET Add White House - AP to My Yahoo!

By H. JOSEF HEBERT, Associated Press Writer

WASHINGTON - Vice President Dick Cheney (news - web sites)'s energy task force appeared to have some interest in early 2001 in Iraq (news - web sites)'s oil industry, including which foreign companies were pursuing business there, according to documents released Friday by a private watchdog group.

Judicial Watch, a conservative legal group, obtained a batch of task force-related Commerce Department (news - web sites) papers that included a detailed map of Iraq's oil fields, terminals and pipelines as well as a list entitled "Foreign Suitors of Iraqi Oilfield Contracts."

The papers also included a detailed map of oil fields and pipelines in Saudi Arabia and in the United Arab Emirates and a list of oil and gas development projects in those two countries.

The papers were dated early March 2001, about two months before the Cheney energy task force completed and announced its report on the administration's energy needs and future energy agenda.

Judicial Watch obtained the papers as part of a lawsuit by it and the Sierra Club (news - web sites) to open to the public information used by the task force in developing President Bush (news - web sites)'s energy plan.

Tom Fitton, the group's president, said he had no way to guess what interest the task force had in the information, but "it shows why it is important that we learn what was going on in the task force."

"Opponents of the war are going to point to the documents as evidence that oil was on the minds of the Bush administration in the run-up to the war in Iraq," said Fitton. "Supporters will say they were only evaluating oil reserves in the Mideast, and the likelihood of future oil production."

The task force report was released in May 2001. In it, a chapter titled "Strengthening Global Alliances" calls the Middle East "central to world oil security" and urges support for initiatives by the region's oil producers to open their energy sectors to foreign investment. The chapter does not mention Iraq, which has the world's second largest oil reserves after Saudi Arabia.

Commerce Department spokesman Trevor Francis said: "It is the responsibility of the Commerce Department to serve as a commercial liaison for U.S. companies doing business around the world, including those that develop and utilize energy resources. The Energy Task Force evaluated regions of the world that are vital to global energy supply. The final report, released in May of 2001, contains maps of key energy-producing regions in the world, including Russia, North America, the Middle East and the Caspian region."

A spokeswoman for the vice president did not immediately return a phone call seeking comment Friday.

A two-page document obtained with the map and released by Judicial Watch lists, as of March 2001, companies in 30 countries that had an interest in contracts to help then-President Saddam Hussein (news - web sites) develop Iraq's oil wealth.

The involvement of Russia and France has been documented. Also on the list were companies from Canada, Australia, China, Germany, Indonesia, Ireland, India and Mexico. Even Vietnam had interest in a service contract and, according to the paper, was close to signing an agreement in October 1999.

So far nearly 40,000 pages of internal documents from various departments and agencies have been made public related to the Cheney task force's work under the Judicial Watch-Sierra Club lawsuit. The task force itself has refused to turn over any of its own papers.

Uranium Deception May Be Tip of the Iceberg

Tell Congress Member to Co-Sponsor Push for Investigations

With each passing day new revelations are surfacing about the justifications cited by President Bush to launch an American attack on Iraq. Bush's allegation that Saddam tried to buy uranium is the first claim getting the scrutiny it deserves. Here are a few more from the same State of the Union Address:
* "Our intelligence officials estimate that Saddam Hussein had the materials to produce as much as 500 tons of sarin, mustard, and VX nerve agent." ...None has been found.

* "U.S. intelligence indicates that Saddam Hussein had upwards of 30,000 munitions capable of delivering chemical agents." ...No trace of such weapons has been found.

* "Our intelligence sources tell us that he (Saddam) has attempted to purchase high-strength aluminum tubes suitable for nuclear weapons production." ...Yet months before the war the International Atomic Energy Agency and other leading scientists determined that these tubes were unsuitable for producing nuclear weapons.

War is the gravest act a country can commit. America and indeed the whole world need to know if the justifications for starting this last war were truthful. Congress in the past has unearthed important truths about the conduct of our nation's government. It's time again, and there are two bills in Congress that would open meaningful investigations into what happened. To send a free fax* to your Congress Member (text below) urging your Representative to co-sponsor HR-307 and HR-2625 just hit "Reply" and "Send." If you are not currently registered with TrueMajority or you would like to customize your message, click here.

http://www.truemajority.org/

Yours in truth seeking,
Ben's
Ben Cohen
President, TrueMajority.org
Co-Founder, Ben & Jerry's Ice Cream+

Here's the letter we'll send to your Representative:

Dear Representative:

As a constituent of yours, I am very concerned about the almost daily revelations about the validity of the justification used to launch America's attack on Iraq. I understand that two pieces of legislation are now introduced in the House, either of which will launch meaningful investigations. Please add your name to a growing list of legislators, including many who voted for the initial war resolution last October, who are interested in learning what the administration knew and when. Please co-sponsor HR-307 and HR-2625.

The responsibility of Congressional oversight sits squarely on your shoulders. I would like to know that my member of Congress is asking these important questions. Thank you for your continued effort on this issue.

Sincerely,
(We'll put your name and address here.)

+ I am writing this email on my own and not on behalf of Ben & Jerry's, which is not associated with the TrueMajority campaign.

* note: A few of our strongest allies in Congress have asked us to send emails to them instead of faxes. This makes it easier for them to contact you about their position on the issue. We agree that we should help our friends in this way, and therefore we send emails instead of faxes to these special members of Congress.

Your not going to get any here, try somewhere more aligned with what you are persuing.
You should only associate yourselves with those that you have something in common with.

July 22, 2003 Release Number: 03-07-68

FOR IMMEDIATE RELEASE

STATEMENT REGARDING OPERATION IN MOSUL, IRAQ

Statement from US Central Command:

On Tuesday, July 22, forces associated with the 101st Airborne Division and Special Operations Forces conducted an operation against suspected regime figures at a residence in Mosul, Iraq. The site is currently being exploited. Four Iraqis were killed in the operation. We have confirmed that two of the dead were Saddam's sons Uday and Qusay

I doubt CW will be outlawed. As it stands, CW is legal just about anywhere (and I've used that to *very* good advantage when someone tried to QRM me). Just drop in the 250 Hz bandpass filter on the rig, run it through DSP, and let the SSB, AM, FM, RTTY, and anyone else try and get through it :)

I remember well when I got W2OY's blood pressure to rise (likely over 200). I had to stop and open up the bandwidth to hear him whining after he tried to jam a QSO between me and a Pennsylvania station. His kilowatt didn't fare very well against our 75/100 watts. Joy joy joy! Say what you want, most folks are very dependent upon their computers and *still* can't type worth beans :)

Columnist Blows CIA Agent's Cover

By Timothy M. Phelps and Knut Royce
WASHINGTON BUREAU; Timothy Phelps is the Washington bureau chief.

July 22, 2003

Washington - The identity of an undercover CIA officer whose husband started the Iraq uranium intelligence controversy has been publicly revealed by a conservative Washington columnist citing "two senior administration officials."

Intelligence officials confirmed to Newsday yesterday that Valerie Plame, wife of retired Ambassador Joseph Wilson, works at the agency on weapons of mass destruction issues in an undercover capacity - at least she was undercover until last week when she was named by columnist Robert Novak.

Wilson, while refusing to confirm his wife's employment, said the release to the press of her relationship to him and even her maiden name was an attempt to intimidate others like him from talking about Bush administration intelligence failures.

"It's a shot across the bow to these people, that if you talk we'll take your family and drag them through the mud as well," he said in an interview.

It was Wilson who started the controversy that has engulfed the Bush administration by writing in the New York Times two weeks ago that he had traveled to Niger last year at the request of the CIA to investigate reports that Iraq was trying to buy uranium there. Though he told the CIA and the State Department there was no basis to the report, the allegation was used anyway by President George W. Bush in his State of the Union speech in January.

Wilson and a retired CIA official said yesterday that the "senior administration officials" who named Plame had, if their description of her employment was accurate, violated the law and may have endangered her career and possibly the lives of her contacts in foreign countries. Plame could not be reached for comment.

"When it gets to the point of an administration official acting to do career damage, and possibly actually endanger someone, that's mean, that's petty, it's irresponsible, and it ought to be sanctioned," said Frank Anderson, former CIA Near East Division chief.

A current intelligence official said that blowing the cover of an undercover officer could affect the officer's future assignments and put them and everyone they dealt with overseas in the past at risk.

"If what the two senior administration officials said is true," Wilson said, "they will have compromised an entire career of networks, relationships and operations." What's more, it would mean that "this White House has taken an asset out of the" weapons of mass destruction fight, "not to mention putting at risk any contacts she might have had where the services are hostile."

Deputy White House Press Secretary Claire Buchan referred questions to a National Security Council spokesman who did not return phone calls last night.

"This might be seen as a smear on me and my reputation," Wilson said, "but what it really is is an attempt to keep anybody else from coming forward" to reveal similar intelligence lapses.

Novak, in an interview, said his sources had come to him with the information. "I didn't dig it out, it was given to me," he said. "They thought it was significant, they gave me the name and I used it."

Wilson and others said such a disclosure would be a violation of the law by the officials, not the columnist.

Novak reported that his "two senior administration officials" told him that it was Plame who suggested sending her husband, Wilson, to Niger.

A senior intelligence official confirmed that Plame was a Directorate of Operations undercover officer who worked "alongside" the operations officers who asked her husband to travel to Niger.

But he said she did not recommend her husband to undertake the Niger assignment. "They [the officers who did ask Wilson to check the uranium story] were aware of who she was married to, which is not surprising," he said. "There are people elsewhere in government who are trying to make her look like she was the one who was cooking this up, for some reason," he said. "I can't figure out what it could be."

"We paid his [Wilson's] air fare. But to go to Niger is not exactly a benefit. Most people you'd have to pay big bucks to go there," the senior intelligence official said. Wilson said he was reimbursed only for expenses.

1 US Soldier Killed, Another Wounded in Iraq Ambush
VOA News
22 Jul 2003, 13:26 UTC

U.S. Central Command says one American soldier was killed and another wounded Tuesday in an ambush west of Baghdad.

A statement says a U.S. convoy was hit by a rocket-propelled grenade and small arms fire on the road between the towns of Balad and Ar Ramadi.

Both towns are in an area that has become known as the Sunni Triangle, which is home to many loyalists of ousted Iraqi leader Saddam Hussein and his outlawed Baath Party.

At least 37 U.S. soldiers have been killed by hostile action since May 1, when President George Bush declared major combat in Iraq to be over.

Meanwhile, residents of the northern Iraqi city of Mosul say U.S. soldiers stormed a house today searching for Saddam's sons Qusay and Uday. Reuters news agency quotes U.S. army Lieutenant Colonel William Bishop as saying several people of "very high interest" have been detained.

Witnesses say a gunbattle broke out during the raid, and that the house lay in ruins afterward.

Later Tuesday, the U.S. civilian administrator in Iraq, Paul Bremer, is to brief U.S. lawmakers on progress in efforts to stabilize and rebuild Iraq. He is expected to face tough questioning from Democratic lawmakers, who have raised concerns about continuing American casualties as well as the financial burden of reconstruction efforts.

Today, the civilian authority announced the set-up of a new Trade Bank of Iraq, which will have a capital of $100 million. The bank is to support the import and export of goods for Iraq.

Bush the Believer

By Richard Cohen

Tuesday, July 22, 2003; Page A17

Is George Bush the Iraq war's "useful idiot"?

The phrase was coined by Vladimir Lenin to refer to gullible communist sympathizers who swallowed whole the party line. They believed what they were told, and what they were told was mostly lies.

It could be somewhat the same with Bush. He may well be the last person to believe that the Iraq war was waged virtually in self-defense. He believes that Saddam Hussein was on the verge of obtaining nuclear weapons. He believes Hussein had other weapons of mass destruction and that he was linked somehow -- don't ask how -- to Osama bin Laden, al Qaeda and the events of Sept. 11.

The evidence is nowhere to be found. No weapons of mass destruction have turned up. An advanced Iraqi nuclear program seems to be, well, not so advanced. The evidence for it is either bogus or so tenuous as to be far from convincing. Ties to al Qaeda -- "bulletproof evidence," in the words of Don Rumsfeld -- have not been proved and never made much sense anyway. Al Qaeda is not well disposed toward secular leaders.

What evidence exists suggests, in fact, that the United States was hankering for a war no matter what. Intelligence -- no matter how fragmentary or inconclusive -- was shaped, molded and goosed until it could be used to prove that Hussein had to be taken out swiftly. The bogus uranium from Niger is a mere detail in this regard -- a smoking gun, yes, but one in the hands of White House aides for whom truth meant less than impact.

The real mystery is whether Bush himself realized how weak the evidence for a preemptive war was or was being manipulated by a cadre of disciplined administration aides who long had sought a war with Iraq. These are some of the very same people who in 1998 wrote a letter to President Clinton arguing that America should abandon containment, "removing Saddam Hussein and his regime from power." Ten of the 18 signatories -- including Rumsfeld and Paul Wolfowitz -- are now in the Bush administration and were among the most vigorous proponents of war. Rumsfeld, Bob Woodward tells us, argued at the first Cabinet meeting after the Sept. 11 attacks for war on Iraq.

They may have been right then and they may be right now -- and in my view, a pretty good case can still be made for the war. But that's not really the case Bush made. Instead of arguing that down the road Iraq might have a nuclear weapons program or that eventually the United Nations would lose interest in maintaining sanctions, he raised the rhetorical danger to one of virtual imminence: Hit Iraq quick -- before Hussein could hit us.

That was a bogus argument. The war could have waited. But Bush could not. My guess is that his tendency to see things in black and white and an un-Clintonian determination to eschew micromanaging led him astray. The president "is not a fact-checker," an administration aide told the media last week in explaining why Bush used weak evidence in his State of the Union message.

But neither is Colin Powell. Yet he went over the evidence carefully, discarding some of it before he made his own presentation to the United Nations. Powell might have suspected what Bush apparently did not -- that some administration officials were so intent on war they were cooking the books.

The proposals contained in the 1998 letter to Clinton were either bold or reckless, depending on your point of view. Whatever the case, Bush essentially adopted them. But in choosing an unconventional course, he persisted in using the conventional language of self-defense. In fact, he opted for a discretionary war, one waged not so much to preempt terrorism -- although that was part of the mix -- as to reorder the Middle East.

Had Bush made the same case for war that his aides did in 1998, that could have been debated. But it was a hard case to make, because Hussein really and truly did not pose an imminent threat to the United States. He posed a distant or theoretical threat -- and not really to America but to our interests and allies.

Now Bush stands abandoned by events. No weapons of mass destruction. No nuclear program. No links to al Qaeda. His judgment and his competence are being questioned -- his honesty as well. But the president is no liar. More likely, he is merely an uncritical man who believed what he was told. Lenin knew the type.

Bush in new threat to Iran and Syria

Duncan Campbell in Los Angeles
Tuesday July 22, 2003
The Guardian

President George Bush issued a strident new warning to Iran and Syria yesterday, accusing them of harbouring terrorists and hinting at the consequences. "This behaviour is completely unacceptable," he said during a joint press conference at his ranch in Crawford, Texas, with the Italian prime minister, Silvio Berlusconi. "And states that continue to harbour terrorists will be held completely accountable."
Mr Bush said that the sponsoring of terrorism in the region was undermining the latest push for peace in the Middle East, which is delicately poised after promising overtures last month.

The US president will meet both the Palestinian prime minister, Mahmoud Abbas, and his Israeli counterpart, Ariel Sharon, in Washington later this month, and is keen to ensure that the influence of regional power brokers Syria and Iran does not jeopardise recent progress.

"Both prime minister Abbas and prime minister Sharon are showing leadership and courage," Mr Bush said. "Now it's time for governments across the Middle East to support the efforts of these two men by fighting terror in all its forms."

Iran's nuclear ambitions are looming particularly large over the region. Israel warned yesterday that Iran "is trying everything" to get a nuclear weapon, and that if it succeeded it would threaten a far wider theatre than just the Middle East.

Iran denied the charge, saying that developing nuclear weapons would imperil its own safety. It repeated the claim that its nuclear developments are aimed at meeting energy needs and are in no way a threat to the region.

But the EU also voiced "increasing concern" about Iran's nuclear manoeuvres, and warned that a trade deal could be in jeopardy unless Tehran allows inspectors to look at its nuclear projects. The Bush administration has made no secret of its desire for regime change in Iran, but has had even less international support than it had for toppling Saddam Hussein.

During Mr Berlusconi's visit, the US president has thanked him for his support as part of the "coalition of the willing" during the war in Iraq.

Before sitting down to a chicken lunch at the ranch, Mr Bush said: "Defending freedom requires cost and sacrifice. The United States is grateful for Italy's willingness to bear the burdens with us."

Mr Bush expressed concern about the deteriorating situation in Liberia, but stopped short of specifying what sort of contingent he would commit to the country beyond the 40 marines sent in yesterday to protect its embassy in Monrovia

Antiwar Groups Say Public Ire Over Iraq Claims Is Increasing

By Evelyn Nieves
Washington Post Staff Writer
Tuesday, July 22, 2003; Page A03

SAN FRANCISCO -- The letters are pouring in like a water main break -- fast and, yes, furious. From Alabama: "We want to know the truth!" From Arizona: "If there's nothing to hide, what's the harm in a bipartisan inquiry?" From Mississippi: "We must get to the truth -- whatever it is!"

About 400,000 people from every state have contacted members of Congress in the past three weeks as part of a MoveOn.org petition that asks Congress to investigate the controversial claims that led to the war on Iraq, with more than 50,000 people signing on to the liberal activist Web site in the past five days alone.

"It seems more and more people who supported the war are signing on," said Eli Pariser, MoveOn.org's campaigns director. "They're angry. People who in the past couple of weeks before the war decided to support it are swinging back."

For organizations that opposed the war, these are busy days. Not since hundreds of thousands of people across the country marched in antiwar rallies in the weeks before the U.S.-led invasion has the rationale for the preemptive war come under such fire. The groups hope to galvanize a broad spectrum of the American people, a majority of whom supported the war, but with reservations. The goal is to persuade public officials to support an independent, bipartisan commission modeled on the panel investigating the Sept. 11, 2001, terrorist attacks. In the week since the administration admitted that President Bush's State of the Union speech in January should not have mentioned that the British had "learned" Iraq had tried to buy uranium from Africa for a nuclear weapons program, antiwar groups say that more and more Americans have been contacting them, looking for answers.

"You know an issue has momentum," said Andrea Buffa, co-chair of the United for Peace and Justice coalition, "when people are coming into your office to ask if there's a protest planned about it."

And, with other intelligence claims about an Iraq nuclear program under scrutiny, weapons of mass destruction yet to be found and U.S. soldiers dying in Iraq nearly every day, antiwar coalitions are seizing on the public's growing concerns over the war, as recent polls have indicated, to

try to reenergize their movement and force an examination of the process and the policies that led to the war.

So far, Congress has been split along party lines on the issue of formal reviews and the issue, some in the movement fear, could become a strictly partisan one, diluting its appeal. The Democratic National Committee has begun running a television ad accusing Bush of deception -- ads the Republicans have asked broadcasters not to air. Last week, Senate Democrats proposed examining the prewar intelligence, while Republicans in the majority voted against the proposals, each side accusing the other of playing partisan politics. (Republicans also say that intelligence reviews are already underway in House and Senate committees.)

But antiwar groups, almost by definition also anti-Bush, say they hope this issue reaches beyond party politics. They point out that two House bills -- one to create a nonpartisan, independent commission on the intelligence questions, the other to create a committee in the House to investigate the controversy (and to complete its findings before the 2004 election), are sponsored by California Democrats who voted to authorize the war, Reps. Henry Waxman and Ellen Tauscher, respectively.

Both United for Peace and Justice and Win Without War, the largest mainstream antiwar coalitions, with hundreds of member groups, including the National Council of Churches and the AFL-CIO, have launched campaigns that include petitions demanding an investigation into the intelligence that led to war, print and television ads that accuse Bush of misleading the nation with discredited or unproven claims about Iraq's nuclear arsenal and suggestions for organizing at the local level to reinvigorate the broad movement that developed in the weeks before the war.

"Since the war started we've had a pretty lackluster response from the grass roots and this issue has really lighted a fire," said David Cortright, co-founder of Win Without War and president of the Fourth Freedom Forum, a foreign policy think tank that advocates nonviolent conflict resolution. "Our strategy is to keep trying to reach those persuadable voters. We're going to do a new ad and pick major cities -- say, Detroit or Des Moines -- to air them and at the same time try to work on local events. Local groups will lobby their members of Congress. We'll have a series of public communication action efforts."

Groups such as Cortright's Fourth Freedom Forum, which investigated several administration claims, including linking Saddam Hussein to al Qaeda, say they have been ready for this moment to disseminate the information they have gathered over the past several months.

The public is clearly anxious for information, said Erik Gustafson, a Gulf War veteran who founded the Education for Peace in Iraq Center (EPIC) in 1998 to call attention to what opponents of U.S. policy describe as a humanitarian catastrophe created by economic sanctions imposed on Iraq because of the 1991 war.

"The number of people who actually read our e-mail alerts was 3,000 last June and 10,000 this June, which gives you some indication of interest," he said. But, he added, the public also clearly needs the authority of a full-scale official investigation. When he tried convincing Americans that the case for war had not been made, he said, "the greatest challenge was the number of people who said, 'There must be something there.' But I think even the Americans who will say that war was a good idea overall want accountability."

Like members of the large antiwar organizations -- EPIC considers itself neither antiwar, per se, nor anti-Bush -- Gustafson's organization has been asking the public to lobby Congress for an investigation into the claims about weapons of mass destruction, as well as the chaos that has gripped much of Iraq since the war.

But some of those who were raising questions about the claims for war early on remain skeptical that these efforts will lead to any meaningful investigation. Mark Karlin, editor of BuzzFlash.com, with 2.4 million readers per month, said his readership doubts anything will come of the disputed intelligence claims. "I think the BuzzFlash readership is very skeptical that this is going to be kept alive," he said, "because they've heard claims outed before and nothing has come of them."

Still, Win Without War and MoveOn.org are already calling a 30-second ad they co-sponsored, which aired over the past week in the Washington and New York area cable markets, an unqualified hit. The ad, which labels Bush a "misleader," brought in thousands of people to the MoveOn.org Web site to sign the petition. The coalition said it will place ads in at least 10 other cities over the next two weeks.

Waxman's bill doubled its co-sponsors in the week after the ad aired, from 23 to nearly 50, said his chief of staff, Phil Schiliro. "And we expect quite a few more directly as a result of the petition," he added.

Last Wednesday, co-sponsors of Waxman's bill began reading MoveOn.org petition letters on the House floor after the last vote of the night. Rep. Sherrod Brown (D-Ohio) said he and his colleagues were doing this because Republicans wouldn't allow them to debate the subject of an investigation on the floor. He said they plan to read letters every night until the August recess.

Saddam's Sons Confirmed Dead
July 22, 2003

Saddam Hussein's sons Odai and Qusai were killed in a six-hour firefight Tuesday when U.S. forces surrounded and then stormed a palatial villa in the northern Iraqi town of Mosul, a senior American general said.

"We are certain that Odai and Qusai were killed today," said Lt. Gen. Ricardo Sanchez at a news conference in Baghdad. "The bodies were in such a condition where you could identify them."

Four coalition soldiers were wounded and two other Iraqis were killed in the raid, but Saddam was not among them. The house belonged to one of Saddam's cousins, a key tribal leader in the region.

The deaths of the sons could have a major impact on the Iraqi resistance, which has been mounting about a dozen attacks a day against U.S. occupation troops. The guerrillas are thought to be former military officers and Baath Party leaders loyal to Saddam and his family, especially the sons, who played primary roles in the military and feared security services.

Odai and Qusai ranked second only to their father in the deposed regime. They were Nos. 2 and 3 on the U.S. list of 55 top former Iraqi officials wanted by Washington. The United States had offered a $25 million reward for information leading to Saddam's capture and $15 million each for his sons.

The U.S. military commander in Iraq says a walk-in tipster revealed their hideout, but top officials in Washington tell CBS News multiple intelligence sources pinpointed the brothers.

In Washington, L. Paul Bremer, Iraq's top civilian administrator, said he did not want to comment on how the deaths of Saddam's sons would affect security in Iraq.

However, Bremer said: "It certainly is good news for the Iraqi people."

"This will contribute significantly to reducing attacks on coalition soldiers," said Ahmad Chalabi, a delegate from the Coalition Provisional Authority, speaking at the United Nations.

Asked whether the killing of the sons would reduce the incessant attacks on American forces, Sanchez said he thought the security situation now would improve.

"I believe very firmly this will have an effect. This will prove to the Iraqi people that these two members of the Iraqi regime will never come to power again," Sanchez said.

Hours after the raid in Mosul, gunfire erupted throughout Baghdad, making travel very dangerous. The shooting was believed to be celebratory as news of the killing of the sons spread through the capital.

"It's probably very appropriate that they would be celebrating about now," Sanchez said.

Fighting broke out after soldiers from the 101st Airborne Division surrounded the stone, columned villa.

When troops approached the building, gunmen inside opened fire with small arms. The "suspects barricaded themselves in the house" and "resisted fiercely," Sanchez said.

"They died in a fierce gunbattle," Sanchez added.

After the firefight, about 1,000 people gathered, some expressing delight, others cursing the Americans.

The soldiers removed four bodies and did not let photographers near enough to take pictures.

Some Mosul civilians appeared to have been caught in the crossfire. It was not known how many people were injured, but several were taken to a hospital.

Officials gave conflicting reports on whether anyone was captured during the assault. The officials said they had no initial information that would suggest Saddam was present during the raid.

Experts conducted DNA tests after the bodies were flown from Mosul to another location, officials said.

Throughout the day, Defense Secretary Donald H. Rumsfeld briefed President Bush personally about the assault.

Qusai, Saddam's younger son, was his father's likely successor, U.S. intelligence officials said. He ran much of Iraq's security apparatus, controlling several militias, internal security services and the military forces of the once-vaunted Republican Guard.

He was described as quiet and level, particularly compared to Odai, Saddam's eldest son, who had a reputation for brutality and flamboyance. Odai controlled Saddam's Fedayeen, the paramilitary force that fought U.S. troops during the war; many of its survivors are thought to be part of the ongoing guerrilla campaign in Iraq.

Odai also controlled information and propaganda in Saddam's Iraq, and was chairman of the country's Olympic committee.

Saddam has a third, younger son, according to some reports, and three daughters. All kept a low profile in his regime.

Mosul, a town 240 miles northwest of Baghdad that housed Iraqi army bases, is outside the so-called "Sunni Triangle" in central Iraq home to much of the remaining support for Saddam, a Sunni Muslim who used his Baathist Party to oppress the country's Shiite majority.

The triangle is also a center of anti-American resistance: In the latest attack, Tuesday, a U.S. soldier was killed and another wounded in an ambush along a dangerous road north of Baghdad. His death brought to 153 the number of U.S. troops killed in action since the March 20 start of war, six more than during the 1991 Gulf War.

In other developments:

Former POW Jessica Lynch returned home to West Virginia nearly four months after she was ambushed by Iraqi forces and later rescued from a hospital. "It's great to be home," she told a cheering crowd.

The Army has approved a plan for rotating fresh troops into Iraq and bringing home those who have served for nearly a year. The plan calls for maintaining troops at their current level of about 145,000 by rotating in one-for-one replacements, defense officials said Tuesday.

U.N. Secretary-General Kofi Annan is urging the United States to quickly restore control of Iraq to its people, warning that "democracy can't be imposed from the outside." In a report to the Security Council, Annan also noted concerns about the U.S. treatment of Iraqi detainees and the failure to improve security in Baghdad.

Where do you come off saying someting like "if they ever knew to begin with" . Do you think you are the voice of America? What does America stand for
to you?

America has come to stand for greed. A country run by corporations more interested in the bottom line then the common man. A country who invades
other countries to get rid of governments it doesn't agree with. A country who now preemptively invades other countries because of things they may do
in the future. A country more interested in spending billions of dollars invading those countries then in taking care of its own at home.

That is what America stands for to me today. That is not the same America I grew up to love and respect.

Can't you see this guy with a key? No wonder people on the other
end never "get it." He can't even construct a meaningful sentence!

And he's talking about jamming other operators to boot! Ain't CW
operators a cut above the rest? (not)

Protesters push for Bush impeachment
By DAN WHITE
Sentinel staff writer

SANTA CRUZ - Angry peace protesters at City Hall displayed a realistic-looking, oversized layoff notice for President Bush on Tuesday, advising him to "vacate your office in 24 hours."

The 80 protesters, waving pink slips, are part of a local movement that wants the City Council to be first in America to pass a resolution not only seeking to impeach Bush, but to clean house at the White House.

"We want a resolution from the city to impeach Bush, Cheney, Rumsfeld, Ashcroft, Powell, Wolfowitz and Condoleeza Rice," said Sherry Conable, active in the impeachment movement. She and others also want the City Council to beef up a local resolution opposing the U.S. Patriot Act, by directing the city government not to cooperate with its provisions.

Robert Nahas, one of the organizers, said he'd gathered more than 200 pro-impeachment signatures on Saturday while downtown, and urged the council to "protect us from the crimes of the federal government."

One protester, Louis LaFortune, even stripped down to a "pink slip," as in a pink nightie, while addressing the City Council about impeachment.

Protesters will have to wait, however, because the City Council, deep in budget-slashing sessions, has yet to take action on the resolution and will soon break for its August recess.

Skeptics say a Republican-dominated Congress makes impeachment all but impossible.

Vic Marani, a former chairman of the local Republican Party Central Committee, scoffed at the idea of protesters asking a city council to support impeachment.

"They aren't going to impeach Bush so fix the streets," he said. "That's boring, but that's what local government does. There's no such thing as a Democratic or Republican sewer or pipe. They have no chance of any kind of follow through, so take that energy and try to keep the Civic (Auditorium) open."

He was referring to concerns that the city-owned 2,000-seat auditorium in downtown Santa Cruz might be scaled back or mothballed in light of budget

cuts.

Peace activist Ruth Hunter agreed impeachment wasn't likely but said that if there is enough of grassroots support, it could pressure Republicans into changing their minds.

Protesters also said they're heartened by suggested articles of impeachment drawn up by former U.S. Attorney General Ramsey Clark, by Bush opponents questioning his statements about Iraqi weapons of mass destruction, and a recent dust-up surrounding a section in Bush's pre-war State of the Union address.

The controversial clause referred to Iraq seeking uranium from Niger, a piece of information subsequently criticized as "tainted." The White House later stated the accusation, attributed to Britain, was based on forged information and should have been excised.

The City Council, in September, was the first such body in the United States to pass a resolution opposing a U.S. war on Iraq, a measure that drew a brief but intense bout of national attention.

Among those calling for the latest measure are members of the Santa Cruz Action Network, Santa Cruz Peace Coalition, Green Party of Santa Cruz County, the Peace and Freedom Party Central Committee, Santa Cruz Peacemakers and Code Pink of Santa Cruz.

Though U.S. Rep. Sam Farr, D-Carmel, could not be reached to comment, his spokeswoman, Sarah Rosen, said Farr didn't think the movement could achieve its goals.

"The congressman definitely supports any efforts that can be made to discuss the credibility of the president, but the possibly of impeachment going anywhere is not even remote," she said. "We're talking infinitesimal."

She said energy being directed toward an impeachment movement would be better directed toward electing a Democrat president. "We have an excellent opportunity to get rid of this guy and that's what elections are all about."

LIBERATION OF THE UNWILLING
Tue Jul 22, 8:01 PM ET Add Op/Ed - Ted Rall to My Yahoo!

By Ted Rall

Why Bush Won't Help Liberia (news - web sites)

Ted Rall

NEW YORK--"If war is forced upon us," Bush once proclaimed, "we will liberate the people of Iraq (news - web sites) from a cruel and violent dictator." Now Liberia, a nation founded by former American slaves and whose Constitution, flag, language and civil administration are modeled on those of the United States, is deteriorating as a bloody civil war devolves into total anarchy. Close to a thousand civilians have died, caught in the crossfire between government and rebel forces, during the last few days alone. Here is Bush's stirring message of hope for the miserable people of Liberia: "We continue to monitor the situation very closely."

First we attacked Iraq, which posed no threat, while ignoring North Korea (news - web sites), which did. Taking a stance which defies common decency and common sense, we're now stiff-arming people who are literally dying for our help--while forcing ourselves on others who are willing to die to avoid our presence. Apparently, whether or not Bush "liberates" you has nothing to do with how badly your country needs liberation.

Last fall, government and talk-radio loudmouths claimed that they had the power to read the hearts and minds of Iraq's 25,000,000 citizens. Now the results of their intelligence failure are in: Iraqis prefer Saddam's homegrown autocracy to our 148,000 infidel storm troopers. They're voting with mines, rocket-propelled grenades and AK-47s in ambushes so frequent that the media doesn't bother to report them until someone gets killed. Graffiti covers the walls of Iraqi cities: "Pray for Saddam's victory because he's a genuine Iraqi." "May the occupation fall and may Saddam return."

The resistance owns the highways, the alleys and the nights, forcing hapless American forces to scurry in convoys between their cantonments. On average they kill one of our soldiers every day--152 so far--and cripple another half-dozen. Iraqi collaborators are executed nightly. They're sending a clear message to the American people: get your Kevlar-coated goons out. Sunni imams in Fallujah, The Los Angeles Times reported on July 15, rejected food from soldiers of the Third Infantry Division. "We would rather eat rocks than eat chickens from Americans," one cleric said. "Even the poorest

person in Fallujah doesn't want chickens from you." Children threw rocks at the U.S. soldiers as they retreated with their proffered poultry.

We haven't lost as many young men and women in Afghanistan (news - web sites), but that's because fewer are there to begin with: a mere 10,000, most of whom are holed up at Kabul's Bagram air base. Before the October 2001 invasion, Bush decided against posting peacekeepers in the 95 percent of the country that needed them; now Afghanistan belongs to warlords and their tribal militias. And we're not winning popularity contests even in the rump city-state of Kabul. Hamid Karzai's puppet regime is broke, and the tiny amount of U.S. aid went entirely to non-government organizations which spent it on SUVs and fancy offices. Nothing substantial has been rebuilt for ordinary Afghans. "N.G.O.," spat an unpaid Kabul cop at The New York Times' Khaled Hosseini. "What have they done for us? I have yet to see them put two bricks together."

Twenty peacekeepers have been killed so far in Afghanistan, meaning that that assignment offers roughly the same 1-in-400 odds of dying as a one-year tour of duty in Iraq.

Regime change in Liberia, on the other hand, would be a cakewalk. Unlike Iraq and Afghanistan, the country has a strong historical connection with us--streets and airports are named after U.S. presidents, and the American dollar is the national currency. Liberian strongman Charles Taylor has promised to go into Nigerian exile. Crowds have rioted in Monrovia in favor of U.S. intervention. Taylor's only demand is that we show up to avoid a power vacuum after he steps down, but Bush--who hasn't learned from the chaos in Baghdad--has refused.

Considering recent history, sending in the Marines would also be the right thing to do. President Reagan and Bush's father funded a military coup in 1980 that led to Taylor's 1989 seizure of power and a seven-year-long civil war that killed more than 200,000 people. American taxpayers funded that carnage; they should now help end it.

The trouble is, Liberia doesn't fit into Bush-Cheney's policy of "total energy dominance." That's why a White House determined to invade Syria and Iran during its second term has only dispatched a few dozen soldiers to guard the U.S. embassy. While neighboring countries have an estimated 60 billion barrels of oil in all, Liberia itself possesses insignificant reserves. Iraq, on the other hand, is the world's second largest oil-producing state. And the U.S. invaded Afghanistan principally as a conduit to the oil- and gas-rich Caspian Sea.

Hopefully Bush will cave into public pressure by transferring a significant troop complement from Iraq and Afghanistan to Liberia. Until then, Liberia's best hope is striking oil.

Two U.S. Soldiers Killed in Attacks
By THE ASSOCIATED PRESS

Filed at 4:38 a.m. ET

BAGHDAD, Iraq (AP) -- Two U.S. soldiers were killed in separate attacks on convoys, the military said Wednesday, including one on the outskirts of the northern city of Mosul, where the sons of Saddam Hussein were killed in a firefight the day before.

Spc. Brian Sharkey said the attack near Mosul happened as a military convoy was traveling near the town. He said one of the vehicles was destroyed by a roadside bomb.

An Associated Press reporter in Mosul, 260 miles north of Baghdad, heard a large boom shortly before noon (5 a.m. EDT).

Six soldiers were wounded in the attack, but the name of their unit wasn't immediately available.

Another convoy was attacked in Ramadi, 60 miles west of the capital, Baghdad, killing one soldier and wounding two more.

Witnesses told Associated Press Television News the attack happened at 10:30 p.m. (3:30 p.m. EDT) Tuesday and several Iraqi bystanders were injured.

The nature of the attack was unclear.

The attacks brought to 155 the number of American soldiers killed in action since the beginning of the war in Iraq, eight more than died in the 1991 Gulf War.

Odai and Qusai Hussein were killed Tuesday in a fierce gun battle with U.S. forces in a villa in Mosul.

Bush's Deceptions

A BUZZFLASH READER COMMENTARY
by Paul Ryan

There are a few thoughts that come to my mind regarding the Administration's deceptions in the lead-up to the Iraq war:

When does self-deception become culpable? At what point does the unwillingness to process factual information that is contrary to one's beliefs become a moral shortcoming? We are told that Bush did not lie because he thought what he was saying is true. Even if that were so, does it not point to deficient judgment, to nothing less than moral incompetence?!

Clearly one reason why Bush is popular is that 9/11 scared people shitless. When people are scared, they gravitate around leaders who promise to take responsibility for their safety -- which is what Bush did. In 2002, Bush and the Republicans literally ran on the notion that electing Democrats would jeopardize our safety. That is why Bush is in a sling right now. It turns out that he is no less a buck-passing weasel than any other politician. He is not taking ownership of anything -- he is simply covering his ass.

Bush said yesterday: "As long as I hold this office I will never risk the lives of American citizens by assuming the good will of dangerous enemies." Naively depending upon the good will of dangerous enemies is one way leaders fail to discharge their responsibilities, but there are other ways that a leader can needlessly risk the lives of his countrymen. And all across the globe, Bush's carrot and stick approach to the other nations of the world has been quite unsurpassed in finding those ways. It seems quite alien to the Administration that people from other lands may be motivated by such sentiments such as patriotism and justice. Their logic seems to be: why should someone from a shithole country have a soul? We'll just bribe them here, bully them there, because we're no one's fool.

Dems win the next election by dealing successfully with the national security issue. This requires, positively, the ability to articulate a vision of good guy nations to rounding-up a posse and going after the terrorists -- as opposed to the "go it alone" Republican approach. It also requires, negatively, the willingness to challenge Bush's competence and integrity. People vote out "failed" Presidencies. On the domestic side, his failures are obvious. It ultimately comes down, I believe, to his unreliability -- Bush and his cronies cannot be trusted with high office because, not unlike the enemies of freedom, they are fundamentalists, and

this fundamentalism generates a set of conceits and biases that even the truth itself cannot overcome.

There is a darkness of the soul that overtakes the person who filters all data through an ideology because no ideology is big enough and real enough and complex enough for the truth. In an odd way, it is Bush and the Republicans who have become the moral relativists -- holding their enemies to high standards while holding themselves to the standards of their enemies. That is not the thinking that defends civilization. It is just more barbarism, more of the uninteresting and simplistic nonsense that denotes humanity at its baser level. The question facing Americans is do we want our country to participate in civilization or shall we simply lead the world into a deeper cycle of lawlessness and savagery?

Ultimately, it comes down to whether our morality is rational or simply religious. The former is objective, secular, apt, civilized -- one might say, "absolute." The latter is just more of the same old bullshit, sometimes better, sometimes worse, always second-rate; useful in its place, perhaps, but in the macro, tending to rend, rather than mend, civilization.

Thanks for listening.

24 "Deceptions" In 704 words: Bush's 2003 SOTU

A BUZZFLASH READER COMMENTARY
by Pete Goodwin

It took a lot of Prozac and Norvasc but I finally finished parsing the POTUS' "Denial and Deception" (their words, not mine) SOTU address.

So, without further adieu, in order of their appearance, here are:

24 "deceptions" in 704 words from the President's 2003 State of the Union Address

1. "We will not deny, we will not ignore, we will not pass along our problems to other Congresses, to other presidents, and other generations." How about the nearly $7 trillion national debt that's increasing by $475 billion or more this year and every year that Bush remains in office.

2. "Our first goal is clear: We must have an economy that grows fast enough to employ every man and woman who seeks a job." Highest unemployment in a decade, climbing higher every month.

3. ".the best and fairest way to make sure Americans have that money is not to tax it away in the first place." Unless you're poor or middle class.

4. "92 million Americans will keep, this year, an average of almost $1,000 more of their own money." Bill Gates goes into a bar where nine unemployed workers are nursing their beers. "Whoopee we're rich!" shouts one of them. "The average net worth of every one in this room is 3 billion dollars."

5. "I ask you to end the unfair double taxation of dividends." The federal government levies an income tax on the pay of every wage earner. That pay is then taxed again for Social Security, Medicare, State income tax, unemployment benefits, workers comp. That's sextuple taxation. Why not end that!

6. ".we continue to work together to keep Social Security sound and reliable." Looted $150 billion from the "lockbox" this year alone.

7. "I have sent you Clear Skies legislation that mandates a 70-percent cut in air pollution from power plants over the next 15 years." Actually it allows increased air pollution from coal fired power plants.

8. "I have sent you a Healthy Forests Initiative, to help prevent the catastrophic fires that devastate communities, kill wildlife, and burn away

millions of acres of treasured forest." Allows logging of previously protected national forests.

9. "I urge you to pass both my faith-based initiative and the Citizen Service Act." Which violates the Constitutional guarantee of separation of church and state

10. "In Afghanistan, we helped liberate an oppressed people. And we will continue helping them secure their country, rebuild their society." Still not liberated outside of Kabul, not secure and not even remotely rebuilt two years after we "won" the war.

11. "We have the terrorists on the run. We're keeping them on the run." Osama and Saddam don't seem out of breath to me.

12. "And this year, for the first time, we are beginning to field a defense to protect this nation against ballistic missiles." The experts agree, it won't work and will cost billions more than projected.

13. "Our government must have the very best [mis]information possible."

14. "Today, the gravest danger in the war on terror, the gravest danger facing America and the world, is outlaw regimes that seek and possess nuclear, chemical, and biological weapons." I agree, but the regime is in Korea, not Iraq.

15. "Once again, we are called to defend the safety of our people, and the hopes of all mankind." Our people are now less safe and mankind is mainly hoping for the removal of GW and is gang.

16. "Our nation and the world must learn the lessons of the Korean Peninsula and not allow an even greater threat to rise up in Iraq." How about we learn the lessons of the Korean Peninsula and deal with Korea, and actual bona fide threat unlike Iraq.

17. "The United Nations concluded in 1999 that Saddam Hussein had biological weapons sufficient to produce over 25,000 liters of anthrax ... 38,000 liters of botulinum toxin.materials to produce as much as 500 tons of sarin, mustard and VX nerve agent .upwards of 30,000 munitions capable of delivering chemical agents." Hmmm, still haven't found any WMD, not even a little one.

18. "Saddam Hussein had an advanced nuclear weapons development program.The British government has learned that Saddam Hussein recently sought significant quantities of uranium from Africa. Our intelligence sources tell us that he has attempted to purchase high-strength aluminum tubes suitable for nuclear weapons production." Wow, a trifecta of deception in one paragraph.

19. "Evidence from intelligence sources, secret communications, and statements by people now in custody reveal that Saddam Hussein aids and protects terrorists, including members of al Qaeda." Intelligence sources like Karl Rove and Paul Wolfowitz?

20. ".for the safety of our people and for the peace of the world, we will lead a coalition to disarm him." Where would we be if it weren't for those brave fighting troops of Palau, Tongo and the Solomon Islands?

21. "We seek peace. We strive for peace." So we wage an unproved war?

22. ".if war is forced upon us, we will fight with the full force and might of the United States military -- and we will prevail." Forced on us? Prevail?

23. "And as we and our coalition partners are doing in Afghanistan, we will bring to the Iraqi people food and medicines and supplies -- and freedom." Not enough food, medicine, supplies or freedom to go around in either Afghanistan or Iraq.

24. "Americans are a free people, who know that freedom is the right of every person and the future of every nation." Unless your government enacts a "Patriot Act."

washingtonpost.com
Newspaper Shuttered, Editor Held In Baghdad
'Inciteful' Article Brings Raid on Site

By Pamela Constable
Washington Post Foreign Service
Wednesday, July 23, 2003; Page A18

BAGHDAD, July 22 -- A local newspaper has been shut down and its manager arrested over an article that U.S. occupation authorities and Iraqi officials considered an incitement to violence and a threat to human rights in Iraq.

Iraqi police accompanied by U.S. troops raided the offices of Al-Mustaqila newspaper, which means The Independent in Arabic. Neighbors said troops broke down the front door, ransacked the office and detained the newspaper's manager, Abdul Sattar Shalan.

According to U.S. occupation authorities, the paper published an article 10 days ago titled, "Death to all spies and those who cooperate with the U.S.; killing them is religious duty." The headline closely echoed recent threats made by clandestine armed groups against U.S. forces and their Iraqi collaborators.

"The Coalitional Provisional Authority supports and encourages the development of a free and responsible Iraqi press," the occupation agency said in a statement today. But it said Al-Mustaqila "has chosen to threaten the basic human rights of Iraqi citizens" and published a "clearly inciteful article," putting it in violation of occupation press rules.

The U.S. authority has banned all Iraqi media from publishing or airing material it views as inciting political, religious or ethnic violence or promoting attacks on U.S. forces here. It has already shut down one Baghdad radio station and one Shiite Muslim newspaper in Najaf on these grounds.

In a report today, the Paris-based advocacy group Reporters Without Borders criticized the occupation press rules, saying U.S. authorities should ease their restrictions on the Iraqi media and develop more "liberal and democratic" regulations.

The Iraqi Governing Council, appointed earlier this month by U.S. officials, issued a statement today supporting the shutdown of Al-Mustaqila. It said the article in question was "inconsistent with all laws, religious

principles and human rights," and that the right to press dissent should not extend to "calling for the shedding of others' blood."

Today, the two-story yellow building that housed Al-Mustaqila was locked and empty, and no copies of the newspaper could be found at any newsstand in downtown Baghdad. But several neighbors described Monday's armed raid in detail and said they were surprised because nothing about the newspaper or its staff had appeared out of the ordinary.

"Everything seemed normal. There was nothing suspicious. They reported on what was happening, including the attacks [on U.S. troops] in Fallujah," said Abdul Mohsin, 40, who manages a printing plant across the street. He said the police and U.S. troops turned the newspaper's office upside down and took some equipment.

Occupation authorities could not be reached for comment tonight. It was not immediately clear whether the article in question had been a news story or an editorial, and there was no information on the whereabouts of Al-Mustaqila's manager or whether any charges would be filed against him.

Several Iraqi newspaper journalists said they knew little about Al-Mustaqila but that they did not feel the U.S. authorities were interfering unduly in their own reporting. More than 50 newspapers and magazines have opened in the capital since the government of president Saddam Hussein was deposed.

"Every day the Americans send a representative with their news, and we are free to publish it or not," said Nadah Shauqat, an editor at Az-Zaman, the best-known Baghdad daily. "We are independent. We publish news and interviews about political groups, but we do not publish propaganda."

BWHAHAHAHA. "Santa Cruz", he says.

"80 protestors", he says. HAHAHAHAHA. Try crunching some numbers to see what percentage of the total population "80 protestors" actually is. Hint: it's not much. I was a stupid college kid once, too. This too shall pass.

> Protesters push for Bush impeachment

LOL. Oh, please DO try to impeach Shrubby. But you have a slight problem. Namely THIS:

The Democrat party lacks a majority in the Senate.(51R-48d-1)
The Democrat party lacks a majority in the House of Representatives.(226R-209d)

BTW, when Clinton was impeached, *his* job approval went up 10 points. At this moment, despite your best efforts, 6 out of 10 Americans STILL approve of the job Shrub is doing. Trying to impeach him will push his job approval even higher.

Now shut up and read the *real* story that is coming out of Iraq. You know, the one your puppeteers are afraid to tell you:

Angela J. Phelps is an Assyrian American whose mother is a native of Baghdad.

July 23, 2003

Are Iraqis Better Off?
Is that a joke?

By Angela J. Phelps

For weeks, I've been hearing members of the media ask self-described pundits whether Iraqis are better off today than they were four months ago. Am I the only person who thinks this is a stupid question?

Ask the average third-grade child if he would be better off if the meanest bully in the class got expelled. Ask the average single female if she would be better off if the serial rapist who was terrorizing her neighborhood was

finally jailed. See what they would say. Have people lost their minds or simply their common sense?

Are they better off? I say, ask the Iraqis, not the people who want to speak for them on cable news. Better yet, let's ask the very people who were terrorized most severely under Saddam Hussein: the women of Iraq.

Under Saddam's reign, the evil dictator and his posse of thugs not only targeted men who threatened his power, they routinely and sadistically included Iraqi women and children in their "training" exercises. Rape, torture, and murder were all condoned, if not encouraged.

For years, I had heard stories from Iraqi Americans of Saddam's vicious rule - most of which, frankly, seemed unbelievable - like something out of a twisted horror novel. My mother, an Assyrian native of Baghdad herself, would tell me things that were far too unspeakable for public consumption.

However, it wasn't until late 2001 that I truly grasped the depth of evil in the Iraqi leadership. An article from the September 2001 issue of Maxim magazine, of all places, detailed the gruesome legacy that President Bush later revealed to the world in his State of the Union address last January 29. The article was the most disturbing one I had ever read, and still is. It recounted a story of Saddam's son Uday, who was known for preying on young, beautiful Iraqi women. One woman in particular, a college student, who refused his advance, was quickly taken from her home, hauled off to a remote compound in the desert, and for months experienced rape and torture.

When Uday finally had enough of her, he decided upon a creative disposal. Ordering his guards to stop feeding his Dobermans for two weeks, he had the girl stripped, lathered with honey, and fed to the starving animals. I doubt Uday or his father batted an eye.

And this was just one example of the Hussein family's high esteem for women. Sure, this is one of the worst cases reported, but a number of Iraqis have told me that not a single family escaped the terror of the Saddam regime. If only they could be sure that Saddam Hussein was gone for good, they'd be shouting their stories from the rooftops. You can be sure of that.

So, ask yourself: Are Iraqis better off today than they were four months ago? Let's use some common sense, since many seem to be lacking it these days: Millions of Iraqis are experiencing freedom for the first time in their lives; Iraqi women are safe from the governmental threat of rape, torture, and murder; Saddam's two ferocious sons are now confirmed dead; a democratic government has just been formed; and allied forces have lost fewer soldiers than expected. Better off? Yes - and when you consider how much better off they are, it's hard to get caught up in a debate about those "16 words."

America stands for many things to me. Mostly, it stands for a land
where bitter, delusional idiots with absolutely no life can hide
behind anonymous remailers designed for cowards, use numerous phony
names, and post hundreds of off-topic, absurd messages to hobbyist
newsgroups where they actually think one or two people might care.
And then be so pathetic that they wax philosophical about what the
country stands for. Ain't America great?

"There has been no mass exodus anywhere in Iraq. On the contrary, many Iraqis, driven out of their homes by Saddam, are returning to their towns and villages.
Their return has given the building industry, moribund in the last years of Saddam, a boost. Iraqi exiles and refugees abroad are also coming home, many from Iran and Turkey. Last month alone, the Iranian Red Crescent recorded the repatriation of more than 10,000 Iraqis, mostly Kurds and Shiites.

In Iraq today there are no "displaced persons," no uprooted communities and no long lines of war victims in search of a safe haven.

For the first time in almost 50 years there are also no political prisoners, no executions, no torture and no limit on freedom of expression. Iraq today is the only Muslim country where all shades of opinion, from the extremist Islamists of the Hezbollah to Stalinists, and passing by liberals, socialists, Arab nationalists, and moderate Islamists, have full freedom to compete in an open market of ideas. Better still, all are now represented in the newly created Governing Assembly (Majlis al-Hukum). Iraq is also the only Muslim country where more than 100 newspapers and weeklies, representing all shades of opinion, appear without a police permit and are subjected to no censorship."
.....
"A stroll in the open-air book markets of the Rashid Street reveals that thousands of books, blacklisted and banned under Saddam Hussein, are now available for sale. Among the banned authors were almost all of Iraq's best writers and poets whom many young Iraqis are discovering for the first time. Stalls, offering video and audiotapes for sale, are appearing in Baghdad and other major cities, again giving Iraqis access to a forbidden cultural universe."
....
"There are two Iraqs today: one as portrayed by those in North America and Europe who wish to use it as a means of damaging Bush and Blair, and the other as it really exists, home to 24 million people with many hopes and aspirations and, naturally, some anxiety about the future.

"After we have aired our grievances we remember the essential point: Saddam is gone," says Mohsen Saleh, a geologist in Baghdad. "A man who is cured of cancer does not complain about a common cold.""
...
""We see our liberation as the start of a friendship with the U.S. and the U.K. that should last a thousand years," says Khalid Kishtaini, one of Iraq's leading novelists. "The U.S. and the U.K. showed that a friend in need is a friend indeed. Nothing can change that.""

Getting off on a typo is about what I'd expect. Folks in around 300
DXCC countries "on the other end" have managed to "get me".

> And he's talking about jamming other operators to boot! Ain't CW
> operators a cut above the rest? (not)

Wrong dweeb. Go back and get a grip on the thread before you spout
off. The discussion was what would happen if SSB ops moved down into
the spaces where CW is used and CW ops stay put. The results would not
constitute jamming. Work it through.

As if.

>A country run by corporations more interested in the bottom line then the
>common man.
>

Lotsa truth to that .. esp when the bottom line winds up in their pocket.
Enron comes to mind, but there were many others who did the same thing on a
smaller scale.

And the "bottom line" to this is a lot of people lost their investments, and a
lot of others lost their jobs due to plant closings. And it's probably gonna
get worse before this is over.

And these guys would be greedy even if Bush didn't exist.

DTMF Dual-Tone Multi-Frequency. (Or Touch-tone an AT&T trade name) similar to telephone touch-tone pads.

DTMF is used all over Amateur Radio, for autopatching phone calls and for remote control of a repeater by control operators. Autopatch codes are usually available only to repeater members -- check with the club trustee for these codes, rules, and procedures.

From your VHF/UHF radio you can access a local repeater -- send DTMF codes to bring up an "AutoPatch" -- the repeater is now connected to a telephone line --- now you can dial in the desired number by the touch tone pad.

Some radios have a paging function with DTMF to call a particular station or group of stations. Appears this is similar to Alinco DSQ. Also some radios have provision to memorize the autopatch codes and the long telephone number, this allows your favorite numbers and emergency numbers to be implemented at the touch of a single key or a few key presses -- again see your manual.

Tell the party on the telephone that you are talking to them via amateur radio phone patch and it is one-way (not like a cell phone) - I talk, you listen, and vice versa. Using over is helpful. Most "civilians" have enough movie experience to know how it works. When you're finished with the call, say good-bye and have your party on the other end hang up. Then send the disconnect command which on many autopatches is the "#" key. And identify again, "W6XYZZ clear autopatch". Listen to make sure you successfully killed the patch (the repeater may talk to you, or beep, or just drop)

CW is alive and well ---- just tune the CW portions of the band plans. During contests -- it wall to wall CW signals

Hi OMs
I found a schematic of a 50MHz-preamp,and the coils are e.g. 5 turns of wire
No. 20.What's wire 20 in mm,or does a list exist ?

Reality check:

A hundred Americans die each day on the US highways. The soldiers in
Iraq are safer there than they are here.

I hope that pineapple-boy spends a LOT of time in his car. Maybe he
will disappear like Burt Fisher did.

But back to the subject, has anyone used a 160 vertical, or 160 inverted
L, on 60 meters (5 MHz)? From what limited info I can see on the web,
it's a 5/8 wavelength and is very close to a dipole in the ERP result.

73,
Dave

Hello,

I am looking for a "telephone patch", or something similar. I'm not into radios, and the application has nothing to do with radios, but I got the advice to ask here.

I want to be able to record a telephone call and on the same time myself provide the input signal (rather than talking into the handset). The reason is that I want to record a telephone call where I also can process my own voice when speaking, that is, speaking into a microphone, process the sound and then send it to the phone.

Some device with one audio connector in and one audio connector out would be perfect, and also of course some connection to the telephone, maybe to the headset connector.

There are simple and cheap devices where you can tap the conversation through an ordinary audio connector (less than $20), but I also would like to provide the input signal through a connector.

I am hoping to find something simple and inexpensive - preferrably less than $50. I am not into electronics so I won't be able to build anything myself; I am looking for a product to buy.

Thanks in advance.

ITHACA, NY The Tompkins County Amateur Radio Club announces the Finger Lakes HAM-IN (hamfest and fly-in) at Tompkins County Airport (KITH), 3 miles NE of Ithaca on Route 13, on Saturday August 2, 2003.

Talk-in on 146.970- AF2A repeater.

Vendor setup starts at 6 AM (inquire for Friday night setup time).
Doors open to the public at 7 AM Saturday morning.
Hamfest closes at 2 PM Saturday afternoon.
Large hangar for indoor vendors and displays.
Drive-in setup.
Paved outdoor flea market and parking.
Aviation displays - fly in and show your plane for free!
Breakfast and lunch served by Boy Scouts.
Admission: $5.00 at the door
Indoor tables: $10.00.
Outdoor space $2.00 each.
ARRL sanctioned event. VE exams starting at 9AM, walk-ins always welcome at tests.

More info, including a PDF format flyer from a previous year, is available on the club
website at
http://www.compcenter.com/~tcarc/

For more info email Mike N2VR at n2vr@.nospammerslightlink.com
after removing the NOSPAMMERS and leading period.

WRC has dropped the code requirement, the FCC has not as of yet, so
everything is still as before, nothing has changed. What a twit!!

714. There is no International Code Requirement and techs can operate HF according to FCC Rules

That is what I'm talking about. There is no longer a international requirement
for morse code so tech's can pick up the microphone and talk on 10 meters.
Here in America the FCC has to issue a warning notice, then a violation notice
and the person cited can then simply demand a hearing before a administrative
law judge. The ALJ is a pretty informal process and you just need to cite the
rules and they are not very strict when it comes to matters like these.
If you have a tech license and you operate outside your allowed bands like pop
up in the twenty meter band and keep it up they might come after you. But if
you meet the international requirements and stay in the HF TECH bands it is not
a violation of the rules and no one can verify if you have passed a horse and
buggy CW test any god damn way.

Keith,
What you don't seem to realize is that the 'rule'
you quoted is NOT law in this country. Until it has
been adopted, it's only a recomendation. So until
the new ITU recomendations are accepted by the US,
nothing has changed.
It doesn't matter if the 'no-code' rule WILL be
changed. Until it IS changed, there is NO change.
The ITU can't change US law, only the US government
can do that. It's okay to be happy about the proposed
code change, but don't be stupid...
'Doc

This is silly. Each country has it's own laws, and you are obliged
to follow them.

What has changed is that the treaty agreement whereby all countries
issuing amateur radio licenses are obliged to have a code test of some
sort for operating below 30MHz (or, was it a higher frequency?) is now

gone.

That means that each country no longer has to conform to that treaty agreement.

They can, if they so choose, to eliminate their law that requires code proficiency for amateurs operating in the HF bands.

But they are not obligated to do so.

Until a country changes it's law about this, everyone is obligated to follow those laws.

Just because the treaty agreement is gone does not mean that there is any more legality for someone who hasn't taken a code test to operate at HF. Two months ago, someone could have done it, and if caught they would face a certain process. If they do it today, and are caught, they face the same certain process. Nothing has changed on that account.

The 25.5 is automatically accepted by the US Government. The treaty has already been previously ratified. The change is administrative and it is not a new treaty.

Read the regulation. The regulation indicates that according to international
morse code requirements the CW requirement is required. Well the international
regulations do not require a morse code proficiency for HF access.
97.301(e)
I guess it all boils down to what "IS IS".

BTW, what do you care about US regs if you live in Canada?

A Phone patch will give you an 8 ohm input and a (usually) 600 ohm output on the "radio" side, and a telephone connection, usually level protected on the other side.

A Hybrid phone patch, (which is what most but not all amatuer phone patches are) will let you tranmit and recieve to the phone line at the same time. It provides a Null adjustment to cancel your signal back to you.

There will be a level meter on the front, as well as gain controls so you don't over drive the phone line. When you set the service switch on the rear, the meter is used to adjust the null.

Due to an old requirement to keep a record of phone patches made, many of the units have an output connection to go to a tape recorder.

You can find them on Ebay for under $50. The units for older radios will have a different impeadence for the microphone side.

If the FCC decided to drop CW requirement totally they could still say the
TECHNICIAN is a VHF ONLY LICENSE. Or the could say its a VHF and 28.3-28.5
voice ONLY LICENSE.

In anycase I highly doubt the FCC will give the Technician ticket an
equivilant to a General UNLESS the Tech was issued prior to 1986 when the
WRITTEN was the same for Tech and General.

Get over it Keith.

While not a violation of the international treaty, it would be a violation of the current FCC rules. They are quite clear that Techs (at this time) must have passed a code test to use HF. Keep in mind that the international treaty did not abolish the requirement altogether but simply let each country set its own requirements of any where from no-code to whatever the country wished. Our FCC rules have not yet changed so a codeless tech operating HF is in violation.

You are not on track and are unable to follow a discussion. I am talking about
a technician class licensee having tech class HF privileges without the code
test. I'm not talking about making them to general.

Don't worry this is going to be reviewed legally very soon.

I think a more interesting question would be "how have amateur satellites affected amateur radio and the world at large?".

Don't forget that the first amateur satellite went up in December of 1961, sixty years after Marconi spanned the Atlantic, and forty years after hams spanned the Atlantic with shortwave.

The hams who built that first one, and snagged space on an existing launch, didn't say "how can we use this in amateur radio?". They saw it as part of amateur radio, of trying new things and stretching technology. Just under 4 years after Sputnik went into space, amateur radio was able to build a satellite (in a garage) and get it into space, at a time when most satellites were government and large; I'm not even sure there had been a commercial satellite by then.

This set the tone for making multiple launches from one rocket, and ultimately offered a way for many small groups and countries to get something into space.

And just like amateur radio, the satellites were a test of what could be done. That first one lasted a week or a few weeks, and didn't do anything but send "hi" in morse code, though it's speed vary with some variable in the satellite (either temperature or battery voltage). Apart from the thrill and learning process of building the satellite, it gave many a chance to track the satellite, becoming familiar with such things when they were still uncommon to most people. It also caused people to build equipment, be it converters or antennas, to receive the signals, and as the satellites got more complicated, that meant increasingly higher frequencies. There were one or two similar amateur satellites, and then one went into space that could actually relay signals. Of course the orbit was such that it was only good for a brief time for each pass, and it too lasted a short time. But they kept at it, and eventually OSCAR 6 was launched in the fall of 1972 and it lasted for some years, making it of some use as a relay station in space.

To ask how the satellites are used is to think of them as a utility, and to some extent think of amateur radio as merely a means of communication.

But like amateur radio in general, the satellites have been about trying new things, with the ability to communicate secondary.

NO! This is what the rules say:

s97.301(e) reads:
>
> For a station having a control operator who has been
> granted an operator license of Novice Class or Technician
> Class and who has received credit for proficiency in
> telegraphy in accordance with the international requirements.
> ^^
> (followed by frequency table)
>

Now we have the new regs from WRC that are NOW in effect. They require no morse code test except set down by the administration so a tech licensee should be in compliance with the requirement set down in 97.301(e) There is no requirement for morse code test except for the requirement by the international morse code requirements.

> The 'international requirements' (ITU-R s25.5) now read:
>
> Administrations shall determine whether or not a person seeking a licence
> to operate an amateur station shall demonstrate the ability to send and
> receive texts in Morse code signals.
>

The ARRL tried to pull a fast one, but the way the FCC rules are written it appears that it doesn't hold water with current regulations as set down by the FCC.

Don't worry I'm going to get real legal advice on this.

1. FCC requires compliance with international morse code regulation.
2. The international morse code regulation is changed to something completely different and no longer has any morse code proficiency requirement except what the administration of that country requires.
3. The FCC, the administration of the USA, only requires the tech licensee to comply with the morse code proficiency requirements required by international requirements.
4. The international requirements have no requirement to know morse code.

This could be a legal loop hole.

By your interpretation, every ham in the world can start operating
on HF, no matter what their license restricts them to, merely because
the international agreement on this matter has been rescinded. Your false
interpretation would therefore apply to all countries. Besides, you
posted in newsgroups that are read by people in many countries, so
why shouldn't I comment.

The international agreement does not set the rules. While except for
Japan with their low power license I can't think of any country that
did not respect the treaty agreement, there wasn't much to keep countries
from not honoring the treaty, other than on a diplomatic level. If
someone operated on HF without passing a code test, they weren't
prosecuted by an international body, they were pursued by their
own country's enforcement body, which also set the rules that
the person was violating. Each country had to put in place rules that
reflect the agreement.

Those rules are still in effect, until they are changed.

"We had to put these rules in place because we honor the international
treaty."

That's a big difference from "You have to know morse code or else the
international boogy man will come down and toss you in jail".

The first is about implementing rules that honor an international agreement. The second is some international law that you must respect directly.

Find some other section of your rules, and you're bound to find something that tells you you can't operate HF with certain classes of licenses. That's the rule that is in control. It's absolute, and not dependent on some international treaty.

When I was a kid, there was no license here in Canada that let someone operate without taking a code test. Some likely argued that the code test was there because of the international agreement, but the rules were quite clear, you couldn't operate unless you took a test, and part of that test was a code test. Back in 1978, there was a code-free license here, but only useable at 220MHz and up, and had a lot of digital questions. The rules were clear; if you got that license you could only operate on those VHF frequencies. Back in 1990, there was restructuring, and there was a license which did not require a code test; but it was also clear in setting out where you could operate.

For that matter, the US Technician license originally was VHF and UHF only, yet there was a code test. Your FCC decided it was a necessary requirement, even if the treaty did not require it in that case. It was only in more recent decades, when 10meters was added, that the treaty required a code test. Take away the code test, and the FCC limited such licenses to VHF and above.

No, the rules are what counts, not some preamble.

Only according to FCC regulations in regards to the s25.5 change.
I can't speak for other countries regulations. I only have what the FCC
regulations are today.

The FCC rules are based on that international requirement.
Now the FCC could have said you must pass the 5 wpm test to operate on HF
frequencies. But they said based on the international proficiency requirements
a tech can operate on HF.

Today there are no international proficiency requirements for morse code.

736. Breaking News!!! Strom Thurmond murdered.....

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-26 00:24:34 UTC
From: demersumbigguns@aol.com
Message-ID: <20030725202434.24680.00000539@mb-m28.aol.com>
Source record: 64854

STROM THURMOND MURDERED BY SHOCK OF SUPREME COURT INTEGRATIONIST SODOMY RULING:
PRESIDENT DECRIES JUDICIAL SLAYING OF HEROIC SENATOR
Emergency Statement by the President

THE PRESIDENT: Please be seated. I would say "good morning," but I cannot, for today comes on the heels of one of the darkest days in the entire history of our great Christian nation. Yesterday evening, heroically spry ladies man and pillar of inclusiveness Senator Strom Thurmond was brutally murdered by a deranged and sickening United States Supreme Court ruling.

For those of you who don't know the background on this case, "Lawrence v. Texas," I'll give it to you right now. Back in September of 1998, while I was still Governor of Texas, I explicitly told my state prosecutors that any jail cells not already occupied by colored fellas too poor to buy real cocaine instead of that really disappointing crack stuff should be immediately filled up with anybody suspected of hot man-on-man ass sex. So out they went in Houston, and it wasn't too long before they busted in on this white Catholic priest-lookin' fella named Lawrence doing it homo style with Lamar Latrelle from Revenge of the Nerds. Of course, after being allowed to climax, they were arrested, convicted of breaking God's Texas law, and placed in prison where they could be sodomized in a controlled environment.

Now almost five years later, the same Supreme Court which somehow had the wisdom to crown me, has trumped last year's horrible ban on the execution of retards with this, a full-out green light for rampant same-sex and MIXED RACE cornholing and rugmunching. And let it be known that this ruling, once expelled from the loins of the Court's traitorous Republican-appointed geezers, wafted like a moist, noxious fart over our nation's capital all morning. By the afternoon, it had caught a stiff breeze that carried that putrid cloud all the way down to South Carolina, where is seeped into the lungs of Thurmon, asphyxiating him with its vile liberal stench.

Now I know it's not proper for men folk to weep like a toddler girly baby who done dropped her pure, vanilla ice cream cone on a sizzling-hot patch of filthy black asphalt, but upon hearing the tragic news of this cold-hearted killing, I fell to my knees and turned on the water works. I'm sure it was the same with you.

As I mentioned in my speech at his 100th birthday party, Senator Thurmond was a soft-spoken champion of individual rights, like the right to string up your Nigra neighbor if'n he so much as spits a watermelon seed across the street from your wife. He bravely resisted the second invasion of the south by the Union Army – or as sissies call it, the "Civil Rights Movement." Indeed, Senator Thurmond believed every white, heterosexual Christian soldier has a right to happiness – and if happiness includes not having to imagine what sordid, dog-like rutting goes on behind the closed doors of anus-worshipping

Broadway man-starlets, then so be it. Because Senator Thurmond believed that a Southern Reb's right to swing his fist begins when someone different tries to mess up the nice world Jesus bestowed upon the righteous, and ends when whoever that someone is – be him queer, black, chinky, jew, liberal, or some mongoloid pedophile moooo-latto – gets his mouth bashed in with a big brass belt buckle that reads "SHUT UP NIGGER!"

Of course, while I am very disappointed in the High Court, I nevertheless respect the institution and accept that I must wait for voluntary retirements before packing it with Antonin Scalia clones. Therefore, even though they may have murdered Strom, I am committed to preserving the safety of those liberal justices I despise. Because I know that the world can be a dangerous place. I've seen the way Ruth Bader Ginsberg's little lady shoes sometimes slip on those steep, shiny marble Supreme Court staircases. I've seen the way that the brake cables on David Souter's Toyota Avalon are worn to near thread-bare. And I've seen the way that Sandra Day O'Connor's Georgetown home sits inside a four block blast radius from the nearest underground natural gas routing conduit. But I digress.

In closing, let us take some small solace in the knowledge that Strom has ascended to heaven on a shaft of white light, where at this very moment he is lying supine on a downy-soft ivory cloud, surrounded by a harem of nubile teenaged South Carolina beauty queens who are taking turns massaging his sore muscle and feeding him luscious strawberries dipped in white chocolate, and where there are NO mixed race homosexuals giving each other illicit, steamy Hot Carls in the privacy of their own garage sex dungeons. We're sure he's having a grand old time. We'll miss you, Strom old buddy.

God Bless America.

Actually, this could be read in another way:

Since there is no international requirement that one can be in accordance with,
then the regulation is no longer operative at all and that means that novice
licensees and technician licensees with code credit have NO privileges below 30
MHz at all! :-(

International agreement has killed the "coded technician" license and has made
it indistinguishable (in operating privilege) from the "no-code technician"
license. ;-)

> the administration of that country requires.

Then is it still an "international morse code regulation?"

> 3. The FCC, the administration of the USA, only requires the tech licensee to

Of which there is no such thing, so there is no longer a "technician" license
that has any privilege below 30MHz.

> 4. The international requirements have no requirement to know morse code.
>
> This could be a legal loop hole.

But not the one you think! 2x :-)

Sure they can. So can someone with no license at all. And as FCC will
view the matter, the only difference is that a Tech is a licensed ham
who is supposed to know better, and thus will have no excuse.

>rules and they are not very strict when it comes to matters like these.

Think so? Tell you what I think, I think you forgot to check your
facts again before opening your mouth to change which foot was in
there. The following is quoted from http://www.fcc.gov/oalj/ :

"The Office of Administrative Law Judges (OALJ) of the Federal
Communications Commission is responsible for conducting the hearings
ordered by the Commission. The hearing function includes acting on
interlocutory requests filed in the proceedings such as petitions to
intervene, petitions to enlarge issues, and contested discovery
requests. An Administrative Law Judge, appointed under the APA,
presides at the hearing during which documents and sworn testimony are
received in evidence, and witnesses are cross-examined. At the
conclusion of the evidentiary phase of a proceeding, the Presiding
Administrative Law Judge writes and issues an Initial Decision which
may be appealed to the Commission."

You call that an informal process?

Be advised that there are people currently behind bars because they
tangled with the FCC. The way you're going, you're going to be one of
them before the code test goes away. I suggest that you either find
out what you're talking about first, or stick to other newsgroups
where the participants don't know any better.

> If you have a tech license and you operate outside your allowed bands like pop
>up in the twenty meter band and keep it up they might come after you.

Make that "they will definitely come after you."

>But if
>you meet the international requirements and stay in the HF TECH bands it is not
>a violation of the rules

As has been repeatedly pointed out to you, it *is* a violation of the
rules, unless you have Element 1 credit. Have you ever bothered to
read the rules?

and no one can verify if you have passed a horse and
>buggy CW test any god damn way.

As has been repeatedly pointed out to you, this assertion is also
incorrect. Now go back to 11 meters where you belong, troll.

The *new* 25.5 has already been posted to this newsgroup for you. Did
you even bother to read it? It leaves the determination of
qualifications to hold licenses for amateur radio up to individual
administrations - meaning that each country formulates its own set of
requirements to be met by prospective licensees before that country's
government will issue them a license.

Current licensing requirements in the United States call for a 5 WPM
code test before the government will issue a license that grants HF
privileges. Until those rules IN THE US are changed, they are not only
valid under the *new* 25.5 but they are also binding on commission
licensees. But don't listen to us - go ahead and operate on HF without
the appropriate license so we can laugh until we wet our pants when we
read in QST, Monitoring Times, Popular Communications, WorldRadio, and
CQ about the fine FCC slaps on you for operating your station on an
unauthorized frequency - if you even have a ham license of any kind,
which I doubt.

Absolute nonsense. You don't know *anything* about the regulations
that govern the amateur radio service in the U.S., do you?

Here, in its entirity, is the portion of Part 97 that specifies
qualifications for an FCC-issued ham radio license:

SUBPART F-QUALIFYING EXAMINATION SYSTEMS
ï¿½97.501 Qualifying for an amateur operator license.
Each applicant must pass an examination for a new amateur
operator license grant and for each change in operator
class. Each applicant for the class of operator license
grant specified below must pass, or otherwise receive
examination credit for, the following examination elements:
(a) Amateur Extra Class operator: Elements 1, 2, 3, and 4;
(b) General Class operator: Elements 1, 2, and 3;
(c) Technician Class operator: Element 2.

Here, in its entirity, is the portion of Part 97 that sets the
standards for the various elements mentioned in the above subpart:

ï¿½97.503 Element standards.
(a) A telegraphy examination must be sufficient to prove
that the examinee has the ability to send correctly by hand
and to receive correctly by ear texts in the international
Morse code at not less than the prescribed speed, using all
the letters of the alphabet, numerals 0-9, period, comma,
question mark, slant mark and prosigns AR, BT and SK.
Element 1: 5 words per minute.
(b) A written examination must be such as to prove that the
examinee possesses the operational and technical
qualifications required to perform properly the duties of an
amateur service licensee. Each written examination must be
comprised of a question set as follows:
(1) Element 2: 35 questions concerning the privileges of a

Technician Class operator license. The minimum passing score is 26 questions answered correctly.
(2) Element 3: 35 questions concerning the privileges of a General Class operator license. The minimum passing score is 26 questions answered correctly.
(3) Element 4: 50 questions concerning the privileges of an Amateur Extra Class operator license. The minimum passing score is 37 questions answered correctly.
ï¿½97.505 Element credit.
(a) The administering VEs must give credit as specified below to an examinee holding any of the following license grants or license documents:
(1) An unexpired (or expired but within the grace period for renewal) FCC-granted Advanced Class operator license grant: Elements 1, 2, and 3.
(2) An unexpired (or expired but within the grace period for renewal) FCC-granted General Class operator license grant: Elements 1, 2, and 3.
(3) An unexpired (or expired but within the grace period for renewal) FCC-granted Technician Plus Class operator (including a Technician Class operator license granted before February 14, 1991) license grant: Elements 1 and 2.
(4) An unexpired (or expired but within the grace period for renewal) FCC-granted Technician Class operator license grant: Element 2.
(5) An unexpired (or expired) FCC-granted Novice Class operator license grant: Element 1.
(6) A CSCE: Each element the CSCE indicates the examinee passed within the previous 365 days.
(7) An unexpired (or expired less than 5 years) FCC-issued commercial radiotelegraph operator license or permit: Element 1.
(8) An expired FCC-issued Technician Class operator license document granted before March 21, 1987: Element 3.
(9) An expired or unexpired FCC-issued Technician Class operator license document granted before February 14, 1991: Element 1.
(b) No examination credit, except as herein provided, shall be allowed on the basis of holding or having held any other license grant or document.
ï¿½97.507 Preparing an examination.
(a) Each telegraphy message and each written question set administered to an examinee must be prepared by a VE holding an Amateur Extra Class operator license. A telegraphy message or written question set may also be prepared for the following elements by a VE holding an operator license of the class indicated:
(1) Element 3: Advanced Class operator.
(2) Elements 1 and 2: Advanced, General, or Technician (including Technician Plus) Class operators.

(b) Each question set administered to an examinee must utilize questions taken from the applicable question pool.
(c) Each telegraphy message and each written question set administered to an examinee for an amateur operator license must be prepared, or obtained from a supplier, by the administering VEs according to instructions from the coordinating VEC.
(d) A telegraphy examination must consist of a message sent in the international Morse code at no less than the prescribed speed for a minimum of 5 minutes. The message must contain each required telegraphy character at least once. No message known to the examinee may be administered in a telegraphy examination. Each 5 letters of the alphabet must be counted as 1 word. Each numeral, punctuation mark and prosign must be counted as 2 letters of the alphabet.
ï¿½97.509 Administering VE requirements.
(a) Each examination for an amateur operator license must be administered by a team of at least 3 VEs at an examination session coordinated by a VEC. Before the session, the administering VEs or the VE session manager must ensure that a public announcement is made giving the location and time of the session. The number of examinees at the session may be limited.
(b) Each administering VE must:
(1) Be accredited by the coordinating VEC;
(2) Be at least 18 years of age;
(3) Be a person who holds an amateur operator license of the class specified below:
(i) Amateur Extra, Advanced or General Class in order to administer a Technician Class operator license examination;
(ii) Amateur Extra or Advanced Class in order to administer a General Class operator license examination;
(iii) Amateur Extra Class in order to administer an Amateur Extra Class operator license examination.
(4) Not be a person whose grant of an amateur station license or amateur operator license has ever been revoked or suspended.
(c) Each administering VE must be present and observing the examinee throughout the entire examination. The administering VEs are responsible for the proper conduct and necessary supervision of each examination. The administering VEs must immediately terminate the examination upon failure of the examinee to comply with their instructions.
(d) No VE may administer an examination to his or her spouse, children, grandchildren, stepchildren, parents, grandparents, stepparents, brothers, sisters, stepbrothers, stepsisters, aunts, uncles, nieces, nephews, and in-laws.
(e) No VE may administer or certify any examination by fraudulent means or for monetary or other consideration including reimbursement in any amount in excess of that

permitted. Violation of this provision may result in the
revocation of the grant of the VE's amateur station license
and the suspension of the grant of the VE's amateur operator
license.
(f) No examination that has been compromised shall be
administered to any examinee. Neither the same telegraphy
message nor the same question set may be re-administered to
the same examinee.
(g) Passing a telegraphy receiving examination is adequate
proof of an examinee's ability to both send and receive
telegraphy. The administering VEs, however, may also include
a sending segment in a telegraphy examination.
(h) Upon completion of each examination element, the
administering VEs must immediately grade the examinee's
answers. The administering VEs are responsible for
determining the correctness of the examinee's answers.
(i) When the examinee is credited for all examination
elements required for the operator license sought, 3 VEs
must certify that the examinee is qualified for the license
grant and that the VEs have complied with these
administering VE requirements. The certifying VEs are
jointly and individually accountable for the proper
administration of each examination element reported. The
certifying VEs may delegate to other qualified VEs their
authority, but not their accountability, to administer
individual elements of an examination.
(j) When the examinee does not score a passing grade on an
examination element, the administering VEs must return the
application document to the examinee and inform the examinee
of the grade.
(k) The administering VEs must accommodate an examinee whose
physical disabilities require a special examination
procedure. The administering VEs may require a physician's
certification indicating the nature of the disability before
determining which, if any, special procedures must be used.
(l) The administering VEs must issue a CSCE to an examinee
who scores a passing grade on an examination element.
(m) Within 10 days of the administration of a successful
examination for an amateur operator license, the
administering VEs must submit the application document to
the coordinating VEC.

Nowhere in there does it say anything about the international
requirements.

> Well the international
>regulations do not require a morse code proficiency for HF access.
>97.301(e)

97.301(e) For a station having a control operator who has been
granted an operator license of Novice Class or Technician

Class and who has received credit for proficiency in
telegraphy in accordance with the international
requirements.
<snip> (Snipped material lists authorized frequencies for operators
with these license classes)

Once again, current international requirements leave it up to each
country's government to determine the requirements for that country's
ham licenses. Which brings us back to:

ï¿½97.503 Element standards.
(a) A telegraphy examination must be sufficient to prove
that the examinee has the ability to send correctly by hand
and to receive correctly by ear texts in the international
Morse code at not less than the prescribed speed, using all
the letters of the alphabet, numerals 0-9, period, comma,
question mark, slant mark and prosigns AR, BT and SK.
Element 1: 5 words per minute.

> I guess it all boils down to what "IS IS".

Yes, it does. And the above "is" what the current regulations "is"
whether you like it or not. Deal with it - or be prepared to explain
your illegal operation to Riley Hollingsworth.

>BTW, what do you care about US regs if you live in Canada?

The HF bands propagate worldwide - which means if clueless trolls like
you get on HF, he would have to listen to your pitiful attempts to act
like someone who knows what they're talking about.

I've been in favor of dropping the code test since the mid-1970's. You
are beginning to make me change my mind.

You are apparently unable to read and understand the applicable regulations, at both the US and international level, even though I and others in this NG have gone out of our way to post the material in this newsgroup (thus saving you the trouble of finding it yourself on the Internet) AND explaining it to you (thus saving you the trouble of turning off your CB set long enough to figure it out).

>I am talking about a technician class licensee having tech class HF
>privileges without the code test.

For the hundredth time: they don't.

> I'm not talking about making them to general.

Perhaps the confusion is because you insist on referring to picking up your microphone and talking on the HF Tech bands (plural) when there is only on HF Tech band (singular) in which Techs are allowed to operate phone (that being a part of ten meters). You don't get to bands (plural) until you have a General or above.

> Don't worry this is going to be reviewed legally very soon.

To paraphrase your own comment in another post: SNARF! HA, HA!

It will be reviewed *administratively* - there is a big difference. Congress empowered FCC to formulate and enforce regulations governing the use of the radio frequency spectrum. The courts have repeatedly ruled that FCC's authority is constitutional. The decision of whether or not to drop the code test will be purely an administrative decision on the part of the Federal Communications Commission.

That's not what he is saying. US Rule 97.301(e) uses the words
'international requirements', i.e. it incorporates the ITU rules by
reference. If he goes on 10m he may well end up before a judge, but he may
win (or not, it's risky).

You obviously don't understand the FCC rules any better than Keith.
Until the FCC eliminates the code test requirement, everything remains
the same for U.S. hams.

Not quite. The rule is the same, but the 'international requirements' it refers to have changed. How you interpret that is another thing, but the FCC chose to write a rule that incorporates by reference the rules that were changed in the WRC.

Here's an idea for an analogy. Anyone here ever write any code of the computer kind? Say you write something that makes a call to another object/subroutine, etc. The ITU have re-written the subroutine, and the FCC code includes a GOSUB that calls it (revealing my BASIC roots here).

758. Help with TS-930S Power Output

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-26 10:50:19 UTC

Source record: 64876

Recently acquired a nice TS-930S but I suspect a previous owner had turned the RF power output down somewhat as I only get between 80-90 watts out of the rig. I believe the rig is rated at 230 watts input and have been told the RF output should be around 130 watts. Can someone tell me where/what pot to adjust to increase the RF output ? I did not get an owners or service manual for the rig. I have ordered an owners manual but suspect it will be some time before I get it. Any help would greatly be appreciated.

- actually, if you consider the effort expended on debating this entire issue and the expense of an initial consultation with a bottomfeeder, one may come out ahead simply by getting an MFJ-418, learning the 5WPM, and passing the CW test - and getting a certificate or upgrading to a general ticket...

- the truth is that the multiple choice exams are so easy, one can simply drill for a day or so before the exam and pass easily - all without any real learning of the principles and operating procedures...

- quite frankly, i'm not surprised there are problems with a number of operators on the amateur bands - and i find it interesting that courtesy has to be taught and tested on the FCC exams, when common sense would dictate and infer good manners anyway... (something lacking nowadays on Usenet, which i've been using since 1986)...

- is being able to copy CW at 5WPM an indication of skill or evidence that one is a better radio operator? in some ways, you have to admit that yes, this is the case... there is a difference between being able to copy CW and not copy CW (manually of course, as one can also use a computer)...

- on the other hand, is it necessary to know CW in order to use voice on HF? of course not...

- i'm a relatively new ham, and am learning CW now... i find the effort to be a challenge and at the same time, very rewarding... the ability to learn a new skill, even if considered no longer necessary by a U.N. agreement, does not diminish the intangible benefits of mental discipline... (perhaps CW may help me stave off sliding into early onset of adult Alzheimers)...

:-)

- of course, i also build my own bamboo fly rods and have built two boats by hand - abilities that some fly fishermen and boaters may consider superfluous as well...

Not only that, but he is also a dickhead. Of the guy is probably cowering behind his keyboard while making his posts. Whether or not you agree with the amount of media and other attention focused on Ms. Lynch, you should at least show her basic respect that she risked her life and future in order to get shot at and possibly killed in duty. The same goes for the rest of the veterans of any war because without their sacrifices you wouldnt have free speech or anything else for that matter. Of course, Mr. Spammer aka Sir Dickhead doesn't appreciate those sacrifices the American fighting man/woman done. A good trip to Red China may be what he would deserve.

I've dealt with these types before. Take one part of a rule, and then proceed to interpret the bejabbers out of it.

There is no rule that can be written that cannot be interpreted just about any way a person wants to.

In other portions of the rules, there is adequate understanding that for HF privileges, you must take a test, one of the elements consisting of a Morse Code test.

In addition, we must note that the Morse code test has NOT been eliminated. It is now up to the individual country to determine if they want the test as a requirement.

So, the US is still in compliance with the rule, in requiring a Morse code test. If we eliminate the MOrse code test, we will still be in compliance, having exercised that option as outlined in the rule.

If you don't believe me, just give it a try, and provide documentation of your times and date. A recording would be nice too.

Do you folks have the courage of your convictions?

- Mike KB3EIA -

> 1. The FCC Rules & Regs make reference to the code requirement as
> spelled out by the WRC.
> 2. The WRC no longer requires any code.
> 3. Ergo, the FCC Rules & Regs no longer require code.
>
> What's so difficult to understand? (Other than English, that is.)

What are you babbling about dickieboy? Maybe his misconceptions are
clear to idiots like you (why does that suprised anyone?), but the fact
remains, until the FCC goes through the procedures necessary to
eliminate the code requirement for the amateur radio service, it is
still required and everything is just as it has been. Just because the
WAC no longer requires the code, does not automatically drop it from the
FCC requirements. Try reading more carefully and you might learn
something, like how to find the 10 meter band.
Lets see a newbie go for the General license and see if he can get one
without taking a code test. You are as dense as this keith bird. You
both must be really good on cb.

Hi OMs
I got a schematic for an amplifier.What is:
an Unelco
a coil with 3 turns #16 enameled wire,3/16" ID (everything unclear except
the 3 turns)
dura mica

mni tnx
Tom

What are you babbling about, JJ? He made it quite clear (except for
morons):
1. The FCC Rules & Regs make reference to the code requirement as
spelled out by the WRC.
2. The WRC no longer requires any code.
3. Ergo, the FCC Rules & Regs no longer require code.

What's so difficult to understand? (Other than English, that is.)

Was an Anti War Protester in the 60's
(- Got tear gassed with the best of them)

Very glad Jessica Lynch is alive, well and
was rescued. What she did was heroic.

The people who rescued her were heroic. Most of the people over there
whether in combat or not, are doing heroic things.

Better get it all over with now than wonder, ten years down the road,
why CNN suddenly goes off the air . . .

- And, if your still alive & upwind..
have to get your news from SWR

Another problem that was pointed out to me are people with disabilities.
According to the American with Disabilities Act the government can not
discriminate against disabled people .
Now that s25.5 is international law the government must now accommodate
disabled people and they must do it without reasonable delay.

Since I was "double quoted" in this, I'm not certain if that last comment was directed back to me or just for Keith.

However, note that I recognize that there may be an unintended result of the recent international event - and that is certainly a "new thought" for this group. It also demonstrates that no body of law should refer to definitions made in another body of law that one has no control over and expect things to be the same if the referred-to law is changed when the referring law isn't.

Do I need to petition for declaratory ruling to find if the FCC rules say if I
can operate CW on 80 meters?
And do not say I'm playing a lawyer. I am discussing a issue you on a f*cking
news group.

But note HOW the privilege is defined. In this case, it's NOT defined as simply holding "element 1 credit" like it's pre-2000 predecessor was. Other license classes' privileges are based on license class, which is in turn based on element credit. However, for the HF operation of Technician and Novice licenses, the current regulation doesn't refer to element credit but instead refers to the international requirement - which was just repealed (and replaced with a statement that each country may decide for itself - but that makes it a "national requirement" and choice, not an international one).

If the section privileges were based on "holding element 1 credit," then I would agree that nothing has changed. However, that is clearly erroneous.

> So, the US is still in compliance with the rule, in requiring a Morse
> code test. If we eliminate the MOrse code test, we will still be in
> compliance, having exercised that option as outlined in the rule.

I don't dispute that. However, the authority for HF operations of Technician and Novice licenseholders isn't based on simply holding element credit like it

is for the other license classes.

There's a fourth step here:

4. Since there is no international requirement any more, no one can meet that
[now nonexistent] requirement.

Therefore, under this logical application of the regulation and the events
effective July 5, 2003, there is no operating authority for any Novice or
Technician (Plus or with an element 1 CSCE) for any frequency below 30MHz,
since said authority contains a requirement that cannot be met (because there
is no such requirement anymore, having been repealed).

You actually can't wind around the coil until it's
made.

You make it by winding number 16 gauge enamelled
wire
around a former (a drill shank will do) three
times.
Leave enough at the ends to atach the coil to
whatever.
Note - the wire will be a bit springy - you may
have to
use a slightly smaller former and allow it to
expand
to 3/16".

Cheers.
Murray

A 5wpm code test does not discriminate against Americans with disabilities.
Disabled people have passed while their unhandicapped brethren have sat on
the sideline whining about the code.

Jessica Lynch is truly a hero, and I am proud of her.

There are plenty of cowards on this list who wouldn't (couldn't) be a soldier if they had to.

BRAVO for Jessica Lynch !!!!!!!!!!!!!!!

Cowards are finding it hard for a female to receive recognition for being brave, and a proud American.

I love BUSH and Jessica Lynch !!!

Actual it is discrimination, but that beside the point. The FCC should not
deleted
47 CFR 97.503(a) because of ADA - it should deleted it because it: (1) is
unnecessary,
(2) is bad public policy, (3) it servse no legitimate government purpose,
and (4) is not
in conformity with 5 USC 706(2)(A). At WRC 2003, no nation member spoke
in favor retaining ITU rule S25.5.

Whinning? I think you mean winning. We are sat the winning side of the
debate
to end Morse code exams.

Dee, it not necessary to insult people, just tell Keith that the WRC 2003
delete
the international requirement; and the FCC, in due course will delete
the domestic requirement.

Right on Dee.

I am d**m near deaf, and if a guy who reads lips can learn morse, then
most everyone can.

An early acquaintance in ham radio could "read" CW in flashing lights. I've
heard stories of others who have felt vibrations to "read" CW.

My ex had 70% hearing loss in both ears and a constant ringing of the ears.
He too passed his 5wpm. Although he did have it so loud when he practiced
that I either had to leave the room or make him wear headphones. Of course
there were other testing methods for those who were totally deaf.

Pardon me if I'm confused..

How can it possibly be that one can be a traitor because they disagree with the government, when that government is supposed to be protecting their right to disagree?

As far as I'm concerned, there are lunatic fringes on both ends of the political spectrum... and though their methods may differ, their real goals are pretty much the same.

I find it absolutely hilarious that both sides have a bitch about the Supreme Court.. the SAME Supreme Court. On the one hand, the liberals are bitching at the Court because they placed Bubya in office... on the other hand, the conservatives are bitching because the court found in favor of gays' right to privacy.. seems to me that makes a balanced court.

As for the security/civil rights situation, there MUST be a balance, or we all lose.. liberals AND conservatives. People need to use thier brains, instead of just parroting the party line.. THIS MEANS BOTH SIDES!!

I'm old enough to remember all the same arguments going on nearly 40 years ago. They were stupid back then, and stupid now.

At one point, I was thinking about trying the vibrating method, like
holding my fingers on a speaker cone. But as a challenge, I decided to
go for the aural method. Wasn't easy, but I did it.

Hehheh, I know that one. I use headphones to listen to the television,
and my XYL is driven up the wall by the level I use to listen. Field day
can also be a nuisance, when one person is op, and the other is logging.
Thank heavens there are some headphones with volume controls on them.

In the end, That's a big reason why I love PSK31. I don't have to
disturb anyone else, and can work in a relaxed state of mind.

Nothing at all.

The original posting was the latest in the
ongoing series of flood-postings to the rec.radio
related NG's by an individual who was recently
nailed for QRM'ing on the 75 Meter ham bands
by the FCC, and this is his way of blowing off
steam as he can't fire-up his ham rig to jam anymore
on HF. (the FCC's got his transmitter's RF envelope
"fingerprint" online at the DF facility in Laurel Md
so his days of stirrin-up-the-sh*t on ham radio have ended)

Damn right, Werner! Even if you believe this story was exploited for propaganda purposes, or were opposed to the war itself, she had nothing to do with that. She put herself in harm's way when ordered to do so, got exact that through no fault of her own, and was able to return home later with a smile on her face. If that doesn't make her a hero, it does makes her something darn special.

Hey Keith may be you can help me. I have been diagnosed as a dyslexic
and have ADD. My disability prevents me from concentrating for more
than a few minutes so I can't take any code test or written test let
alone study for them.There must be some legal loophole or political
angle you can figure because there are millions of general public with
disabilities like me who want open access to the ham bands but the
government discriminates against us.Just because I have a disability
why should I be denied my right to operate ham? Maybe a protest or
something would help.Thanks for your help Keith keep up the good work.

802. CAT-1000 PROGRAMMING HELP...

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-27 07:39:08 UTC
From: "R. Belcher" <randy.belcher@verizon.net>
Message-ID: <wkLUa.8004$FP5.5460@nwrddc02.gnilink.net>
Source record: 64921

Anyone have suggestions why I cannot connect via modem to a CAT-1000 controller?
Settings are correct on my end and on the CAT end per manual.
I dial out and get the CAT modem tone, my modem answers with its white noise/racket then stops after a few seconds. The repeater modem tone then times out a few seconds later. No handshake or connect. I've used the Comm32 and Hyperterminal programs with the same results.
What's the flowchart on this? Could it be a "level" thing on the CAT end?
Any help appreciated.
Randy

And you understand just about as much as dickboy does. Until the FCC
changes it, nothing has changed, code is still required.

It doesn't matter.

If s/he/it is posting as anonymous or under a falsie, then s/he/it is posting as the great "one" who all anonymous posts are accredited to: the anti-Christ, the Great Satan, the weirdo, the twirp, the eternal masturbator.

Of course, not all "anonymous" masturbators who post anonymously on newsgroups are "anonymous", some of them have sexual habits of which they are ashamed.

I am horrified that many think that anonymous posters are suffering from AIDS or third-degree syphillis and I suggest that this is not true over 99% of the time.

So - when you see an anonymous post - don't be angry, just remember that those suffering from AIDS - such as anonymous posters to rec.radio.shortwave - are to be pitied - these are people for whom one should be sorry for. I mean we're talking about the horrible, ugly and perverted anonymous posters to rec.radio.shortwave.

We're not talking about heterosexual people.

Hi
Is 3/16" the coil length ? And what's "enamelled wire" ? Isolated wire ? My technical english dic ain't available at the moment.

Alternate interpret all you want, until the FCC changes the rules,
nothing has changed. The FCC makes the final interpretation and they
have NOT changed the rules regarding a code test.

KEITH.

YOU ARE AN ASS... IN dealing with CW tests for ADA people there are MANY ways an examiner has latitude to issue a code test so that they have a chance to pass it... READ THE RULES AND REGULATIONS SOME TIME. I've given many ADA tests, to both Blind, Deaf and those who couldn't even write even if they did have all other senses. So long as the examiner does NOT give them the answers to the questions or directly/indirectly tell them what was sent so as to cheat, they can do damned near anything to help that person get what is needing to be sent to give them that fighting chance.... Don't open your mouth without facts which you have yet to provide any of in support of your lawlessness aim to sidestep a part you're apparently too damned lazy to do. I've seen more handicapped people pass a code exam than you can count. MORE than the lazy people like you who are "supposedly" NOT handicapped. PRIOR to the code being dropped to 5WPM, there were waivers available by Dr. Signature for the 13/20WPM. But 5WPM is so damned easy, it is pathetic. I STILL SEE LAZY in every one of your posts. I know a paraplegic who is a ham, passed his exam with no problems.. Today that boy even in his condition, is one hell of a smart kid. IT TOOK DETERMINATION AND WORK to get where he got. It takes that by ALL to get anything worth having. That boy is - even in his condition, a computer whiz. He earned his 20 WPM the old way, no waivers. IF HE CAN DO IT, ANYONE CAN.

It is very apparent you have yet to crack open a copy of Part 95... IF you are supposedly an amateur, you're supposed to have a copy of it there to refer to and to be familiar with. Ignorance will get you no where. Even when

you try to claim such in court. Again, if you get busted, I'm going to laugh my ass off.
I'd be willing to be, you would act as your own defense.... Boy, what a joke that will be.

JMS

got a schematic for an amplifier.What is:
>an Unelco
>a coil with 3 turns #16 enameled wire,3/16" ID (everything unclear except
>the 3 turns)
>dura mica

I'm not sure if Unelco refers to a brand name, or if it is a type of construction unique to a certain brand. But whenever I run into Unelco caps, they are always these 'square pads' that have a tab on the side. The capacitance is from the construction. The square pad is soldered down, and the tab is insulated from the square tab, the insulation being the diaelectric. You usually find these in high power amplifiers as bypass on the final stages where there may be respectable RF current.

As to the coil, there's usually one other 'spec' that you seem to be missing. That's the 'turns per inch'. But in it's absence, you can still easily make the coil. In this case, just get a 3/16" bar and wrap your 16ga wire around it 3 times and you have your coil. If it's not specified, try to make the coils spaced 1 width apart. Some people wrap TWO wires to make the coil, then unwrap one, leaving space for a wire between the wraps.

With 16ga wire it's not easy, but if you can find a 'coarse thread bolt' in 3/8" diameter, wrap the wire to follow the threads. Then unscrew the bolt out of the coil. If you need wider spacing, you can gently 'pull' the thing to stretch it out. I had one kit one time that specified the coils by what bolts to wind them on...

Explain to me why a deaf person should now need to know morse code? When the silly horse and buggy test was rammed down their throats by the US government they could use lights. Now how is a deaf person supposed to use morse code sitting in their home listening to the radio? With modern digital communications like PSK31, Pactor and RTTY a deaf person can enjoy ham radio. And as always they can use a computer to decode morse code as they have in the past. But for them to learn morse code through some silly light system is pure discrimination because the deaf have no way of decoding morse by ear.
The morse code test for deaf people is pure discrimination and now that s25.5 no longer requires a proficiency to know and send morse code the FCC better move fast to remove this discrimination.

Here is your original message...

Hi OMs
I got a schematic for an amplifier.What is:
an Unelco
a coil with 3 turns #16 enameled wire,3/16" ID (everything unclear except
the 3 turns)
dura mica

mni tnx
Tom

You said everything was clear except the 3 turns.

YOU GO TO RADIO SHACK AND AKS FOR SOME #16 ENAMELLED WIRE
YOU CAN TELL BECAUSE IT LOOKS LIKE A COAT OF SEE THROUGH BROWN PAINT ON IT NOT INSULATION
YOU BUY A 3/16" DRILL BIT

YOU CUT APPROXIMATELY 9 INCHES OFF THE ENAMELLED WIRE TO GIVE YOU PLENTY OF WIRE TO HOLD ONTO
YOU PUT YOUR DRILL BIT IN A VISE TO HOLD IT STEADY
YOU WIND THE ENAMELLED WIRE AROUND THE DRILL BIT THREE TIMES LEAVING A GENEROUS AMOUNT AT EACH END
YOU SLIDE THE COIL YOU HAVE JUST MADE OFF OF THE DRILL BIT
YOU TRIM THE ENDS TO THE LENGTH YOU NEED

SEE ATTACHED PICTURE FOR AN EXAMPLE OF WHAT THE COIL SHOULD LOOK LIKE
YOURS WILL ONLY HAVE THREE TURNS THE EXAMPLE HAS 5 TURNS

DON'T SCRATCH THE ENAMELLED WIRE AND DON'T ELECTROCUTE YOURSELF
TO AVOID ELECTROCUTION TAPE A WIRE TO YOUR GROIN AND THE SCREW IN AN ELECTRICAL OUTLET TO GROUND YOURSELF
HAPPY AMPLIFIER BUILDING

You complain about the politcal posts and how they take up space, but why do you contribute to the topic? I haven't actually contributed to the political topic. I happen to practice what I preach. There are numerous other newsgroups that focus on politics, are you that lazy that you can't do a search for them?

Sorry, my statements aren't sugarcoated or politically correct but they are the truth. I know you Liberals hate it.

818. Help with Amp Keying Relay in TS-930S

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-27 14:41:57 UTC
From: Tim English <te@usol.com>

Just acquired a Kenwood TS-930S but did not get any manuals with it.
Can someone tell me where I can get a relay output to key my SB-200
amplifier? There are REMOTE and TRANSVERTER plugs on the back of the
rig so I assume there is a relay closure back there someplace. Any
help would be appreciated.

WHAT "exclusive CW allocations" ??? Are you talking about
50.0-50.1 MHz and 144.0-144.1 MHz??? If not, you're operating
under a serious misunderstanding of the FCC rules and should
consider some remedial study ... you are a licensed ham, right?
(You should, therefore, know these things ...)

> Certainly there can be no argument for keeping the current band

> frequency.

Certainly there should NOT be an expansion of the phone bands
(this is my *personal* opinion), as that would constrain the development
of modern digital modes in (what you think is "exclusive CW allocations."

Suggest you read Phil Kane's posting on the subject. As he states, the law has changed only in respect that each Administration can choose themselves about the requirement for a code test. It does not mean that the FCC has to abolish a code test. So like Phil says, nothing has changed yet.

But the requirement has not been eliminated in the U.S. and the change
in the international treaty is not a mandate that the requirement for a
code test must be dropped. The FCC can keep the requirement indefinitely
if they desire. Until they do drop it, nothing in the licensing
structure has changed.

All the removal of the international requirement in the ITU Radio
Regulations
does is to allow each administration to determine on its own whether or not
to keep a Morse test.

Most will eliminate it ...

The US has NOT done so yet, so what is suggested above would be ILLEGAL,
put your license in jeopardy, and give all of ham radio a black eye.

And YES, the FCC *does* have records of which Techs have HF privs, so the
writer above is totally wrong.

FCC rules have NOT changed (yet) ... Techs are STILL not allowed
HF privs unless they have passed, and have documented credit for,
the 5 wpm Morse test ...

Don't let the writers in this thread talk you into ILLEGAL operation.

SEE PART 97
§97.501 Qualifying for an amateur operator license.
Each applicant must pass an examination for a new amateur operator license grant and for each change in operator class. Each applicant for the class of operator license grant specified below must pass, or otherwise receive examination credit for, the following examination elements:

(a) Amateur Extra Class operator: Elements 1, 2, 3, and 4;

(b) General Class operator: Elements 1, 2, and 3;

(c) Technician Class operator: Element 2.

§97.503 Element standards.
(a) A telegraphy examination must be sufficient to prove that the examinee has the ability to send correctly by hand and to receive correctly by ear texts in the international Morse code at not less than the prescribed speed, using all the letters of the alphabet, numerals 0-9, period, comma, question mark, slant mark and prosigns AR, BT and SK.
Element 1: 5 words per minute.

I understand your caution, Carl. But, somehow, if one is willing to ignore existing R&R, or maybe doesn't even understand them, in an area where they would "experiment," don't they kind of deserve whatever trouble they would have coming their way?

Well, Carl, here is a well thought out and well presented argument.
Your answer?

Mike, I agree it *is* a reasonable argument. Myself, I would prefer that a portion of the bands be reserved for digital modes (including cw) in the same manner that many parking lots used to have a number of spaces reserved for small cars (I haven't seen that many in some time since cars have shrunk considerably since the 70s). My fear is that some of the yahoos with 5 KW capability would love to wreck havoc in the low ends of the various amateur bands using voice modes. Besides, it makes it easier to find a station using a mode that you may wish to use if the bands are segmented somewhat to use.

Actually, YOU BOTH need to read it more carefully.

Unlike the frequency privileges defined for other license classes and for those Technicians on frequencies above 30MHz, which are bases SOLELY on holding the license (based solely on the element credit), the HF allocations for Technicians and Novices are based on TWO things:
- Holding a Technician or Novice license (i.e. element credit)
- Compliance with (i.e. EXISTENCE) of an international regulation
The problem is that with the recent removal of the international regulation (via S25.5), NO licensee can meet the second requirement above, and without it, the FCC wrote a sufficiently defective regulation that now RESCINDS ALL HF operation for these license classes.

Until the FCC revises the U.S. regulation to be dependent ONLY on element credit and removes the reference to the international regulation that was just rescinded, only General, Advanced, and Extra licensees have privileges below 30 MHz.

It's not that there is no code requirement for HF operation by Technicians that don't have element 1. It's that for those who DO possess the credit, they

CANNOT operate (and neither could Novice licenseholders) below 30MHz at all.

> the 5 wpm Morse test ...

I disagree - they don't even have that anymore. Techs who have the element 1 credit in hand CANNOT operate on HF, because 47 CFR 97.301(e) has TWO requirements, the second one being compliance with an international regulation that now no longer exists. Since there is no way to be in compliance with the rescinded regulation, the second condition can NOT be met, and therefore, no "technician plus" licensee (or equivalent) and no novice licensee has any HF privileges. By the stated condition, the privilege was rescinded on July 5, 2003, when the international regulation effectively disappeared.

Note that .301(e) is NOT written like the rest of .301, which defines operating privilege based solely on license class, which is in turn based solely on element credit (in .501).

Had the regulation been written in such a way that it indicated licensees who hold element 1 credit may operate (see list below), then I would agree that nothing had changed. It's NOT written that way.

That requirement, by itself, is NOT enough.

See other replies, and the sub-thread titled "Alternate interpretation."

It is not a reasonable argument. It has logical and technical
flaws which make that particular commentary quite worthless.

>"Mike Coslo" <mcoslo@adelphia.net> wrote:
>> Stu Parker wrote:
>> >
>> > But the point is well-taken. If CW is to be removed as a

>> > evaporated.

That is an absurd statement which cannot be supported logically.
(It says: The apples are ripe, so lets pick the oranges today.)

All that has happened is that CW has changed its status from a
separately tested requirement, to being one of many modes which
random questions on the written exam will refer to. That change
affects the *testing* only; it has *nothing* to do with the
technical requirements which are the basis for band allocation.
(Testing is apples; band allocation is oranges.)

There are many modes with "special status", none of which have
ever been a "requirement" for a ham license. CW is now (or
shortly will be) no different, in that respect. We still have
"special status" in band allocations for digital modes, slow
scan TV, SSB, AM, FM, and yes, CW. The basis for those
allocations has not changed.

The allocations may indeed be ripe for a few changes, but not
because the test requirements were changed.

>> > Why give it any band-plan perks at all? CW operators can
>> > already operate in the phone bands (most of them don't, but that's a
>> > free choice), so why not accord the phone users the same freedom of
>> > choice?

That is not technically sound.

An essentially narrow band mode like CW is not nearly the
interference problem to wide band modes like SSB and AM that the
wide band modes are to the narrow band modes. Hence, no phone
in the CW band by regulation, but the same is not required to
keep CW out of the phone band.

Not that it would hurt anything to ban CW from the phone bands,
just that it isn't needed.

>> > I'd be in favor of reserving a very small portion of each HF band for
>> > rtty, psk31, etc., but I'd let all modes permitted by an operator's
>> > license be used everywhere else.

A more reasonable approach is the current arrangement, though it
probably is time to consider some adjustments to the amount of
spectrum allocated to narrow band digital modes vs. wide band
phone modes.

A shift of 25 to 100 KHz from most of the HF CW bands over to
the phone bands would not necessarily be a bad thing. But it
would certainly cause a lot of noise if it were proposed, and
hence might take many years to accomplish. Therefore it
probably should be proposed now, and in 20 years when it becomes
reality, it will only be 10-15 years late... ;-)

Regardless, it is _technically_ not wise to allow wide band
operation in the narrow band digital band segments, and for
that reason I doubt the FCC will ever entertain the idea.

>> > In other words, it is legitimate and useful to reevaluate the entire
>> > band-plan structure of the Amateur Radio Service, and it is even
>> > thinkable that what is commonly called the "cw portion" of the bands
>> > should be reallocated.

That paragraph is correct. It's just the ideas given above for
the causative factors, the affected factors, and what the
methods should be that were wrong!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th/July, through Sunday, 27th/July there were 211 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A3, A4, A6, A7, AP, BV, BY, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, ER, ES, EU, EX, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J6, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, S0, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP2M, VP5, VP6, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUES ISLAND. Guy, FR5ZL, is a new operator on the island as 3B9ZL. He will be there for about the next three weeks. His activity has been on 15 and 20 meters CW/SSB. Watch around 21022 and 21275 kHz after 1100z and around 14017 and 14190 kHz 0230z. QSL via FR5ZL. Meanwhile,

Robert, 3B9FR, (ed. NOW a NODXA member!) continues to be active on 20 meters CW around 14024-25 kHz usually after 0300z and sometimes after 1100z.

CY9, ST. PAUL ISLAND. CY9A is now active until August 2nd. Please refer to OPDX.619 for the suggested operating frequencies (+/- 5 kHz). QSL via N5VL.

DX HOLIDAY WEBSITE. Kenny, K2KW, reports that the "DX Holiday Website" has been updated. The Web site lists information on where to operate overseas. Categories included are: Rent-a-QTH, Ham Friendly Locations, Club Stations and general information. The recent updates include:
New Rent-a-QTHs in PJ2, 9M8, ZP, PEI (VE)
Recent Rent-a-QTHs in HC8, ZK1, YL, G.
It also includes new Ham friendly locations or information updates in:
NA - 6Y, C6, FM, FS, HR and VP2V OC - W, H4, H40, KH6, KH8, P2 and ZK1/s
SA - P4 and PJ2 AS - 1S/9M0 and BV
EU - 9H, CU, DL, SM and TA AF - 3B8, 3DA, 7P, 7Q, A22, C5, C9, CT3 and S9
There's also great DXpedition Reference material in the "DXpedition Resources" section. The Web page's URL is: http://www.dxholiday.com
Kenny, K2KW, would like to thank the many who contributed the new information and patiently waited for this new update.

DXCC NEWS.....
Bill Moore, NC1L, ARRL DXCC Manager, wants to remind everyone that once again, the deadline for submitting applications for the 2003 DXCC Annual List is rapidly approaching. Applications must be postmarked September 30, 2003.

Bill Moore, NC1L, ARRL DXCC Manager, reports that the following are approved for DXCC credit:
Guinea - 3XY1L (1/Jan/2003 - 31/Dec/2003)
Guinea - 3XD02 (19/Mar/2003 - 31/Apr/2003)
Sudan - ST2CF (17/Mar/2003 - 2/Apr/2003)
Guinea-Bissau - J5UCW and J5UDX (8/Mar/2003 - 6/Apr/2003)
Afghanistan - YA/N4SIX (Ongoing)
Angola - D2CR (1/Jan/2003 - 31/Dec/2003)
Uganda - 5X2A (24/Jun/2002 - 1/Jul/2003)

FP, ST. PIERRE AND MIQUELON. By the time you read this, look for Paul, FP/K9OT, and Peg, FP/KB9LIE (YL), to be active from Miquelon (NA-032). They will be on the air from now through August 5th. Activity will be on CW/SSB on 160-6 meters (emphasis on 40, 30, 17, and 12 meters). On 6 meters they will have a breakable beacon around 50.120 MHz. They will run 100 watts to a variety of antennas: wire, inverted-L, and 6 meter beam w/Armstrong rotor. Paul and Peg will be looking for station who are QRP, mobile, and VK/ZL/JA/JT/Oceania in particular. FP/K9OT will participate in the CW NA QSO Party. QSL via their home callsign, bureau or direct. Their web site is: http://www.mhtc.net/~k9ot

IOTA NEWS.....
AS-147. Takeshi "TAKE", JI3DST, was active this past weekend as JI3DST/8 in the IOTA Contest from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) and will continue to be active until 0000z, August 3rd. Activity will be on 40/17/15/12/10/6 meters SSB. QSL via the Bureau ONLY.

EU-004. Steve, DJ7AO, has activated Mallorca Island instead of Fehmarn Island (EU-128) this past weekend for the IOTA Contest. He will be active until August 4th as EA6/DJ7AO. He will also activate some lighthouses. Activity will be mainly 20 meters CW/SSB. For more details on past and present lighthouse activations, please visit the Web site at: http://e09.de

EU-170. Milan, 9A5DJ (OK1DJG), and Lada, 9A5LO (OK1LO), will activate the Island of Pasman (CI-085) until August 8th. Activity will be on HF, 6 and 2 meters, mainly CW. Maybe they will activate some other Croatian islands around Pasman Island.

OC-133. Members of the Kinabalu Amateur Radio Transmitting Society (operators 9M6KM and 9M6KTC) will be active August 16-17th from Tiga Islands. The name, TIGA ISLAND (Malaysia name PULAU TIGA) is about 40 miles from Cotakinapal, Borneo Island, Saba State. Look for activity on 15 and 20 meters. QSL via the address on QRZ.com.

JX, JAN MAYEN (Update to OPDX.617). Ove, LA2IJ, informs OPDX that he is sorry to report his JX2IJ operation is delayed. Flights to JX-land on Thursday were cancelled due to thick fog, and Friday was not better. The next possibility is Wednesday (July 30th) if weather permits. He will possibly follow that flight. Length of his stay is not known - max 6 days.

KH9, WAKE ISLAND. By the time you read this, Jake, N6XIV/KH9, should once again be active from Wake Island beginning on or about July 26th (if all goes as planned). His visit will run approximately four weeks, and this will be his last KH9 work assignment for 2003. Jake will operate whenever possible during his very limited spare time. Just a reminder, he operates SSB only. QSLs go via K2FF direct or bureau. LAST MINUTE UPDATE (before going to print): Glenn, K2FF, informs OPDX that "Jake came up at 0830z on July 27th on 7.254 using a home-brew 40m vertical and had a nice QSO with K2FF and W6FRH. He reports that the C3SS tribander has some element damage and he's trying to get some parts shipped to Wake in a week or two. If this does not work out then he will continue to use the 40m vertical and a long wire for other bands. Operating times will be as usual with a start time around 0730z and lasting for a few hours. Again he hopes to be on the island for four to six weeks and this will be his last KH9 trip for 2003."

INTERNATIONAL LIGHTHOUSE/SHIP WEEKEND 2003. Mike, GM4SUC, reminds everyone that there are only three weeks to go before the International Lighthouse/ Ship Weekend takes place (starts at 0001z Saturday, August 16th and ends 2359z Sunday, August 17th). There are just over 250 stations in 34 countries

confirming their participation in the event. The list of these stations can be found at: http://lighthouses.net.au/illw/2003.htm
Mike states, "If you have notified us of your participation would you please check that the details are correct." Full rules and details of the weekend event can be found at: http://lighthouses.net.au/illw/index.html

OHIO QSO PARTY. It's less than one month away for the 2003 Ohio QSO Party (OQP). The OQP runs from 1600z Saturday, August 23rd, to 0400z August 24th. Full details, including rules, planned operations, past scores, records, software, operating aids, awards, etc., are available at the OQP website at: http://www.mrrc.net/oqp
You can also sign up there for the the latest news via the OQP E-mail reflector. Remember, 2003 is Ohio's Bicentennial, celebrating 200 years of statehood. We hope you'll join us in celebrating on August 23rd, whether from Ohio or elsewhere, in one of the best state QSO parties.

QSL INFO AND NEWS.....
Members of the F6KNL Radio Club of Cenon (REF33), operators F8BBL, F1DHX, F0DVX and F0ECL, were active from Margaux Island (DIFM: AT-102). QSL via F8BBL Bureau or direct.

Steve, G4EDG, informs OPDX that direct QSLs for his ZL4/G4EDG (OC-203) operation were mailed July 24th. All bureau cards will be processed as they arrive.

Nilay, TA3YJ, informs OPDX that QSL cards of TA3YJ, TA3YJ/0, TA3YJ/3, TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3, TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV, YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 were sent to the QSL Bureaus of Cyprus, Algeria, Croatia, Malta, Kuwait, Oman, Chile, Portugal, Uruguay, Germany, Spain, Ireland, Moldova, Tajikistan, France, United Kingdom, Liechtenstein, Ecuador, Colombia, Republic Of Korea (South Korea), Panama, Italy, Japan, Luxembourg, Czech Republic, Belgium, Denmark, Netherlands, Brazil, Russia, Slovenia, Poland, San Marino, Bosnia & Herzegovina, Cote D'Ivoire, Ukraine, Australia (VK2, VK3, VK4, VK5 and VK7), Mexico, Latvia, Romania, Venezuela, New Zealand direct July 25th.

POSTAL RATES INCREASED (VE and CX). The cost of DXing is going up again. It was announced that postal rates will go up in Canada and Uruguay. Hal, K4HB, provides the following info:
For Canada: Effective January 12, 2004, Canada will increase its rates as follows:
Canada to Canada will increase from .48 to .49
Canada to the US will increase from .65 to .80
Canada to all other countries will increase from 1.25 to 1.40

As of July 25, 2003, 1 USD = 1.38 CAD. Unless the USD picks up on the foreign exchange between now and January 2004, 1 USD will be a little short for sufficient postage from Canada to countries other than the US.
http://www.canadapost.ca/personal/corporate/about/newsroom/pr/default-

e.asp?prid=924

For Uruguay: This country increased its rates on July 1, 2003. Postage to the US and other countries went from 24 pesos to 36 pesos. (Don't know about the rate to other SA countries) The present exchange rate is 1USD = 27 Pesos, so 1USD is not enough for return postage anymore.

Hal, K4HB, states, "The 'Foreign Postage Rates' Web page has been updated with this information. Thanks to Pierre, VE2PIJ, and Bill Plum for passing this on to us."

RSGB IOTA Contest (Late listings)

QSL 90CI via HA3KNA. Activity was from Island of Sveti Nikola (EU-110 and CI-118). Operators were: HA1AG, HA3OV, HA3NU, HA6OI, HA1TX and 9A6AA.

QSL BI5P via direct or via bureau to BA4RD (P.O.Box 538 Nanjing, China). Activity was from Pingtan Island (AS-138). Operators were: BA4TA, BD4RS, BD5RV, BA5RX, BD5RT and some other BY5s. More details can be obtained on the JSDXC's Web site at: http://www.jsdxc.org

QSL HP1XVH (Guenter) via N0JT. Activity was from Contadora Island (NA-072).

QSL HS0EHF/p via HS0EHF. Activity was from Si Chang Island (AS-107).

QSL IB0P via I5JHW. Activity was from Ponza Island (EU-045 and IIA LT-0010). Operators were: I5JHW, I5NSR, I5OYY, I5UKS, IK5FTQ, IK5ZTW, I5HLK and SWL Francesco.

QSL IQ2CJ/3 via the Bureau. Activity was from Pallestrina Island (IOTA EU-131 and IIA VE033). Operators were: IK2JUB, IK2NCJ, IK2FIL, IW2HAJ and IW2JOD.

QSL KB4CRT/4 via home address. Activity was from Key West, Fla (NA-062).

QSL MD0BJM/M via direct or RSGB. Activity was from the Isle of Man (EU-116).

QSL OH0Y via OH6YF. Activity was from Aland Island (EU-002). Operator was Harry, OH6YF, celebrating 20 years (1983-2003) of HAM radio.

QSL F/ON5MF/P via ON5MF, direct or by the bureau is OK. Activity was from Ile Sainte-Marguerite (EU-058). Operators were: ON5MF and ON6NN.

Tony, TK5XN, active in the IOTA Contest, was from Corsica (EU-014, DIFM TK-01). QSL via Paul, F2YT.

Jack, W4NF, activated Hatteras/Pea Island, NC (NA-067). QSL via his home callsign.

QSL VY2TT via K6LA. Activity was from Prince Edward Island (NA-029). Operator was Ken, K6LA.

QSL K9AJ/VY0 via home callsign. Operator Mike was active from Southampton Island (NA-007). ADDED NOTE: Jim/K9PPY/VY0 and Mike/K9AJ/VY0 made over 5,000 QSOs from NA-225. Mike, K9AJ, was not able to be active from NA-009.

QSL YW6P (IOTA Contest) via EA7JX. QSL YV5JBI/P (outside contest) via YV5JBI. Activity was from Piritu Afuera Island.

SPECIAL EVENT. Look for special event station EN3WLL now through August 3rd from Lviv, Ukraine, to commemorate the Polish scientist Ignacy Lukasiewicz (who was the first-ever to use a kerosene lamp for the first time during the medical operation on July 31, 1853, in Lviv). QSL via UR4WXQ to the bureau or direct to: P.O.Box 7072, Lviv 79018, Ukraine.

SPECIAL EVENT. Operators Jack/G0FQN, Mark/G1PIE/M3PIE, and Pam/2E1HQY will be active next Saturday, August 2nd, as GB2SCL from Ribblehead Station on the Settle and Carlisle Line. This activity will commemorate the 35th anniversary of the withdrawal of the steam train by the British Railways. ADDED NOTE: A steam train will be driven through the station while the team is operating.

SPECIAL EVENT. John Hughes/G4KGT and G4PSG, Station Manager, Prestwood Scout Group Amateur Radio Club, informs OPDX that the RSGB Mobile Demonstration Vehicle, GB4FUN, will be present at WINGS2003, August 2-9th, at Windsor Great Park, Berkshire, England. There will be world-wide representation by over 3000 Guides and Scouts. The Amateur Radio Station callsign GB4FUN will be active from 1400 BST Sunday, August 3rd, with daily sessions thereafter 0930 to 1230 and 1400 to 1700, for demonstration purposes and for greetings messages to be passed (subject to existing bi-lateral agreements). Please listen around the usual Scout SSB frequencies. It is hoped that further activity will take place outside the session times.

SPECIAL EVENT. Look for special event station GB90RSGB to be on the air from RSGB HQ in Potters Bar now through August 9th, to celebrate the 90th anniversary of the formation of the Society. Activity will mainly be on the HF bands, CW and SSB, but with some digital modes and VHF operations. Also, you may have heard over the past weekend some stations signing GB90RSGB/number (ex. GB90RSGB/32). These station were also celebrating the RSGB anniversary and were involved in what was called "Party in the Park". The numbers at the end of GB90RSGB represents the RSGB district number the station was in. Some 58 stations were expected to be on. A special 90th anniversary award is available for those making contact with or monitoring any GB90RSGB stations. Details can be found at: http://www.rsgb.org/rsgb90/award.htm

TI5, COSTA RICA. Operators Harry/AC8G, Ron/WA8LOW, W8ILC/Ron, Brian/KA7KUZ, Kecko/TI5KD, Tony/VE3RZ, Jorge/CX6VM, Ed/K1EP, Tom/ZP5AZL, Juan/ZP5MAL, Dale/N3BNA and Dave/WT8R, will be manning the TI5N Contest station as a Multi-Multi entry in the CQWW SSB Contest, October 25-26th. QSL TI5N via W3HNK. For a day or two before and after the contest, the individual operators will be on using TI5/own-callsign as time permits. Expect a higher level of CW and other non SSB modes on the contest bands due

to the large SSB volume in the contest. Attention will also be directed to 6 meters and the WARC bands using various modes. QSLs for the individual QSOs should go to the callbook address unless advised otherwise. IMPORTANT: Do not mix the contest QSL with ones for the individual contacts.

TS7, TUNISIA (Large IOTA Op). About 17 OMs and 3 XYLs will operate from Kerkennah Islands (IOTA AF-073) from November 19th to December 1st. Their activity will include the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry using the callsign TS7N. During their time there, they plan to have five active stations on all modes and on 160-6 meters. Operators mentioned are: 9K2RR, JH4RHF, DK1BT, DJ9CB, DJ7IK, DK7YY, DL3KDV, DF2SS and possibly more. QSL via DL9USA. More information is forthcoming, and an online Web page will be available in August at: http://www.qsl.net/ts7n

USI ACTIVITY. Look for NODXA member Byron, KF8UN, to be active from Tappan Lake Island (USI OH-New) between August 9-10th. Activity will be on all bands 80-6 meters. QSL via the address on QRZ.com.

VP9, BERMUDA. Mark, AA1AC, will operate as AA1AC/VP9 from the Hamilton Parish, Bermuda, during August 10-13th. No other details were provided. QSL via home call.

W9DXCC 2003. The Northern Illinois DX Association is pleased to announce the 51th annual W9DXCC convention at Rolling Meadows (a NW suburb of Chicago) Illinois on September 19-20th. This will be the 50th anniversary of the first W9DXCC initiated by Bob Baird, W9NN, and held in Chicago in 1953. Their banquet speaker will be Dave Sumner, K1ZZ, ARRL CEO. Dave's topic will be the recently completed World Radio Conference 2003 from the DX'ers perspective. Dave is also Secretary of the International Amateur Radio Union, and has been instrumental in acquiring new frequencies for amateurs, as well as protecting current allocations. The complete W9DXCC schedule, and on-line registration is available at the W9DXCC website at: http://www.w9dxcc.com
Contact W9VA for info and questions via E-mail at: w9va@aol.com

XU, CAMBODIA. Hugo, LA5YJ (ex-9N7YJ), informs OPDX that he will be active as XU7ACW at least until September 9th. He was heard this past week on 40/30/20/17 meters CW. Watch 7006, 10105 and 18075 kHz after 1330z, and 14030 kHz after 1830z. QSL to LA5YJ with a SAE and please 1 IRC (If not available, 2 USD or equivalent). Postage from LA is 1.50 USD.

ZB2, GIBRALTAR. Carl, GW0VSW, will be one of four Sea Cadet Instructors training in Gibraltar between August 15-29th. He will operate mainly QRP (Some QRO operation may be possible) using an FT-817 and dipoles on all bands CW/SSB as ZB2/GW0VSW/p. However, Sea Cadet/Naval training must take priority, so expected times of operation will be early morning and late evening around 0500z and 2100z. Suggested frequencies are: 7030, 7055, 10106, 14060 and 14255 kHz. QSL is OK via his homecall.

Quyanapuk! which is "a big thanks" in the way my neighbors
would say it in Inupiaq.

Some day I'll add some more pictures, and finish the descriptions
of each of the North Slope villages. One other thing I should do
is add a URL for Barrow weather, as it is often just as interesting
as pictures. Right now, for example!

http://weather.noaa.gov/weather/current/PABR.html

Typical late-July/early-August day. Here's another URL that you
may also get a kick out of, as it shows where the Arctic ice
pack is.

http://pafc.arh.noaa.gov/data/ice/graphics/acij23a.gif

We've had two boats show up off shore already, but as can be
seen in the satellite images, getting any farther east than
Barrow would be a bit difficult except for the one that was a
Coast Guard icebreaker. That ice will clear out by late
August and early September, and barges will be able to make
it to Prudhoe Bay which is 200 some miles east of here.

The FCC, as a government agency, is bound by international treaty and law, and here, the international law HAS CHANGED, so any regulation that refers to it CAN (and in this case, HAS) been affected.

It's not "element 1 credit" by itself that determines a Technician class licensee's operating privilege on HF. If it were, then I would agree that nothing has changed - but that's simply not the situation here.

842. Re: American w/ Disability Act and CW Proficiency Test (Dyslexia)

Source record: 64809

I've been through this and always get flamed..

SOME Dyslexics are unable to learn morse code because their brain just interprets the dots and dashes as 'noise' and can't assemble them in proper order. The same type of Dyslexia also prevents them from enjoying music or playing a musical instrument. It has to do with the brain not being able to sort out the short duration sounds. I have learned to receive morse code, but unfortunately it has to be sent extremely slowly with dots in excess of one second in length and dashes in excess of three seconds and spaces between letters of three seconds or more. One word in three minutes doesn't cut it with the ham people. I'm glad that the code portion of the ham test is going away.

Flamers will be added to my killfile, profane flamers stupid enough to include an email address will be mailbombed via open proxy.

All good points, Jim. The US method does indeed work pretty well, and
hams who disregard it with bookoo power could indeed make a mmess of it.

In a word, YES ... they should have their licenses revoked.

HOWEVER, the REST of us don't need the grief that large-scale flaunting
of the rules would bring down on ALL of ham radio ...

73,
Carl - wk3c

> 2003, when the international regulation effectively disappeared.

That's ridiculous ... the NEW ITU Radio Regs simply give administrations
the CHOICE as to whether or not to have a Morse test as a requirement
for licenses that convey privs below 30 MHz ... they do NOT preclude
any administration from having it either way ... it's their choice.

The regulation was not "rescinded" on July 5, 2003, it was simply
MODIFIED.

Thus, there is no issue of "compliance with international requirements".
Current US FCC Part 97 rules are in compliance with the ITU Radio Regs.

I have previously voiced my view that I do NOT favor phone band
expansion, as the CW/data portions would be over-run with SSB.

That would thwart the development of new digital modes and IMHO,
be a bad thing.

I operate SSB a lot ... and I don't find the phone bands "too crowded" ...
certainly not so crowded that you can't find room for a QSO ...
even on major contest weekends, that's the case ... though some of
the folks operating the contests behave rather badly.

>OK Phil, read 97.301(e) and let us know how you understand it, parsing
>each part carefully.

OK - I presume that you mean the following text, not the frequency
table:

(e) For a station having a control operator who has been
granted an operator license of Novice Class or Technician Class

This is self-explanatory.

and who has received credit for proficiency in telegraphy in
accordance with the international requirements.

The key to this discussion is, or course, "what are the
international requirements".

Up until the 2003 revision of S25.5 of the IRR, each Administration
was required to determine the proficiency of each applicant for a
license valid for operation below 30 MHz. In the US, this was done
by requiring the applicant to pass Element 1.

Upon the 2003 revision of S25.5 of the IRR, the requirement to
determine proficiency was made optional for each Administration.

That is the only change in the "international requirement" - each
Administration can now decide by its own rules/regulations whether
to require a code test. The code test is no longer mandatory for
each Administration. Each Administration's requirement for code
testing has not been automatically "dropped" or "eliminated" solely
by the revision of S25.5.

Until the FCC changes the rules concering Element 1, the
requirement in the US remains that Element 1 must be passed.

The question of -when- and -how- the FCC Rules will be changed is a
separate item from -what- the rule requirement is up until they
-are- changed. Ditto for how the FCC will handle the issue of
giving -what- privileges to folks who hold a Technician license
but have never passed the code test.

Does that answer your question?

Mike,

As another NCI director, I'd tell Stu that IF he feels strongly
about his suggestion, he could submit a petition for
rulemaking to the FCC.

Cheers,
Bill K2UNK

And before July, there was no specific "code speed"
international requirement...yet that didn't allow techs who
could do 2 wpm morse on HF...the FCC mandated 5 wpm
even though the ITU had no speed minimum.

Cheers,
Bill K2UNK

You know I've heard this guy was accused of being a pedophile in the past by someone. There was actually a newsletter that contained all the alleged information about him and his work in the school district near his home in Maine. Is it true? I sure don't know. Don't want to know! From everything I've read the guy is supposedly a total creep.

The guy certainly SOUNDS deranged if you listen to his weird anti-government rants on the air. Twilight Zone stuff, black helicopters... definitely one fry short of a happy meal. Allegedly he sued the FCC for 10 million bucks and lost back in 1999. What kind of an idiot sues the Federal government?

He has been a lot more tame since he was thrown off 14.275 this spring and since the FCC in Boston got on his case, and after Walter Cronkite and the ARRL threatened to sue him. He was also allegedly soliciting donations for all kinds of nefarious organizations. One of the "directors" in his so-called "organization" actually admitted smuggling communications gear to a jungle dictator. Then he admitted giving communications gear to an African warlord! What a freaking fruitcake... allegedly the funding for this stunt came from this guys charity!

My buddy told me no one listens to his crap since he was exposed as a fraud and a liar. He just spews it out with a puny little signal while people just talk right over it these days. A has been who never was.

I'd bet on development ... because that's one of the fundamental
purposes amateur radio exists ... read the R&O in WT Docket
No. 98-143 (it's on the NCI website "Articles" page ... you'll
have to scroll down a ways ...)

What does that have to do with ham radio? Maybe the hearing disabled can climb
up there 75 foot antenna towers and use the lantern morse code to exchange
messages to each other? That has nothing to do with the radio transmission and
receiving of morse code by EAR which is what the test requires.

That is the test, the portion of the regs we are talking about is 97.301(e).
That portion of the regs is dependent on a international requirement for morse
code proficiency to operate on HF. The international requirement for morse code
proficiency has been eliminated.

Nah...this will be short-circuited by the FCC changing the Rules
long before it could ever be brought to trial, and any competent
regulatory attorney in or out of the government service knows just
how to thusly delay such things.

So far, so good

> Until the FCC changes the rules concering Element 1, the
> requirement in the US remains that Element 1 must be passed.
>

That's not what 301(e) says, though, is it?

The problem I have in your analysis is that 301(e) itself is one of the rules concerning element 1. It mentions Element 1 per se nowhere, but there is no other rule tying Technician HF privileges to Element 1.

This last statement of yours is indisputable re the General and Extra, in that Element 1 is still required to obtain those licences. However, there is nowhere in Part 97 any statement that a Technician needs Element 1 for anything, instead there is only the wording in 97.301(e).

Not really. The question comes down to the meaning of "and who has received credit for proficiency in telegraphy in accordance with the international requirements". If there is no international requirement to have "received credit for proficiency in telegraphy" for access to any frequency, then a person who has not "received credit for proficiency in telegraphy" is "in accordance with the international requirements" if they operate on those frequencies.

Can we deem that a Tech who has not "received credit for proficiency in telegraphy" has nevertheless "received credit for proficiency in accordance with the international requirements", i.e. is "in accordance with the international requirements"?

Granted that s25.5 as revised allows each administration to determine whether a code test is required. That being the case, the FCC does so in respect of Tech HF operation only through 97.301(e) and in no other rule. If that rule is conditional upon a code test being required by

international requirements, then there is nothing therein indicating that the FCC chooses to require a code test for that particular purpose.

To cut a long story short, the argument rests upon whether "in accordance with international requirements" is a necessary condition in the sentence. If it is, then no-code Techs have the Novice HF frequencies*, and if not, then they will have to wait. This is really what I am seeking comment on, although all other observations are welcome.

*(Although possibly not until after ratification of the new treaty)

The rule includes the words "has received credit", which gives the FCC
control over what speed they will give credit for.

cw keyer.

There are many disabled who have passed CW exams. The only thing that these bozos are whining about is they are too damned lazy to learn the code. 5 WPM is the easiest thing in the world, like walking.... some just too lazy to work for anything worth having. Mommy and Daddy must have spoon fed them all their lives.

I don't have my manual in front of me to do verbatim rules, but code tests for disabled can be done 1 letter at a time, sentence, etc. Stopped if need be to allow the person time to divulge the message or character sent. As long as it is sent with a "speed" setting to be as prescribed to work out at 5 WPM if sent all at once. In other words, speeding up or slowing down the speed of the character will give it a different sound and could make it hard to decipher at all if incorrectly sent. SO - you have a message consisting of the prescribed number of characters and sent as necessary to the handicapped party to allow them to decipher what is sent... THAT IS how a disabled can be tested..... You can use "lazy" all you want in any form of protest, it still comes out to LAZY.
._.. .- --.. -.-- MOST of the info I related on exam giving to Handicapped is covered in VE manuals, but should be found in FCC Rules as well.

866. HAMS in the South Pacific Islands

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-28 05:12:36 UTC
From: ausradio@volcanomail.com
Message-ID: <26c28518.0307272112.1a21ea49@posting.google.com>
Source record: 64835

A question for those in contact with radio amateurs in the south pacific islands.

Does anyone have any contact with radio amatuers in the south pacific islands who might have a GPS unit & who might be able to take some latitude/longitude (& maybe height ASL) readings for me on some FM broadcast band transmitter tower sites in any of the below listed nations. This info seams to be largely unavailable in the smaller islands.

Countries that I am interested in are:

Tonga
Vanuatu
Solomon Islands
Western Samoa
Niue
Nauru
Wallis & Futuna Island
New Caledonia
French Polynesia
Norfolk Island
Parts of PNG

The GPS info would be used to establish exact distance & azimuth stats & info for dxers from their QTH.

Anyhelp would be VERY highly appreciated.

Contact Ian [ONLY] at this e-mail address below:

too44hungry@hot44mail.44com

(please remove ALL the "44" numbers in the e-mail address above to reply, my partial defence against spam....thank you)

Ian

Unfortunately all those addresses use
ftp://147.229.35.11/pub/hamradio/Xpr/
link and it is invalid. I am still
looking for this application. I will
be greatful for good addresses or if
somebody will send this program to me.

Reading Phil's posting won't help. They know more than a lawyer does
about the "law". While I find the premise they are presenting
interesting, I feel concern that some poor schmuck might take them at
their word and start transmitting illegally.

Come on Phil, get real! Why should anybody listen to you? Its not like you are a lawyer or something... Oh yeah, you are, aren't you?

Well, its not like you have any special knowledge regarding FCC regulations. Thats a whole different kind of law you know... Oh shoot, thats right..... you have a great deal of experience that way.

Ahh, who cares, I'm still gonna believe a bunch of lay people over an expert any day.

Sarcasm mode off now....

I find the point people made regarding the idea interesting, but it cracks me up that they will argue it to death even when they are shown that they are wrong.

Just like any other Kenwood HF rig, the 930 is using the 7-pin DIN
REMOTE connector for an amp interface.

Pinout:

1. (speaker out) n/a
2. amp relay common
3. (PTT standby) n/a
4. amp relay transmit (closed on TX)
5. amp relay receive (closed on RX)
6. ALC input from amp
7. +12V DC on TX

But by their standards, they haven't been shown they are wrong. They
are discounting what others are saying because they think what
they see is right.

Look at all the conspiracy theories. Someone latches onto some
idea, because they want to believe it or because someone made a good
case for it. Then they proceed to create the world based on that
concept. Anyone who tries to disprove it is obviously just deluded
and likely part of the conspiracy.

This isn't the same thing as someone who misunderstands something
and when corrected then understands it.

This thread is about someone who wants to be able to operate on HF
without having to pass a code test. That's all that matters.
The details are secondary to that.

There may no longer be an international requirement for Morse code
proficiency, but there still is an FCC requirement for Morse code
proficiency, and until the FCC drops that requirement, NOTHING HAS
CHANGED concerning U.S. Amateur Radio.

I have in the past taught several disable persons in Novice classes. One had CP and could not even write fast enough to copy 5 wpm on paper. He simply copied in his head and wrote it down when the test was finished. All these handicapped folks worked very hard to achieve this goal and never complained once about having to do so. On the other hand, I had other non-handicapped who whined through the entire course about having to learn the code. I said, "look, it is a requirement to get the license, if you don't want to learn the code then you don't want the license, so make up your mind." I only had one who gave up.

So we have an EXTRA class licensee encouraging illegal operation on the
ham bands. Obviously the code test wasn't a good enough filter in this case.

Phil is not unbiased in this since he is part of the ARRL legal goons that want to ram morse code down the throats of Americans so they can pick a microphone to talk on HF. Read 97.301(e) it depends on the International requirement for morse code proficiency. The requirement for morse code proficiency is GONE.

> MODIFIED.

And 97.301(e) is dependent on a international requirement for morse code proficiency. There is no longer a international requirement for proficiency to send and receive morse code.
The s25.5 regulation says that it is left up to the administration. . The FCC rules do not require a morse code proficiency unless the international proficiency is required. So the FCC has already written the rules.
Now the ARRL thought their stupid trick to leave it to the administration would help keep more Americans from enjoy the ham radio hobby, but they screwed up in my opinion.

wrote:

> > Today there are no international proficiency requirements for morse code.
>
> Actually, the new treaty sez each country can decide for itself.

Exactly and 97.301(e) depends on the international proficiency requirements
laid out in s25.5. Now that there are no longer any proficiency requirements in
s25.5 then 97.301(e) is affected.

25.5 Any person seeking a license to operate the apparatus of an amateur
station shall prove that he is able to send correctly by hand and to receive
correctly by ear, texts in Morse code signals. The administrations concerned
may, however, waive this requirement in the case of stations making use
exclusively of frequencies above 30 MHz.

New Text of Article 25.5 (effective July 05, 2003)

25.5 ï¿½3 1) Administrations shall determine whether or not a person seeking a
licence to operate an amateur station shall demonstrate the ability to send and
receive texts in Morse code signals.

s97.301(e)

For a station having a control operator who has been
granted an operator license of Novice Class or Technician
Class and who has received credit for proficiency in
telegraphy in accordance with the international
requirements.

The US government has no standards for a technician to know morse code. To
receive a certificate yes, but the only reason a tech could not transmit on HF
was because of 97.301(e). Now that no code technicians have no requirement in
international law to know code they should be allowed to transmit on their
allocated frequency. That doesn't mean they can hop on 20 meters, it means they
can operate voice/data/cw 28.1-28.5 or even CW on 80, 40 and 15 meters.

The reason that 97.301(e) was written that way is because the government
expected s25.5 to be just deleted and techs could then operate HF. The ARRL
with their fancy footwork is trying to stop the removal of morse code as a
requirement for a HF license.
But don't worry it looks like BPL is going to destroy the bands anyway and you
morse code nuts can keep your death grip on those keyers. The ARRL has done
nothing but help put ham radio in it's grave.

That is NOT what 97.301(e) says. 97.301(e) does not require a tech to possess
element 1, it requires the tech licensee to meet the international standards
set down in s25.5 to transmit on HF. The reason 97.301(e) was written that way
is because the FCC expected the s25.5 reference to be deleted, but it was
changed. The fact that it was changed does not mean a tech licensee is not
meeting the requirements set down in 97.301(e).
It doesn't mean a tech can get on 20 meters, it should mean he can operate on
HF in the allocated tech bands according to the FCC rules.

We are talking about 97.301(e) and it does not require a technician to possess element 1. It requires the tech to meet s25.5 which NO longer requires the tech to know morse code. The reason 97.301(e) was written that way is because the FCC expected s25.5 to be deleted.
Don't you see the ARRL is trying to pull a fast one? Read 97.301(e) like you don't know anything and then read s25.5 to see what we are talking about. Don't worry about the test, it has nothing to do with the test.

You can lead a pig to water, but hams are something else.

Hello!

All Ham Radio related web-sites are invited to join W5WWW's Top Ham Sites list, which has recently moved to a brand new server (much more reliable than the old server). Your site would be a welcome addition to the list.

The new address is http://usa.ultimatetopsites.com/general/w5www/ . This is a great way to advertise your site for free and is also a great way to visit other ham radio sites on the web.

Many thanks for your consideration!

73.........Ron @ http://www.w5www.com

892. Radio Amateurs of Canada (and other radio databases) at PublicGIS.com

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-28 12:55:16 UTC
From: PublicGIS <publicgis_a@rogers.com>
Message-ID: <U29Va.103433$zwL.59344@news04.bloor.is.net.cable.rogers.com>
Source record: 64755

publicgis.com hosts 56,034 records (or "waypoints", as we call them) from the Radio Amateurs of Canada (RAC) database.

These 56 thousand "waypoints" are a small fraction of the over 8.6 million waypoints in the collection. Some other Canadian radio themes hosted at publicgis.com that may be of interest to you include
* Canadian AM radio transmitters
* Canadian FM radio transmitters
* Canadian TV radio transmitters
* TAFL Canadian radio transmitters database (with 300,000 records).

In addition to allowing normal searches (eg. find all hams whose surname begins with "F", etc), you can perform proximity searches.

For example, you can find all hams within 20 km of ...
* Port Colborne, Ontario (212 records found)
* postal code L3K 5V3 (201 records found)

This style of search lets you "find your neighbors", so to speak. You can further qualify the search, with "Advanced Search mode" to limit your search based on any other searchable field in the database. For example: find all hams whose surname begins with "F" and are within 20 km of
* Port Colborne, Ontario (12 records found)
* postal code L3K 5V3 (11 records found)

(Select Preferences to turn advanced mode on or off, and to select the type of location: postal code, populated place, zip code and latitude/longitude)

Happy Hamming!

There are cases where flashing lights are used for such a thing OR vibrating surfaces..... so being deaf is no excuse either. There ARE provisions. The main thing is, that IF the person is that handicapped, it is up to THEM or their family to provide any testing accessories to suit their needs, to allow the VEs to send the text. The VEs are not required to provide specialized equipment to cater to the handicaps needs.

Message-ID: <U%bVa.74447$vz%.12755@news01.bloor.is.net.cable.rogers.com>
Source record: 64762

There are more frequencies at publicgis.com than you could ever hope to receive. The themes

"Canadian AM Radio Transmitters"
"Canadian FM Radio Transmitters"
"Canadian TV Radio Transmitters"
"Canadian Radio Transmitters" (has 277,000 waypoints)

together contain over 300,000 frequencies. The AM, FM and TV themes each contain about 10,000 waypoints.

There are two kinds of searches:

1. simple search: specify radius and location. All transmitters within defined circle are returned. (eg. show me all radio tarnsmitters within 15 kilometers of Hamilton Ontario)
2. advanced search: narrow your search based on parameters specific to the theme in question (eg. show me all radio transmitters that transmit under 10 watts at between 35 and 40 MHz within 15 kilometers of Hamilton Ontario).

Goto "Preferences" to enable "Advanced Search Mode"

If you need assistance using these themes, please ask.

You folks act as if CW has died and is being buried by everyone in the whole world. I hate to break it to you but there is a LOT of activity on CW. And will continue to be for YEARS.

Just because the testing has been dropped is no reason think CW is not going to be used. I foresee a increase in activity actually. As the phone bands pile up with more and more CBisms the only recourse will be digital and/or CW. There will continue to be CW contesting, DXCC CW only, County hunting...etc..etc.

And I guarantee you a CW signal is a lot less bothered by phone interference than a phone signal is by CW.

Just stay up on the high end of the bands, and leave us alone.

Deal?

BUT UNTIL THE AMERICAN LAWS are rewritten, changed, updated (pick your
term), the CW requirement STILL exists in our Radio Laws.
You can NOT sidestep laws that exist. A law may be come effective in one
sense but when it affects so many countries, it takes time in the
administrative governments to trickle down. As I understand it, there are
yet, a few countries who will refuse to abide by the International Treaty's
standards to the letter.
The International Union decided to drop CW as a requirement, that does NOT
mean WE have to. IF the other countries are not so willing to go with it
either, then perhaps the FCC won't be so quick to jump either.

Get off your lazy ass and learn 5 WPM CW. It is not any harder than learning
to drive a car or program a computer. IF it is worth it to you to use 10
meters or any other band, then get your act together and make it a mission
to actually LEARN something. "I" am NOT one of the biased ARRL people, I
don't and won't belong to the ARRL. So my opinion is based purely on KNOWING
that is doesn't take a hell of a lot of work to LEARN - CW @ 5 WPM.
If the handicapped can do it, ANYONE CAN. If you can't, then you're not
handicapped, you're plain brain dead and lazy.

How stupid can one be -

s25.5 now lets each Administration decide whether a code test is
required. So far the US Administration (FCC) hasn't said that a
code test is not required.

"better move fast" -- hey, dummy, push the FCC and you will see how
slow "big government" will move. I can guarantee that....

The compliance was met when it was required by international regulation
(and it is still required by FCC regulations). According to your logic
then no license class has any HF privileges since we met the compliance
of an international regulation that no longer exists. So all license
classes that took a code test are now non-compliant, so looks like we
are all off HF until the FCC changes the rules.

The international requirement meant that all entities had to require a code test for HF privileges. Now the international requirement has been dropped, now each entity can decided for itself if it wants to require a code test for HF privileges, and until the FCC changes the rules, it is still required for U.S. hams. What is so hard to understand about that?

CW no longer retains favored status as a *testing requirement*.

>Don't believe that CW has had a long tradition of having favored
>status? Then reread the history of amateur radio. From being the
>mode favored by international treaty, to being the only mode that US
>hams were allowed to use on 40 meters until 1952, amateur radio
>history is full of examples of CW's most favored status.

You are once again mixing the apples with the oranges.

>Now, all of that has changed.
>

>At the moment, CW operators are "protected" from phone operators, but
>the reverse is not the case.

As noted previously, so are RTTY and other narrow band digital
modes, and it has *nothing* to do with the testing requirement
and everything to do with technical issues.

>With the deemphasis of CW, the old
>situation is clearly inequitable, because the old claim that
>"international agreements demand the band restrictions" is rapidly
>becoming false.

What "old claim" is that? I've never heard of any such claim,
and you are fabricating it just as you fabricated the above claim
that CW is "the mode favored by international treaty".

CW *testing* was required previously, and now is not. That is
all that has changed.

>There is a new reality quickly developing, and heated, emotional
>claims which attempt to preserve tradition for its own sake just
>aren't going to work.

A new reality quickly developing? Where have you been for the past
30 years as this slowly cooked?

>I'll bet my farm that THE BAND PLANS ARE GOING TO BE REEXAMINED over
>the next several years. Ignore the coming debate, and wind up having

Of course the band plans are going to be reexamined. That is a
continuous process that is *always* going on, and has been in
the past just as it will be in the future.

Technology changes. Jeeze, when I first got into ham radio everyone
was worried to death that we'd lose everything. That was the influence
of the WWII shutdown. But look what has been going on for the past
30 years now! Amateur Radio allocations in the HF region have been
expanded. (And now the pressure is on in the microwave regions, that
were once basically undesirable.)

>others decide your band allocations for you. Engage in the debate,
>and you just may stand a chance of making a difference.

Engage in debate! You are engaging in emotionalism. Start using
facts and figures instead of scare stories.

This reminds me of the time Marconi spanned the Atlantic. I remember
he told his assistant "I'm not going to wait until voice modulation
is invented, because I want to give morse code favored status".

Then twenty years later, when hams spanned the Atlantic with shortwaves,
they all said "let's not use that newfangled voice stuff, because
we want to give morse code a favored status". Obviously, Howard
Armstrong who we have to "blame" for all the receivers we use even
today, must have been part of that conspiracy to keep AM in it's place,
since he was part of one of the official transmitting sites for
the attempt.

Of course, there were all those hams in the early days who used
only morse code because they wanted to give it favored status.
It's a myth that they used it because a cw transmitter was simpler
and less expensive.

Let's not forgot OSCAR 1, launched in December of 1961. Those
guys obviously had it send morse code because they wanted to give
the mode favored status.

Phil from now on I will refer to you as Prince Jr.

Listen Prince Jr., I can discuss anything regarding US law and express my opinions. Just because you are ARRL lawyer trying to force morse code down the throats of the disabled and helped destroy Amateur radio by keeping it a elite club doesn't mean I shouldn't voice my opinion. I have never said I was a lawyer or even a wannabe lawyer, good god I bet you are proud of your pals that are going after ten year old children trading muppet songs on the Internet.
The reason disability recognition didn't change was because there was a international agreement that stopped the disabled who could not receive code from being exempt. Now that the international regulation has been changed to delete mandatory morse code proficiency the disabled should be provided a exemption promptly. (That is my opinion, is that OK Prince Jr?)
Is it ok if I express my opinion Prince Jr? Or are you like the morons sending me carbon copies of complaints they are sending to Hollingsworth AKA "Prince" for daring to tell the FCC and the ARRL they are bone heads that have destroyed Amateur radio for selfish reasons.
I mean I'm not the only person that thinks this about the ARRL, FCC and the morse code lunatics that have kept the ranks of ham radio so small it is ripe for the pickings by the commercial entities. The utilities will destroy HF with BPL and the rest of 50 Mhz and up bands that are worth billions of dollars will be sliced up in short order.
All this time I was praying the ARRL and FCC would come around and I was a sucker to be a ARRL member for all those years. Then when it is time to dump the code the crazed bunch of "morse code or death" bunch sneak one in the back door. Now the cocksuckers want to drag out the death of morse code requirements for years.
Who the hell was the ARRL board and staff saving the bands for? It certainly isn't for the average American citizen to become a ham radio operator. If you listen to ten meters it appears the truck drivers are now taking it over, so thank the ARRL and FCC for that.
Thanks for sharing Prince Jr. I hope it was OK for this ham radio operator of twenty years to express his opinion. Should I include a legal disclaimer on all my post from now on? I hope you will not report me to the Oregon Bar Association.

When was the last time you heard about amateur radio in your local newspaper
or on your local tv stations? When your local ham clubs have an event, be
it club meetings, Field Day, hamfest or something else that the public might
like to know about, do they bother to get listed in the local events columns,
and try to get mention on TV and radio, and even post to your local
newsgroups?

Or to put it another way, how did you find out about amateur radio?

When I was a kid, I learned about it when there was an article in
a publication intended for children. When I discovered hobby electronic
magazines, amateur radio was still a part of those magazines, though
it was right on the cusp of their disappearing. But when I could try
for a license, I had to dig around to find a local ham club, going to
the ARRL because I didn't know of any local clubs, and had no way of
finding them.

One of the failures of amateur radio is that it doesn't do a particularly
good job of outreach. Notice there is a big difference between trying
to sell something to fill seats, and trying to share something because
it's important to you and you want others to know about it.

Over the 31 years since I've been licensed, my impression is that
amateur radio has increasingly disappeared from public view. Yes,
there is the argument that ham radio has less and less relevance,
but that just means people need to work harder at conveying thei
importance of the hobby to themselves.

Meanwhile, the licensing requirements have become less and less.
About fifty years ago, you might say the halfway point of
amateur radio, your FCC introduced the then-novel novice license, to make
the entry requirements simpler. A simple test, a 5wpm code test, limited
operating priviliges, and only valid for a year. Over the years,
that was modified for less restrictive rules, and more priviliges.
The US Technician license came out at the same time, and originally
was only good for 220MHz and above. That too was modified tremendously
over the years. Then the code was dropped for the technician class.

Here in Canada, we had a no-code license a quarter century ago. But virtually nobody used it. Then in 1990, we got restructuring, and there was an entry level license that did not require a code test.

So over fifty years, half of the time that amateur radio has been around, it has become increasingly simpler for people to join the hobby in North America.

Yet, instead of doing a better job of outreach, the focus is always on making the license requirements simpler. Keep it up, and there will be absolutely no entry requirement.

You think we need numbers to justify the bands, so you want to lessen entry requirements. But that may be a false path. Maybe we justify the ham bands because it is something more than a place to yak it up.

Maybe the kids that use to come to ham radio aren't even hearing about the hobby in the first place. Maybe if they knew, it could be as appealing as it was to me when I was ten. Maybe like me, the code and theory tests are not impediments to joining the hobby, but a sense of accomplishment when they are passed. I was twelve, and went from 0 to 12wpm in four months, and I know I was always disappointed that I took the test (well, I had to go back a second month to pass the code test) in the last week of grade 6, because I was unable to boast to the kids at school.

Maybe the need or lack of a code test isn't an issue to many people, because they haven't heard of amateur radio in the first place.

Methinks you don't have a clue about the history of amateur radio. It didn't start when some regulatory body decided there should be a place for people to talk to their heart's delite. There were radio hobbyists almost as soon as Marconi spanned the Atlantic in 1901, when there were no rules and there wasn't even any use for radio. Those hobbyists played with this new thing, and in part helped to propel the field along. I'm not sure you could separate amateur from professional in those days. It was only once there started to be uses for radio that any rules were put in place. And amateur radio became a service in those early days by virtue of staking out a claim right from the start.

Dilute the entry requirements too much, and what do you have to justify the bands, other than large numbers?

But shift it back to where the test is not just an obstacle to overcome, and you may again make the hobby something that society in general benefits from.

Most of the assertions that a code test should be required are
based on the (illogical) premise that if an idiot (the poster)
can pass the test, anyone can and everyone should.

Keith works that one to death.

Well JJ, there you have it! He holds an Extra class license, almost surely of the Lite category, and thus is a prime example of the New Age codehating hams. If I had a case on the table I now rest it.

Yes, that works better but still there it doesn't tell you which station
broadcasts on which frequency, which would be very helpful.
I like the simplicity of the site. Very fast and easy to use.

Hmmm...

Please tell me
1. which theme you are using
2. what attributes you are looking for
3. what searches you would like to perform

... and if PublicGIS can do it, I'll tell you how.

One question: did you click on a waypoint to see its details? It shows
anything and everything related to the transmitter:
Step 1: enter search parameters and click "Find Waypoints" button.
Step 2: see list of waypoints.
Step 3: Use "Prev" and "Next" links to scroll through the waypoints found.
Step 4: click on a particular waypoint.
Step 5: See waypoint details (including frequency info)

If this is unclear, please advise and I will elaborate.

Case dismissed, with prejudice.

He's just another idiot, and a code test didn't keep him or you out
of ham radio, and is unnecessary (indeed ineffective) as a filter.

My only gripe with the code is the testing. It is stated as a 5 word per minute test. When I challenged the test a few weeks ago I found that it is actually anywhere from 13 to 18 words per minute, not 5 words per minute. The 5 words per minute is a lie....

Why not tell it like it is.... Those giving the test do not want to make it easy for anyone who has a learning disability or not. I have never been able to memorize anything easily when in school, and was accused of being from lazy to stupid. My father told me that I was ignorant because I was partly colorblind. I do not want sympathy, just after studying for almost a year to pass the 5 word per minute test for what it is suppose to be not what someone who is more proficient with the code wants it to be.....

If my General CSCE expires again (this will be #2) I will never take it again and will have lost desire in a hobby that I grew up working in for the last 39 years.......

Not trying to be a smart ass here...but...how do you know it was 13 if you say you can't copy 13???. Could it be he was sending the characters fast and making the spacing long. I.E. Farnsworth method, which is the recomended way to conduct a test?

If you want to quit. Thats your choice. I would suggest you go to a different test place with different folks instead.

The test is given at 5 words per minute. They use a faster character speed
but make the letters further apart. It is actually easier this way because
the brain has more time to react to the character before it has to go on to
the next one.

> Why not tell it like it is.... Those giving the test do not want to make

If you were memorizing the code, that was the problem. That's not the right
way to learn it. There's quite a bit of material out there on the internet
on the right way to learn code. For starters, work towards a reflex
reaction. i.e. Hear the sound, write the letter. Don't think about the
dots and dashes. Practice every day for 30 mintues per day EVERY day or
almost everyday. There are lots of computer programs out there you can
download from the internet and every person has their favorite. Set it for
an 18wpm character speed but 5wpm word speed. Try the G4FON program. It's
available for free on the internet. I apologize for not posting the website
but I don't happen to have it anymore.

Practicing once or twice a week won't get it. You fall too far backwards
between sessions. Memorizing dots and dashes and then trying to write the
letter slows you down so that you can't keep up.

Read "The Art and Skill of Radiotelegraphy". It's available for free on the
internet. The author did extensive research on how code should be studied.
The biggest problem is that too many people are told to use study methods
that hold a person back rather than move them forward. Another problem is
unrealistic expections. They see the whiz kids get it in a week and think
they should be able to do the same. They're the exception not the rule.

The code is far easier than most things that you have learned in life if you find the correct way to study it and put in the amount of time needed.

I agree with you 100%. The reason in my opinion is that the ARRL kept the morse code requirement for HF access and that kept a lot of my teenage friends out of ham radio way back in 1982 and through the present day.
Today kids now have instant voice communications via the Internet and cell phones and can even send pictures and text messages with their phones. Now that the Internet is here and advanced digital cellphone is in every middle class kids pocket technology has passed by ham radio.
Hams are the now the old technology brushed aside by technology advances. The ARRL just couldn't let code die and now it is too late. IMHO.

What you just described, about memorizing the code, happened to me. I started to try to learn the code at 12 years old. My mom bought me a record...yeah thats right A RECORD..hi. And I thought I was hot stuff...but when I actually tried to receive CW off the air, at a very slow rate. Listened in the Novice bands. I found I didn't know a thing.

A local ham told me I had memorized the record. And that is exactly what happened. He then gave me the ARRL license manual with the proper method and helped when he could.

I eventually RE-LEARNED Morse and got it right. I passed the Novice and in 3 months passed the 13WPM General in front of the FCC.

I am not solid at 40 or so.

So Dee's advice is right on target.

Dan/W4NTI

I asked why it seemed so fast. I was told by the VE that he gives all
code test at least 13 words per minute if not faster.....

I have sent out a couple of e-mails requesting imformation of how tests
are given ie, speed and if fonsworth method was used. I do not wnat to
know the test iteslf as that would defeat the purpose of the testing
session. I have yet to receive an answer from any VE...

All I ask for is to know what speed I need to be studying as it all
sounds different to me at each speed....

No I am not doing a memorizing of each dit and dah and converting
method. My problem is my brain does not react fast enough to decide what
each character is before the next one is sent. I just get further
behind. I practice at least 20 to 30 minutes usually twice a day if not
more. I use computer programs and ARRL training CDs.

I will check "The Art and Skill of Radiotelegraphy". Thanks for the
encouragement.

No I am well aware of that point. However, the FCCs implementation of requiring a code test is different for Techs than it is for Generals and Extras. Generals and Extras are required to pass Element 1, and Techs are not. Access for Techs to the Novice HF subbands is __not__ conditioned on passing Element 1, but only upon having "received credit for proficiency in telegraphy in accordance with the international requirements" (from rule 97.301(e)).

Given that s25.5 leaves it open for each administration to determine if a code test is required, with no mention of any specific frequencies, the only rule the FCC chooses to make for Tech HF access is 97.301(e), which in turn includes the words "in accordance with international requirements", i.e. in accordance with s25.5.

So, the FCC rule implies that a code test is required if s25.5 requires it, and s25.5 says that a code test is required if the administration (the FCC) requires it! This is a circular process, in fact one that could go around in ever decreasing circles! Each rule appears to be conditional upon the other! Obviously those who drafted the rules did not intend this, but the ITU rule has changed in a way that was not anticipated.

It would seem to me that if two rules each require that a specific condition must be met only if the other rule requires it, then in fact

that condition does not have to be met.

None of us could react fast enough at first. You are not alone. When you are copying and miss a letter, just skip it and catch the next one. If you let your mind focus on what you missed, you will then miss several others that come after. DON'T TRY TO GET THE MISSED LETTER AT THAT TIME. Just write an underscore and go on so that you don't miss following letters. This takes a little practice by the way as we all want to be perfect so we sit there and try to figure it out while falling further behind. If you get a lot of blanks at first, that's OK. Just keep working on it.

When you take the test, you are allowed time to go back over your paper and fill in what you think the missing material might be. Here is an example (using an underscore for characters that you miss on the copy).

What you originally copied: NAM_ IS JO_N.
Now if you look back over your copy, fill in what you believe the missing letters should be. In this case, the text sent was most likely: NAME IS JOHN.
Then on the test questions, you will probably be asked the name and there you have it right there on your paper.

When I took my extra code test (20wpm), I had a lot of underscores on my paper but despite that I was able to successfully answer the country question (it was Switzerland) even though I only had about half the letters copied on my sheet.

Don't email. TELEPHONE them. Ask them what is the character speed and what is the overall word speed. They can have the character speed at 13 (or faster), but the spacing must be adjusted to end up at 5wpm overall. It is not proper test procedure to have the test at an actual 13wpm when it is supposed to be 5wpm.

Talk to the VE team leader that you will eventually be testing under so that you do get the correct character speed for the test that you will be planning to take.

Finally try to find someone who is knowledgeable in correct training methods to "Elmer" you if at all possible.

Ahh, that training CD! I used it, and failed miserably at it. Turns out
I memorized the darn thing. You might try a program that sends out
random groups or even makes up QSO's.

Yes, but modified in a way that the FCC regulation that was directly dependent on it is affected. It's not the U.S.'s compliance that is in question. The FCC regulation made it a requirement that certain U.S. licenseholders must meet an international requirement that now does not exist; therefore, NO ONE can meet the requirement. That's the problem.

If it's OPTIONAL (on a country-by-country basis, but that doesn't matter; any
basis will do), then it's NOT A REQUIREMENT. One cannot comply with a
requirement that doesn't exist - and that's the problem.

> Until the FCC changes the rules concering Element 1, the
> requirement in the US remains that Element 1 must be passed.

But that's not the requirement. 47 CFR 97.301(e) made DIRECT REFERENCE to the international requirement, not to "element 1 credit." Certainly, there's no need to cite "element 1 credit" for the novice license!

If it had cited "element 1 credit" as the second requirement for technican licenseholders (novice licenseholders already have it by definition in .501), then I would agree that nothing had changed. But that's not how the FCC wrote .301(e) and you know it! ;-)

> The question of -when- and -how- the FCC Rules will be changed is a

> -are- changed. Ditto for how the FCC will handle the issue of
> giving -what- privileges to folks who hold a Technician license
> but have never passed the code test.

I don't believe that's the correct question. It's not a matter of no-code technicians now having HF privileges. It's a question of "coded techs" and Novices having their HF privileges STRIPPED on account of one of the two requirements now being untenable.

But until the FCC acts to remove such a reference, that doesn't mean that it's not operative in the meantime.

How does one comply with a requirement that doesn't exist?

But if it's an OPTION for each country, it's NOT an international REQUIREMENT.

Words have definitions. These terms are self-evident.

How does one show compliance with a REQUIREMENT that does not exist?

With most people having computers, learning CW should be so much easier
nowadays. Not like when I was ten, and bought a telegraph set so I
could learn Morse Code, not realizing that sending is not he same thing
as receiving.

One of the things I've wondered about is whether one could get used
to the sounds of the letters subconciously via a program that
sends the morse letter everytime you press a key on your keyboard.
You wouldn't really being paying attention, but it would be a positive
reinforcement of what sounds go with what letters. I'm not sure
it would be a completely painless method, but it would either help
get someone used to the sounds, or reinforce the learning already done.

But I'm not sure anyone has cooked up such a program.

At the very least, with people spending so much time at their
computers, I'd suggest running a CW practice program, sending
random letters, while you do something else at your computer.
Set the volume relatively low, and don't even bother trying to
copy it; just use it to get used to the sounds.

I suspect some of the problem some people have is that they are
trying way too hard. They see the code as an obstacle, and are
fighting it all the way. "Now I'm going to do my hour of code
practice". In the old days, that would mean going to a code
practice course, or buying one of those records (I had one to

start, and I think it did help), or listening to a receiver
where the code might not be optimal or under the best conditions.
You sit there with your pen and paper, and struggle to get it
all right. But moving it into the background makes it less important,
and perhaps by simply getting used to the sounds before struggling
to get it all, it might all come easier.

I've taken exactly the opposite approach: IF there is no international requirement (it's now OPTIONAL), then how can one show compliance with a requirement that itself no longer exists? My answer is that one CANNOT be in compliance with a non-existant requirement, and thus HF privileges defined in .301(e) have been STRIPPED effective July 5, 2003 from those who previously held them, not granted to those who didn't have them.

> Granted that s25.5 as revised allows each administration to determine

> the FCC chooses to require a code test for that particular purpose.

Having a choice (regardless of whom holds the choice) means that it is an OPTION, and options aren't requirements. A requirement means that there is no choice; no option. These are OPPOSITES.

> To cut a long story short, the argument rests upon whether "in accordance
> with international requirements" is a necessary condition in the sentence.
> If it is, then no-code Techs have the Novice HF frequencies*, and if not,
> then they will have to wait. This is really what I am seeking comment on,
> although all other observations are welcome.

What novice HF bands? Novice licenseholders are likewise affected despite the fact that their licenses DO include element 1 credit, because that credit has no bearing on the ability to use those bands. If element 1 were an important fact, then 47 CFR 97.301(e) would have been written that way instead of making reference to the "international requirement" [that no longer exists.]

> *(Although possibly not until after ratification of the new treaty)

Ratification won't make a difference here. Rejection of the treaty might!

Receive credit for what? A requirement that no longer exists?

How does one demonstrate compliance with a non-existent requirement?
```

I'm not confusing anyone. Read 47 CFR 97.301(e) for yourself and tell me where
it refers to element 1 credit....

Even if techs HAVE PASSED element 1 credit, they no longer possess HF
privileges.

Which means that NO ONE can be compliant with meeting the now non-existent
regulation, and therefore, no technician or novice licensee has any operating
privilege below 30MHz.

For the "brain tumor for breakfast" club:

A choice or option is NOT a requirement.

The WRC-03 attendees may have changed S25.5 - and changed it from a requirement to an option, but that also means that they REMOVED the requirement; i.e. there is NO requirement. It doesn't matter what they put in its place since the FCC regulation dependent on it is dependent on the requirement that no longer exists.

Wrong. What it means is that there is a requirement in the FCC regulation that
NO LICENSEE CAN MEET.

The international change does not mean that no-code technicians can use those HF frequency ranges. It does mean that coded-technicians and novices can NO LONGER use them - because none of them can show compliance with a requirement that no longer exists.

> The reason that 97.301(e) was written that way is because the government

It does not mean that at all. It is another perfect example of FCC regulation-writer shortsightedness, just like happened with the April 2000 changes.

I agree with the above as to what 47 CFR 97.301(e) says.

I disagree that what is left means that any Technician or Novice has any HF privilege at all. The FCC rule still says that these licensees must show compliance with a non-existent regulation. Since they CANNOT COMPLY with a non-existent [international] regulation, they LACK the privilege.

> The reason 97.301(e) was written that way is because the FCC expected the
> s25.5 reference to be deleted, but it was changed. The fact that it was

I disagree. There is a [U.S.] requirement for these licenseholders to meet the international requirement. Show me how they can do this if the international requirement doesn't exist.... It's impossible for them to demonstrate compliance, and therefore, they cannot meet all of the U.S. requirements (one of which is to meet the non-existent international requirement), and thus have no such privilege.

> It doesn't mean a tech can get on 20 meters, it should mean he can operate on

What you think it should mean and what it does mean are as clear as night and day.

S25.5 no longer REQUIRES anything. So how can one show that one has met the
requirement? That's impossible.

> Don't you see the ARRL is trying to pull a fast one? Read 97.301(e) like you

Not totally correct. The FCC doesn't have information on techs who passed
element 1 after April 15, 2000.

However, what does having passed element 1 for technicians have to do with the
.301(e) privileges? I see no such requirement.

You did fine up to here. I fully agree.

> So, the FCC rule implies that a code test is required if s25.5 requires
> it, and s25.5 says that a code test is required if the administration (the

> upon the other! Obviously those who drafted the rules did not intend this,
> but the ITU rule has changed in a way that was not anticipated.

If a government can choose NOT to require something, then it is not an international requirement but an option. The FCC regulation is dependent on an international requirement that no longer exists, so how can anyone show compliance with it?

They can't. What this was was a way for the FCC to get rid of the "technician" HF privileges and make the novice license so useless that the latter will either upgrade or die. They dont' have to worry about the "tech plus" class anymore - there isn't one! 47 CFR 97.21(e) [or whatever it is] that designates renewals of technician plus licensees as technician demonstrates the FCC's real intent on this issue.

> It would seem to me that if two rules each require that a specific
> condition must be met only if the other rule requires it, then in fact
> that condition does not have to be met.

I disagree to as what it says.

I state that what the FCC wrote is that the licensee is to meet a requirement that is now impossible to meet because it no longer exists.

Better me as "Prince Jr." than you as "The Little King" or are you
too young to remember that comic strip ?

Call me anything that you want but don't call me late for dinner or
a juicy pile-up on 20m.

> Listen Prince Jr., I can discuss anything regarding US law and express my
>opinions.

And if you do it often enough even more people will realize that
you are off-base.

>Just because you are ARRL lawyer

Even though I am an ARRL Life Member I do not work for them other
than to volunteer my service - for free - to advise ARRL members in
what the law is and how it applies to them, just like I did at the
County Free Legal Clinic several years ago. I am, in fact, the
engineering manager and regulatory counsel of one of the largest
communications consulting engineering firms in the country,
specializing in public safety clients.

>trying to force morse code down the
>throats of the disabled and helped destroy Amateur radio by keeping it
>a elite club doesn't mean I shouldn't voice my opinion.

A real bozo you are. Did you read my filing with the FCC in the
Restructuring Docket where I came out clearly in favor of dropping
all code testing requirements as soon as possible? And I haven't
changed my mind since then, either.

Wanna talk "disabled", bozo? I am disabled, both of my brothers are
disabled, mu wife is disabled, and my son is disabled. All of us
are respected professionals in highly technical fields, three of us
are hams and none of us has ever asked for one iota of "special
treatment" along the way. e all feel that it is immoral and

downright obscene to use our disabilities as a weapon,

Where do you come off spouting about "the disabled" ??

>I have never said I was a lawyer or even a wannabe lawyer.

Then why are you spouting off as if you were one?

>good god I bet you are proud of your pals that
>are going after ten year old children trading muppet songs on the Internet.

Don't get me started on that. Among other things, my wife lives off
of copyright royalties from stuff she creates and gets published....

>The reason disability recognition didn't change was because there was a
>international agreement that stopped the disabled who could not receive code
>from being exempt.

The reason that disability recognition didn't change was that the
FCC showed that it was making the accommodations required by the ADA.

>Now that the international regulation has been changed to
>delete mandatory morse code proficiency the disabled should be provided a
>exemption promptly. (That is my opinion,

I feel that the FCC should delete all code test requirements for
-everybody- promptly. I've said it before, several times, right here
on your screen, and I'll say it again. Did you not pay attention?

> Is it ok if I express my opinion Prince Jr? Or are you like the
>morons sending me carbon copies of complaints they are sending to
>Hollingsworth AKA "Prince" for daring to tell the FCC and the ARRL
>they are bone heads that have destroyed Amateur radio for selfish
>reasons.

Calm down, take your meds, and sleep it off.

> Thanks for sharing Prince Jr. I hope it was OK for this ham radio
>operator of twenty years

Do you have twenty years of experience or one year's experience
twenty times? You don't have ten minutes' worth of insight,
though.

>to express his opinion. Should I include a legal disclaimer on all my
>post from now on?

What legal disclaimer - you are not a lawyer. Don't flatter
yourself.

>I hope you will not report me to the Oregon Bar Association.

How about the Oregon Mental Health Association ?

Well then, you should know that 5 WPM isn't that difficult to learn... And I
TOO have a 20 WPM Extra. I have NO problem with the FCC keeping the 5 WPM
code element.

I've seen some situations in my life time where code was able to be used
aside from radio. Not a bad idea to keep it in tact at LEAST at 5 WPM.

You have posted this in lots of places, so I will reply only once. The
international requirement is that code testing is optional, hence it can
be met either with or without passing a code test, i.e. veryone meets it
all the time.

My bigget problem was missing a letter, and getting hung up on it. By
then 3 or 4 more letters would go by, and then the real frustration
would set in. It ended up that I needed to just relax and let the
mistakes roll by. Then the mistakes went away.

> it is actually anywhere from 13 to 18 words per minute, not 5 words per
> minute. The 5 words per minute is a lie....

You are correct, sir.

The exam administered by the various VEC's is called Farnsworth. If
you look at Part 97, you will see that it specifies Morse. Farnsworth
is mentioned nowhere in Part 97. Furthermore, the specification of
Morse Code is defined nowhere in Part 97, nor in all of Title 47. We
on RRAP have been down this road before.

Basically, if you are a Pro-Code Test Agenda type, you agree to allow
the VEC's to break the law, even encourage it because the examinee may
eventually want to actually use Code at a higher speed.

But if you can read, you see that Morse is specified, not Farnsworth.

If you happen to know enough about all this to ask for the real Morse
Exam at a test session, then the VE must accomodate you. But the
aren't likely to mention it unless you do. If you've been studying
the Morse training tapes, you are likely to fail the Farnsworth exam.

Farnsworth is fairly well agreed to be the better METHOD to learning
faster code. By the time one gets to about 20WPM, there is supposed
to be no difference between Farnsworth and Morse, but with the various
code tutor programs, anything is possible.

Anyway, the VEC's are administering a code exam not specified in Part
97.

Hopefully it will all be over with soon.

Good luck, Brian

>
> Dan/W4NTI

Dan, he probably finished failing the exam again and said to one of
the VE's, "Sheesh, that code seemed awfully fast." Whereas the VE
replied, "Sure, we're sending it at 13-18wpm with long spaces in
between. It all evens out in the end. By the way, we are denying you
access to HF."

That's what happens to people who study Morse Code tapes at 5wpm then
take the Farnsworth exam.

If they don't have a high level understanding of all of this, then
they are just as likely to get a hold of real Morse study material as
opposed to Farnsworth study material.

Just killfile the kiddies.. no big deal. I automatically killfile
anyone who posts anything off-topic. Really keeps the "signal to
noise" ratio down.

Welcome to my killfile.

968. HTX-242 TX lockup

Newsgroup: rec.radio.amateur.misc
Date: 2003-07-29 15:31:28 UTC
From: drewt@loritsu.com
Message-ID: <880111a3.0307290731.388c4226@posting.google.com>
Source record: 64638
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I have an HTX-242 2m VHF mobile that was in the proximity of equipment that was struck by lightning. I didn't notice any evidence that lightning had struck the 242's antenna, but my HF rig had definately been struck. The power supply that powered the 242 was destroyed.

Now the 242 is locked in transmit mode. Turning it off and on doesen't help, and using the reset as described in the manual does nothing, the keypad is locked out. Is there anything internal that can be done? It's probably fried but I figured I would at least try.

I would ask RadioShack but they would probably commit it for service and trying to get them to be technically verbose is like asking a cat to read poetry. Is there any fix for this under the price of the radio ($80)? If not I'll just get a Yaesu or Icom.

I have solved the mystery.
I was using older Netscape 4.7 and it didn't display frequencies. Now I'm
using Opera 7.11 and it works. I guess just more recent browser is needed.
It's a great site.

If they don't pay any more attention than you, that is likely. And a part of the learning process that you have always missed.

Lightning strikes do not always cause damage predictably or visibly.

Many useful documents are available through the RS website, including
some schematics. Use their search engine with variations on the model
number, both "HTX-242" and "HTX242".

You might as well pop the cover and try to fix it yourself. You can't
make it work less, and even if you cannot fix it, you will at least
learn something.

There is a fair chance that the failure of the PS "protected" the
power side of the radio circuit, but it still could have caught a jolt
through the antenna side. Still first thing right away would be to
check the internal voltages on the board against spec.

The RCV/XMIT relay would be one of the first components to check.

Happy trails,
Gary (net.yogi.bear)
